**SEC. 605. PROTECTION AGAINST AGRICULTURAL BIOTERRORISM.**

Of funds made available to carry out programs under the Foreign Assistance Act of 1961, \$1,500,000 may be made available to North Carolina State University for the purpose of fingerprinting crop and livestock pathogens in order to enhance the ability of the United States Government to detect new strains, determine their origin, and to facilitate research in pathogen epidemiology.

**SEC. 606. COMPLIANCE WITH THE CHEMICAL WEAPONS CONVENTION.**

(a) FINDINGS.—Congress makes the following findings:

(1) On April 24, 1997, the Senate provided its advice and consent to ratification of the Chemical Weapons Convention subject to the condition that no sample collected in the United States pursuant to the Convention would be transferred for analysis to any laboratory outside the territory of the United States.

(2) Congress enacted the same condition into law as section 304(f)(1) of the Chemical Weapons Convention Implementation Act of 1998 (22 U.S.C. 6724(f)(1)).

(3) Part II, paragraph 57, of the Verification Annex of the Convention requires that all samples taken during a challenge inspection under the Convention shall be analyzed by at least two laboratories that have been designated as capable of conducting such testing by the OPCW.

(4) The only United States laboratory currently designated by the OPCW is the United States Army Edgewood Forensic Science Laboratory.

(5) In order to meet the requirements of condition (18) of the resolution of ratification of the Chemical Weapons Convention, and section 304 of the Chemical Weapons Convention Implementation Act of 1998 (22 U.S.C. 6724), the United States must possess, at a minimum, a second OPCW-designated laboratory.

(6) The possession of a second laboratory is necessary in view of the potential for a challenge inspection to be initiated against the United States by a foreign nation.

(7) To qualify as a designated laboratory, a laboratory must be certified under ISO Guide 25 or a higher standard, and complete three proficiency tests. The laboratory must have the full capability to handle substances listed on Schedule 1 of the Annex on Schedules of Chemicals of the Chemical Weapons Convention. In order to handle such substances in the United States, a laboratory also must operate under a bailment agreement with the United States Army.

(8) Several existing United States commercial laboratories have approved quality control systems, already possess bailment agreements with the United States Army, and have the capabilities necessary to obtain OPCW designation.

(9) In order to bolster the legitimacy of United States analysis of samples taken on

its national territory, it is preferable that the second designated laboratory is not a United States Government facility. Further, it is not cost-effective to build and equip another Government laboratory to meet OPCW designation standards when such capability already exists in the private sector.

(b) ESTABLISHMENT OF SECOND DESIGNATED LABORATORY.—

(1) DIRECTIVE.—Not later than February 1, 2002, the United States National Authority, as designated under section 101 of the Chemical Weapons Convention Implementation Act of 1998 (22 U.S.C. 6711), shall select, through competitive procedures, a commercial laboratory within the United States to pursue designation by the OPCW.

(2) DELEGATION.—The National Authority may delegate the authority and administrative responsibility for carrying out paragraph (1) to one or more of the heads of the agencies described in section 101(b)(2) of the Chemical Weapons Convention Implementation Act of 1998 (22 U.S.C. 6711(b)(2)).

(3) REPORT.—Not later than March 1, 2002, the National Authority shall submit to the appropriate committees of Congress a report detailing a plan for securing OPCW designation of a third United States laboratory by December 1, 2003.

(c) DEFINITIONS.—In this section:
