SENATE RESOLUTION 668—TO COMMEND THE AMERICAN SAIL TRAINING ASSOCIATION FOR ITS ADVANCEMENT OF CHARACTER BUILDING UNDER SAIL AND FOR ITS ADVANCEMENT OF INTERNATIONAL GOODWILL

Mr. KERRY submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 668

Whereas the American Sail Training Association (ASTA) is an educational nonprofit corporation whose declared mission is “to encourage character building through sail training, promote sail training to the North American public and support education under sail”;

Whereas, since its founding in 1973, ASTA has promoted these goals through—(1) support of character building experiences aboard traditionally-rigged sail training vessels; (2) a program of scholarship funds supporting such experiences; (3) a long history of tall ship races, rallies, and maritime festivals dating back as far as 1976; (4) the Tall Ships Challenge series of races and maritime festivals which have been conducted each year since 2001, have reached an aggregate audience to date of some 8,000,000 spectators, have had a cumulative economic impact of over \$400,000,000 for over 30 host communities, and involve sail training vessels, trainees, and crews from all the coasts of the United States and around the world; (5) support of its membership of more than 200 sail training vessels, embracing barks, barques, barkentines, brigantines, brigs, schooners, sloops, and full-rigged ships, which carry the flags of the United States, Canada, and many other nations and have brought life changing adventures to thousands and thousands of young trainees; (6) a series of more than 30 annual sail training conferences to date, conducted in numerous cities throughout the United States and Canada and embracing the Safety Under Sail Forum and the Education Under Sail Forum; (7) extensive collaboration with the Coast Guard and with the premier sail training vessel of the United States, the square-rigged barque USCGC

Eagle; (8) publication of “Sail Tall Ships”, a periodic directory of sail training opportunities; and (9) supporting the enactment of the Sailing Schools Vessel Act of 1982, Public Law 97-322, on October 15, 1982;

Whereas ASTA has ably represented the United States as its national sail training organization as a founding member of Sail Training International, the recognized international body for the promotion of sail training, which itself carries forward a series of international races amongst square-rigged and other traditionally-rigged vessels reaching back as far as the 1950s; and

Whereas ASTA and Sail Training International are collaborating with port partners around the Atlantic Ocean to produce Tall Ships Atlantic Challenge 2009, an international fleet of sail training vessels originating in Europe, voyaging to North America, and returning to Europe: Now, therefore, be it

Resolved, That the Senate—

(1) commends the American Sail Training Association for its advancement of character building experiences for youth at sea in traditionally-rigged sailing vessels and its advancement of the finest traditions of the sea;

(2) commends the American Sail Training Association as the national sail training association of the United States, representing the sail training community of the United States in the international forum; and

(3) encourages all citizens of the United States and of nations around the world to join in the celebration of Tall Ships Atlantic Challenge 2009 and in the character building and educational experience that it represents for the youth of all nations.

Mr. KERRY. Mr. President, today it is my great pleasure to honor the incredible achievement, tradition, and performance of the American Sail Training Association, ASTA. This educational nonprofit corporation has allowed young participants from across the country to build character through sail training and to represent the United States around the world with distinction and good spirit. I am proud of the dedicated trainers who have taught young sailors to persevere in international adventures on brigantines, schooners, sloops, and other vessels. I commend the efforts of the ASTA to provide such exciting and educational opportunities for youth, and I look forward to the coming Tall Ships Atlantic Challenge 2009.

AMENDMENTS SUBMITTED AND PROPOSED

SA 5631. Mr. CASEY (for Mr. LIEBERMAN (for himself and Ms. COLLINS)) proposed an amendment to the bill S. 2606, to reauthorize the United States Fire Administration, and for other purposes.

TEXT OF AMENDMENTS

SA 5631. Mr. CASEY (for Mr. LIEBERMAN (for himself and Ms. COLLINS)) proposed an amendment to the bill S. 2606, to reauthorize the United States Fire Administration, and for other purposes; as follows:

In lieu of the matter to be inserted, insert the following:

SECTION 1. SHORT TITLE.

This subtitle may be cited as the “United States Fire Administration Reauthorization Act of 2008”.

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) The number of lives lost each year because of fire has dropped significantly over the last 25 years in the United States. However, the United States still has one of the highest fire death rates in the industrialized world. In 2006, the National Fire Protection Association reported 3,245 civilian fire deaths, 16,400 civilian fire injuries, and \$11,307,000,000 in direct losses due to fire.

(2) Every year, more than 100 firefighters die in the line of duty. The United States Fire Administration should continue its leadership to help local fire agencies dramatically reduce these fatalities.

(3) The Federal Government should continue to work with State and local governments and the fire service community to further the promotion of national voluntary consensus standards that increase firefighter safety.

(4) The United States Fire Administration provides crucial support to the 30,300 fire departments of the United States through training, emergency incident data collection, fire awareness and education, and support of research and development activities for fire prevention, control, and suppression technologies.

(5) The collection of data on fire and other emergency incidents is a vital tool both for policy makers and emergency responders to identify and develop responses to emerging hazards. Improving the data collection capabilities of the United States Fire Administration is essential for accurately tracking and responding to the magnitude and nature of the fire problems of the United States.

(6) The research and development performed by the National Institute of Standards and Technology, the United States Fire Administration, other government agencies, and nongovernmental organizations on fire technologies, techniques, and tools advance the capabilities of the fire service of the United States to suppress and prevent fires.

(7) Because of the essential role of the United States Fire Administration and the fire service community in preparing for and responding to national and man-made disasters, the United States Fire Administration should have a prominent place within the Federal Emergency Management Agency and the Department of Homeland Security.
