

with their friends—every Penn State student has benefited from Mr. Paterno's generosity and philanthropy as he contributed significant funds to an addition of the library that was completed in 2000, and was instrumental in raising more than a billion dollars for the university in only 5 years.

Happy 150th Birthday, Penn State . . . may we all be united in our own personal efforts to stand for your admirable principles and in that respect we will all be able to say, WE ARE . . . PENN STATE!

PENN STATE: 150 YEARS OF SERVICE

HON. BILL SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 6, 2004

Mr. SHUSTER. Mr. Speaker, I rise this evening to join my colleagues in recognition of Penn State's 150 years of service to students in pursuit of higher education. Charted in 1854 in response to a request from Pennsylvania State Agriculture Society, Penn State was established as agriculture based school with the goal of applying scientific principles to farming. In time, its ability to draw intellectual talent and broaden its mission enabled it to grow into one of the premier educational institutions in the country.

Over the past 150 years, Penn State has continued to expand its mission to meet the challenges of tomorrow. Today, the University consists of 11 academic schools and 20 campuses throughout the state, including two in my district, located in Altoona and Mont Alto. Additionally, the Penn State system holds a College of Medicine, the Dickinson School of Law and the Pennsylvania College of Technology. All together the combined enrollment in Penn State programs is more than 80,000 students.

To give a sense of this school's impact over the years let me share some facts: one in every eight Pennsylvanians with a college degree is a Penn State graduate and one in 720 people in the U.S. is a Penn State graduate. On personal level, I have felt Penn State's impact in my own life, three of my siblings attended Penn State and numerous members of my staff over the years are Penn State alumni.

So why is it that thousands of students from all walks of life come to Penn State in pursuit of a higher education? They come knowing that their time at Penn State will translate into a top-quality education. Penn State has been consistently recognized as one of the best technical schools in the country and U.S. News and World Report's "America's Best Graduate Schools 2004" selected a number of Penn State programs among the nation's top ten. These strong credentials are proof of Penn State's high standards.

Mr. Speaker, once again I want to congratulate Penn State on 150 years of excellence and to thank all of the professors, administrators, staff, students and alumni who dedicate themselves to making Penn State one of the most valuable educational institutions in our state and our nation.

CELEBRATING THE PENNSYLVANIA STATE UNIVERSITY SESQUICENTENNIAL

HON. DON SHERWOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 6, 2004

Mr. SHERWOOD. Mr. Speaker, it is with great pleasure that I rise before you today to honor the Pennsylvania State University as it celebrates its Sesquicentennial. On February 22, 1855, Pennsylvania Governor William Pollock signed the charter that created what is today The Pennsylvania State University. The University will be celebrating its Sesquicentennial for a full year from July 1, 2004 through June 30, 2005.

Penn State was started as a small college dedicated to the study of scientific agriculture; the University was then designated the Commonwealth's sole land-grant institution in 1863 by the Pennsylvania Legislature and has grown to become one of the world's most renowned public universities. The University is well known not only for its agricultural research and extension programs but also engineering, architecture, social sciences, medicine, and law.

Penn State has been instrumental in creating a heart-assist pump developed by medical and engineering faculty in 1976 to prolong the lives of cardiovascular patients. This pump was the first surgically implantable, seam-free, pulsatile blood pump to receive widespread clinical use. It led to the Penn State Heart, the only artificial heart approved by the U.S. Food and Drug Administration. A Penn State surgeon and two engineers also perfected the world's first long-life, rechargeable heart pacemaker.

In 1955, physics Professor Erwin Mueller became the first person to "see" an atom, using a field ion electron microscope of his own invention. The device was a landmark advance in scientific instrumentation that allowed a magnification of more than 2 million times.

Penn State in 1955 became the first university to be issued a federal license to operate a nuclear reactor, which it continues to use for studies in the peaceful uses of atomic energy and the training of nuclear industry personnel.

Penn State is a leader in food science. In 1892 Penn State offered America's first collegiate instruction in ice cream manufacture, followed soon after by a pioneering "short course" program that has helped to make the University an international center for research in frozen confections. Ice cream gurus Ben & Jerry got their start from a correspondence course in ice cream making from Penn State.

Pennsylvania's and the nation's pure food laws stem partly from the work of pioneer chemist William Frear, who in the early 1900s analyzed foods for government agencies and headed an expert committee whose recommendations shaped the landmark Pure Food and Drug Act of 1906.

In the 1920s, Penn State became the first land-grant college to initiate a comprehensive mushroom research program. Researchers developed improved composts and production practices that were adopted by growers worldwide and also helped Pennsylvania retain its leadership as the number one source of domestic mushrooms.

This institution has contributed tremendously to the Commonwealth and the nation, with

graduates throughout the world as well as the largest outreach efforts with programs in every state and 87 foreign countries. The University has 11 academic schools and 20 campuses located throughout the Commonwealth, as well as an extension program that reaches nearly one out of two residents annually. Penn State annually host the largest all student run philanthropy in the world raising over 3.5 million dollars for The Four Diamonds Fund which provides money for comprehensive care of children with cancer, support for their families, and for research of pediatric cancer.

One out of every eight Pennsylvanians and one in every 720 people in the United States, as well as one out of every 50 engineers and one out of every four meteorologists has a Penn State degree. The university also boasts the largest dues paying alumni association in the nation that was established in 1870.

The University has also produced many championship Division I athletic teams, as well as a record breaking and legendary football coach Joe Paterno.

The 150th anniversary of Penn State will highlight what is important and good about this distinguished institution and the fine people and research that it produces.

Mr. Speaker, I urge you and my colleagues to congratulate the administration, faculty, staff, alumni and students of Penn State as they celebrate the Sesquicentennial of this fine institution. I wish them all the best during their next 150 years.

A TRIBUTE TO HENRY BOLUS

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 6, 2004

Mr. TOWNS. Mr. Speaker, I rise in honor of Henry Bolus in recognition of his service to New York City and his country as well as his accomplishments in the beauty industry.

Henry was born to Henrietta and Roy Bolus on February 19, 1934, in City Hospital of New York, located on Welfare Island now known as Roosevelt Island. He was one of 5 children. Henry's solid education was obtained through the New York City public school system, from kindergarten straight through Brooklyn College. Long coupled with his wife, Henry has gone from teenage friend of Josephine, to a loving husband of more than 50 years, and the cherished and respected father of their two children: Michael Henry and Sabrina Jo. Henry is the warm and generous father-in-law of Ana Alicea; the cheerful, playful, and caring grandfather of three, Michael Luis, Ana Margarita, and Hector Luis; and lastly the proud great grandfather of Jasmine. At the urging of his young children, Henry went from never having a single pet, to happily living with cats and dogs.

Throughout his adult life, Henry has had a long history of dedicated and exemplary volunteer service to the community. He has touched and enriched the lives of many. From an altar boy in the Catholic Church, he found his way to becoming a member of the Knights of Columbus. He volunteers each week as an usher at the 10:30 a.m. Mass at the Shrine Church of St. Jude in Canarsie.

Voluntarily enlisting in the U.S. Army, Henry proudly served his country during the Korean
