

Grants and education initiatives throughout the country. I urge Senators to finally make good on the promise made to parents and students and teachers. And I urge the administration to stop playing games with America's kids. Our schools and our children cannot afford 4 more years of broken promises.

#### DOD AUTHORIZATION CONFERENCE REPORT

Mr. BUNNING. Mr. President, I rise today in support of the Department of Defense Authorization conference report.

This bill funds important priorities for our troops. It gives them a 3.5-percent pay raise. It makes last year's increases in special pay for combat duty and family separation permanent.

The bill expands health care coverage for our National Guard and Reserve members and improves retirement and survivor benefits for those who have served.

The bill also funds the safety needs of our troops for the coming year. It includes over \$750 million for force protection gear, including over \$430 million for body armor. More than \$570 million is provided for additional armored humvees, and another \$100 million will be used on more armor for existing vehicles.

This bill gives our troops the tools they need to do their jobs, and the benefits they and their families deserve.

This bill also contains important reforms to the Energy Employees Compensation Program.

The Bunning-Bingaman worker compensation Amendment was added in the bill when it was on the Senate floor. The amendment included reform for the compensation program and was cosponsored by a bipartisan group including myself and 18 other Senators.

I thank the Senate managers, Senators WARNER and LEVIN, for their consideration and support of this important provision in the conference report.

This provision will fix the problems with Subtitle D of the Department of Energy's Energy Employees compensation program for sick injured cold war workers at Energy sites throughout the country.

Since the end of World War II, workers at Department of Energy sites across the country helped our Nation face threats from our enemies by creating and maintaining our Nation's nuclear weapons.

Many of these workers sacrificed their health and safety and were exposed to harms unknown at the time in their work to preserve our freedoms.

Congress passed a compensation program for the energy workers in 2000 in an effort to help these workers.

The Department of Energy's Subtitle D program failed miserably. During the past 4 years the Department received \$95 million but processed and paid only a small number of the more than 25,000 claims for workers who were made ill by their work.

DOE's miserable job with this program was especially troubling because of the Kentucky workers at the Paducah Gaseous Diffusion plant, where the uranium shipped to sites throughout the country was refined.

Under DOE's operation, more than 3,000 former Paducah workers have filed for compensation for their illnesses. But zero Paducah workers have received compensation for their illnesses.

The provision in this bill transfers Subtitle D claims processing operations from the Department of Energy to the Department of Labor, which is currently handling thousands of similar claims under Subtitle B of the program.

The Department of Labor runs one of the largest and most efficient claims operations in the country.

Payments will be made directly by the Department of Labor to the worker or survivor. This solves the current issue of no willing payer for all eligible claims. Workers will get prompt medical care for their covered illnesses with no need to go through another system at the State.

This reform effort finally fulfills the promise that Congress made to DOE workers in 2000.

Many of these workers are ill and dying. Because of this reform, they will not have to wait for the Department of Energy to get its act together to process and pay the valid claims in a timely manner. DOL will take over these operations and process the claims much more efficiently and get deserving claimants the compensation Congress promised.

I urge you to support this conference report to help protect those workers who risked their health and safety to help us win the cold war.

Mr. JEFFORDS. Mr. President, I rise to express my concern about section 3116 of the fiscal year 2005 Department of Defense Authorization Conference Report, S. 4200, which the Senate passed by unanimous consent this week. Section 3116 establishes new procedures for the disposal of high-level radioactive waste in South Carolina and Idaho that resulted from the reprocessing of spent nuclear fuel at Department of Energy, DOE, facilities.

As my colleagues will recall, 48 members of this body voted to remove these provisions during Senate floor consideration of the fiscal year 2005 Department of Defense Authorization bill. Senators were concerned that the provisions in the Senate-passed bill would allow the Department of Energy to leave millions of gallons of high-level nuclear waste next to drinking water supplies in South Carolina. While these provisions have been modified in conference and some changes have been made in an effort to strengthen the language, I regret to say that loopholes still remain that cast serious doubt about whether the environment near these facilities will be protected.

I want to be certain that this language does not preempt the ability of

States in which these facilities are located to issue permits to protect the surface and drinking water near these DOE facilities. The new conference report language in section 3116 appears to protect the right of states to approve closure plans or issue permits for the closure of nuclear waste containing tanks. The opening lines of section 3116 specifically eliminates the ability of the Federal Government to regulate these tanks under the Nuclear Waste Policy Act of 1982, the Energy Reorganization Act of 1974 or "other laws that define classes of radioactive waste." This language is silent on state's authority, delegated to them by the federal government under the Clean Water and Safe Drinking Water Acts, to issue permits protecting surface water and drinking water. The conferees did not exempt the requirements of the Clean Water and Safe Drinking Water Acts. These laws and the regulations that implement them, which do contain lists of radioactive pollutants, are not overridden. It is my hope that these laws will be implemented the way the conferees intended, and States will continue to be allowed to protect their citizens from exposure to radioactivity through the water they drink and our lakes, rivers, streams and wetlands.

I am also concerned that nuclear waste greater than class C, and generally not suitable for near surface disposal, will remain onsite with limited oversight. Section 3116 allows these wastes to stay onsite pursuant to a plan developed by the DOE in consultation with the NRC. I would have preferred that NRC be explicitly required to follow current regulation regarding disposal of greater than class C waste. Section 3116 instead requires a new "plan" that has no particular requirements. Mr. President, radioactive waste remains environmentally harmful for an extremely long period of time. It had been my hope that we could have been more clear about the guidelines for its disposal.

As a member of the Committee on Environment and Public Works, one of the Senate Committees with jurisdiction over the management of nuclear materials, I am deeply concerned with this provisions. It is unfortunate that it will soon be law. I am concerned that, in the future, with one small change in this legislation, several other States may find their water resources at risk.

Indeed, if this waste sludge remains, the Savannah River site would continue to be among the most radioactively contaminated sites on the planet. It is my hope that the agencies responsible for implementing this section will do so responsibly, and I will be monitoring their actions.

#### 20TH ANNIVERSARY OF NATIONAL BREAST CANCER AWARENESS MONTH

Mr. JOHNSON. Mr. President, I rise today to share my support and
