

emergency response, thus enabling us to better respond to future homeland security threats.

Knowledge of Earth's water cycle is a critical first step in protecting our water supply; water flows over the Earth's surface in oceans, lakes, and streams, and is particularly vulnerable to attack.

NASA sensors provide a wealth of information about the water cycle, and contribute to improving our ability to monitor water resources and water quality from space. We must also protect the quality and safety of the air we breathe; airborne contaminants can pose danger to human health; and chemical, nuclear, radiological, and biological attacks are plausible threats against which we can better protect the United States through NASA's research.

Elimination of the Constellation program will present homeland security implications for cyberspace, critical infrastructure, and the intelligence community of the United States. Elimination of the Constellation program will also compromise the effectiveness of the International Space Station as it relates to the strategic importance of space station research, and intelligence.

Continuation of NASA's human space flight program is crucial to improving national security, studying climate change and its effects, and research in science and medicine.

CONCLUSION

For all of the above reasons, it is my hope that this committee will join me in supporting efforts to maintain NASA's Constellation Program. It is through balanced policies that promote economic growth that we will continue to maintain our international leadership and technological competitive edge, and gain valuable knowledge relating to the national security of our nation. I look forward to working with all of you to ensure that we preserve a robust human space flight program in the United States.

AMENDMENT TO H.R. 4899

OFFERED BY MS. JACKSON LEE OF TEXAS

At the appropriate place, insert the following:

SEC. ____ . HUMAN SPACE FLIGHT CONTINUATION.

The Administrator of the National Aeronautics and Space Administration shall ensure that—

(1) all planned funding for the National Aeronautics and Space Administration's Constellation programs will be maintained through fiscal year 2015 with the assumption that the Constellation programs will continue;

(2) the Federal Government will lead United States human space flight systems—

(A) to ensure crew safety; and
(B) to ensure that skills, capabilities, and institutional knowledge attributable to the National Aeronautics and Space Administration and the International Space Station are retained by the Federal Government for the appropriate time;

(3) partnerships between universities and the National Aeronautics and Space Administration's centers are strengthened; and

(4) a protocol for commercial human space flight utilization is established.

Mr. MCGOVERN. I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DREIER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

CALL OF THE HOUSE

Mr. MCGOVERN. Mr. Speaker, I move a call of the House.

The SPEAKER pro tempore. Under clause 7(b) of rule XX, the Chair confers recognition for that purpose.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:
