

serious political implications for about every nation on Earth. The drop in food output could begin quite soon, perhaps only 10 years from now."

My colleagues, Newsweek published this dire warning in its April 28, 1975 issue, years before global warming began getting the headlines it does today.

Did Newsweek accurately forecast the coming of global warming more than 30 years ago? No. The article entitled "The Cooling World" warned that the Earth's climate seemed to be cooling to the point that populations around the world are in imminent danger because of the coming ice age.

Newsweek was not the only publication to warn about the supposed threat of global cooling during the 1970s. In an article entitled "Another Ice Age?" the June 24, 1974 issue of Time reported: "When meteorologists take an average temperature around the globe, they find that the atmosphere has been growing gradually cooler for the past three decades." And Time's article did not predict a break in this decade-long cooling trend.

The article continued to warn that "telltale signs were everywhere, from the unexpected persistence and thickness of packed ice in the waters around Iceland to the southward migration of warm-loving creatures like the armadillo from the Midwest."

Fortune magazine also gave warning. A February 1974 article entitled "Ominous Changes in the World's Weather" claimed that "there is a fair agreement among researchers that the earth is now heading very slowly into another major ice age, such as the one that brought the glaciers deep into North America before it retreated some 10,000 years ago."

This article also pointed to the supposedly unusual weather patterns of the day as indication of much worse weather to come: "Climatologists now blame those recurring droughts and floods on a global cooling trend. It could bring massive tragedies for mankind."

These days, of course, we no longer hear much, if anything, about the possibility of runaway global cooling triggering another ice age. Instead, we hear a lot about the threat of catastrophic global warming. Now, what happened? Well, the temperature trend changed. After dropping for about 35 years, the temperature started to rise in the mid seventies, although the global temperature now is only slightly higher than it was in the 1940s when the cooling trend began.

Over the centuries and millennia, the weather has changed, at times radically. During the 10th century, the Vikings established prosperous colonies in Greenland, having named the island for its lush pastures. By the early 15th century, however, these were wiped out by cold and hunger, and now four-fifths of Greenland lies buried under hundreds of feet of ice cap. No one blamed human activity for this climate shift or the ice age.

But in the seventies, some experts argued that human impact on the environment had grown to the point where their atmospheric pollutants were contributing significantly to global cooling, just as some experts argue that CO₂ and other greenhouse gas emissions are causing global warming today.

Climatologists suggested that dust and other particles released into the atmosphere as a result of farming and the burning of fossil fuels were blocking more and more sunlight from reaching and heating the surface of the Earth. They projected that man's potential to pollute would increase six- to eightfold over the next 50 years. And as Reid Bryson stated in Fortune in February 1974, "It is something that, if it continues, will affect the whole human occupation of the Earth, like a billion people starving."

Another of the concerned scientists was Dr. Stephen Schneider, the co-author of the Science report, who in the seventies was worried about the threat of global cooling. Now at Stanford University, Dr. Schneider not only sees things differently but is considered one of the leading experts now sounding the alarm about global warming. In a recent MSNBC report, Dr. Schneider argued that today's warming trend "has been induced by humans using the atmosphere as a free place to dump our tailpipe waste." However, not everyone sounded the alarm about global cooling in the seventies, just like not everyone is sounding the alarm about global warming today.

Madam Speaker, the fact that so many experts were wrong about global cooling in the seventies does not necessarily mean that they are wrong about global warming today, but it does at least show that experts are sometimes incredibly, incredibly wrong.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 10 o'clock and 43 minutes a.m.), the House stood in recess until noon.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Ms. WOOLSEY) at noon.

PRAYER

The Reverend Stan Gruneich, National Chaplain, The American Legion, offered the following prayer:

Holy God, our help in ages past, present and future. In this place of history and memory, we remember with gratitude that You have blessed our Nation with this great land as our her-

itage for this space in time. Grant that in humility we all may live worthy of that trust.

Bless this legislative body with clear vision, deep insight and courage to seek and do what is right. In Your gracious mercy, Lord, may each strive to see the best in everyone else. It is then that we can discern what is best for all here and in the world around us.

We pray for the men and women of our military services. Sustain them and their families during difficult times. Give Your comfort to the wounded in body or mind. Grant eternal rest to those who died in the line of duty.

Lord, hear our prayer. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House her approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentlewoman from South Dakota (Ms. HERSETH) come forward and lead the House in the Pledge of Allegiance.

Ms. HERSETH led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

WELCOMING REVEREND STAN GRUNEICH

(Ms. HERSETH asked and was given permission to address the House for 1 minute.)

Ms. HERSETH. Madam Speaker, I rise today to recognize Reverend Stan Gruneich, National Chaplain of the American Legion, as guest chaplain of the House of Representatives.

On behalf of the entire House, thank you, Reverend, for your prayer, for serving as guest chaplain, for your military service to this country, and for your service to the American Legion as national chaplain. We are honored to have you here today.

Reverend Gruneich was appointed National Chaplain of the American Legion on August 30, 2006. A U.S. Army Vietnam-era veteran, he received his bachelor of arts degree and his master's in divinity from the University of Sioux Falls in Sioux Falls, South Dakota.

He is a member of the Kelly-Porter Post 70 in Flandreau, South Dakota. During his 22 years in the American Legion, Chaplain Gruneich has held several key positions. In addition to serving as post commander, he brings 15 years of experience as the South Dakota department chaplain to the floor today.

Reverend Gruneich, I look forward to continuing to work with you and your
