

area. "The Congress shall have Power . . . To make Rules for the Government and Regulation of the land and naval Forces."

There is a widely held belief at America's universities that it is somehow unfair that the American military is disproportionately made up of minorities and those from a disadvantaged socioeconomic background. However, it is the height of hypocrisy to complain that too many of the sacrifices in the military are made by people from lower income groups and at the same time bar the military from recruiting at prestigious universities.

Clearly, there is an antimilitary bias at many elite universities that has nothing to do with the military's policy of "don't ask; don't tell." Too many of the spokespeople and prominent officials in academia are relentlessly anti military and antiwar regardless of the circumstances.

The usual, tired complaints from the halls of academia ring especially hollow in the post 9/11 world. Who does the NYU Law School faculty believe will protect it from another terrorist attack on downtown New York if not the U.S. military?

The complexity of our military systems creates a demand for recruits with a diverse backgrounds and education levels including bachelor degrees and law degrees. To restrict ROTC offerings on college campuses limits the pool of applicants necessary to run vital military systems.

Conversely, men and women should have an option to prepare for military careers with the support of Federal Government. Restricting ROTC from campus limits and restricts career options.

It is a double standard for universities to be willing to accept all types of funding from the Federal Government, but are unwilling to support America's men and women training to defend the freedoms of our country.

I strongly urge all of my colleagues to vote for this resolution.
