

Mr. GEORGE MILLER of California. Mr. Speaker, Members of the House, the disaster that we now see unfolding in the Middle East with the war in Iraq was set in motion when this President, against the advice of so many generals and military people, and against the advice of so many Middle East experts, made the decision to invade Iraq.

It was a war of choice, a choice not made by the American people, but a choice made by this President. And he set in motion the disaster that we now see. We understand that this decision that he made has been paid for by the lives and the injuries and the harm done to our men and women in uniform.

Last night he asked for a continuation of that disastrous choice with no new plan to change the outcome, but to simply extend the time in which our military will be engaged in Iraq.

It is foolhardy to believe that we should be sending our troops into Iraq based upon the theory that the Shia majority in Iraq for the first time in 100 years and the growing Shia majority across the Middle East is going to negotiate away their ability to act as a majority. This is a foolhardy trip, and we ought to vote against the President's proposal.

IRAQ NEEDS TO DEFEND ITSELF

(Mr. AL GREEN of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AL GREEN of Texas. Mr. Speaker, it is time for the Iraqis to stand up and defend themselves.

Mr. Speaker, we have freed them from a ruthless dictator. We have lost more than 3,000 lives. We have more than 20,000 wounded. We have helped them to construct a constitution, to reestablish their constabulary. We have helped them hold an election, and we are spending more than \$177 million, not per year, not per month, not per week, but per day.

It is time for them to stand up and defend themselves. Do not send 20,000 in; bring 20,000 troops home. It is time for them to stand up and defend themselves.

OPPOSE PRESIDENT ON ESCALATION

(Ms. WATERS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. WATERS. Mr. Speaker and Members, last night the President of the United States addressed the Nation. He had promised us that he was going to come up with creative solutions because he acknowledged his failures. He has designed what he called "a new way forward." That is another one of his sound bites.

He tried to cloud the escalation by saying sending 20,000 new troops was a surge of some kind. There was nothing new or creative about his message.

Remember, it was the President of the United States who promised us that they were going to get rid of the weapons of mass destruction, only for us to find out there were no weapons of mass destruction.

Remember when he rolled out on the battleship saying "Mission Accomplished"?

Remember when he promised us that we would get the proceeds from the oil in Iraq and that would be used to rehabilitate Iraq?

Remember when they promised us that we would be welcomed with open arms and we were winning the war?

Well, there this is no new real exit strategy. This is no new way forward. As a matter of fact, this is a new way backwards. And then on top of that, he had the audacity to tell us he wants a billion dollars to give to the Iraqis for jobs and employment. Give me some of that money for our cities and our rural communities. We could really use it. We have to oppose the President on this escalation.

DON'T VETO HOPE

(Mr. COOPER asked and was given permission to address the House for 1 minute.)

Mr. COOPER. Mr. Speaker, the American people want us to stop bickering in Washington and to start making progress on the many problems we face.

Well, many millions of American families face dreaded diseases: cancer, diabetes, Parkinson's, Alzheimer's, you name it. And today we have an exciting opportunity to vote for a chance towards curing those diseases.

Last year in the Republican Congress, the vast majority of this body and the Senate voted for embryonic stem cell research. This year, the majorities will be even larger.

I urge the President not to veto this legislation as he did last year. It is the only veto of his entire Presidency. He is the first President since Thomas Jefferson to have vetoed so few bills, but he chose last year to veto hope. I urge the President not to veto hope this year.

FAILED IRAQI POLICY

(Mr. DEFAZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEFAZIO. Mr. Speaker, the President persists, despite the contrary advice of his most experienced and senior military officers in the field, that escalation is the answer to the chaos, the sectarian strife, in Iraq.

He is not only perpetuating his failed status quo stay-the-course strategy; he actually is going to undermine the U.S. forces and our allies in the most critical conflict.

Remember his phrase, "Fight them there or fight them here"? Well, that is true, but not in Iraq. That is true in Afghanistan.

Remember "Osama bin Ladin: dead or alive"? The Taliban, al Qaeda? Well, they are resurgent and they are going to threaten Kandahar we are told by our commanders in the field in the spring, and they have asked for reinforcements.

And what is the President doing to perpetuate his failed policy in Iraq, an unnecessary war in an area that doesn't threaten the United States of America? He is withdrawing U.S. troops from southern Afghanistan and sending them on a failed mission in Iraq.

He could be the only President to lose two wars at the same time.

□ 1030

SAVING LIVES OF AMERICANS

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, it is not often that we have such serious moments in the House to save lives, so I rise today to offer to the President an opportunity to not use the United States military for 9/11 calls, to bring our troops home, and to focus on a political-diplomatic solution of solving the contentious civil disunity between Sunnis and Shiites. I oppose the escalation.

But I rise today to save the lives of those who suffer from Parkinson's disease and Alzheimer's by asking for an outstanding and enthusiastic vote for stem cell research. We must realize that even though amniotic fluid research is going on, it is not a substitute for embryonic stem cell research.

We can do this together. We can save American lives. We can do the right thing and ask the President, do not utilize your veto. Help to save the lives of Americans. Bring our troops home, and support stem cell research.

ALLOW IRAQIS TO CONTROL THEIR FUTURE

(Mr. KAGEN asked and was given permission to address the House for 1 minute.)

Mr. KAGEN. Mr. Speaker, we must begin to think differently in America, because the path we are on now is morally unacceptable. More than 3,000 brave Americans have perished in Iraq and more than 650,000 Iraqi civilians are dead. President Bush's newest war proposal is not a complete and comprehensive plan, and more importantly, it is not based on realities on the ground and in the region.

The President believes that 20,000 additional U.S. troops will change the outcome in Iraq. He was wrong to invade Iraq, and he is wrong now. Instead of decreasing the violence, last night's proposal will increase the risks to everyone in Iraq and the surrounding region, and it will not bring an end to the Iraqi civil war. Clearly it was bad judgment to have invaded Iraq. It will be even worse judgment to remain.

Simply put, we do not belong in Iraq, and we are still headed in the wrong direction. We all support our troops, but we must not support the administration's policy of more of the same poor judgment. We must begin to withdraw our forces and allow the Iraqis to take control of their own future.

AMERICAN PEOPLE HAVE SPOKEN ON IRAQ

(Mr. CUMMINGS asked and was given permission to address the House for 1 minute.)

Mr. CUMMINGS. Mr. Speaker, I rise today to say to our President that the people have spoken and they have spoken quite loudly. Just the other night I ran into the family of Sergeant Kendall Waters-Bey, who was one of the first military folks who died in the war. He is from my district.

His family just said one thing. "Ask the President what his plan is, his true plan for getting us out of there. Ask why is he being so stubborn. Ask how many have to die, like our relative died, and we still don't fully understand why."

The President presented us with some statements last night, but we have heard them before. The American people have been patient, and they have simply run out of patience. So we must continue to loudly speak into the President's ear that the people do not want this war. They want to get our folks out of Iraq. Three thousand have already been killed, and others are being harmed every day.

FINDING CURES FOR DEBILITATING AND DEVASTATING DISEASES

(Mr. COSTA asked and was given permission to address the House for 1 minute.)

Mr. COSTA. Mr. Speaker, I rise today in support of H.R. 3, a bill that I consider a pivotal step toward the fight against devastating and debilitating diseases.

The narrow view of stem cell research espoused by the administration places unrealistic limitations on the medical research capabilities of this Nation. The administration's position on this critical issue leaves patients across the country without the hope that they can be cured of the effects of medical conditions, including but not limited to Parkinson's and Alzheimer's diseases, as well as spinal cord injuries.

Every person who has had to watch a mother, a brother, a friend, a family member, knows of this terrible, terrible, difficult problem. I know. I have had that experience.

These conditions may be curable through stem cell research, but it will only be possible if Congress asks for full-fledged research to take place. We owe it to the afflicted and their families to put forth the best efforts to find cures for these debilitating medical conditions.

I urge the House to put political posturing aside and give hope to patients and families by passing this important measure today.

IN SUPPORT OF EMBRYONIC STEM CELL RESEARCH

(Mr. GENE GREEN of Texas asked and was given permission to address the House for 1 minute.)

Mr. GENE GREEN of Texas. Mr. Speaker, today, we will vote on a bill to provide changes to a merciless Federal stem cell policy, changes that are still relevant and still necessary despite the recent discovery of stem cells derived from amniotic fluid cells.

To be sure, this is an important discovery, but the same scientists championing this research have stressed the amniotic cells are not a substitute for embryonic stem cells. While they hold the great promise of turning into some cell types, only embryonic stem cells can divide indefinitely and evolve into any cell type in the body.

If anything, the recent amniotic stem cell study proves that it is critical to explore all kinds of stem cell research, since advancements in one area of stem cell research could lead to life-saving discoveries in others. By prohibiting Federal funds of more embryonic stem cell research, the current policy shuts the door on this collaborative research and slams it in the face of millions of Americans suffering from incurable diseases.

We have the opportunity today to advance this promising research that could offer cures for the scourges of our times. To purposefully keep the doors to a cure closed is a patent failure of our responsibility to ease human suffering from scores of incurable diseases.

HELPING KEEP CHILDREN FREE FROM DISEASE

(Ms. SHEA-PORTER asked and was given permission to address the House for 1 minute.)

Ms. SHEA-PORTER. Mr. Speaker, I am the parent of two children with asthma, and my husband has asthma also. When my children were young, I spent many hours beside their bed helping them to breathe with machines, giving them medicine that had side effects that were very unpleasant and kept both my children and myself up. We had a great deal of worry in those early years.

It is my great hope that science will find a cure. I ask all of my colleagues to reach out and help my children and the children of America to be free of these diseases.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. FRANK of Massachusetts). The Chair announces that the Speaker has deliv-

ered to the Clerk a letter dated January 11, 2007, listing Members in the order in which each shall act as Speaker pro tempore under clause 8(b)(3) of rule I.

STEM CELL RESEARCH ENHANCEMENT ACT OF 2007

Mr. DINGELL. Mr. Speaker, pursuant to section 509 of House Resolution 6 and as the designee of the majority leader, I call up the bill (H.R. 3) to amend the Public Health Service Act to provide for human embryonic stem cell research, and ask for its immediate consideration.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 3

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Stem Cell Research Enhancement Act of 2007".

SEC. 2. HUMAN EMBRYONIC STEM CELL RESEARCH.

Part H of title IV of the Public Health Service Act (42 U.S.C. 289 et seq.) is amended by inserting after section 498C the following:

"SEC. 498D. HUMAN EMBRYONIC STEM CELL RESEARCH.

"(a) IN GENERAL.—Notwithstanding any other provision of law (including any regulation or guidance), the Secretary shall conduct and support research that utilizes human embryonic stem cells in accordance with this section (regardless of the date on which the stem cells were derived from a human embryo).

"(b) ETHICAL REQUIREMENTS.—Human embryonic stem cells shall be eligible for use in any research conducted or supported by the Secretary if the cells meet each of the following:

"(1) The stem cells were derived from human embryos that have been donated from in vitro fertilization clinics, were created for the purposes of fertility treatment, and were in excess of the clinical need of the individuals seeking such treatment.

"(2) Prior to the consideration of embryo donation and through consultation with the individuals seeking fertility treatment, it was determined that the embryos would never be implanted in a woman and would otherwise be discarded.

"(3) The individuals seeking fertility treatment donated the embryos with written informed consent and without receiving any financial or other inducements to make the donation.

"(c) GUIDELINES.—Not later than 60 days after the date of the enactment of this section, the Secretary, in consultation with the Director of NIH, shall issue final guidelines to carry out this section.

"(d) REPORTING REQUIREMENTS.—The Secretary shall annually prepare and submit to the appropriate committees of the Congress a report describing the activities carried out under this section during the preceding fiscal year, and including a description of whether and to what extent research under subsection (a) has been conducted in accordance with this section."

The SPEAKER pro tempore. Pursuant to section 509 of House Resolution 6, the gentleman from Michigan (Mr. DINGELL) and the gentleman from Ohio (Mr. BOEHNER) each will control 90 minutes.
