

program has been especially useful in the treatment of post-traumatic stress disorder, which requires regular counseling and recurring follow-up appointments.

While I am grateful that Kids Korner will be extended for another year, Congress should do more. I urge my colleagues to support legislation introduced by Congresswoman JULIA BROWNLEY to make the program permanent and allow VA hospitals across the country to establish similar programs for veterans that they serve. Making child care available to patients who need it is a cost-effective way to improve health outcomes for veterans to whom we owe so much.

JUSTICE FOR VICTIMS OF IRANIAN TERRORISM ACT

(Mr. LAMALFA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAMALFA. Madam Speaker, it is no secret that Iran has been one of the leading sponsors of terrorism in the world for decades and that I am strongly opposed to the Iran nuclear deal.

Hundreds of Americans have been killed by terrorist attacks that were sponsored or financed by Iran. U.S. courts have ruled against Iran in more than 80 cases, holding Iran responsible for nearly \$45 billion in damages.

The first thing, before any agreement would ever happen, is that we should make sure that Iran—out of that \$150 billion of possible sanctions relief, we should demand that American families who lost a loved one at the hands of Iranian terrorism receive the damages they are owed. We cannot fail these American families. Yet Obama's administration is prepared to unfreeze up to \$150 billion of these assets that will help finance Iran's continued terror attacks.

I am proud to cosponsor the legislation by the gentleman from Pennsylvania (Mr. MEHAN), H.R. 3457, the Justice for Victims of Iranian Terrorism Act, which keeps Iran's sanctions in place until Iran has at least paid the damages that it owes American families.

Madam Speaker, this is the very least we can do on a bad deal.

PLANNED PARENTHOOD

(Mr. QUIGLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. QUIGLEY. Madam Speaker, the right to choice, the right for a woman to have control of her own body is guaranteed by the Constitution and has been for 40 years. Defunding Planned Parenthood will not change that. Instead, defunding Planned Parenthood would lead to a decrease in access to contraception and an increase in unplanned pregnancies.

With 40 percent of unplanned pregnancies ending in abortion, defunding

Planned Parenthood would inevitably result in more abortions, not fewer. If you really want to reduce the number of abortions, you should be lobbying to increase funding for Planned Parenthood and other organizations that provide safe and effective birth control.

So let's fund Planned Parenthood, keep our government open, and move on to more pressing issues for the American people.

NATIONAL RICE MONTH

(Mr. ABRAHAM asked and was given permission to address the House for 1 minute.)

Mr. ABRAHAM. Mr. Speaker, I rise today to join with America's rice farmers and families in celebrating the month of September as National Rice Month. It has been 25 years since September was first dedicated as National Rice Month.

So on this silver anniversary, I want to pay a special tribute to the hardworking men and women who produce rice on their family farms. I would also like to recognize all those who mill and market rice, all the suppliers and buyers and, of course, all of the consumers who make rice an essential part of their diet.

Rice farming in America actually predates this Nation's independence, beginning almost 300 years ago. Today, America's rice industry creates 125,000 good-paying jobs and contributes an estimated \$34 billion to our Nation's economy.

Nine million tons of rice are grown each year by family farmers on more than 2.7 million acres of land, predominantly in Louisiana, Arkansas, Mississippi, Missouri, California, and Texas. While these six States produce the lion's share of rice in America, there is also rice production in other States, like Illinois and Tennessee. In fact, the rice industry reaches every State in the Nation, especially those States with cereal makers, breweries, and other foodmakers that use rice as a key ingredient.

I ask my colleagues to support me in recognizing September as National Rice Month.

PLANNED PARENTHOOD

(Mr. KILDEE asked and was given permission to address the House for 1 minute.)

Mr. KILDEE. Mr. Speaker, I am here because I stand with the majority of Americans who support Planned Parenthood and the lifesaving preventative healthcare services that they provide each year to millions of women, to men, to families all across this country. In fact, a new poll shows that nearly 7 in 10 Americans, 69 percent, oppose shutting down the Federal Government as a means of defunding Planned Parenthood. Shutting down the government, we know, puts this American economy at risk, and it is no way to govern.

But there is only 1 legislative day left before another GOP-engineered shutdown. Republicans are so focused on defunding Planned Parenthood, in fact, they are so focused on fighting one another, that they can't fight for hardworking Americans who are simply looking for their government to address the problems and concerns and the priorities that the American people sent us here to address.

Americans overwhelmingly want both parties to work together, to find solutions to the big problems we face in this country. I call on this Congress to set aside these petty fights and get to the work that the American people sent us here to do.

CLEAN NUCLEAR ENERGY

(Mr. ALLEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALLEN. Mr. Speaker, back home in Georgia's 12th Congressional District, I have had the opportunity to visit Southern Company's Plant Vogtle in Waynesboro many times. I am extremely excited to see the progress of construction of Vogtle reactors 3 and 4, the Nation's first new nuclear reactors in 30 years. I look forward to the clean energy and job opportunities they will provide for our State and the entire Southeast.

My district is proud to be the home of every nuclear reactor in the State, including two at Plant Vogtle, two at Plant Hatch in Appling County, and two in construction at Plant Vogtle.

Nuclear energy plays an important role in Georgia's energy portfolio and accounts for nearly a third of all power generated. Nuclear energy facilities across Georgia employ more than 4,000 highly skilled employees and play a vital role in our State and local economy.

Nuclear energy produces 91 percent of Georgia's emission-free electricity and is the only clean air source that can produce large amounts of electricity around the clock.

As the proud grandfather of Elsie Louise Allen, born at 10:45 a.m. this morning, I support clean nuclear energy and support the great work being done at Plant Vogtle and Plant Hatch on behalf of our children and grandchildren and their future energy needs.

THE POPE'S ADDRESS TO CONGRESS

(Ms. HAHN asked and was given permission to address the House for 1 minute.)

Ms. HAHN. Mr. Speaker, I rise today to first thank Speaker BOEHNER for inviting Pope Francis to be the first Pope to ever address a joint session of Congress in his visit to the United States last week.

I know that I was not the only Member of Congress who was deeply moved
