

Iran is permitted to keep thousands of nuclear centrifuges to enrich uranium. As for the \$150 billion in unfrozen assets, does anyone think that Iran is going to use that to build schools or hospitals or to teach tolerance of other faiths? Instead, how about using it to wipe Israel off the map? How about the chants of “death to America”? Why are we paving the path to weapons that can accomplish these atrocities?

Why should we trust Iran? What is it about their history of deceit, destruction, and killings that warrants our bestowing trust that they will be peaceful?

Here is a question for those who say this is a good deal: How many people can Iran kill with this money for this to remain a good deal? What is the under-over death toll threshold for this deal to no longer be a good deal?

I ask these questions because, very simply, this money is going to be used to kill people, and this deal provides the funding for it.

Millions of Americans, throughout the history of this country, have fought and died. Families have sacrificed in the name of freedom. Generations of Americans have brought about American strength and exceptionalism, and this has engendered a belief in our allies that we will have their backs, and it has kept many of our enemies in check given our military capability. This strength has always been at the very core of our leverage when dealing with other countries.

As for negotiating, the administration simply says we have negotiated the best deal we can, and we are supposed to, as Congress, accept that at face value with zero input.

Here is a little bit of recent history. We were assured by this administration that al Qaeda had been broken, but it hasn't. Our strategy in Yemen was called a model for combating terrorism, but, at this point, it looks very much like an Iran proxy state. ISIS was mocked as a JV team, and now they are murdering thousands. Our relationship with Russia was supposed to be reset, but I don't think anyone let Vladimir Putin know that as he invades sovereign countries and faces no consequences.

□ 1045

How about the bright red line in Syria that said we won't allow Assad to kill his own people with chemical weapons? This administration decided to ignore that, and we now have a Syrian refugee crisis.

This is the recent backdrop from which our leverage, our American strength and exceptionalism, earned through the blood, sweat, and tears of generations of Americans, has been broken by this administration in this deal.

The U.N. voting on this deal before the United States Congress and the United States Senate, the minority of which is actually considering filibus-

tering a vote on this deal, is an outrage, Mr. Speaker.

What does a good deal consist of? Real simple: A complete dismantling of their entire nuclear program. Once we have a demonstrated proof of that, then sanctions get lifted. No non-nuclear concessions.

Any other outcome is not acceptable. Let's use our leverage to the maximum. We fought for it. Let's be strong and let's be proud of our strength and let's use it to our advantage.

Diplomacy isn't compromising to the preferred position of a terrorist country. Diplomacy must always begin and end with protecting American security.

This is not about politics, and it is not just about America. A nuclear Iran is a global threat to everyone everywhere. All Iranian terror must be stopped. We need to reject this deal and go back to the negotiating table.

#### MAKE IT IN AMERICA FIELD HEARING

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Connecticut (Ms. ESTY) for 5 minutes.

Ms. ESTY. Mr. Speaker, yesterday Congresswoman DELAURO and I held a Make It In America field hearing in Connecticut.

We heard from manufacturers from across the State, including leaders from Click Bond in Watertown, Connecticut, who are committed to growing their businesses right here in the United States. But they need our support.

Congress needs to be a more effective partner for American manufacturing. We must continue to foster an innovation economy that creates manufacturing careers, not jobs, but careers that are at the heart of the middle class.

We must reauthorize the Export-Import Bank, a critical financial tool for our companies to remain competitive in the global marketplace.

We must work together to create a predictable Tax Code that encourages companies to return to the United States and levels the playing field for our small businesses, particularly our family-owned companies.

We must inspire our students in science, technology, engineering, and math so that the United States remains the leader in global innovation for generations to come. By engaging our students in the STEM fields, we can prepare them to be the scientists, entrepreneurs, and innovators of the future.

These students could become NASA astronauts like Waterbury's own Rick Mastracchio, who circled the planet on the International Space Station, or machinists or Teamsters, who assemble the aircraft that our military flies proudly all around the world, or computer programmers, who make our world more accessible and connected. Many of my colleagues share my passion for STEM education and bolstering our skilled workforce.

With Minority Whip STENY HOYER's leadership, Congress has advanced the Make It In America agenda and passed important legislation to cut taxes, provide small business loans, train skilled workers, and support American manufacturing.

I look forward to working with my colleagues on both sides of the aisle who are dedicated to creating and growing American jobs.

By rising above partisan politics and focusing on commonsense practical policies, our bipartisan efforts can stimulate real economic growth. We should seize the opportunity to work together to support high-paying careers in American manufacturing.

#### WASHINGTON STATE WILDFIRES

The SPEAKER pro tempore (Mr. BYRNE). The Chair recognizes the gentleman from Washington (Mr. NEWHOUSE) for 5 minutes.

Mr. NEWHOUSE. Mr. Speaker, for the second year in a row, my home State of Washington and my Fourth Congressional District are facing the worst wildfires in the State's recorded history.

One year ago the Carlton Complex fire broke out in Okanogan County. At the time, it was the most destructive in our State's history, burning over 250,000 acres, destroying hundreds of homes and businesses, and devastating the environment.

Now the people of Washington are once again enduring another catastrophic wildfire season, far surpassing the scale of the devastation experienced last year.

To put it in perspective, the amount of land burning in my home State is equivalent to the State of Rhode Island. Many of these fires continue to burn, even as Federal, State, and local agencies and officials work tirelessly to contain them.

Communities across my State are mourning the tragic loss of three firefighters who fell in the line of duty on August 19 while battling the Twisp fire in Okanogan County. We remember and mourn the loss of these brave young men: Andrew Zajac, Richard Wheeler, and Tom Beshevsky.

Our prayers are with their families and their loved ones. The current situation in Washington is dire, and the heartbreaking loss of life is a sober reminder of the dangerous conditions facing many residents.

Already roughly 1 million acres have burned, along with countless homes and businesses and agricultural operations, forcing thousands of residents to evacuate their homes as the threat continues.

While the Governor has declared a state of emergency and the President approved a Federal emergency declaration, the threat remains for residents of central and eastern Washington, and more resources are necessary.

For the first time in history, the Forest Service has spent more than half
