

So I'll argue, Mr. Speaker, we need to supply more energy, not less. The idea that more expensive energy is a good thing for Mother Nature, that somehow, if you raise the price of gas to \$3.51 or \$4.50 or six bucks or seven bucks, that somebody's going to get on a bicycle and ride around town instead of driving around in their car, that may work in some occasions, but it doesn't work out very good for Grandma that's got to go 10 miles to town in January in Iowa. She can't put the chains on her bicycle and do that. She'll get in her car and she'll drive, and she'll pay a higher price out of her Social Security and her fixed limited income because you're driving up the price of gas; you're not driving it down. And it's limiting the quality of life, and people are having to make tough decisions.

We need to take action to put more energy on the market, not less. And if we do that, we can see these prices go down, not up.

And I'd add to that that the value of the dollar is a significant factor in this. The depreciation of the dollar, the dollar value needs to be shored up. A significant part of the cost of energy is because it takes more dollars to compete with the higher value currency in foreign countries, Mr. Speaker.

And so that is a summary of some of the things I came to the floor here to address. I want to thank you for recognizing me and the privilege of speaking here on the floor of the House of Representatives.
