

generation students, adult learners, and veterans. From providing transition services for homeless youth, to promoting single parents' education programs and mental health services for veterans, there are no bounds to the McClure family's encouragement of life-long success.

Institutions such as the Vermont State Colleges, the American Red Cross of Vermont, the Vermont Department of Libraries, the Vermont Vet to Vet Program, and hundreds more have expanded innovative learning programs as a result of the foundation. From cancer patients to legislators, the foundation has touched countless lives, while inspiring those to follow their dreams.

The foundation has also been instrumental in supporting historical preservation projects at the Leahy Center for Lake Champlain and the Lake Champlain Maritime Museum. The McClures' vision to inspire a lifelong cultural and historical education for all Vermonters, meanwhile maintaining a commitment to environmental sustainability, has enhanced multiple facets of our State's diverse landscape for generations to come.

As someone who has met many leaders and legends within public service, I am continually humbled by the McClure family's boundless charity and true dedication to supporting the common good.

Marcelle and I are proud to call Lois our dear friend, and we were blessed and honored to know Mac. We are forever proud of the McClures' undying commitment to Vermonters, and we are thrilled to congratulate the foundation on 20 wonderful years of extraordinary and selfless service.

#### NATIONAL MENTAL HEALTH AWARENESS MONTH

Mr. CARDIN. Mr. President, I ask my colleagues to join me in recognizing May as National Mental Health Awareness Month. Sadly, mental health is a subject that often does not receive the attention it deserves in our society, despite the fact that mental illness touches the lives of tens of millions of Americans each year. Nearly 50 percent of American adults will develop at least one mental illness in their lifetimes, and in a given year, one in four American adults, more than 60 million people, experiences some form of mental illness. Of that number, approximately 5.8 percent suffer from a serious mental disorder like schizophrenia, bipolar disorder, or major depression.

Mental illness can have a devastating impact on an individual's overall health and quality of life. Those suffering from serious mental illnesses are not only at increased risk for chronic medical conditions, but they also die, on average, 25 years earlier than other Americans, due in large part to treatable medical conditions. Adults with severe mental disorders are also much more likely to be impoverished, further

limiting their access to health care services needed to help manage their illnesses. A 2012 study published in the *Journal of Mental Health Policy and Economics* found that the presence of a household member with a severe mental illness was shown to increase the likelihood of poverty in a home by more than three times.

Mental illness also has a significant impact on our country's economy. According to the CDC, the economic cost of mental illness in the United States was a staggering \$300 billion in 2002.

The good news is that high-quality, evidence-based treatment for mental illnesses can be very effective. However, fewer than half of those in need receive any mental health care in the United States. This is simply unacceptable. Stigma, cost, and other barriers, such as limited capacity in some areas to serve all those in need, prevent many individuals from receiving necessary mental health care. It is imperative that we act to improve access to high-quality, evidence-based mental health care services in our country.

Several weeks ago, I had the opportunity to attend the ribbon-cutting ceremony for the Mosaic Integrated Healthcare Center, a state-of-the-art facility in Baltimore that will provide essential mental health services, substance abuse treatment, and primary care services to the community. Mosaic Community Services is the largest community-based behavioral health service provider in Maryland, serving thousands of children, adolescents, and adults annually. The new Integrated Healthcare Center will allow full implementation of Mosaic's integrated care model, which addresses patients' physical and behavioral health needs in a comprehensive, coordinated, and cost-saving manner. A pilot program based on this model, supported by a 2010 grant from Maryland's Community Health Resources Commission, resulted in an impressive 78 percent reduction in emergency room visits and urgent inpatient care. Mosaic's innovative system is a perfect example of the ways in which integrated care can improve quality of care, result in better health outcomes, and help generate long-term cost savings.

I am also excited to be working on an initiative to improve access to, and quality of, mental health care in our country by facilitating the integration of mental health care services into the primary care setting through the collaborative care model, developed by the late Dr. Wayne Katon, at the AIMS Center at the University of Washington.

In the collaborative care model, primary care providers treat patients with common mental health disorders, such as depression or anxiety, with help from a care manager and a psychiatrist who acts a consultant, reviewing patients' progress, making treatment recommendations and sharing his or her expertise with the primary care provider and care manager.

The collaborative care model not only improves patient care experiences and outcomes, it has also been shown to reduce overall health care costs. One large trial, which focused on depression care in primary care clinics in five States, found substantial reductions in overall health costs, with an overall rate of return on investment of \$6 in health care costs saved for each \$1 spent on depression care.

Mental illness affects the lives of so many Americans. This May, in honor of National Mental Health Awareness Month, let us commit to working together to improve mental health care in our country by building on the success of integrated care models like the collaborative care model and the innovative system at Mosaic's Integrated Health Center.

#### TRIBUTE TO LARRY ARFT

Ms. BALDWIN. Mr. President, I wish to recognize and salute Larry Arft, the city manager for Beloit, WI, on the occasion of his retirement. It has been my pleasure to work closely with Larry since he started in this role in 2003. Throughout that time, he has been a tireless and effective leader of the community. He has been a model public servant, and his talent and passion will be missed by all who have worked with him.

A Missouri native, Larry served in the U.S. Army in Vietnam. Following his military service, he graduated magna cum laude from the University of Missouri—St. Louis. It was there that his interest in local government was sparked by an internship with a St. Louis-area municipality. Since then, Larry has served with distinction in multiple communities in three States for more than 40 years.

As Beloit city manager, Larry Arft has been the driving force behind extensive economic development. During his tenure, Beloit has experienced strong and sustained revitalization of its downtown, in the Gateway Business Park, and along its riverfront. He has always been an enthusiastic partner with the business community, and Larry proved that Beloit was—and continues to be—a good place to do business. He also engaged other government leaders in the area, around the State, and in the Federal Government. He set an example of how things should be done and how people could come together to address challenges.

I had the privilege of working closely with him in efforts to secure Federal funding for the construction and improvement of local roads and bridges, allowing for safer and more rapid transport and economic development. In addition, I had the pleasure of working with him as he led efforts to create good jobs and attract visitors to the area through the development of a Beloit casino.

Larry's work extended well beyond the city limits. He actively engaged other communities in the region and

served as the president of the Wisconsin League of Municipalities, advocating for issues important to cities and villages.

I am grateful for Larry Arft's contributions to the people of Beloit and to the people of Wisconsin, and I thank him for his service. I know his presence and personal commitment will be missed. I wish him and his wife Karen all the best in the years ahead.

#### ADDITIONAL STATEMENTS

##### NATIONAL SEERSUCKER DAY

• Mr. CASSIDY. Mr. President, today I rise in appreciation of seersucker manufacturers and enthusiasts across the country. I extend a Happy Seersucker Day. This uniquely American fashion has a storied history dating back to 1909. Louisiana is proud to have played an important part in introducing the country to seersucker apparel. The first seersucker suit was designed by Joseph Haspel at his Broad Street facility in New Orleans, LA.

This lightweight cotton fabric, known for its signature pucker has been enjoyed by Americans from all walks of life during our hot summer months. Mr. Haspel said it best, "hot is hot, no matter what you do for a living." In the 1990s, Seersucker Day was established by members of this chamber to honor this unique American fashion. I proudly resumed this tradition last year in the U.S. House of Representatives by designating Wednesday, June 11 as National Seersucker Day. I wish to continue this tradition in U.S. Senate by designating Thursday, June 11 as National Seersucker Day once again. I encourage everyone to wear seersucker on this day to commemorate this iconic American clothing.●

##### RECOGNIZING THE OPENING OF THE UCI-FRED HUTCH CANCER CENTRE

• Mrs. MURRAY. Mr. President, today I want to congratulate the Fred Hutchinson Cancer Research Center and the Uganda Cancer Institute for officially opening the UCI-Fred Hutch Cancer Centre in Kampala, the first comprehensive cancer center jointly constructed by U.S. and African cancer institutions in Sub-Saharan Africa.

The 25,000-square-foot regional cancer center is a state-of-the-art-facility that can treat up to 20,000 patients a year and includes an adult and pediatric outpatient clinic, a specimen repository, training center, conference rooms, and a pharmacy.

Uganda has a substantial cancer burden, and 6 out of 10 of the most common cancers there are caused by infectious diseases. To address this unique health need, Uganda has invested in cancer research, training, and clinical care. The UCI-Fred Hutch Cancer Centre will significantly increase patient

access to cancer diagnosis and treatment while furthering study of cancers in Uganda, particularly those that are infection related.

This alliance brings together two international leaders in the field of oncology care, training, and research and is ideally positioned to provide American and Ugandan physician scientists with indepth training in the treatment of infection-related malignancies in both the United States and Sub-Saharan Africa.

The relationship between Fred Hutch and the UCI dates back to 2004, and the UCI/Hutchinson Center Cancer Alliance was formally established in 2008. The program was formed to support the development of a strong biomedical infrastructure in Uganda that would contribute to the prevention, early detection, diagnosis, and treatment of cancer and related health concerns.

In 2008, Uganda had just one oncologist who treated more than 10,000 patients a year. In response, Fred Hutch spearheaded an extensive medical training program that has trained more than 300 Ugandans and Americans to date in the treatment of infection-related cancers, including physicians, nurses, laboratory technicians, pharmacists, data specialists, and experts in regulatory affairs and fiscal management. Today, the number of practicing oncologists in Uganda has increased twelvefold.

The UCI-Fred Hutch Cancer Centre is funded in part by two grants for which I was proud to advocate totaling \$1.4 million from the U.S. Agency for International Development (through the American Schools and Hospitals Abroad Program), as well as an \$8.6 million investment from Fred Hutch. The Ugandan Government has supported the collaboration through donations of land, provision of funding for personnel and equipment, and technical support.

I am proud to work with Fred Hutch in their effort to bring cutting-edge cancer care to patients and families all around the globe. This joint venture with UCI has the potential to drastically improve the lives of many people, both in Uganda and worldwide. I am proud that my State of Washington is home to Fred Hutch, and I applaud them and the Uganda Cancer Institute for their cross-national effort to effect this critical change.●

##### LEONARD SCHOOL OF MUSIC 70TH ANNIVERSARY

• Mr. SCOTT. Mr. President, I would like to congratulate and honor the Leonard School of Music in North Charleston, SC, for their 70th anniversary. In 1945, the Leonard School of Music was founded by Mr. Patrick Leonard, who became a Charlestonian early in his life. He was a trombonist for the prestigious Armco Band and the Circus Corporation of America. After traveling to Charleston with the circus, he fell in love with the city and ul-

timately started the Leonard School of Music. Mr. Patrick Leonard eventually retired from his leadership role at the school and passed it on to his son, Dan Leonard.

Mr. Dan Leonard is a recognized expert in the field of music education. His work has received State, national, and international acclaim. He has taught and directed bands of all levels: elementary, junior high, high school, and college. Many of Mr. Leonard's students are accomplished musicians and teachers. His specialized rhythm approach has inspired Leonard School instructors' teaching strategies.

The Leonard School of Music became a nonprofit organization in 2010. The school's mission is to provide solid music education for all Lowcountry youth regardless of race, creed, or financial standing. On May 23, 2015, the Leonard School of Music will celebrate 70 years of music excellence. I applaud Patrick and Dan Leonard for their expertise in music education, and therefore recognize the Leonard School of Music's accomplishment.●

##### REMEMBERING SID McDONALD

• Mr. SHELBY. Mr. President, today I wish to honor the life of Sid McDonald of Arab, AL, who passed away on May 15, 2015. He will be remembered as a skilled businessman who was committed to bettering his community and State through public service.

Sid was born in Springfield, AL. He earned a degree from the School of Commerce and Business at the University of Alabama in 1961. However, his time at the University of Alabama goes well beyond his days as a student. He was a member of the University of Alabama board of trustees from 1992 to 2008, and served as the pro tempore of the board from 1999 to 2002.

Sid began his career in public service when he was named to the Alabama Commission on Higher Education in 1970, the year that it was created. He had a passion for education and was instrumental in establishing the Arab City School system where he became the first board chairman. Sid served the people of Marshall County in the Alabama House of Representatives for two terms and also served in the Alabama Senate from 1975 to 1979. He later served as Alabama's finance director under Governor Fob James from 1980 to 1982.

After graduating from the University of Alabama, Sid began his successful business career. He became president of Brindlee Mountain Telephone Company, which he managed until it was sold in 2000. In 1983, he founded DeltaCom, a statewide long-distance telephone company, serving as its chairman until it was sold in 1996. He was one of the first outside members of the board of directors of Intergraph Corporation from 1997 until 2006. Most recently, he led the start-up of CBX Holding, LLC (Cold Box), an Arab producer and marketer of temperature
