

fact that it was done decades ahead of predictions and at a cost vastly less than expected is a testament to all those involved, and I think we have an obligation to make sure that workers' benefits are carried forward and that they are properly compensated for work-related health problems.

Getting to this day has been long and difficult. But the Colorado congressional delegation worked hand-in-glove with the local communities, DOE, and the contractors to work through the obstacles and I think lessons learned at Rocky Flats can be applied to the cleanup challenges at other nuclear-weapons sites.

I look forward to the next major chapter—transfer of most of the Rocky Flats site to the Interior Department for management as a National Wildlife Refuge. But getting that chapter properly written will require some additional steps, notably including the acquisition of mineral rights at Rocky Flats that are now in non-Federal ownership.

To facilitate that acquisition, I have introduced legislation (H.R. 4181) to authorize DOE to expend funds to acquire some or all of the minerals, including \$10 million from its appropriation for fiscal year 2006. The bill also provides that DOE's expenditure of \$10 million for that purpose (or, under certain circumstances, an appropriate payment to specified Federal and State officials for acquisition of Rocky Flats minerals or for habitat restoration at Rocky Flats) will satisfy certain claims the State of Colorado might bring for natural resources damages resulting from past discharges of hazardous substances at or from Rocky Flats).

The bill also would give the Interior Department two additional methods (either instead of or in addition to purchase for cash) for completing such acquisitions—namely: by giving "credits" that could be used instead of cash to pay for oil and gas leases on the Outer Continental Shelf; and/or by allowing federal lands or minerals anywhere in the country to be exchanged for the Rocky Flats minerals (under current law, such exchanges can only occur within the same state—Colorado lands/minerals for other Colorado lands/minerals).

Other parts of the conference report are also important for Colorado, including the funding for several Bureau of Reclamation projects in our State, including the Colorado-Big Thompson and the Frypan-Arkansas projects as well as the ongoing construction of the Animas-La Plata project.

Similarly, the conference report provides needed funds for operation and maintenance of a number of reservoirs operated by the Army's Corps of Engineers as well as for other Corps activities in Colorado, including aquatic restoration work involving Goose Creek and Lower Boulder Creek.

I am very glad to note that the bill will provide funds for completing construction of the new science and technology facility at the National Renewable Energy Laboratory.

I find it highly ironic, however, that the new NREL facility comes at the expense of the very renewable energy research and development programs that would be conducted within it. It's conceivable that we'll have new buildings but nothing to fill them with—no scientists or other NREL personnel, since many of them will lose their jobs due to deep cuts in program funding.

As co-chair of the Renewable Energy and Energy Efficiency Caucus in the House, I have

worked for years to increase—or at a minimum, hold steady—funding for DOE's renewable energy and energy efficiency research and development programs.

Given the finite supply and high prices of fossil fuels and increasing global demand, investing in clean energy is more important than ever. DOE's renewable energy programs are vital to our Nation's interests, helping provide strategies and tools to address the environmental challenges we will face in the coming decades. These programs are also helping to reduce our reliance on oil imports, thereby strengthening our national security, and also creating hundreds of new domestic businesses, supporting thousands of American jobs, and opening new international markets for American goods and services.

But for our investment in these technologies to pay off, our efforts must be sustained over the long term. This conference report does not do that.

Though some of the renewable energy accounts are increased from FY05 levels, it is an illusion. The EERE accounts are earmarked so heavily that there is little left of the core programs.

While the biomass line is up slightly from FY05, fully 53 percent of the FY06 funds are earmarked. Wind is slightly reduced from FY05 levels, but this is after repeated cuts—11 percent in just three years. Factoring in earmarks makes the situation even worse. The bill earmarks fully a third of the funds appropriated for wind energy for Member projects. Solar energy funding is down from FY05 levels, and also earmarked—17 percent of the total goes to Member projects.

I am concerned that year by year, DOE's renewable energy and energy efficiency programs seem to be losing—through gradual cuts, shifts of more EERE dollars to hydrogen and fuel cells and out of core renewables technologies, and earmarks.

These cuts will only increase U.S. vulnerability to energy supply disruptions, worsen fuel price volatility, and cause higher energy prices overall unnecessarily, and are especially ill-advised at a time when the need for a secure, domestic energy supply is so crucial.

So, Mr. Speaker, while I regret that they could not adequately address all our needs, in Colorado or elsewhere, I appreciate what the conferees have done and urge the House to pass this important conference report.

SECURE ACCESS TO JUSTICE AND COURT PROTECTION ACT OF 2005

SPEECH OF

HON. JOHN L. MICA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 9, 2005

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 1751) to amend title 18, United States Code, to protect judges, prosecutors, witnesses, victims, and their family members, and for other purposes:

Mr. MICA. Mr. Chairman, I am pleased to speak in support of the Secure Access to Justice and Court Protection Act, legislation which strengthens criminal penalties for crimes

against United States judges, federal law enforcement officers and federally funded public safety officers.

Also included in this bill is an important provision from legislation I authored, H.R. 3833—the National Guard Emergency Protection Act, which increases federal protection to our National Guardsmen.

This measure was offered as a result of assaults against members of the National Guard while they were engaged in rescue and law enforcement operations in New Orleans following Hurricane Katrina. Unfortunately, I found that our National Guardsmen are not protected by federal law if they are assaulted or killed in the line of duty while serving States during Presidentially declared disasters and emergencies. My bill, now included in the Secure Access to Justice and Court Protection Act, extends the same penalties to those who attack both federal and non-federalized members of the Armed Services.

I would like to thank Chairman SENSENBRENNER and his staff for working with me to ensure that our National Guardsmen have the further support of the Federal Government.

TRIBUTE TO PHILIP MCGOLDRICK

HON. JIM MARSHALL

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 10, 2005

Mr. MARSHALL. Mr. Speaker, I rise today to honor Philip McGoldrick, of Macon, Georgia, for his efforts on behalf of Middle Georgia's children and for his long record of community service and activism.

In September, for his successful efforts to bring the joy of Christmas to underprivileged children in Middle Georgia, the Marine Toys for Tots Foundation recognized Macon's Toys for Tots campaign as the 2004 Local Community Organization of the year. With 481 local community campaigns nationwide, this is a tremendous achievement and a great honor for Middle Georgia. As the coordinator for Macon's Toys for Tots campaign, Philip also received a commendation from the United States Marine Corps for his exemplary administration, his tireless dedication, and his commitment to helping children in need.

When I learned of the devastation wrought by Hurricane Katrina in Louisiana, Mississippi and Alabama, and seeing first hand the nationwide outpouring of support and assistance, it really struck home for me exactly how much a small number of caring people—or even one dedicated volunteer—can do to reduce hardship and suffering. In Middle Georgia, we are extremely lucky to have many kind souls willing to help and support those less fortunate than themselves.

Mr. Speaker, one of Middle Georgia's kindest, most caring souls is Philip McGoldrick, and I am proud to call him my friend. Philip's recent success with Toys for Tots is not an isolated event. He is active in all manner of civic organizations which do tremendous good for the Middle Georgia Community. Philip is a charter member of CrimeStoppers and the chairman of the Macon Sports Hall of Fame, and he founded Macon Youth Day, just to name a few of the many hats he wears.

In response to his recent commendation, Philip's modest reaction was typical. "I do this because I love it, not to win an award," Philip told the Macon Telegraph's Ed Grisamore. "This is really Macon's award."

Mr. Speaker, community leaders like Philip McGoldrick are a real treasure for a city like Macon. Already, Philip is working on ways to help this year's Toys for Tots annual drive bring Santa to every child in Macon, but he hasn't forgotten the critical need to bring Santa to the children left devastated by Hurricane Katrina. I can only wish that other cities each have at least one Philip McGoldrick to lead, organize and motivate civic organizations. Truly, the "gold" in the Philip's surname must reference his heart, for it is made of pure gold.

HONORING THE NORRISTOWN
AREA HIGH SCHOOL HALL OF
CHAMPIONS INDUCTEES

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 10, 2005

Mr. GERLACH. Mr. Speaker, I rise today to honor five distinguished men and women on the occasion of their induction into the Norristown Area High School Hall of Champions Association.

The Norristown Area High School Hall of Champions Association was established in 1977 to honor and commemorate the athletic accomplishments of distinguished alumni of the Norristown Area High School.

The 2005 Annual Hall of Champions Inductees will be John Sewell III; Willie A. Suber, posthumously; Robert V. Mitchell; Angela Henry Lee; and Melissa Mary Kelly.

John Sewell III, Class of 1954, was a football and track and field standout for three years in high school and won the District One shot put title with a distance of 49 feet, 11³/₄ inches. Mr. Sewell also played both offensive and defensive line positions in football. During his career, he earned all-star team honorable mention.

Willie A. Suber, Class of 1958, received All-Suburban honors as halfback during the 1957 Eagles football team's undefeated season, which was only the second in school history. Mr. Suber also participated on the track and field team and ran both the 100 and 200 yard dashes. Mr. Suber passed away in 1994.

Robert V. Mitchell, Class of 1961, was well-known in high school as a basketball, baseball, and track star. Mr. Mitchell helped lead the basketball team to the Suburban One title in the 1960-1961 season. Mr. Mitchell also batted .313 for the baseball team which placed second in the league, and he set a school high jump record of 6 feet 4¹/₂ inches while helping the track team to the District One title in 1961.

Angela Henry Lee, Class of 1987, was the captain of the indoor track team and co-captain of the 1984 outdoor team. In 1984, she won four medals in the PIAA State title meet in the 400 meter dash, the 100 meter dash, the 4x100 yard relay, and the 4x400 yard relay. Mrs. Lee also won four additional medals in the District One track meet as well as winning three gold medals in the Suburban One championships.

Melissa Mary Kelly, Class of 1998, was an outstanding basketball and softball player. Her athletic accomplishments resulted in her being named to the first team Suburban One League all three years, while also leading the basketball team in scoring and assists. Ms. Kelly also won all-league honors for her athletic talent in softball all three years.

Mr. Speaker, it is an honor to rise today to recognize these remarkable and talented men and women who have all excelled in their respective sports and have made a positive impact on their school and community.

RECOGNITION OF INTERNATIONAL
DAY OF PRAYER FOR THE PER-
SECUTED CHURCH

HON. PATRICK T. McHENRY

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 10, 2005

Mr. McHENRY. Mr. Speaker, in recognition of the International Day of Prayer for the Persecuted Church on November 13, 2005, I commend Burke Community Bible Church and Pastor David Doster, New Day Christian Church and Pastor George Logan, and First Hmong Baptist Church and Pastor Nhia Yee Her for gathering in worship and prayer on behalf of Christians around the world who are persecuted for their faith.

Hebrews 13:3 says, "Remember them that are in bonds, as bound with them; and them which suffer adversity, as being yourselves also in the body." This day of prayer is an opportunity to live that verse, and to remember that prayer changes things. Today we place a special focus on their situation, and we need to continue to remember and pray for those being persecuted, those involved in the persecution, and those that choose to ignore it.

With over 100,000 United States churches representing nearly every denomination taking part in this day of remembrance and prayer, I urge the country to remember those believers who are suffering because of their faith.

As Christians living in a free nation, we often take our freedoms for granted. Remembering those who can not worship in freedom should cause us to thank God for His blessings to us, and compel us to live out our faith in every single aspect of our lives.

RECOGNIZING JACK C. SMITH ON
THE 50TH ANNIVERSARY OF
FOOD CITY

HON. RICK BOUCHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 10, 2005

Mr. BOUCHER. Mr. Speaker, I rise today to honor one of my constituents. On November 17, 2005, Jack Curtis Smith, founder of K-VA-T Food Stores, Inc., will mark his 50th year in the grocery business in southwest Virginia, and I would like to take this occasion to recognize his many contributions to my Congressional District. K-VA-T Food Stores, Inc. is an important asset in southwest Virginia, eastern Kentucky, and northeast Tennessee, employing more than 11,000 residents and honoring a strong commitment of service to the region.

Jack C. Smith returned to his hometown of Grundy, Virginia, in 1954 after graduating from the U.S. Naval Academy in Annapolis, Maryland, and serving in the U.S. Navy for 10 years. While standing in a lengthy line at Grundy's only grocery store, Jack Smith decided that his hometown needed a larger, more convenient supermarket with an emphasis on customer service. Earl Smith, Jack's uncle, Ernest Smith, Jack's cousin, and Curtis Smith, Jack's father, shared the vision that Jack could meet this need. These four local businessmen formed a partnership and began work with the Piggly Wiggly Corporation to construct a new, state-of-the-art grocery store, and on November 17, 1955, Jack Smith and his partners opened the Piggly Wiggly supermarket in the town of Grundy.

After experiencing great success with his Grundy store, Jack Smith acquired grocery stores in eastern Kentucky, southwest Virginia, and east Tennessee from grocery chains such as White Stores, Food City, Winn Dixie, and Piggly Wiggly. Retaining the Food City name, Smith remodeled and modernized the stores, adding features such as wide aisles, larger selection of products and computerized check-out systems, designed to provide the customers greater accessibility to the products and to facilitate an easier shopping experience. Smith soon created K-VA-T Food Stores, Inc., as the organization under which his supermarkets would operate. K-VA-T is an acronym for Kentucky, Virginia, and Tennessee, the States in which his grocery stores are located.

The work begun 50 years ago by Jack C. Smith has borne fruit. Today K-VA-T Food Stores, Inc., operates nearly 100 Food City stores. K-VA-T has grown to become the largest employer in the Tri-Cities region of Tennessee and Virginia and the fifth largest employer in the Commonwealth of Virginia. Despite its development as a large retail grocery chain, the headquarters of K-VA-T as well as its distribution facility remain in southwest Virginia near the location of its first supermarket.

Most importantly, K-VA-T has adopted a policy of improving the lives of the residents in the communities it serves. The company is 16 percent employee owned. Jack Smith once stated, "The ultimate objective of K-VA-T Food Stores is to fulfill its ongoing commitment to planned growth. My wish is that the public, our corporate officers, associates and patrons can find their lives enriched because of this company's existence and its efforts. But first, and foremost, let us remember that the friendship of those we serve is the foundation of our progress." For 50 years, Jack Smith has been making investments in the communities his stores serve in cities such as Knoxville, Tennessee, as well as small, rural towns such as Grundy, Virginia.

K-VA-T supports local farmers and produce vendors by selling locally grown produce in its stores. Through the Apples for Students program, K-VA-T has provided over \$9.2 million in computers and computer equipment to over 700 schools. The company regularly participates in local food drives and provides assistance to chapters of the Second Harvest food bank network. Semi-annually, K-VA-T sponsors Food City Family Race Night, which occurs during the week before the NASCAR races the company sponsors. Food City Family Race Night draws over 40,000 race fans,
