

an obligation to people on our coasts to fund NOAA and see that it can do its job well, and we should work to fulfill that obligation.

In the United States, NOAA's National Weather Service operates two tsunami warning centers, the Pacific Tsunami Warning Center in Hawaii and the West Coast/Alaska Tsunami Warning Center in Alaska. In the event of a tsunami, the Centers will issue local tsunami advisories to the Emergency Managers Office of each potentially affected State. The decision to evacuate a coastal area rests with each responsible EM. The Seattle Post Intelligencer reported that the current U.S. network consists of six deep-sea sensors in Alaska, Washington, Oregon, Hawaii, and near the equator off the coast of Peru. In addition to the six tsunami buoys, the warning system takes advantage of existing tidal monitoring stations and USGS seismic monitoring and reporting capabilities. The NOAA official in charge of the system described the current configuration as the "bare minimum" needed for adequate warning. There are plans to expand the system to 20 tsunami buoys in the next five years, 10 of which will be placed in the Aleutian Islands. NOAA is estimating one-time costs of \$8.7 million and recurring costs of \$8.5 million to enhance the current system.

NOAA also runs a Tsunami Research Program out of the Pacific Marine Environmental Laboratory in Seattle. The objective of the Tsunami Research Program is to improve warning guidance, hazard assessment, and implementation planning. The Joint Institute for the Study of the Atmosphere and Ocean, a partnership between NOAA and UW, has also worked with the Tsunami Research Program on hazard assessment modeling.

PMEL has also developed instruments it has named tsunameters. With six deployed in the middle of the Pacific since 2001 in waters 2.5 to 4 miles deep, the tsunameters can detect the perturbations in water pressure as a tsunami passes above. When it detects something, it sends a signal by sound waves to a buoy on the surface. The signal is relayed to a satellite and then back to Earth to tsunami warning centers in Hawaii and Alaska, a process that takes only 2 minutes.

No significant tsunamis have yet occurred in the Pacific for the tsunameters to detect, but they have prevented a false alarm. In November 2003, a magnitude 7.8 undersea earthquake occurred near the Aleutian Islands, spurring officials to issue a tsunami warning. When the wave passed over a tsunameter, they saw it was small and canceled the warning.

In conclusion, I again express my condolences and those of Washingtonians to those who have lost family members in this tragedy. The Senate should do all it can to help all those who face a long and difficult cleanup.

Mr. SALAZAR. Mr. President, I wish to express my profound condolences for

the victims of the earthquake and tsunami in Southeast Asia, South Asia, and Africa. I commend our two leaders for writing S. Res. 4, passed unanimously by the Senate earlier this afternoon. It is right and fitting that on our first day of business in this Congress the Senate has united to send a message of hope and leadership to the victims of this horrible disaster.

We were all mortified to learn of the devastation caused by this disaster as we awoke after a day of Christmas celebrations. The news from this disaster has been arriving so fast and furious that it is hard to put the kinds of numbers we are talking about in perspective. We know there are more than 150,000 people dead—that is 150,000 personal tragedies. And there are hundreds of thousands of others who are homeless and whose lives have been turned upside down by this tragedy. We said clearly to their families and loved ones in our resolution today that we are here to help them recover and rebuild.

The generosity and compassion of America will be felt in Bangladesh, Burma, India, Indonesia, Kenya, Malaysia, Maldives, Seychelles, Somalia, Sri Lanka, Tanzania, and Thailand. In fact, our troops and humanitarian assistance professionals are already bringing hope to those countries in the form of water, food and comfort. We thank our troops for their hard work and for showing the world the best of America, as they always do.

I am also mindful this afternoon that this terrible disaster has wreaked havoc in our own country and in my own state of Colorado. My thoughts and prayers go out to all the victims and their families.

---

#### RESERVATION OF LEADER TIME

The PRESIDENT pro tempore. Under the previous order, leadership time is reserved.

---

#### MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, there will be a period for the transaction of morning business with Senators permitted to speak therein for up to 10 minutes each.

Mr. FRIST. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DURBIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered. The Senator is recognized.

---

#### TRIBUTE TO MONSIGNOR IGNATIUS McDERMOTT

Mr. DURBIN. Mr. President, it is with sadness that I rise to pay tribute

to the life of a great friend, a great man who passed away on December 31. His name was Monsignor Ignatius McDermott and he was known as Father Mac, from the city of Chicago. He was a model of compassion, commitment, and service.

On December 31, when he left this Earth, he was 95 years old. He made his name in Chicago because of his dedication to some of the poorest people who lived in that city. When he was a young priest, he had many options. He worked in parishes and had different assignments, but he knew there was a special calling in his life, a calling that very few priests, very few people would even consider. Monsignor McDermott, Father Mac, dedicated his life to walking Chicago's meanest streets, skid row, and becoming the priest, the chaplain, of thousands of people on those streets addicted to drugs and alcohol.

Ironically, he died on the 29th anniversary of the day that he cofounded Chicago's largest addiction treatment center, Haymarket Center.

He was born in the "Back of the Yards" neighborhood. If you read Upton Sinclair's book "The Jungle," you know what the stockyards meant to the city of Chicago. That is where the immigrant families headed. That is where they could find a job that required hard work and a strong back and barely make a living. That is where he grew up.

He was known in his youth as just the kid brother of the famous alderman, Jim McDermott. He was ordained to the priesthood in 1936. He was assigned to what is now known in Chicago as Maryville Academy, a home for neglected and abandoned orphaned children. It was there that he saw for the first time in his ministry how alcoholism affected families.

He disagreed with the common sentiment in Chicago and across the country that alcoholism was just a character flaw: If you had a little better character, you might overcome that problem. He understood it was a disease and it needed to be treated. So Father McDermott brought Alcoholics Anonymous, which in the late forties was really a creation for the middle class of America, to the people of skid row in Chicago, people whose alcoholism had left them in the worst possible plight.

In 1963, he founded the Central States Institute of Addiction because he recognized the need for qualified treatment counselors and educators. It was there that Illinois's first program for offenders convicted of driving under the influence of alcohol was created.

In the 1970s, he led the charge in our State to decriminalize public drunkenness. On New Year's Eve 1975, along with Dr. James West, who would go on to direct the Betty Ford Center in California, Father McDermott founded Haymarket Center.

I have had the privilege in public life to meet some amazing people, and I count Monsignor McDermott—Father Mac—as one of those people.
