

on Monday. As the Sun went down, you could see blue lights in windows across the Capitol complex honoring those brave men and women.

The dedicated individuals who serve in law enforcement help to preserve the way of life we hold so dear. They walk the neighborhood beats, patrol our streets, and willingly do dangerous work to protect our families and communities.

It is one of the most honorable activities anyone can engage in, and I want to thank them for their selflessness and bravery they demonstrate as officers of the law. They deserve our profound gratitude.

REPEAL WILL AFFECT EVERY AMERICAN

(Mr. HOYER asked and was given permission to address the House for 1 minute.)

Mr. HOYER. Mr. Speaker, I rise out of a deep concern, not just for the 30 million Americans who will lose access to health coverage and the tens of millions of others who will see their costs rise if Republicans repeal the Affordable Care Act without a replacement, but as well for every American because the repeal will affect every American, including every American who has health insurance through their employer.

Let there be no mistake. Every American will be adversely affected by the repeal of the Affordable Care Act. The repeal and delay plan ought to be called repeal and deny, deny health coverage to tens of millions, deny tax credits to small businesses to help them cover their employees, deny those with preexisting conditions protection from high premiums and coverage denials, and deny parents from covering their children under age 26 through their own insurance plans. Every American will be adversely affected if we repeal the Affordable Care Act.

I heard recently through social media from a woman in my district whose family was able to save more than \$1,200 a month because of the ACA marketplace. Another wrote to tell me that the ACA made it possible for her to sign up for coverage for the first time in years since she lost her job and her employer-based insurance. When she needed to be hospitalized this spring, having coverage saved her life.

Repeal and deny would be a disaster for our people and our economy. I urge my Republican friends to instead work with the Democrats to improve the Affordable Care Act.

CAMERAS IN THE U.S. SUPREME COURT

(Mr. POE of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. POE of Texas. Mr. Speaker, Americans nationwide are interested in

watching the Supreme Court at work, but only a handful on any given day are allowed to have access to the courtroom. The courtroom is small and seating is limited. Well, why not give the public the ability to view the proceedings in their entirety on television or through live streaming?

Public court hearings are the bedrock of American justice. Americans want to know what is going on behind those closed doors. A simple nonintrusive camera would allow for greater transparency and greater faith in the decisions made by the most powerful Court in the world.

I was one of the first judges in Texas to allow cameras in the courtroom. All the naysayers said: oh, it won't work. But it did. It benefited everyone.

The gentleman from Virginia (Mr. CONNOLLY) and I are once again cosponsoring a bill to allow cameras in the Supreme Court. It is better to show all of the proceedings to the public than to rely on a 30-second sound bite from a news reporter on television during the 6:00 news. It is time for cameras in the Supreme Court.

And that is just the way it is.

KEEP AMERICA HEALTHY

(Ms. JACKSON LEE asked and was given permission to address the House for 1 minute.)

Ms. JACKSON LEE. Mr. Speaker, I rise to keep America healthy, saving the Affordable Care Act.

I rise in the name of Cynthia Perry, facing a life-or-death scenario. Without the law in place, Cynthia Perry would also be facing life or death. Perry suffers from an immune deficiency that requires her to take medication she estimates costs roughly \$40,000 a year. Cynthia, who lives today.

I rise to keep America healthy. Kathryn Will, terrified about losing access to treatment, terrified because she, herself, at 28 years old, was diagnosed with stage III breast cancer.

I rise to keep America healthy because a Senator from Kentucky said we need to think through how we do this, and it is a huge mistake for Republicans if they do not vote for replacement on the same day they vote for repeal.

I rise to keep America healthy and not give hundreds of billions of dollars in tax breaks to insurance companies and drug manufacturers while eliminating tax credits for millions of working Americans.

I rise to keep America healthy. Vote to save the Affordable Care Act.

SOUTH CAROLINA FIFTH MOST POPULAR STATE FOR NEW RESIDENTS

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, last week The Post and Cou-

rier of Charleston announced that South Carolina is the fifth most popular State for new residents. In an annual study conducted by United Van Lines, South Carolina achieved being in a top place for people looking to relocate, whether for a job, retirement, or temperate climate.

The Post and Courier detailed that the moving company this week said 60 percent of the trucks in South Carolina dropped off household goods for newcomers, placing it among the top destinations for those seeking a new home. The article also reveals that recent data from the Census Bureau confirms the Palmetto State is gaining significantly.

I am grateful to Governor Nikki Haley, incoming Governor Henry McMaster, Secretary of Commerce Bobby Hitt, and everyone who works each day to promote South Carolina as a great place to live, work, and raise a family. We have a probusiness mindset. We are military friendly. We have communities that promote job creation. We have a State that is ready to welcome transplants.

In conclusion, God bless our troops, and may the President, by his actions, never forget September the 11th in the global war on terrorism.

LET'S WORK TO IMPROVE OUR HEALTHCARE PLAN

(Mr. SCHNEIDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHNEIDER. Mr. Speaker, in his farewell speech, President Obama said that if anyone can put together an alternative healthcare plan that is demonstrably better and covers as many people at less cost, he would publicly support it. I feel the same way.

The ACA is not perfect, and anyone who is serious about working to improve our healthcare system should count me as a willing partner. But that is not what we have heard from President-elect Trump and my Republican colleagues. Their irresponsible plan is to repeal ObamaCare and then figure out what comes next. That is like jumping ship without a life raft or a plan.

Repealing ObamaCare will leave 1.2 million people in my State without health insurance, allowing insurers to again deny coverage based on preexisting conditions or put annual and lifetime caps on coverage, and deny young people the option of staying on their parents' plan. This will hurt real people who depend on the Affordable Care Act.

I urge my colleagues to join me in finding ways to improve our Nation's healthcare system rather than burning it down.
