COMMENDING MR. RICHARD D. MILTON ON HIS CONTRIBUTION TO THE HELLFIRE MISSILE

HON. MO BROOKS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, August 16, 2019

Mr. BROOKS of Alabama. Madam Speaker, I rise today to recognize Mr. Richard D. Milton, a key contributor to the development of the Hellfire missile.

In the 1960s, Mr. Milton worked with a team at the U.S. Army Aviation and Missile Research, Development, and Engineering Center (AMRDEC) on Redstone Arsenal to find practical uses for lasers in the medical and military fields. By 1965, Mr. Milton found a unique role for lasers on the battlefield, and that by illuminating a target with a laser, a missile could be guided to that target.

In March of 1979, Richard Milton's invention, the Missile System Using Laser Illu-

minator, became U.S. Patent 4,143,835. U.S. Patents 6,166,803, 6,296,803, and U.S. Patent 6,305,797 can also be attributed to Mr. Milton. The invention of laser guided missiles contributed to the creation of the Hellfire missile, and this revolutionized America's defense. The ability to be launched from various platforms, the use of missiles by military personnel under the protection of cover, the ability for long range and multiple launches, and accuracy of hit are all battlefield advantages of the Hellfire missile.

Mr. Milton's coworkers often refer to him as "Dick" and speak highly of his brilliance and everyday problem-solving skills. Mrs. Debbie Jordan, a coworker, says, "Working with Dick and watching how he thought and attacked each problem was a great gift for a just out of college engineer."

Madam Speaker, the new-age ideas Richard Milton offered in the 1960s revolutionized many U.S. ally's missile systems and the U.S. precision in missile defense we have today.

I commend Mr. Richard D. Milton for his innovation and passion for public service to the American people.
