

Depending on the last two digits of an individual's Social Security number, they could have that money in their pocket as early as July 23. Anyone wishing to find out should check www.samjohnson.house.gov, to learn when they will receive their rebate.

Mr. Speaker, Americans are over-taxed. They are overtaxed, and they deserve a rebate.

CALIFORNIA DREAMING

(Mr. BALLENGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BALLENGER. Mr. Speaker, California's Governor has decided to hire high-priced Democrat spin-meisters instead of addressing the emergency crisis in his State. Taxpayers will subsidize Mark Fabiani and Chris Lehane at \$30,000 per month to boost Governor Gray Davis in the media as California's energy crisis further drops his poll numbers.

Instead of repairing California's energy crisis, the Governor is using taxpayer dollars to repair his image. This \$30,000 in consultant fees that will be charged to the taxpayers is more than the Governor earns monthly himself. The Governor has had plenty of time to implement a solution. He knew over a year ago he had a problem; yet Gray Davis has refused to address that problem. He kept putting it off and putting it off and putting it off. It becomes blatantly obvious that the Governor is more concerned about repairing his image than helping the people of his State. Rather than working with the President and the White House to help California, the Governor is trying to find ways that high-priced PR men can exploit the energy crunch to his advantage.

ENERGY AND IMMIGRATION

(Mr. TANCREDO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TANCREDO. Mr. Speaker, many pundits, and many of my colleagues, will undoubtedly continue to discuss the energy crisis that the Nation faces, and specifically in California they will be proposing solutions that will range from increased supply to reduced demand and price caps. Mr. Speaker, when will we get the courage to attack the root of this problem or even discuss the root of this problem? The problem in California and many places around this Nation is a massive population increase caused by massive immigration, both legal and illegal.

It is the numbers, Mr. Speaker. That is what drives everything. That is what drives the demand for all the resources we are now running out of, and it is something we must come to grips with as a Nation. The numbers, Mr. Speaker, more than anything else, that is the reason we are going to be facing these

kinds of dilemmas over and over and over again, starting in California; but believe me, that is just the beginning.

It is the numbers. We have to do something about reducing massive immigration into this country.

THE ENERGY CRISIS

(Ms. DELAURO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DELAURO. Mr. Speaker, let us talk about the energy crisis. Let us talk about electricity costs in California. Let us talk about what the White House is going to do.

Take a look at what CNN said the other day in an article by Major Garrett: "Power of advertising fights electricity rate gaps. Worried GOP White House give blessing to utilities California campaign. The major United States utility companies, at the behest of senior congressional Republicans and with White House approval, are going to launch a multimillion dollar advertising campaign to fight the Federal caps on electricity prices in California."

That is how they are going to handle the energy crisis in California, is by getting their friends in the special interests to launch a media campaign against doing something about energy prices in this country, and particularly in the State of California where it has been an overwhelming burden on families with what their electricity costs have been.

This is the way this administration handles the crisis, not by giving any help to Californians. They have walked away and said, "California, drop dead."

SCHOOL CONSTRUCTION, RENOVATION AND MODERNIZATION

(Mr. OWENS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OWENS. Mr. Speaker, we had a major education bill on the floor for consideration, and we did not permit a single amendment to deal with school construction, renovation, or school modernization. We were afraid to have the issue presented on the floor.

I think we were afraid that we might get a majority vote on it. For some reason, the leadership is afraid of school construction, school modernization, and school repairs. We are pushed into the vehicle of a motion to discharge today; and I urge all of the Members, regardless of their party, to sign the motion to discharge on the Rangel-Johnson bill.

This is a bipartisan bill. It is a bill which impacts on all America, rural as well as urban. It is a bill which almost every school district in America can benefit from. Even charter schools can benefit from a bill which calls for more funding for construction, for modernization, and for repairs.

It is impossible to go forward and really claim we want to reform education unless we are willing to provide the physical facilities that are necessary to educate our children. I urge my colleagues to sign the motion to discharge.

CALIFORNIA'S ENERGY CRISIS

(Mr. KINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KINGSTON. Mr. Speaker, we all just heard a very interesting discussion, and I am being very generous with that word, on the energy crisis. It seems that there are those who are just content in trying to make political hay out of a problem in California during a period of time when demand for energy went up 25 percent; yet the supply that was allowed through government permit was only allowed to increase 6 percent.

Now, who was at the wheel during that period of time? It was generally liberal Democratic Governors and legislators who did not want nuclear power, even though France has nuclear power and has used it safely and efficiently, and about 25 percent of the power in California is nuclear. They do not want to use coal, because, well, you know, we just cannot use coal, so we do not want that. We do not want to use waterpower, because that would keep salmon from swimming upstream and spawning, even though there are ladders that would allow them to do that.

Sometimes we have to say yes to something. Energy means hospital beds, energy means schools and senior citizens homes. Helping people stay warm and stay protected, that is what energy is all about. I wish that it would be time for the folks from California to start working with the rest of the Nation for a common-sense middle road.

CALIFORNIANS LOOKING TO FERC AND WHITE HOUSE FOR LEADERSHIP IN ENERGY CRISIS

(Ms. SOLIS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SOLIS. Mr. Speaker, I am representing a district in Los Angeles County, California; and a week and a half ago I had my first experience going through a blackout. One would think that in a community like mine, in the city of El Monte, that our readiness would be there; that we would have substantial support to be able to help our community out. What I found going through 30 minutes of this blackout was that I was unable to use my cell phone because there was no capacity to make calls. All the electricity went out. All our lights went out on our streets. And no one was notified in advance.

This is a serious problem that we are going through, and it was not even 80
