

been endorsed by more than 90 groups. The Congressional Budget Office estimates that the CREATES Act would lower Federal spending on prescription drugs by \$3.9 billion and research shows that the savings to patients with employer-based health insurance and the health care system overall would be far greater—many billions of dollars more.

Think for a moment about the impact of price hikes on the family of a patient facing a life-threatening illness. Across the country, hardworking Americans feel like the system is rigged against them by corporations that are looking to make a profit at any price. With examples like Turing and Mylan, it is no wonder they feel that way.

The CREATES Act is one piece of the puzzle, addressing anticompetitive behavior that delays the creation of affordable generic drugs. Drug affordability is a bipartisan issue that affects each and every American. These reforms will make a difference. I hope we can finally act together to help put more affordable prescription drugs in the hands of Americans.
