

their ideas into reality and implement new solutions and ways to teach. This series of grants consist of the \$30 million Washington State School Grant Program which will serve approximately 140 schools, and the \$150 million School District Grant Program which includes \$50 million for 10-11 districts in Washington State.

Finally, the Foundation is providing the Seattle School District with a \$26 million grant that will assist the district in its use of technology to help students meet Washington state's challenging academic standards.

I'm sure my colleagues join me in thanking Bill and Melinda Gates for their significant and considerate contribution to education. I know that current and future generations of students will benefit greatly from this gift. The education of our children is the key to the success of our country and the Gateses have given all of our students an even greater chance of succeeding.

Mrs. MURRAY. Mr. President, I want to share with my colleagues some great education news for schools in Washington state and around the country. Today, the Bill and Melinda Gates Foundation announced a nationwide commitment to provide \$350 million over three years to help students succeed in the classroom.

As a former educator in Washington state, I'm especially pleased that more than \$200 million dollars will go to Washington state classrooms. This generous contribution will put money where we know it will make a difference: helping all students achieve by developing strong leadership skills in our teachers and administrators.

As we work here in the Senate on our national education policy, today's announcement is a reminder that educating our children is a team effort—and there are important roles for federal, state, and local officials, as well as businesses, nonprofit organizations, and individuals.

For years, the people I represent have seen first-hand the generosity and sense of community that Bill and Melinda Gates possess. Their foundation has worked to vaccinate poor children against diseases, to bring computers to libraries across the country, and to provide scholarships to talented minority students. We in Washington state have known about it since the beginning, and I'm proud that today, the whole nation gets to see it—and benefit from it.

I couldn't be more proud of the Gates Foundation on this special occasion and can't wait to see the many ways this will improve education for millions of students.

As we begin our work to reauthorize the Elementary and Secondary Education Act, I hope that this major announcement serves to remind us that local school districts—on their own—don't have all the resources they need. Individuals have a role to play as mentors, volunteers and coaches. Char-

itable foundations have a role to play, and the federal government also has a role to play.

I hope the Senate will follow the important and thoughtful example set by the Gates Foundation to do our best to give all students the resources and the tools they need to reach their potential.

#### RECOGNITION OF THE "FROM THE TOP" PROGRAM

Mr. GORTON. Mr. President, I would like to announce the winner of my 33rd Innovation in Education Award. This award goes to a national group sponsored by Boston Public Radio titled "From the Top." I learned about this program when I attended a "From the Top" performance in Spokane on January 29th. Two students from Washington state, Stephen Beus of Othello and Justin Mackewich of Vancouver, participated in the concert and I was amazed by their technique and their immense talent. I was delighted to see such outstanding students excelling in the arts and am pleased to award Stephen and Justin and recognize this exceptional program.

Both Stephen and Justin are very gifted musicians. I was amazed by Stephen's skill at the piano and the Four Seasons Quartet that Justin played in was astounding. I hope to attend more of their concerts in the future.

"From the Top" consists of a series of public radio performances, taped in front of live audiences. These performances have been given across the country in places like Boston, New York City, Sarasota, Florida, and St. Paul, Minnesota. The concept for "From the Top" is to highlight the performances of exceptional, pre-college age, classical musicians. Indeed, their performances make a "From the Top" concert a remarkable experience.

An additional positive impact of "From the Top" is that it provides an arena for people of all ages to enjoy classical music. In today's modern world, we must take the time to enjoy the classics and encourage our youth to value the great symphonies and music from the past. "From the Top" is an excellent source for all ages and walks of life to learn more about classical music.

Each week, I give an "Innovation in Education" Award to individuals or groups within the education system who make outstanding contributions to the education of our children. I believe that "From the Top" gives our students exposure to the arts that provides an invaluable enrichment to any child's upbringing. I hope my colleagues will join me in recognizing the great contributions of "From the Top".

#### THE VERY BAD DEBT BOXSCORE

Mr. HELMS. Mr. President, in honor of Leap Day, which was yesterday, I am going to vary my regular format.

It is estimated that 200,000 people in the United States were born on Feb-

ruary 29th. While these individuals may not share their birthdays with their families and loved ones every year, they do share—every year—in the less than desirable Federal debt like the rest of us.

Since 1970, the Federal debt has leapt remarkably—reaching \$5,735,333,348,132.58 (Five trillion, seven hundred thirty-five billion, three hundred thirty-three million, three hundred forty-eight thousand, one hundred thirty-two dollars and fifty-eight cents) at the close of business yesterday, February 29, 2000.

The previous Leap Day, February 29, 1996, the Federal debt stood at \$5,016,041,000,000 (Five trillion, sixteen billion, forty-one million) which reflects a debt increase of more than \$700 billion—\$719,292,348,132.58 (Seven hundred nineteen billion, two hundred ninety-two million, three hundred forty-eight thousand, one hundred thirty-two dollars and fifty-eight cents) during the past four years.

Today, Mr. President, each citizen's share of the Federal debt is \$20,727.13. Translating this figure into the amount that Leap Day citizens owe, the figure becomes \$4,145,426,000.00 (Four billion, one hundred forty-five million, four hundred twenty-six thousand). This amount may not seem like a lot, but it is when you consider it is only enough to pay down four days worth of the interest on the Federal debt.

Mr. President, I wish my Senate colleagues to note how tragic it is that our country's debt leaps with more frequency than the years do.

#### ADDITIONAL STATEMENTS

##### TIBUTE TO VETERANS OF THE U.S. NAVY ASIATIC FLEET

• Mr. DURBIN. Mr. President, I rise today to pay tribute to the heroism and sacrifices of the sailors and marines who served in the U.S. Navy's Asiatic Fleet.

The Asiatic Fleet established itself as one of the premier assets of the United States Navy during its years of operation. Officially commissioned by the Navy in 1910, The Asiatic Fleet's origins can be traced back to 1845, when the United States first established a naval presence in the Far East. The United States established the Asiatic Fleet to protect American interests in the western Pacific. The sailors and marines of the Asiatic Fleet ensured the safety of United States citizens and foreign nationals and provided humanitarian assistance in that region during the Chinese civil war, the Yangtze Flood of 1931, and the outbreak of Sino-Japanese hostilities. The increasing risks faced by U.S. military personnel serving in this region were highlighted by the accidental bombings and sinking of a U.S. Navy gunboat belonging to the Asiatic Fleet, the U.S.S. *Panay*, in international waters by Japanese aircraft in 1937—four years before the U.S. entered World War II.
