

could serve as a model for other clean-up efforts around the country. In fact, the Appropriations Committee's report specifically commends the efforts underway at Fernald.

I urge my colleagues to support this legislation. It continues to provide reasonable funding to protect our natural resources. It still helps us to achieve our goal of balancing the budget by 2002—and it will help us to fix an environmental hazard that has placed thousands of people at risk.

HONORING MUSIC EDUCATORS AT
PENNFIELD MIDDLE SCHOOL

HON. JON D. FOX

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 25, 1996

Mr. FOX of Pennsylvania. Mr. Speaker, those who enable children to experience the beauty of music are those who brighten our future. I am pleased to have some of these wonderful people in Pennsylvania's 13th district.

One of them is Mr. Alan Malachowski, the band director at Pennfield Middle School. Mr. Malachowski recently attracted a grant from the North Penn Educational Foundation which allowed his students to experience music in a way many of their peers are not afforded.

Mr. Malachowski convinced nationally known composer Jared Spears to compose a work based on the history of the Montgomery County Fair, to teach the piece to student musicians during 2 days of intense rehearsal, and to personally conduct the students' performance of the work, entitled "The Brass Ring", on May 30 at the school.

Mr. Speaker, I'm sure you join me in applauding the efforts of Mr. Malachowski, Dr. Spears, and the student musicians at Pennfield Middle School. Not all young people have the privilege of such an enriching experience. Not all young people have the opportunity to learn from impassioned educators like Mr. Malachowski.

Music helps young people to form a world view. All of humanity is moved by the beautiful compositions of men like Dr. Spears. I am proud to recognize the efforts of those who by teaching music point out to our children many of the better things in life.

THANK YOU, ROBIN BRIDGES, FOR
YOUR LOYAL SERVICE

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 25, 1996

Mr. FIELDS of Texas. Mr. Speaker, it was with mixed emotions that I announced last December 11 my decision to retire from the House at the conclusion of my current term. As I explained at the time, the decision to retire was made more difficult because of the loyalty and dedication of my staff—and because of the genuine friendship I feel for them. Each one of them has served the men and women of Texas' 8th Congressional District in an extraordinary way.

Today, I want to thank one member of my staff—Robin Bridges, my office manager—for

everything she's done for me and my constituents in the 11 years that she has worked in my office.

Robin has worked on Capitol Hill since 1971. From 1971 to 1976, she served as systems manager for Representatives Charles Thone. From 1980 to 1984, she held the same position in the office of Representative Larry Coughlin. And from 1984 to 1985, she served as systems manager for Representative Buddy Darden.

The first time I met Robin, I was impressed by her extensive experience and her professionalism. But the more we talked, the more I realized that she was not just someone who knew how to get a job done—although she certainly knew that. I came to appreciate her personal warmth and sincerity, and her personal warmth and sincerity, and her eagerness to pitch in to ensure that my constituents received timely responses to their letters and calls. Over time, as computer systems have proliferated and become more complex, I have been impressed with Robin's ability to adapt to new technology—just as she has adapted to a variety of personnel and other changes in my office.

Five years ago, I asked her to assume new responsibilities as my office manager—a request she readily and eagerly accepted. But more than her competence as a member of my staff, I wish to say a word about Robin as an individual, and as a mother.

To determine what kind of a person someone is, one need only look at that person's children. Robin's daughter, Emily, and her son, Andrew, are proof that the qualities she brings to their work in my office are the qualities she lives by. Both Emily and Andrew have been recognized for academic excellence in high school and college. The hard work and dedication they have demonstrated were instilled in them by their mother, who has successfully balanced the difficult roles of single mother and congressional staff member.

Robin Bridges is one of those hardworking men and women who make all of us in this institution look better than we deserve. I know she has done that for me, and I appreciate this opportunity to publicly thank her for the dedication, loyalty and professionalism she has exhibited throughout the years it has been my privilege to know and work with her.

Robin has yet to make a definite decision about what she wants to do in the years ahead. But knowing he as well as I do, I am confident that the skills and the personal qualities she has demonstrated in my office will lead to continued success in the future.

Mr. Speaker, I know you join with me in saying thank you to Robin Bridges for her years of loyal service to me, to the men and women of Texas' 8th Congressional District, and to this great institution.

PROVIDING FOR CONSIDERATION
OF H.R. 3816, ENERGY AND
WATER DEVELOPMENT APPROPRIATIONS ACT, 1997

SPEECH OF

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1996

The House in Committee of the Whole House on the State of the Union had under

consideration the bill (H.R. 3816) making appropriations for energy and water development for the fiscal year ending September 30, 1997, and for other purposes:

Mr. RICHARDSON. Mr. Chairman, I rise in opposition to the DeFazio-Petri amendment.

Their amendment would seek to strike funds from the Animas-La Plata project. This project is especially important for New Mexico and Colorado.

As you know, water in my State and throughout the arid West, is like gold. Consequently, water needs to be conserved. Conservation includes storage for the inevitable dry years. This year has seen a major drought in the region.

Had construction of the Animas-La Plata project begun in 1990, as was originally scheduled, there would have been enough water stored for the citizens in northwestern New Mexico. Over the years, delay in the construction of this project have put over 100,000 people at risk.

Furthermore, in a land where Indians and non-Indians live together, it is important to share water. In 1985, the Colorado Ute tribes began to negotiate a sharing of their senior water rights on tributaries to the San Juan River—water which many of my constituents in northwestern New Mexico need to sustain their quality of life and secure their future. The Ute tribes should be complemented for these negotiations.

This amendment would render that agreement void. Let's not tell the Ute tribes and the people of New Mexico and Colorado, who strive to share a valuable resource, that their efforts have meant nothing.

I encourage a "no" vote on the DeFazio-Petri amendment.

OF H.R. 3816, ENERGY AND

SPEECH OF

HON. SANDER M. LEVIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 24, 1996

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 3816) making appropriations for energy and water development for the fiscal year ending September 30, 1997, and for other purposes:

Mr. LEVIN. Mr. Chairman, I rise in strong support of the Schaefer amendment.

Pulling the plug on our Nation's investment in solar and renewable technology is shortsighted. The funding reductions contained in the bill threaten to undermine any hope the United States has for energy security. Renewable energy programs offer enormous benefits for a very small investment.

I know something about this issue as a company in my district—United Solar Systems Corp. of Troy, MI—developed a solar cell that recently set a new world record for converting the Sun's energy into electricity. This efficiency record would not have been achieved without the assistance of the Federal Government.

Most of us are familiar with the solar cells that power calculators and other consumer
