

a finalist for the Washington Post's 2016 Principal of the Year Award. Mr. Pellegrino is the principal of Evergreen Mill Elementary School in Leesburg, Virginia.

Mr. Pellegrino has led Evergreen Mill Elementary with distinction for the last five years. He has been lauded for embracing out-of-the-box techniques to ensure that his students have everything they need to succeed in the classroom. He was one of the first principals to institute the Backpack Buddies and Study Buddies programs. These programs send weekend meals home for hundreds of students and offer a mentor and tutoring program respectively. For these actions and many others, Mr. Pellegrino received the Washington Post Distinguished Educator Leader Award this year.

Coming from a family of educators, I appreciate the invaluable role that educators play in inspiring our students and communities. The work Mr. Pellegrino has done, and continues to do at Evergreen Mill will inspire and shape the lives of countless young men and women for decades to come.

Mr. Speaker, it is my honor to recognize Michael Pellegrino for being named a finalist for the Washington Post's 2016 Principal of the Year Award. I ask that my colleagues join me in congratulating him on this honor, and I wish him nothing but success in his future endeavors.

CONGRATULATING MOORE
CATHOLIC HIGH SCHOOL

HON. DANIEL M. DONOVAN, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, December 16, 2016

Mr. DONOVAN. Mr. Speaker, I rise today to congratulate the Moore Catholic High School varsity football team for winning the Catholic High School Football League Class A division championship.

After a championship drought lasting 13 years, the Mavericks defeated Cardinal Spellman High School 32–22 last month to capture the Class A title. With only three seniors on the team, these young athletes proved that hard work, dedication, and perseverance are the keys to victory. After this resounding victory, I can certainly see why Moore Catholic has asked the Catholic High School Athletic Association to allow them to join the AA division. The Mavericks never backed down from tough competition this past season, and they definitely won't back down next season.

Led by Head Coach Nick Giannatasio, the Mavericks plowed through their opponents in the regular season to finish with an 8–2 record. This young team also showed its dominance in the stats. Wide Receiver Zach Hampton finished the season third overall in receiving yards in their division; Quarterback Vincenzo Scarola second in passing yards; and Running Back Justin Lacks first in rushing yards and touchdowns. But as each of them knows, you always put your team before any personal glory. The Mavericks exemplified teamwork and cooperation, so their championship should come as no surprise to their classmates, teachers, or parents.

Mr. Speaker, this team gave their time, effort, and sweat to be where they are today.

Their championship was well deserved and I wish them nothing but continued success.

RECOGNIZING SOUTHERN RESEARCH FOR 75 YEARS OF SERVING OUR NATION THROUGH SCIENCE AND INNOVATION

HON. TERRI A. SEWELL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 16, 2016

Ms. SEWELL of Alabama. Mr. Speaker, today I am proud to recognize Southern Research, a crown jewel of scientific and engineering research and innovation headquartered in the 7th District of Alabama, on its 75th Anniversary.

Throughout its 75-year history, Southern Research's scientists and researchers have been extraordinary stewards of the federal and private funds they have earned to solve our nation's most pressing challenges, including finding cancer cures, fighting infectious diseases, supporting our nation's defense, protecting our environment, and creating clean energy technologies, among many others.

Since 1941, the researchers and scientists at Southern Research have performed work on behalf of countless private and government organizations, including the National Cancer Institute, National Institutes of Health, the U.S. Department of Defense, the U.S. Department of Commerce, the U.S. Department of Energy, NASA, and others in the healthcare, aerospace, and utility industries, in seeking to resolve the world's greatest challenges.

Southern Research is headquartered in Birmingham, Alabama and today, hires nearly 500 scientists and engineers working in laboratories and offices in Wilsonville and Huntsville, Alabama; Frederick, Maryland; Durham, North Carolina; Houston, Texas; and Cartersville, Georgia.

Southern Research's drug development record, particularly for FDA-approved anticancer drugs, rivals any other nonprofit research organization in the United States. Today, Southern Research is developing 18 drugs to combat various forms of cancer, ALS, Alzheimer's, diabetes, kidney disease, Parkinson's and tuberculosis, among others. The drug development division also has an outstanding and notable record of achievement in infectious diseases and vaccine development, particularly work in HIV/AIDS, and mosquito borne viruses, such as Zika.

Southern Research has evaluated roughly half of the 200 FDA-approved cancer drugs on the market today and has successfully discovered seven of them. One of these drugs is Clofarabine, which was given FDA approval in 2004 and is used in the treatment of pediatric leukemia. It is currently being used to treat children not only at Children's Hospital of Alabama in Birmingham but at hospitals around the world.

In addition to drug discovery and development, Southern Research has a long history of technology development in engineering, including work on Prompt Global Strike and an aerial engineering system used by NASA to capture full motion high definition video of rocket launches.

The scientists in the Energy and Environment division at Southern Research are at the

forefront of work to produce cleaner energy and water, develop new sources of energy, and drive innovation that addresses climate change and coincides with the Clean Tech Revolution nationally.

It is clear the investments our federal government has made in Southern Research are dwarfed by the returns our nation and world have received from the achievements this prestigious research organization has made in its four divisions: Drug Discovery, Drug Development, Engineering, and Energy and Environment.

The people of Southern Research, from its current president and CEO, Art Tipton, to all of the visionaries who have worked tirelessly in its labs and offices over the past 75 years, are to be commended on this tremendous occasion. The feats they have achieved, through the legacy of Southern Research's founder, Tom Martin, have benefitted not only the South, but the entire nation and world.

It is a privilege and honor to represent Southern Research in Congress. I extend not only my congratulations on 75 years of groundbreaking accomplishments, but my sincere gratitude to the remarkable people of Southern Research for the work they have done to improve the lives of countless people across the world through research and innovation over the past 75 years.

ON MARK MILLER RECEIVING THE VIRGINIA LIBRARY ASSOCIATION'S TRUSTEE LIBRARY AWARD

HON. BARBARA COMSTOCK

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, December 16, 2016

Mrs. COMSTOCK. Mr. Speaker, I rise to congratulate Mark Miller on receiving the Virginia Library Association's Trustee Library Award. Mr. Miller has diligently served the Loudoun community for many years and is more than deserving of this honor.

Loudoun County's public libraries are an enormously important resource for our community, as they serve as centers of knowledge and learning. His efforts to expand and improve LCPL have resulted in a number of great developments such as the future Brambleton Public Library. I cannot stress enough how important it is to have leaders like Mark, who understand the needs and character of our community.

His dedication to improving both our district and the country as a whole is evident through his work on Loudoun County Public Library's Board of Trustees. I am proud to call Mark a friend as I have had the privilege of working with him and his wife Ellyn through the Smashing Walnuts Foundation. I look forward to continuing to work with him to better our community.

Mr. Speaker, I ask that my colleagues join me in congratulating Mark Miller for receiving the Virginia Library Association's Trustee Library Award. It is a privilege to represent him and I wish him all the best in his future endeavors.
