

S. 1528 repeats what we all know and support—that continued and expanded recycling is a national goal.

S. 1528 removes impediments to achieving this goal, impediments Congress never intended to occur.

The nearly 50 Senators who have already co-sponsored this bill recognize the need to amend Superfund for the very important purpose of increasing recycling in the public interest. Let's act this year.

#### MODERNIZATION OF THE ABM TREATY

Mr. COCHRAN. Madam President, I rise today on a substantive issue which has caused me considerable concern recently. It has to do with the issue of our national missile defense and the fact we passed legislation earlier this year on that subject, and we now hear the administration discussing its options under the National Missile Defense Act. We hear responses from around the world about the intent we have that is now in our law to deploy a limited national defense system. I want to speak on that subject for a minute or two.

When we passed the National Missile Defense Act, we all realized, and the President did, too, when he signed it, that the ABM Treaty, the antiballistic missile defense treaty, that exists between the United States and Russia, prohibits the deployment of a national missile defense system and that the treaty would have to be amended if it was to remain in force.

Some statements being made on the subject now by our own administration, as well as by Russian officials, cause me considerable concern. For example, the Secretary of State recently said that the administration was examining "the possibility of adjusting [the ABM Treaty] slightly in order to have a National Missile Defense."

Since article I of the treaty expressly prohibits a national missile defense, the Secretary's suggestion that only a slight adjustment is required in the treaty language is a huge understatement, and it is likely to mislead the Russians and others as well.

The National Missile Defense Act acknowledges our policy of pursuing arms control arrangements, but it requires the deployment of a limited national missile defense which contradicts the initial premise of the ABM Treaty.

A number of Russian Government officials have said they will not negotiate changes in the ABM Treaty. A Russian foreign ministry spokesman has been quoted as saying it is "absolutely unacceptable to make any changes in the key provisions of the treaty and the Russian side does not intend to depart from this position."

A Russian defense ministry official has said: "There can be no compromise on this issue."

Additionally, it has been reported that Russian and Chinese Government

representatives have introduced a resolution in the U.N. General Assembly demanding the United States forego deployment of a missile defense system and strictly comply with the treaty's prohibition on territorial defense.

It is entirely inappropriate for the U.N. to consider seriously a resolution that would presume to dictate to the United States what we should or should not do in defense of our own national security. Ballistic missile threats are real and have caused our Government to adopt a policy that requires a deployed national missile defense.

It is my fervent hope our own Government will acknowledge clearly that the National Missile Defense Act means what it says and stop encouraging misunderstanding by the Russians, the Chinese, or anyone else of our intentions to defend ourselves against ballistic missile attack. We also hope the point will be made that we are not trying to undermine or threaten Russia's missile deterrent.

Our relationship with Russia has improved considerably in recent years. I hope this new era of mutual respect and understanding will continue to be strengthened. We are getting into an unfortunate situation, however, where candor and honest exchange of information and intentions are taking a back seat to half-truths and bluster. The latter course will lead to misunderstanding and possibly disaster. At no time in the history of the relationship have honesty and unequivocal dialog been more important between Russia and the United States. The ABM Treaty is out of date and must be changed to reflect today's realities. The sooner everyone acknowledges this fact and gets busy negotiating the changes that are required, the better off we will all be.

#### CHARLES BATTAGLIA

Mr. SPECTER. Mr. President, I would like to comment about a distinguished American who is retiring from service in the U.S. Senate. Charles Battaglia has been associated with me in the Senate for the past 14 years. He came to help me as an assistant when I served on the Intelligence Committee and stayed with me to become staff director of the Intelligence Committee during the 104th Congress when I chaired that committee, and then, in the 105th Congress, moved over with me to be the staff director when I chaired the Veterans Affairs Committee through the first session of the 106th Congress.

Mr. Battaglia has a distinguished record. Following graduation from Boston College, he served 25 years in the U.S. Navy, serving in the offices of the Secretary of Defense, Secretary of the Navy, and the Naval War College. In 1978, Mr. Battaglia was selected by the Director of Central Intelligence, Adm. Stansfield Turner, to be his special assistant at CIA. He received his MBA

from Bryant University, and in 1991 completed the Kennedy School of Government's international security program, was a member of the Council on Foreign Relations, and has an extraordinarily distinguished military record in the Navy, in the intelligence community and CIA, as an assistant on the Intelligence Committee, and later as staff director there.

He has earned retirement status. I might say we are making some effort to bring him back on a contract part-time basis to help with our inquiry into alleged espionage and other matters on oversight at the Department of Justice.

He has had an extraordinary record and become a personal friend of mine in the intervening 14 years. He has done great service for the military and as a member of the Senate family.

I yield the floor.
