

Her reminiscences rarely come without a few tears, but maybe it's for the best.

"When I'm crying, really it's good for me," she said.

The only child of a butcher in Pecs, Hungary, Mrs. Rona wanted to be an art teacher, but those plans were scuttled when the Germans invaded. Her family was relocated from its large house, and at one point they were living in a stable. Later they were among those taken to Auschwitz, 80 people squeezed into each rail car.

Mrs. Rona was 23—tough, young, and strong—but also naive. All she brought was a change of clothes and a bottle of cologne, which she used to wash her mother when she fainted. Mrs. Rona still regrets that she never traded the latter for water despite her mother's pleas.

"I feel guilty," she said. "I cannot forgive myself."

It was night when they arrived and they were divided into two lines. Her mother and aunt went to the left—"straight to the gas," Mrs. Rona said. Her father was transferred to another concentration camp and later died.

Mrs. Rona divided her time between several camps and remembers it as a dazed experience.

"You think about food, but nothing else. You become like an animal," she said. "One spoon of soup means one day's survival."

"There was electric wire. Some people ran into it because they couldn't take it and they got killed," she continued.

Mrs. Rona, who found out after the war that she could not bear children, is certain that it is the result of her treatment during the war. None of the women in the camp menstruated, she said.

When one woman gave birth to a child in the camp, Mrs. Rona said she was forced to be present as it was put in a toilet by fellow prisoners. Otherwise, both the mother and baby would have been executed, she said.

When the camp was evacuated in April, 1945, as the end of the war approached, Mrs. Rona said she was in no shape for walking. Desperate, she and another woman hid in the rain under some bushes and simply waited for the group to head off before dawn.

When she finally made her way to safety in Prague, Mrs. Rona estimates that she weighed about 50 pounds. She went back home hoping to find her father, but he was gone forever—along with more than 50 other family members. Only three cousins survived.

"I was so angry," she said. "Still the anger, it's burned me."

Even as she left for Palestine and made her way to Toledo, where she worked with children at the Jewish Community Center of Greater Toledo, that anger never left.

How could it when there were mass killings in the former Yugoslavia? Rwanda? Darfur?

"I thought after, when we got freed, the world will be so beautiful. They'll learn," she said. "They didn't because it's repeating the same things somewhere else in a different way."

And yet.

Mrs. Rona still speaks, making public her private hell. She does this because 65 years after the Holocaust she still has something that can offset the pain:

Hope.

DO NOT CANCEL AMERICA'S MANNED SPACE PROGRAM

(Mr. CULBERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CULBERSON. Mr. Speaker, the Democrat Congress and this President have presided over the biggest spending increases in American history, created more debt than any Congress in the history of the United States, and passed unprecedented tax increases, so it's not credible to claim they're cutting taxes.

And there's near unanimous opposition in this Congress to the President's proposal to cancel America's manned space program. What the President's proposing would be like privatizing the United States Navy.

Imagine if America had to call up a private contractor and ask if we could rent the aircraft carrier *Harry Truman* to go to the Red Sea for a week. That's what the President's proposing on the manned space program. That's why there's unanimous opposition.

And, Mr. Speaker, 27 astronauts and NASA leaders have joined together in a magnificent letter they published in the Orlando Sentinel on Sunday, that strongly urges the Congress to drop this misguided proposal that forces NASA out of human space operations for the foreseeable future. They said, Canceling NASA's human space operations, after 50 years of unparalleled achievement, makes America mediocre and will eliminate our leadership in space.

[From the Orlando Sentinel, Apr. 11, 2010]

DEAR PRESIDENT OBAMA: America is faced with the near-simultaneous ending of the Shuttle program and your recent budget proposal to cancel the Constellation program. This is wrong for our country for many reasons. We are very concerned about America ceding its hard earned global leadership in space technology to other nations. We are stunned that, in a time of economic crisis, this move will force as many as 30,000 irreplaceable engineers and managers out of the space industry. We see our human exploration program, one of the most inspirational tools to promote science, technology, engineering and math to our young people, being reduced to mediocrity. NASA's human space program has inspired awe and wonder in all ages by pursuing the American tradition of exploring the unknown.

We strongly urge you to drop this misguided proposal that forces NASA out of human space operations for the foreseeable future.

For those of us who have accepted the risk and dedicated a portion of our lives to the exploration of outer space, this is a terrible decision. Our experiences were made possible by the efforts of thousands who were similarly dedicated to the exploration of the last frontier. Success in this great national adventure was predicated on well defined programs, an unwavering national commitment, and an ambitious challenge. We understand there are risks involved in human space flight, but they are calculated risks for worthy goals, whose benefits greatly exceed those risks.

America's greatness lies in her people: she will always have men and women willing to ride rockets into the heavens. America's challenge is to match their bravery and acceptance of risk with specific plans and goals worthy of their commitment. NASA must continue at the frontiers of human space exploration in order to develop the technology and set the standards of excellence that will enable commercial space ventures to eventu-

ally succeed. Canceling NASA's human space operations, after 50 years of unparalleled achievement, makes that objective impossible.

One of the greatest fears of any generation is not leaving things better for the young people of the next. In the area of human space flight, we are about to realize that fear; your NASA budget proposal raises more questions about our future in space than it answers.

Too many men and women have worked too hard and sacrificed too much to achieve America's preeminence in space, only to see that effort needlessly thrown away. We urge you to demonstrate the vision and determination necessary to keep our nation at the forefront of human space exploration with ambitious goals and the proper resources to see them through. This is not the time to abandon the promise of the space frontier for a lack of will or an unwillingness to pay the price.

Sincerely, in hopes of continued American leadership in human space exploration.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. LUJÁN). Under the Speaker's announced policy of January 6, 2009, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

(Mr. POE of Texas addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

RECOGNIZING THE JAY I. KISLAK COLLECTION AND LECTURE SERIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Ms. ROS-LEHTINEN) is recognized for 5 minutes.

Ms. ROS-LEHTINEN. Mr. Speaker, I rise tonight to acknowledge the contributions of a humanitarian and philanthropist from my area of South
