

The Urban League of Hudson County is an organization that has stood for human advancement and achievement, and has worked tirelessly to develop and revitalize our urban areas. Its work has given hope and fortune to so many who call the inner city their home.

Project Reclaim is an Urban League initiative created for the redevelopment of the twenty-six block radius of Martin Luther King Drive in the Ward F community of Jersey City. The new headquarters building is a cornerstone of the Urban League's plan to initiate an economic and social renaissance in this community. And with the community's participation, this renaissance will be a lasting and inspiring model for the country.

Today, I ask my colleagues to join me in honoring the Urban League of Hudson County for providing hope to countless families, and for believing in America by investing and revitalizing our urban areas, when others turned their backs on our cities. The Urban League's accomplishments have paved the way for prosperous and healthy communities throughout New Jersey.

CONGRATULATING THE
WESTLANDS WATER DISTRICT

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 22, 2002

Mr. RADONOVICH. Mr. Speaker, I rise today to congratulate the Westlands Water District of Huron, CA, on the occasion of celebrating 50 years of dedication and service to the communities of the San Joaquin Valley of California on Sunday, November 17, 2002. The 50th anniversary celebration will take place at Harris Ranch in Coalinga, CA.

Farming in the Westlands Water District began during California's Gold Rush era. The first significant irrigation in the Westlands area began about 1915 with the drilling of deep wells by individual operators on large acreages. In 1942, the Westside Landowners Association was established to urge and help finance studies on the feasibility of developing and constructing water supply systems to serve the west side. In 1952, the owners of 400,000 acres of westside land petitioned the Fresno County Board of Supervisors for the formation of the water district. On September 8, 1952, the Westlands Water District was formed.

Westlands is one of the largest agricultural water districts in the United States, with more than 570,000 irrigated acres of diversified crops on some of the most productive soil in the world. Westlands provides water to nearly 600 family-owned farms that average 850 acres in size. Farms within Westlands produce approximately \$1 billion worth of food and fiber per year. This translates into \$3.5 billion in farm related economic activity, nearly one-third of the \$12.5 billion generated by the agriculture-based economy of Fresno County. In addition to food and fiber, Westlands farmers produce jobs, taxes, and strong economic core for the regional economy.

Mr. Speaker, it is my pleasure to congratulate the Westlands Water District of Central California on the occasion of their 50th year anniversary. I urge my colleagues to join me in wishing the Westlands Water District many years of continued success.

HONORING DR. MARTIN
EICHELBERGER

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, November 22, 2002

Mr. HOYER. Mr. Speaker, Dr. Martin Eichelberger is a Professor of Surgery and of Pediatrics at George Washington University and Director of Emergency Trauma and Burn Service at the Children's National Medical Center, in Washington, DC. He is also president and cofounder of the National SAFE KIDS Campaign, and a nationally recognized pediatric trauma surgeon.

The reason Dr. Eichelberger is so highly regarded became evident on Monday, October 7, when he was called out of a skin graft surgery to begin preparing for a 13-year-old shooting victim who was on his way to Children's Hospital from the Bowie Health Center. The boy had been shot by the Washington-area snipers in front of Benjamin Tasker Middle School, and the dozens of fragments from the sniper's bullet had done extensive and life-threatening damage to a number of the boy's vital organs.

Dr. Eichelberger and his team immediately began to make critical decisions about which organs could be saved, and which ones were beyond repair and needed to be removed. The right decisions were made, and the two and a half hour operation saved the boy's life. Although this brave young man faces a long and challenging road to recovery, I am pleased to report that he has been released from the hospital, and I am hopeful that he will in fact make a full recovery from his injuries.

Mr. Speaker, this 13-year-old young man is one of the countless youngsters who have been touched by the gifts of Mr. Eichelberger and whose lives have been saved or made better by his compassionate dedication to public service. The 1989 United Nations Convention on the Rights of the Child states that "Mankind owes to the child the best it has to give." I am proud to say that in Dr. Eichelberger, we have given Washington area youngsters the best we have.

HONORING THE RETIREMENT OF
DUNCAN A. HOLADAY

HON. TOM DAVIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 22, 2002

Mr. TOM DAVIS of Virginia. Mr. Speaker, I rise today to recognize and honor Mr. Duncan Holaday upon his retirement after 35 years of devoted service in support of our great Nation. His last position was with the Department of the Navy, where he served as the Deputy Assistant Secretary of the Navy for Installations and Facilities.

Mr. Holaday was born on February 15, 1943 in Berkeley, CA. He graduated from Beloit College in 1965 with a bachelor of arts degree in philosophy. In 1976, he received a master of business administration degree from Syracuse University.

Mr. Holaday began his Government service with the U.S. Army in 1967 as a management intern. Following completion of his training, he

spent the next 15 years as an operations research analyst with the Army, serving both in the Pentagon and in Europe as well as with the Office of the Assistant Secretary of Defense for Program Analysis and Evaluation. While in this position at OSD, Mr. Holaday was responsible for analyzing Army and Marine Corps force structure, force basing, military construction, and manpower requirements.

From 1982 to 1987, Mr. Holaday served as a director in the office of the Deputy Assistant Secretary of Defense for Installations. It was there that he implemented the Model Installation Program, which was a highly successful test of the proposition that base commanders could do a better job of running their bases when freed of restraints imposed by headquarters. While at OSD, he also developed and implemented DOD-wide real property and base utilization policies.

He later served as the Director of the Defense Acquisition Regulatory System under the Under Secretary of Defense for Acquisition between 1987 and 1990. From 1990 to early 1993, he was the Executive Director of the Defense Ethics Council.

After leaving the Office of the Secretary of Defense in April 1993 and before joining the Department of the Navy in 1994, Mr. Holaday worked with then Vice President Al Gore on the National Performance Review, NPR. There, he was responsible for improving real property acquisition and management within the Federal Government and oversaw government-wide implementation of NPR recommendations for downsizing and streamlining the Federal workforce.

In October, 1994, he was appointed Deputy Assistant Secretary of the Navy, Installations and Facilities. As the Deputy Assistant Secretary, he was responsible for establishing policy and improving oversight on the Department of the Navy's acquisition, construction, use, management, operation, and disposal of real estate, facilities, and housing at Navy and Marine Corps bases worldwide.

During the transition in administrations, between January and August, 2001, he served as the Senior Civilian Official in the Office of the Assistant Secretary of the Navy for Installations and Environment. As Senior Civilian Official, he was directly responsible to the Secretary of the Navy for the formulation of Department-wide policies and procedures, and for overseeing all Department of the Navy functions and programs relating to environmental protection; Navy and Marine Corps facilities and installations; housing; long-range basing and infrastructure requirements; and safety and occupational health for military and civilian personnel. In this role, he provided stability and continuity during the absence of three presidentially-appointed political appointees.

His accomplishments throughout his career, and especially while serving in the Department of the Navy, are extraordinary. He has worked tirelessly to promote investment in the facilities where sailors and marines live, work, and train. He was at the forefront of the Department's efforts to improve military family housing through the innovative use of privatization authorities allowing partnership with the private sector. During his stewardship, the Department of the Navy was able to realize over \$600 million in investment in Navy and Marine Corps family housing, using only slightly over \$100 million of its own resources.
