

questionable pharmacy billing practices could thwart efforts that have been made to incentivize generics. HHS OIG, GAO, and others have identified important program controls in the Part D program that could be improved.

While the report deals only with those levers in the Part D program that can be adjusted to incentivize the less-costly drug option where appropriate, it is undeniable that recent reports indicate certain situations where the price of a selected generic drug dramatically increases. This trend—and the factors that contribute to this disturbing trend—must be better understood. Generics have been critical to overall fiscal sustainability of the health care system, and we must understand and address volatility that results in inexplicable price spikes for patients and taxpayers. I believe this is a hugely complex and recent phenomenon but one that must be studied further. That is why today, in addition to releasing this important and timely report, I intend to request an investigation by the GAO into those factors that underlie the recent price increases of certain generic drugs.

It is my hope that these actions, taken together, are efforts that both sides can agree to and will inform us on the best way to move forward to achieve the maximum drug savings possible and provide better, more affordable care for our seniors in coming years.
