SEC. 350. (a) FINDINGS.—Congress makes the following findings:

(1) The condition of highway, railway, and waterway infrastructure across the Nation varies widely and is in need of improvement and investment.

(2) Thousands of tons of hazardous chemicals, and a very small amount of high level radioactive material, is transported along the Nation's highways, railways, and waterways each year.

(3) The volume of hazardous chemical transport increased by over one-third in the last 25 years and is expected to continue to increase. Some propose significantly increasing radioactive material transport.

(4) Approximately 261,000 people were evacuated across the Nation because of rail-related accidental releases of hazardous chemicals between 1978 and 1995, and during that period industry reported 8 transportation accidents involving the small volume of high level radioactive waste transported during that period.

(5) The Federal Railroad Administration has significantly decreased railroad inspections and has allocated few resources since 1993 to assure the structural integrity of railroad bridges. Train derailments have increased by 18 percent over roughly the same period.

(6) The poor condition of highway, railway, and waterway infrastructure, increases in the volume of hazardous chemical transport, and proposed increases in radioactive material transport increase the risk of accidents involving such chemicals and materials.

(7) Measuring the risks of hazardous chemical or radioactive material accidents and preventing such accidents requires specific information concerning the condition and suitability of specific transportation routes contemplated for such transport to inform and enable investment in related infrastructure.

(8) Mitigating the impact of hazardous chemical and radioactive material transportation accidents requires skilled, localized, and well-equipped emergency response personnel along all specifically identified transportation routes.

(9) Accidents involving hazardous chemical or radioactive material transport pose threats to the public health and safety, the environment, and the economy.

(b) STUDY.—The Secretary of Transportation shall, in consultation with the Comptroller General of the United States, conduct a study of the hazards and risks to public health and safety, the environment, and the economy associated with the transportation of hazardous chemicals and radioactive material.

(c) MATTERS TO BE ADDRESSED.—The study under subsection (b) shall address the following matters:

(1) Whether the Federal Government conducts individualized and detailed evaluations and inspections of the condition and suitability of specific transportation routes for the current, and any anticipated or proposed, transport of hazardous chemicals and radioactive material, including whether resources and information are adequate to conduct such evaluations and inspections.

(2) The costs and time required to ensure adequate inspection of specific transportation routes and related infrastructure and to complete the infrastructure improvements necessary to ensure the safety of current, and any anticipated or proposed, hazardous chemical and radioactive material transport.
