words, if a pharmacist advises a physician that a particular drug that was prescribed would harm the senior and the physician agreed and wrote a new prescription, then the pharmacist would be reimbursed. Many times physicians are unaware of other drugs being prescribed to patients for other conditions or being human, and are not often aware of the interactions or contraindications with the new prescription.

Under this provision, a pharmacist would receive reimbursement only in instances that will benefit the health of the patient, but at the discretion of a physician. This provision is narrowly focused to provide the biggest bang for the buck in preventing elderly Medicare beneficiaries from becoming unnecessarily hospitalized or severely injured.

This legislation encourages pharmacists to spend more time reviewing the patient’s prescription drug regimen, instead of racing to dispense prescription drugs quicker. Under current pharmacy care, even pharmacists can overlook possible drug prescribing mistakes. SMEA provides more opportunity for adequate review.

The final section of SMEA concerns consultations with pharmacists. A pharmacist would only be reimbursed when consulting a senior citizen which results in improved compliance with regard to specific drugs for six specific high-risk diseases or when a senior is on a drug regimen that requires four or more drugs.

Here, senior citizens will receive counseling from pharmacists for treatments that necessitate extra concern with compliance. Again, this legislation is carefully constructed to maximize Medicare savings, minimize hospital visits, and improve health care delivery for the elderly.

Pharmacists would be required to do more than just tell a patient to take two tablets a day with meals. SMEA would require pharmacists to do much more to improve patient compliance. Patient consultation sessions would involve increased pharmacist interaction with seniors about drug side effects, proper intake, and better drug regimen management with multiple prescriptions. These are just a few of the additional responsibilities that SMEA would require.

The end result is America’s seniors living longer and remaining healthier without undue hospitalization and excessive costs. The elderly win. Medicare wins. And smart health care prevails.

FACING THE FUTURE CHALLENGES OF MANKIND

HON. JERRY LEWIS
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 9, 1996

Mr. LEWIS of California. Mr. Speaker, I would like to bring to your attention and submit for the RECORD a letter I recently received from Henry Chrystie of Yucaipa, CA, that raises some intriguing ideas and questions relating to the challenges mankind will face in the future. As Congress strives to make wise and prudent decisions to guide our country, Mr. Chrystie’s thoughts will give all of us a little more to think about.

To the powers that be:

Ever since I was 14, in 1927, I have understood that, in my lifetime, men would be on the Moon and Mars, and I knew how it was going to be done. I now understand why. It is because we humans are expanding our population at such a rapid rate that in the future we are going to be hard pressed to provide space and food for ourselves. We will convert sea water, and we will convert the deserts to provide more livable land. We will also get into some real knockdown drag-out fights over the resources which we had laid the groundwork for the human race to expand outward toward the universe, which is our destiny. This is the massive problem we will be forced to face. If this sounds dire, then show me that I am wrong.

It takes a lot of foresight to be in a position of responsibility, such as a Congressperson. Some of you have it, unfortunately, some of you do not. You killed the search for extra-terrestrial intelligence even though any mathematician knows that it has to be out there because of the huge numbers that establish that probability. Now you seek to cut off funds, such as to NASA, etc. because you do not seem to understand how important long-range research and planning is.

Are we going to stall around until we are in a real bind, or are we going to continue our long-range research and studies so that we will be able to cope with our needs as they develop? It is up to you, the powers that be, to very carefully consider this problem because the future of the worlds’ population is in your hands. I, for one, hope you have the brains to make the right decisions.

All I can say to you is—think very carefully. You have to support NASA, Mars Surveyor, Galileo, New Millennium, and related activities.

THE MARCH OF THE LIVING

HON. CAROLYN B. MALONEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 9, 1996

Mrs. MALONEY. Mr. Speaker, I rise to call the attention of my colleagues to a critical program which I am proud to say is based in my New York City district—The March of the Living.

The March of the Living is a yearly journey in which thousands of Jewish teenagers gather from around the world in Poland and in Israel. During this unforgettable trip, these young people learn first hand about two 20th century events that changed the history of mankind forever—the Holocaust and the creation of the State of Israel.

While in Poland, March participants tour various cities where there had been vibrant Jewish communities before World War II, including Warsaw, Krakow, and Lublin. After seeing communities where Jewish life flourished, the teens are taken to the death camps where these lives were destroyed. The teens participate in a march from Auschwitz to Birkenau on Holocaust Memorial Day, the same day that Members of Congress gather in the Capitol Rotunda to honor the memory of those who were murdered in this genocide. I believe that this “march of the living”—young people retracing the steps of countless innocent victims who marched to their deaths—is one of the most creative and meaningful Holocaust remembrance programs ever established.

After showing the teens that they will never forget the horrors of the Holocaust, the teenagers travel to Israel, where they visit the magnificent and vibrant Jewish homeland.

Created out of the ashes of the Holocaust, the State of Israel stands as a great triumph, not only for the Jewish people, but for the cherished ideals of democracy, compassion, and enlightenment.

Mr. Speaker, the March of the Living has changed the lives of over 20,000 young people. It has proved to be an effective way of teaching these lessons to our next generation of leaders. At this particular moment in time, I would like to join others in the Congress in appealing to the Government of Austria to become involved in this program.

Half a century after the Nazi era, it is in Austria’s best interests to show the world that it is committed to Holocaust remembrance and the preservation of Jewish heritage. A few weeks ago, the world was once again saddened to hear former Austrian President Kurt Waldheim’s distorted views of World War II and his denial of his own facilitation of war crimes. Waldheim’s autobiography, “The Answer,” is not the right answer to those who survived the Holocaust and those who lost their loved ones.

In my view, this would be an opportune time for Austria to commit itself to participating in the March for the Living. For this nation to assist such a worthy effort to teach the lessons of the Holocaust would be the best answer and would give to Kurt Waldheim’s tragic assertions.

Let me conclude, Mr. Speaker, by congratulating the March of the Living on its outstanding work. I want to especially praise my constituent Ernest Goldblum for his tireless efforts on this and many other worthy causes, and to thank him for bringing these important issues to my attention.

H.R. 3675 STAFF RECOGNITION

HON. FRANK R. WOLF
OF VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, July 9, 1996

Mr. WOLF. Mr. Speaker, I wish to recognize and thank those staff members who supported the Members of this House in the preparation and passage of the fiscal year 1997 Transportation and related agencies appropriations bill, H.R. 3675: The Transportation Appropriations Subcommittee staff: John Blayze, Rich Eford, Stephanie Gupta, and Linda Muir. The Appropriations Committee staff: John Mikel, Dennis Kerdner, Elizabeth Mondro, and Ken Mark; the majority staff; and Cheryl Smith of the minority staff. The associate staff to the committee: Lori-Beth Feld Hua of my office, Monica Vegas Kladakis of Majority Whip DELAY’s office, Connie Veillette of Mr. REGULA’s office, Kevin Fromer of Mr. ROGERS’ office, Bill Deere of Mr. LIGHTFOOT’s office, Ray Mock and Eric Mondero of Mr. PACKARD’s office, Todd Rich and Sean Murphy of Mr. CALLAHAN’s office, Steve Carey of Mr. DCMH’s office, Paul Cambon of Chairman LIVINGSTON’s office, Kristen Hoeschele of Mr. SADO’s office, Jim Jepson of Mr. DUNCAN’s office, Christy Coburn of Mr. COLEMAN’s office, Barbara Zylinski-Mizrahi of Mr. FOGLIETTA’s office, and Paul Carver of Mr. OBEY’s office.
