

of current UAS. The Universal Distributed Management System (UDMS) is a demo proven (TRL-6) autonomous command and control system that will enable up to twelve UAVs to operate simultaneously from a single ground station and perform complex tactical objectives. The upgrade of existing and future US Government UAVs with a Cooperative Engagement capability will significantly reduce the manning required to operate current UAV systems which will lower costs while increasing mission effectiveness.

Legal Name of Requesting Entity: Volvo Powertrain of North America

Address of Requesting Entity: 13302 Pennsylvania Avenue, Hagerstown, MD 21742

Description of Request: Authorized \$3.0 million for research and development of Hybrid electric Heavy Truck Vehicle. The program's goal is to provide the military with a more fuel efficient, cleaner and more easily maintained heavy truck power train. A secondary goal is to build a truck engine that can provide the same electrical source as a traditional diesel generator. Combining these two capabilities in one engine will reduce deployed forces requirement for fossil fuels and reduce the need for inefficient, noisy diesel generators. Requested funds will be used to complete the final development stage prior to production. This final year of funding will enable Mack Trucks and Volvo Power train to finish building a prototype M915 truck with hybrid power train, and be prepared to compete for a M915 by the Army. It will reduce the logistics footprint of deployed forces by requiring less fuel in theater. It will also eliminate the need for noisy, diesel generators that can divulge the location of friendly forces. It will also provide a more easily maintained powertrain.

Legal Name of Requesting Entity: Zeltex Inc.

Address of Requesting Entity: 130 Western Maryland Parkway, Hagerstown, MD 21740

Description of Request: Authorized \$2.0 million for research and development of the Remote Fuel Assessment System. The military has critical operational requirements for a field capability to rapidly assess cached and secured fuel supplies at key distribution nodes without extensive logistic support. Zeltex, Inc. proposes to develop and demonstrate a Remote Fuel Assessment System (RFAS) for rapid fuel quality assessment. It will assess representative fuel content and contamination properties such as particulates, moisture, density, total oxygen content, benzene, olefins, aromatics, octane and cetane index to identify the class of fuel. Embedded wireless communication and control capability in the RFAS will ensure seamless operation with tactical information networks (Sense and Respond Logistics).

Legal Name of Requesting Entity: Fort Detrick Garrison Commander

Address of Requesting Entity: 810 Schreider Street, Ft. Detrick, Maryland 21702-5000

Description of Request: Authorized \$7.4 million for Community Activities Center at Fort Detrick Army Base. This project is required to support installation business operations, planning, and interagency integration as well as

community activities to replace a rapidly deteriorating and unsafe WWII era building for the growing customer population at Fort Detrick, Maryland. This project will provide a modern, sustainable and safe facility that will greatly enhance communications and customer services by providing a facility that can support a variety of demands. All potential alternatives were examined in the development of this project and none were found to be feasible. Currently, the CAC temporary building is at the end of it's useful life and is requiring frequent expensive stop-gap repairs in order to avoid condemnation by the Fire Marshall or closure by the Installation Safety Officer. The building is unsafe, energy inefficient, environmentally unfriendly, unattractive, and incapable of housing services and activities that are vital, self-fulfilling in maintaining morale, esprit, and the quality of life. This new center will respond to the increase in requirements created by the National Interagency Biodefense Campus (NIBC), BRAC-95, BRAC-05, Army Transformation, Wounded Warrior and Suicide Prevention Programs, and the Army's goal of improving the quality of life for soldiers and their families by offering opportunities for self-fulfillment, social activity and leisure-time enjoyment.
