Congressional Record

PROCEEDINGS AND DEBATES OF THE 112th CONGRESS, FIRST SESSION

Vol. 157

WASHINGTON, TUESDAY, JULY 26, 2011

No. 113

House of Representatives

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. Ross of Florida).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
July 26, 2011.

I hereby appoint the Honorable DENNIS ROSS to act as Speaker pro tempore on this day.

JOHN A. BOEHNER,
Speaker of the House of Representatives.

MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 5, 2011, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate.

The Chair will alternate recognition between the parties, with each party limited to 1 hour and each Member other than the majority and minority leaders and the minority whip limited to 5 minutes each, but in no event shall debate continue beyond 11:50 a.m.

STOP PLAYING GAMES WITH THE DEFICIT

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER) for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, there is an air of unreality here on Capitol Hill. There are some people with no experience in government, little knowledge, and less regard about the outcomes who are pontificating, lecturing, and threatening. The disconnect between the rhetoric, the reality between governance and an ideological agenda is in large part why we

are in the conundrum we are in today with the debt ceiling, something that has routinely been increased year after year for decades.

It was on full display in the Republican-controlled House yesterday as we debated the Interior appropriation bill. Now remember, last week Republicans took to the floor with a so-called “cut, cap, and balance” proposal, which is their answer going forward with the economy. It would impose an 18 percent of GDP limit on the amount of spending that the Federal Government could employ in any one year. Now remember, that is not what we have done for years. Ronald Reagan never proposed a budget that was even as low as 21 percent of gross domestic product. So it’s a dramatic reduction, more than 14 percent less than anything Ronald Reagan ever proposed.

Well, yesterday in the debate my colleague from Kansas offered an amendment, an amendment that I personally found destructive and unbalanced that would have done terrible things, singling out for elimination the National Endowment for the Arts, the National Endowment for the Humanities, zeroing out important resources for construction for fish and wildlife, construction and acquisition of land. It would be a 30 percent reduction in water infrastructure. Overall, it would have been an 11 percent reduction. But at least it was honest.

This is where in fact some of my Republican colleagues want to go. In fact, it is less than what they would have imposed with their proposal the week before. As I argued against the amendment on the floor, I predicted that it would fail overwhelmingly, that many Republicans would vote against it because even though they are willing to make reckless proposals disconnected from reality if the only consequences are polls and politics, when it really comes down to basics, even they don’t want to impose it.

Remember what happened on the floor of the House when we were debating Republican and Democratic alternatives to the budget? The Republican Study Group offered up their proposal that went even further than my friend, PAUL RYAN’s. And when it was passing, we watched Republicans start to twist arms to get people to vote against it because, again, it was something they thought was great politics and theater; but if it came closer to reality, they understood that it would hurt them if the American public understood the real agenda.

Well, we are now at a very serious stage dealing with the debt ceiling. Actions matter. Too many are still acting like they’re on the campaign trail or at a Tea Party rally or on a Fox TV shout-fest. There have already been negative consequences from the reckless action of holding the debt ceiling hostage—American businesses are paying more; there are threats that we’re going to be paying more for interest in the international bond market.

It’s past time to stop this dangerous posturing. There is enough irresponsibility displayed already, we should avoid putting the rhetoric, in effect, into a budget.

Now is the time to stop playing games on the budget deficit. We’ve seen this movie before. The last time the Republicans took control in 1995 there was a debate on imposing a balanced budget amendment. It failed by one vote in the Senate, and it failed with the single Republican “no” vote, Mark Hatfield from Oregon. Senator Hatfield, in a profile in courage, stood up and made clear that he was all in favor of balancing the budget, but not with a gimmick long into the future. He was chair of the Appropriations Committee. He invited his colleagues to make the action by reducing the budget, not playing games with gimmicks. That’s what we should do today.

H5493

KEYSTONE XL PIPELINE

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. POE) for 5 minutes.

Mr. POE of Texas. Mr. Speaker, delay, delay, delay is the administration's energy plan. The Keystone XL pipeline project would bring 700,000 barrels of oil a day from Alberta, Canada, to refineries in southeast Texas. This would provide more energy for America.

The President has had over 2 years to approve the project, but the State Department, the EPA, and out-of-towners have stonewalled the project on alleged environmental grounds.

Pipelines are the most cost-effective and more environmentally sound ways to transport oil and natural gas. Oil must reach our refineries somehow. We can either import oil from a safe, reliable pipeline from our neighbors or on risky tankers coming from unstable Middle Eastern countries. Even the EPA should be able to figure this out after 2 years of delay, delay, delay.

Our neighbors in Canada have developed a safe way to obtain crude oil from their oil sands. Unlike many of the countries in the world, the Canadians are concerned about environmental issues in crude oil production. They will sell us their crude oil. It will be piped to refineries in my district in southeast Texas and will be refined into energy and byproducts of crude oil. And it will create jobs in America.

If the White House fails to act, the Canadians will take their oil someplace else. The Chinese are interested in buying that oil, so it's going to be used and it will go to China. Why not let it come to America?

Some environmental extremists are against the project. Of course they are. They are against every type of energy that comes from below the ground. But they have no answers for our energy needs. They say they want green energy. Well, I do too, but there isn't sufficient green energy yet to run America. So they're against everything, it seems, except those curly CFL light bulbs that come from China. They're all in favor of those.

The radicals are against nuclear energy because, well, the Japanese had an earthquake that caused reactors to overheat, so no more nuclear energy.

□ 1010

They are against natural gas because they don't like fracking, even though safe fracking has been around for decades and they don't even understand what fracking does.

They don't want America to use coal even though our resources are abundant and new technologies have made clean coal safer and more efficient.

They don't like wind turbines because running turbines at night in west Texas may bother the flight pattern of bats.

They don't want more offshore drilling; certainly can't have that. And, of course, they are against domestic

crude oil anyway because they hate American oil companies.

So what's the answer? Well, the only White House plan that has been offered is to give American money to Brazil so Brazil can drill off its shores and then America will buy their crude oil. But no more offshore drilling for us it seems.

If we're going to buy crude oil from foreign countries, let's buy it from our neighbor, our ally, Canada. Or do the progressives prefer we keep buying crude oil from dictators like Chavez in Venezuela or continue to be held hostage by the monopoly of OPEC and Middle Eastern countries? Or do they just want us to do without energy altogether?

Meanwhile, gasoline is around \$4 a gallon. So it seems to me the progressives, if they get their way, will have no progress in energy self-reliance, and we'll regress and go back to the horse and buggy days. But whoa, wait a minute, Mr. Speaker, we can't go back to using horses because they, too, cause pollution.

Mr. President, approve the pipeline. Show some leadership. Time to start making progress on taking care of America's energy needs.

And that's just the way it is.

LAST BEST HOPE OF EARTH

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. QUIGLEY) for 5 minutes.

Mr. QUIGLEY. Thank you, Mr. Speaker.

"Fellow-citizens, we cannot escape history.

"We of this Congress and this administration will be remembered in spite of ourselves. No personal significance, or insignificance, can spare one or another of us. The fiery trial through which we pass will light us down, in honor or dishonor, to the latest generation. We, even we here, hold the power and bear the responsibility.

"We shall nobly save, or meanly lose, the last best hope of Earth."

Lincoln, of course, was talking about the state of a Nation in peril on December 1 in his address to Congress in 1862.

But if this Nation had not the leadership of that magnitude, who knows where we would be today. They faced terrible consequences and yet still had the extraordinary foresight and fortitude to charge ahead.

Today, we too face consequences. We face consequences of international economic impact, environmental and ecological destruction.

We consider this week a debt limit crisis that has brought out the best and worst amongst men and women I respect both here on this House floor and on the other side of this Capitol building and on cable news stations across the country.

We are also considering here in this House an Interior and Environment appropriations bill that simply says to

our children: You clean it up; we don't care to bear the burden. This bill does irreparable damage to programs that keep our air clean, our water drinkable, and that protect our national and natural heritage. These are not dollars spent without thought, nor are they investments of a trivial nature as some would have us believe.

Simply put, these are science-based, pragmatic investments in public health. These cuts, all told, will not save the country a penny. The policy riders included in this bill will cost tens of thousands of lives. The bill will expose our children, families, and communities to unnecessary illness and degrade our irreplaceable natural resources.

But this week we are not stopping at a debt ceiling quagmire and an Interior and Environmental appropriations abhorrence. We will continue to consider a measure that would deem congressional approval for the Keystone XL tar sands pipeline. The Keystone would flow from Alberta down to the gulf coast, threading right through the vast Ogallala Aquifer, the main drinking water source for the Midwest.

You can ignore the dozen leaks the Keystone "one" system has had in the last year, stoking fears of a spill in the aquifer from the proposed expansion pipeline. You can ignore the 42,000 gallons that seeped from an ExxonMobil pipeline into the Yellowstone River in Montana earlier this month, under which Keystone XL would also run. You can ignore the science that says that the high energy process of production of tar sands increases greenhouse gas emissions, pollutes water sources, and harms the proposed region's boreal forests. And you can ignore the fact that testimony of TransCanada officials to Canadian regulators included the fact that the pipeline would drive gasoline prices in the Midwest higher, not lower.

But let's forget all that.

On procedure alone, this Congressional consideration of a bill that is currently under review by the Department of State is unnecessary and unprecedented, potentially negatively affecting our national security and safety.

This proposed pipeline needs no congressional approval. In fact, this proposed expansion need not be approved at all. It has drawn criticism from the Environmental Protection Agency, who suggested that the State Department should consider how construction would affect wetlands, migratory birds, and communities through which it passes.

So we stand here today to consider approving a project expansion that has been deemed mediocre at best. We stand here today to consider an environmental appropriations bill that has been deemed the worst we have ever seen. And we stand here today while everyone around us fights against a compromise that might keep our standing in the international economy

from dipping further than we have already seen it fall.

Indeed, "We cannot escape history. We hold the power, and bear the responsibility. We shall nobly save, or meanly lose, the last best hope of Earth."

President Lincoln, truer words were never spoken.

DIPLOMA ACT

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from California (Ms. CHU) for 5 minutes.

Ms. CHU. Mr. Speaker, for so many, education is the key to the American Dream. But for so many, a good education seems like it is beyond reach. That is why I am introducing the DIPLOMA Act, or Developing Innovative Partnerships and Learning Opportunities that Motivate Achievement.

This legislation will address obstacles to learning by giving out grants to schools, social service programs, and the local community to create comprehensive, community-based solutions that will ensure that our struggling students will succeed.

For awhile now, I have advocated for changing the tone of debate that surrounds school reform. Too often critics point fingers instead of offering solutions. That is why I am pushing for real change, dramatic change in our schools that harnesses the energy of parents, the community, and the school to turn around our failing schools that lift up all our students.

Now, there is no denying that this approach can be challenging and hard work, but research shows when communities, parents, and schools collaborate and work together, there is nothing we can't achieve. I know this because I have seen it firsthand in my district.

In East Los Angeles, Esteban E. Torres High School is a shining example of a community school. It's the first new school built in the neighborhood in 85 years, and its facilities and classrooms are simply magnificent. But to me, the most awe-inspiring part is the community-based approach at the heart of Esteban Torres. With the help of the Los Angeles Education Partnership and the Federal Full Service Community Schools Grant Program, Esteban Torres tapped into the resources of the surrounding community to overcome challenges facing their students regarding health care, limited English proficiency, and financial literacy.

Esteban Torres partnered with Bienvenidos for a full-service health service on campus that will help maintain the health and well-being of their students so they are ready and able to learn.

Pan American Bank partnered to help the high schoolers create a student-run financial center to teach the importance of a budget and proper money management, skills which will stick with these students for the rest of their lives.

Luis Rodriguez and Tia Chucha's Centro Cultural joined the effort to establish the first-ever bookstore in East Los Angeles, making it easier for students to expand their education outside their classroom.

And the effect of these programs is apparent on the smiles of the students' faces on their way to school, in the cafeteria and the classroom. This type of engagement and support is giving students in the community new opportunities and opening their world.

Across America, our students face problems like homelessness, lack of health care, and limited English proficiency. Research tells us that two-thirds of the achievement gap is due to factors outside of school, and even the best teachers have a hard time overcoming these obstacles.

□ 1020

A recent study from Chicago found that when we don't address students' social and economic disadvantages outside schools, the hard work done inside the school can be futile. That's why the DIPLOMA Act is so necessary. Local groups can coordinate, integrate, and facilitate services aimed at strengthening student achievement, such as dropout prevention, family engagement, tutoring, extending learning services, health care, and social support. The bill contains strong accountability measures, including independent evaluations to measure results and identify best practices.

These partnerships will make a difference in the lives of students in my district. When students are provided the right kind of support and opportunities to help them learn, nothing can stop them. The DIPLOMA Act ensures that America's next Nobel Prize laureate can come from any background or community because they had the support they needed to succeed.

BREAKING WASHINGTON'S ADDICTION TO TAXPAYERS' MONEY

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from North Carolina (Ms. FOXX) for 5 minutes.

Ms. FOXX. Mr. Speaker, is President Obama really pushing to raise taxes while unemployment hovers around 9 percent just to get an increase in the debt limit?

Republicans beg to disagree. Increasing taxes on American job creators and families will mean fewer new jobs are created, which will result in more Americans remaining unemployed. Washington does not need tax hikes to raise the debt ceiling. Washington needs spending cuts. The Federal Government is addicted to taxpayer money. The solution is not giving it more of Americans' hard-earned money. No. The solution is to halt the runaway spending and permanently reform Washington's reckless spending habits.

We can fix this problem and pay our bills on time, Mr. Speaker. However,

refusing to cut spending and going with status quo tax hikes would be a recipe for disaster that will rob future generations of a chance to fulfill the American Dream.

DEBT CRISIS AGENDA FOR THE AMERICAN PEOPLE

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. DEFAZIO) for 5 minutes.

Mr. DEFAZIO. It's clear to the American public that Congress, especially the Senate, is very good at doing one thing—and that is nothing.

Now, perhaps we can capitalize on this strength to resolve the impasse over the deficit reduction. Well, how could that work? How could Congress do nothing but solve this problem? Well, within 17 months, by doing nothing, we could lower the deficit by \$3.8 trillion. In fact, the President could reinforce the message. Just in case Congress decided to do something, he could say, No, if they do that, I will pocket veto it. I will do nothing. So we've got a good chance here: Congress does nothing or the President pocket vetoes, he does nothing, we can save \$3.8 trillion. Problem solved.

How do we do that? We allow all the Bush tax cuts to expire. Now, you heard the gentlelady, Oh, my God, the job creators will pay more. Yeah, the billionaire hedge fund guys on Wall Street might pay a little bit more in taxes; they're creating so many jobs today. And the other millionaires. Warren Buffet says it's kind of ironic that he pays a much lower tax rate than his secretary.

Now, if we let the Bush tax cuts expire and adopted some modest reforms, those inequities would no longer be in place, and we could have over \$4 trillion of deficit reduction with a little bit of shared sacrifice. Yes, it would ask the millionaires and billionaires to pay as much as they did in the Clinton era. In an era when we had 3.8 percent unemployment, we actually paid down debt in this country. It was good for all Americans. And we asked those who were most capable to contribute the most. But we asked a little bit of everybody. That's what this doing nothing would do.

Now, after we've restored some confidence here by this big step of doing nothing, we could do another half of nothing and put people back to work. How could we do half of nothing and put people back to work? Well, President Obama has adopted this cockamamie Republican idea of a Social Security tax holiday putting people to work. I know a lot of families that can use an extra \$20 a week. That's true. But them spending \$20 a week on junk made in China or food on the table doesn't put any Americans back to work. And if you're unemployed today—one of the 18 million unemployed—you don't get the \$20 a week. We're borrowing \$110 billion to

do that under the guise that this is creating the jobs. And the President mentioned last night he wants to continue creating jobs that way. Well, guess what? It's not working.

So we do half of nothing. We allow the Social Security tax holiday to expire. It doesn't create any jobs. We don't borrow the \$110 billion from China to put in the Social Security trust fund. Instead, we borrow \$110 billion to put people back to work in private sector jobs. We resolve to begin to rebuild our crumbling infrastructure.

That \$110 billion applied to the 150,000 bridges falling down on the Federal system, the \$80 billion backlog on our transit vehicles, the pavement that's disintegrating across the country could put millions to work. And not just construction workers. Engineers would go to work, people who manufacture things—steel, buses, tires, engines. All those people would go to work. We could put millions to work.

Guess what that does? When people go to work, they don't collect unemployment, they don't need food stamps to feed their family, and they pay taxes. That reduces the deficit, too. So by doing one big nothing and one half of nothing and then one little action to put people back to work—nothing that anybody's talking about around here. Where are the jobs? Who's talking about jobs? We need jobs.

Let's stop blathering around here. Let's resolve to do nothing and solve the debt crisis and resolve to do half of nothing and then apply the money that we save by doing that nothing to putting people back to work.

That's an agenda a little more productive for the American people.

SAVING TAXPAYER MONEY

The SPEAKER pro tempore. The Chair recognizes the gentleman from Tennessee (Mr. DUNCAN) for 5 minutes. Mr. DUNCAN of Tennessee. Mr. Speaker, I want to cover two or three things very briefly here this morning.

First of all, The Washington Post reported on its front page yesterday that "U.S. taxpayer money has been indirectly funneled to the Taliban under a \$2.16 billion transportation contract."

This is crazy. It should not be part of the job of the U.S. military to promote Afghan businesses. The official report found "documented, credible evidence of involvement in a criminal enterprise of support for the enemy." This is ridiculous. And it comes on the heels of a report last week that the Navy had spent at least \$300 million on two ships that were never completed, never sent on a mission, and are now headed for a salvage yard in Brownsville, Texas.

Are there no fiscal conservatives at the Pentagon? Sadly, most people in Congress today are afraid to cut the Defense Department for fear they will appear to be unpatriotic. Yet it seems to me, Mr. Speaker, that it's unpatriotic to continue with megabillions in wasteful spending or billions in spend-

ing that promotes businesses in other countries. No part of the Federal Government should be immune from having to save taxpayer money. The American people would be far better off today if every Department and agency had to take a fair, across-the-board 10 percent cut.

Let me mention a couple of other things. We're going to vote later today on the Keystone pipeline project. This is a project that will provide 20,000 jobs and also will lead to 500,000 gallons of oil coming into this country each day. This will help bring down the price of gasoline. And yet it is opposed by a very powerful group of wealthy environmental elitists. Most of these environmentalists today seem to come from very upper-income or very wealthy families and perhaps they don't realize how much they hurt the poor and the lower-income and the working people by destroying jobs and driving up prices. But that's what they're doing, and they're certainly doing that in blocking or delaying this Keystone pipeline project.

We also need to make sure that more jobs are created in this country in every way possible. Just today in The Washington Post, there's a poll that says that 49 percent of the American people are finding it very difficult to find jobs and 33 percent say somewhat difficult. Eighty-two percent of the American people say that it's difficult to find jobs in this country today. Yet we continue to cave in to environmental radicals that destroy jobs and really do just nothing other than help foreign energy producers.

□ 1030

So I think it's time that we start siding with the American people and stop siding with foreign energy producers.

Lastly, let me just say that the most false thing that has been said during this debate over the debt ceiling is that some people are trying to help billionaires or multimillionaires. No one is trying to help the billionaires. They can help themselves. What the debate is about is: Do you want the money spent by the Federal Government, and they will spend it without any question in the most wasteful, least effective, least efficient way possible; or do you want the money to be in the private sector, where it will do much more to create jobs and hold down prices?

If that weren't true, the Soviet Union or Cuba would have been heaven on Earth because, in those countries, the government took almost all the money. So it's not about protecting billionaires, not in the least.

NO ILLUSIONS: A CLEAR-EYED SMART SECURITY APPROACH IN AFGHANISTAN

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from California (Ms. WOOLSEY) for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, last week, General David Petraeus relin-

quished control of the Afghanistan command. He did this as he prepares to take over as CIA Director this fall.

We are all grateful to General Petraeus for 37 years of honorable and distinguished service, but the fact remains that the fundamental realities in Afghanistan haven't changed. The New York Times put it plainly, noting that the general is "leaving behind a country racked by deep political instability, whose fledgling security forces are fighting a weakened but deadly insurgency that kills coalition troops and Afghan civilians and officials nearly every day."

That's a pretty damning assessment, Mr. Speaker, and it's accurate.

In recent weeks, two of President Karzai's most powerful allies, including his brother, have been gunned down by the Taliban, and ordinary Afghan citizens are caught in the line of fire as never, never before. The U.N. recently reported that more Afghan civilians were killed in the first half of 2011 than in any other 6-month period since the war began. Some of these casualties are the accidental result of errant attacks and night raids by U.S. and NATO forces, but the overwhelming majority of civilian deaths came at the hands of insurgents who were often using suicide bombers.

There were nearly 1,500 civilian deaths between January and June, but according to the U.N., that might be a low estimate given that it doesn't include killings in northern Afghanistan in the last few months, because the U.N. closed its office in that region after it was attacked by a mob that killed several staffers.

It is clear, Mr. Speaker, that after nearly a decade of war we haven't been able to vanquish the enemy and bring stability and security to Afghanistan. If after 10 years we can't do more to subdue the insurgency, then clearly—clearly—we must be doing something wrong. Clearly, there must be a better approach.

I've been pushing for that new approach for many years now. It's called SMART Security. It's based on the belief that sending 100,000 troops to occupy a sovereign country is not the best way to win trust and to promote peace, which has proven to fan the flames of resentment, to give increased momentum to extremists and to put the lives of American troops and Afghan civilians in danger.

What we need, Mr. Speaker, is an Afghanistan civilian surge as bold as the military surge that has gotten us further entangled in this failed war. That's what SMART Security is all about. Instead of sending troops, let's send humanitarian aid. Let's send our civilian experts who can help rebuild Afghan schools and hospitals, who can help—and I say "help" because we want the Afghan people to be doing this, but we can help where necessary—rebuild the political infrastructure and rule of law that will strengthen Afghan democracy, who can promote political

reconciliation and peaceful conflict resolution.

As he left Afghanistan, General Petraeus said, "We should be clear-eyed about the challenges ahead." His successor, General John Allen, said, "There will be tough days ahead, and I have no illusions about the challenges we will face together."

But I say, Mr. Speaker, continuing with the current policy demonstrates that, in fact, we are not being clear-eyed at all, that we are gripped by dangerous illusions about what a military occupation can achieve. This strategy has been given a chance to work—10 years. It hasn't worked. It's time for something new. It's time for SMART Security, and it's time to bring our troops home.

FIGHTING FOR THE WELL-BEING OF CHILDREN AND SENIORS

The SPEAKER pro tempore. The Chair recognizes the gentleman from New York (Mr. TOWNS) for 5 minutes.

Mr. TOWNS. Mr. Speaker, this is a sad day in America. There are people who have to choose between paying their bills and eating a decent meal.

All I hear is that we have a spending problem. "We have a spending problem. We have a spending problem."

I want to be sure we do not try to solve our spending problem on the backs of the poor, on the backs of children and on the backs of our senior citizens. We have been cutting services for the poor, children and seniors for years. Go back and look at the record, and you will see that this is a fact. If you add up all of the money we are spending on children and seniors, it would not begin to make a dent in the Federal deficit.

We spend less than 10 percent of the budget on children. That means we are not seriously investing in the future of this Nation. When we cut programs like WIC, we are literally taking the food out of the mouths of babies, so I say our priorities are certainly misguided or upside down. When we cut tens of millions of dollars from juvenile justice delinquency programs, then we'd better get ready to spend hundreds of millions of dollars on more prisons.

When we look to save money by cutting Medicare and Social Security, we really do a disservice to the senior citizens in this country. Senior citizens have worked all of their lives putting a good portion of their paychecks into a system that paid for the well-being of their parents and grandparents.

If the truth is to be told, today's seniors have paid more than \$2.5 trillion extra into Social Security so that it would be safe, and here we are talking about making cuts. When President Ronald Reagan signed the law to increase the payroll tax, it was to make sure Social Security would be there for future generations; but the government spent the money, and now we want to make seniors pay again. That is wrong.

Our senior citizens have paid enormous sums of money into Medicare, and now people are talking about ending it as we know it. Certainly, rising health care costs are causing Medicare problems, but we can fix those problems without making it a voucher program.

I call on my colleagues on both sides of the aisle to take a deep breath and to think clearly about what we're doing. Children and seniors are the most vulnerable citizens in our country. They are depending on us to use sound judgment and not be swayed by the political gamesmanship.

I stand here this morning to tell you that I intend to fight for the well-being of our children and our senior citizens. Of course, we need to uncut, uncap and get some real balance into this discussion, recognizing the fact that our children and our seniors must be protected. Of course, every time I hear one of our Members talking about the fact that we need to cut Medicare, that we need to cut WIC, I think that we need to stop and take a real, real deep breath and recognize that, when we do that, we end up creating other things, and we do not save money.

□ 1040

LET'S ADDRESS CAUSES, NOT SYMPTOMS

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Ohio (Ms. KAPTUR) for 5 minutes.

Ms. KAPTUR. Mr. Speaker, too often, Congress and Washington deal with symptoms, not underlying causes. And that's what's going on with this current debate about the debt limit. It's kind of like you have an ill patient that has a fever, and you say, well, they're sick so throw some water on the patient and their fever will go down. But you never deal with the underlying infection, the underlying cause that is tripping the fever in the first place.

Let me put a little map on the table here this morning, to look at the nature of current economic challenge. When you have 14 million Americans out of work, and up to 24 million who are working part-time that want to work full-time or others who have completely dropped out of the workforce, none of them are earning a full check. Money is not being taken out of that check to pay their social insurance for Social Security, and they're not going to pay their regular income taxes either. And so the government falls short on revenues. It's quite clear.

We have a jobs problem. That's the causal problem that underlies the deficit problem that America faces.

Now, if you look just at this year alone, 2011, so far this year the government's taken in over a trillion dollars—\$1.2 trillion in revenue. That's not bad for an economy that's just limping along. But we've spent \$1.8 trillion. So we've spent already this

year over \$600 billion that we didn't have. We've had to borrow that money. That borrowing gets added to the long-term deficit. But why do we have that deficit this year?

We have that deficit because the revenues aren't coming in at the same rate as in prior years because there is a jobs problem. When you have 14 million to 24 million people who want a better job and can't get one, that's the underlying cause which Washington fails to see or address.

Now, the cost of that unemployment with the attendant shortage of revenues, is added to this huge accumulated debt, which now is over \$14 trillion. So where did that come from? Let me outline the reasons. The largest share, not only of this year's deficit but of prior debt that we've accumulated, is due to a lagging economy. Families know this. They can't pay as much in taxes or any taxes when they're out of work. Companies, banks, and real estate firms that go bankrupt can't pay taxes either. Revenues fall short.

If you take a look at the cost of our sluggish economy triggered and caused by Wall Street abuse, that's what threw us into this mess in the first place, right, back in 2008. The increased costs of resulting unemployment are staggering indeed: Add them up. First, we have to pay the unemployment checks, and some people even got 99 weeks of unemployment because jobs are scarce. Add to it the costs of food for those unemployed people. They are enormous.

When an economy isn't fully functioning, the Federal costs of medical care skyrocket because people fall off their own insurance. So many in this country simply can't get good care, and that's all tied in to a very sluggish economy. Yes, the costs of unemployment are huge.

Then let's add the cost of the housing meltdown. All of the bad mortgages, four out of five bad mortgages were dumped on the Federal Government. Did Wall Street take care of its dirty laundry? No. They gave it to you, the American people. At the FHA, the Federal Housing Administration, at Freddie Mac, Fannie Mae, the Veterans Administration, guess who's holding all of the mortgages that are under water? Eighty percent of them. Us, the people of the United States, because Wall Street's insurance company or vacant units become the property of Uncle Sam; not Wall Street. Did Wall Street write off any losses? Oh, no, no, no. They gave them to us. That is a huge and growing part of the Federal deficit related to the housing crisis and what it is going to cost to revitalize or demolish that housing inventory.

Then, add to all this a trillion dollars more that's been spent on two wars that have not been paid for. That is a major part of the growing deficit. We can't ignore that. Do we say we should have a war tax? Do we say we should end the wars? Do we say our allies

should pay more? The point is we haven't said anything other than just add that trillion dollars on the deficit.

Now let's take a look at the Bush trillion-dollar tax giveaway to the very wealthy, who said that if we gave them the money, they would create jobs in our country. Guess what? They took the money and they created jobs offshore. Corporate profits are at all-time highs, but are jobs increasing in this country? No. Those corporate profits are due to the booking here in our country of profits earned offshore.

So some say give them more tax breaks. Why, unless they invest in our country in job creation here at home. We would be foolish to waste precious dollars on more outsourcing.

And finally, former President Bush had this idea for pharmaceuticals. He said don't let the Federal Government bargain the cost of pharmaceuticals in Medicare and Medicaid expenditures. Yet when we can't do that, when we fail to negotiate the best, competitive prices, that omission adds hundreds of billions of dollars to our debt.

Mr. Speaker, to solve the deficit problem, Congress and the executive branch must focus on employing the citizens who are out of work. That is the real cause of our economic sluggishness. America ought to address causes, not symptoms.

THE FAIRTAX

The SPEAKER pro tempore. The Chair recognizes the gentleman from Georgia (Mr. WOODALL) for 5 minutes.

Mr. WOODALL. Mr. Speaker, I am pleased to come to the floor today. I'm still a little bit winded. I was over in the Ways and Means Committee room where we were talking about exactly these issues. I'm embarrassed that my fitness is in such a state that running up the stairs winds me.

But that's what happens when you don't focus on something, when you don't put in the time it takes to stay fit; things degrade. And that's exactly what's happened with our economy, Mr. Speaker. It's absolutely true that folks are out of work, and it's absolutely true that the best form of unemployment relief is a paycheck. It's not an unemployment check. It's a paycheck.

But why are these jobs going overseas? And this is the real debate that happens up here absolutely every day because people just believe different things about how it is that we put Americans back to work. Every single person who comes to this House floor wants Americans to go back to work, wants America's economy to be the pride of the world once again.

But I will tell you the reason we lose jobs overseas is not because we're taxing businesses too little; it's because we're taxing businesses too much. We have the single highest corporate tax rate in the world in America. Why does Sony want to locate their next plant here? Why does Rico want to locate

their next plant here? Why does Whirlpool want to keep their plants here? We punish business in this country through our Tax Code like no other country in the world.

Now, is there a regulatory component to that too that we need to solve to make America attractive for business? There absolutely is. Is there a health care component of that if those costs rise? Absolutely there is. Is there a payroll tax cost in that we need to address, the largest tax 80 percent of Americans pay? Absolutely there is.

There is only one proposal in the House that does it, and the Ways and Means Committee right now across the street right here behind you, Mr. Speaker, in the Ways and Means Committee room, is holding a hearing on H.R. 25, the FairTax.

The FairTax eliminates these income taxes and moves America to a consumption tax model. America is the only country in the OECD nations, those economically developed nations, that does not have a consumption tax. The FairTax shifts us in that direction.

And what it does for the first time, the only bill in Congress that does it, it eliminates every single bit of corporate welfare in the United States Tax Code. Oil companies, gone. Solar companies, gone. Foreign companies, gone. Every single tax break in the Code is abolished, Mr. Speaker, because we know the free market works best when the market is free. And we know that businesses don't pay taxes. Consumers pay taxes.

There is not a penny that we charge Walmart that they don't roll right into their costs and pass it along to us. You see it. You see it absolutely every day. If we raise gas taxes, gas prices are going to go up. If we lower gas taxes, gas prices go down. The market sorts those things out.

Have you ever been to a Coke machine, Mr. Speaker? I'm from Atlanta; so I'll talk to you about Coke machines. But usually they're going to sit beside a Pepsi machine. Have you ever seen that Coke costs \$1 and the Pepsi right beside it cost \$2? No. Do you ever see the Coke sell for \$1.50 and the Pepsi beside it try to sell for \$5? No. And that's not just because Coke's a wonderful product. It's because the consumer rules in America and price matters. You can't charge whatever you want; you can only charge what the consumer will pay. And when taxes go up, consumers have to pay more.

The FairTax, Mr. Speaker, will bring those jobs back to America like no other proposal in this Congress. It eliminates those corporate income taxes, and it eliminates payroll taxes. Have you thought about your payroll tax recently? It is 15.3 percent of every paycheck that you get.

Now, the wealthy don't pay payroll taxes because they're making their money in interest or dividends or capital gains, these things that payroll taxes don't come out of. Those of us who work for paychecks, we pay pay-

roll taxes. And at 15.3 percent, the payroll tax is the largest tax that 80 percent of Americans pay.

□ 1050

The largest tax that 80 percent of American families pay, and we don't spend any time on the floor discussing that. We argue about income tax all the time. Half of America doesn't even pay income taxes anymore. Payroll taxes are the taxes that American people pay, 15.5 percent; and it comes out of your paycheck before you even get to see your paycheck.

Milton Friedman, the Nobel Prize-winning economist who helped during World War II establish the withholding system—the government needed money in a hurry. It was wartime. That's when we began sucking money out of your paycheck before you ever see your paycheck. Milton Friedman said the worst decision of his life was not working to do away with the withholding system once World War II ended because you need to know how much money you are paying. You need what it costs you to run this United States Government.

We talk about trillions. Have you thought about \$1 trillion, Mr. Speaker? One trillion dollars, the cost of the President's health care plan, for example. If you started a business on the day Jesus Christ was born and you were so bad at your small business, Mr. Speaker, that you lost \$1 million a day, every day, 7 days a week from the day Jesus was born through today, you would have to continue losing money for another 700 years to lose your first trillion dollars. We throw that number around like it is nothing. It is something. We need jobs back in this country. The FairTax will do it.

I encourage folks to pay attention to what's happening in the Ways and Means Committee today on H.R. 25.

RAISE THE DEBT CEILING

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Texas (Ms. JACKSON LEE) for 5 minutes.

Ms. JACKSON LEE of Texas. Mr. Speaker, my good friends have come to the floor of the House. My good friend just came and offered some solutions, and I would say that it's important for Members to have ideas and to be able to engage on behalf of the American people.

Every time we stand in this well, we should be rising to make the lives of the American people, those who have entrusted us to be the holders of the values of this great country, we should be moving on on their behalf. So this morning, I'm asking that we get on with it. It's important to be discussing tax reform. But as many of us know, that is a long, protracted process of give-and-take. And many Americans will understand what the payroll tax is all about when they look in the faces of their seniors and themselves and they know that part of that is Social Security. We know for a fact that Social Security has been a lifeline for millions

of Americans, and it is solvent, and it's important to know that America is not broke.

But the good work of the Ways and Means Committee and the good work of the Judiciary Committee, which is meeting right now—and I'll be heading on to that committee to talk about preventing corruption in business and making sure the American people get their fair share. It is important that we move on. And how do we move on? We do something that Americans have said by and large that they want us to do together, and that is to get past this debt ceiling, do something that has been done time after time after time.

Yes, we have grown as a Nation, and the reason is because in World War II we were not 300 million-plus people. We didn't have all the assets and responsibilities. In fact, the wars of Iraq and Afghanistan were longer than World War II, and all of those moneys were spent under the last administration. Tax cuts that for individuals who, by and large, have said, No, thank you, because they want to invest in America.

So I'm prepared to join with my many friends to work on moving this country forward, but let's move on. Let's move on beyond the impossible proposal given by Speaker BOEHNER that focuses on a two vote process for the debt ceiling increase and vote once then come back and fight it out again in 6 months. That is not the consistency and the evenness that is necessary for all of those who are seeking employment or all of those businesses or all of those in the arena of money making. They need an even pathway, they need consistency for the markets.

We need to get on with the ordinary business so that we can begin to talk about the growth of this country, education for the young people, making sure the doors of businesses stay open, talk about how do we fix a tax system where we all can benefit. But as long as we are wallowing in the ordinary work, the work that should just go on, we will never reach the point of sanity, which is to sit down at the table of reconciliation and compromise. I know we have it in us. We like each other. But it appears to the American people that we may not like them.

So I will just ask, we're nearing the resolution of the debt ceiling, again, to pay the bills that were built up between 2000 and 2008, billions of dollars spent in Afghanistan, billions lost in untoward contracts. We don't even know where the moneys have gone—Iraq, moneys lost; a war that was, in essence, a detour.

And let me just say, every time I say that, I always thank our soldiers and their families because they are not a detour. They accepted the call to duty, and we owe them a great deal of appreciation.

But the policymakers sent them into wars that are going on and on and on, and it caused this country to pay for these wars. At the same time, there are drastic draconian cuts in the revenue

coming into the United States bank account.

So here we are, President Clinton having left in 2000 with \$500 billion of surplus; we came out of 2008 in enormous debt. So what are we doing today? The debt ceiling is simply saying pay America's bills. And it's also saying to the many countries around the world—which we appreciate buying our Treasury notes. That is of value to the United States. The dollar has been stronger than any other currency, except the manipulation that goes on in China. But it's stronger than the euro.

So, Mr. Speaker, it is important to pass the debt ceiling, get past this frivolity of doing it twice. It is time to pass and move forward the Reid proposal which can bring all of us together. And that's what we should do, begin to do, and look at it on behalf of the American people. America should pay its bills.

POLITICAL GAME OF CHICKEN

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from New York (Ms. HOCHUL) for 5 minutes.

Ms. HOCHUL. Less than 2 months on this job, I only have one question to ask: Is anyone in this body listening to the people who sent us here? I can only conclude at this point that the answer is "no," or we would not be teetering on the precipice of not just a government shutdown but an intentional economic shutdown, the likes of which we have never seen in this country. And I say "intentional" because there are high stakes in this game of chicken.

We all know the game of chicken. You've got a couple of crazy teenagers racing toward each other on a highway, and nobody's going to swerve. What happens when no one blinks, no one swerves, no one comes to their senses? Crash. Lives are lost. No survivors. It's not a pretty sight.

It didn't have to come to this. The American people who voted for us, put their faith in us, they don't want this to happen. They wonder if anyone in Washington is listening, and they're absolutely right in that assessment.

I will tell you, I was at a firemen's parade in the tiny, tiny village of Silver Springs in one of my most rural counties, Wyoming County. There are more Republicans than cows out there; and cows and Democrats, not a lot of people. But I'll tell you, we are all bound by the same feelings.

This frustrated senior at the firemen's parade in Wyoming County said to me, Why can't you guys get your act together? We send you there to do a job, and you guys aren't doing it.

You know, he was right; he was absolutely right, and I took that to heart. I came back here, and I want to do something to restore his faith in us.

He talked about the seniors. He said, We are so scared out here. I need my Social Security. I need my Medicare. Why are you guys talking about hurting us? We paid into these systems all

of our lives. We don't deserve this. I said, I'll go back. I'll do the best I can. I'll fight for you.

They have fear, uncertainty, and disgust, all directed at the ineptitude of Washington.

□ 1100

Well, it is wrong. It is plain wrong that we are even considering defaulting on America's obligations. It's doubly wrong that we'd consider defaulting on our obligations to our seniors, promises made 46 years ago this week with the advent of Medicare.

The integrity and willingness to uphold and honor our promises should be the hallmarks of this great institution. And yet what I've witnessed in such a short time is a willingness to renege on our promises to our debtors, our seniors and, ultimately, the American people.

Right now, it's not too late to avoid that highway collision where no one walks away. The American people deserve better than this. Our small businesses deserve better than this. Our middle class families deserve better than this.

I'll tell you, we need to get on with the business of the American people, and do it as soon as possible.

WHAT THE PEOPLE WANT TO KNOW

The SPEAKER pro tempore. The Chair recognizes the gentleman from New York (Mr. ENGEL) for 5 minutes.

Mr. ENGEL. Mr. Speaker, I rise today because I want my colleagues to hear some of the things that I'm hearing from my constituents back home. People want to know why we cannot compromise. People want to know why we cannot work together. I don't know the answers to that because I think we should.

What I see happening here is something that I haven't seen in the 23 years that I've been here. It's that people do not seem to want to move to the center and to compromise.

I know some of my colleagues on the Republican side of the aisle, particularly the Tea Party-backed freshmen, have signed a pledge never to raise taxes. Well, I want to say what Senator COBURN said the other day. He said, what am I upholding my pledge to? I uphold my pledge to abide by the Constitution, not upholding my pledge to abide by what a special interest group wants.

People want us to meet in the middle. People don't understand why there seems to be intransigence.

You know, we have spent too much over these past decades. And you know what else? In order to get back to where we can balance our budget and pay our bills, we can't do it all with just spending cuts. It has to be three things. It has to be spending cuts, for sure. It also happens to be and should be closing tax loopholes for the very wealthy who get away with paying no

taxes at all, for large corporations who pay no taxes at all, for special subsidies to businesses that move their jobs overseas, to special subsidies for companies like Big Oil that don't need the subsidies.

We also need to make sure that those who can afford to pay a little bit more pay a little bit more, because that's how we get our budget back in balance. But if my Republican friends only say, you know, all we're going to do is cut, and we're not going to meet the Democrats halfway, then I'm afraid we're moving to fall off a cliff.

President Obama was absolutely right yesterday when he said that one side seems to be saying, my way or the highway; tax cuts forever, even if our budget is not balanced.

We, as Democrats, are saying let's do it a compromise way. Let us cut spending, let us close tax loopholes, and let those who can afford to pay a little more, millionaires and billionaires, pay a little more.

We are here because the American people sent us here. I know my constituents are concerned about Medicare and Medicaid, Social Security, and the New York Graduate Medical Education. I didn't come here to devastate those programs, and I want my constituents to know that I'm going to fight like crazy to preserve Medicare, Medicaid, Social Security, and GME. We cannot balance our budget on the backs of senior citizens.

I want to remind my colleagues that when President Clinton, the last Democratic president before President Obama left office, we had record surpluses. President Bush came in and we have red ink deficits as far as the eye can see.

And I want to remind my Republican colleagues that 6 of the 8 Bush years Republicans controlled both the House and the Senate, and had the presidency for 6 years. If they wanted a balanced budget amendment they could have had it. If they wanted to try to balance the budget they could have done it.

So I don't think lectures are important now. I think there's plenty of blame to go around on all sides. We had the Bush tax cuts, we had wars, and we had reckless spending. And it was done under President Bush with Republican majorities in the House. So we need to put our heads together and move to the sensible center in terms of what the American people want, to get us off this precipice that we're about to fall into.

I think there's one other thing the President should do. If he sees, in a few days, that there's no progress being made, and we are about to approach August 2 and we're about to have this train wreck, the President should invoke the 14th amendment. The 14th amendment says the public debt shall not be questioned and, in my estimation, gives the President the authority to raise the debt ceiling by himself. I think the President should do that if we cannot come to a compromise.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 11 o'clock and 7 minutes a.m.), the House stood in recess until noon.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at noon.

PRAYER

Reverend Miroslaus Stelmaszczyk, Holy Family Church, Creighton, Pennsylvania, offered the following prayer:

Almighty Father, we gather here this morning to ask for Your wisdom, charity, and humility. We continue the task of operating this great Nation with honesty and integrity. Grant us the wisdom to act for the greater good of all citizens. Keep us humble that we not forget who we are and why we are here.

We remember the Founding Fathers, who risked their reputations, their fortunes and their very lives to form a Nation that ensures the freedoms and opportunities that we enjoy today. We also remember those brave individuals who paid the ultimate price to protect and defend those freedoms and opportunities.

Father, keep us dedicated to the people we represent. Let us not allow partisanship to cause discord among our number and prevent us from completing our agenda. We depend upon Your grace and mercy to allow us to continue to serve this Nation with honor and integrity.

We ask this in Your name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. BROOKS. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Speaker's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BROOKS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 8, rule XX, further proceedings on this question will be postponed.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Pennsylvania (Mr. PITTS) come

forward and lead the House in the Pledge of Allegiance.

Mr. PITTS led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

WELCOMING REVEREND MIROSLAUS STELMASZCZYK

The SPEAKER. Without objection, the gentleman from Pennsylvania (Mr. ALTMIRE) is recognized for 1 minute.

There was no objection.

Mr. ALTMIRE. Mr. Speaker, in the midst of one of the most contentious congressional debates in recent times, I knew just who to bring to Washington to help bring people together. It is my great honor to welcome Reverend Miroslaus Stelmaszczyk, who today serves as our guest chaplain for the U.S. House of Representatives.

Known simply as "Father Miro," he has led the Holy Family Parish in Creighton, Pennsylvania, for 12 of his 36 years in the priesthood. He has received numerous awards in recognition of his public service since he first came to the United States from Poland in 1986.

As testament to his popularity among his congregation, Mr. Speaker, I would also like to welcome the three dozen Holy Family parishioners who made the trip to Washington, along with Father Miro, and are now seated in the gallery to witness his opening prayer today.

Welcome to you all.

On behalf of my colleagues in the House, welcome, Father Miro, and congratulations on being chosen as today's guest chaplain for the U.S. House of Representatives.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. YODER). The Chair will entertain up to 15 further requests for 1-minute speeches on each side of the aisle.

LET'S LEARN A LESSON FROM THE "GERMAN MIRACLE"

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, on Friday, Dr. Milton Wolf in *The Washington Times* reported, in the last 2 years, over 2 million private sector jobs have been lost, that unemployment has increased by 1.5 percentage points, that the U.S. dollar is 12 percent weaker, and that the long-term unemployment is the worst ever on record—and sadly, the national debt has exploded by 40 percent.

At the same time the administration pushed the failed stimulus spending here, the President urged German Chancellor Angela Merkel to do the

same in her country. The Chancellor refused. Now, as a result of her good judgment, Germany's economy has recovered. German unemployment levels are reduced while over 14 million Americans do not have jobs.

The President should learn a lesson from the "German miracle." The solution is not for big government to keep borrowing and spending. Tax increases destroy jobs.

In conclusion, God bless our troops, and we will never forget September the 11th in the global war on terrorism. Our sympathy to the people of Norway in the religious extremist mass murderers.

A COMPREHENSIVE, BALANCED SOLUTION TO SAVE THE ECONOMY

(Mr. COURTNEY asked and was given permission to address the House for 1 minute.)

Mr. COURTNEY. Last night, Speaker BOEHNER addressed the American people and said that if the President would just simply sign his debt ceiling bill, the crisis, in his words, would disappear.

Actually, the opposite is true. An hour or two before his speech, the Standard & Poor's rating agency issued a report, saying that, if the Boehner plan passed, the American bonds would be downgraded from its AAA status. A downgrade is as bad as a default in terms of driving up lending costs and damaging a fragile economy that today needs all of us to work together to strengthen job creation to solve our problems. The Boehner plan calls for three separate votes over the next 15 months for a debt ceiling increase, exactly the kind of political instability that rating agencies are not looking for.

It is time for a comprehensive, balanced solution, which the President has said he will work with the Congress to pass in order to get this economy moving again and to create jobs.

HONORING THE LIFE AND SACRIFICE OF BORDER PATROL AGENT MICHAEL GALLAGHER

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, tonight, Representative GABRIELLE GIFFORDS' office is organizing a Special Order to recognize Border Patrol agents who were killed in the line of duty last year.

I want to thank her and her staff for working to acknowledge these dedicated servants who died serving our Nation. While I won't be able to speak tonight, I wanted to take a moment to honor Agent Michael Gallagher, who grew up in Lancaster, Pennsylvania.

On September 2 of last year, Agent Gallagher was on patrol near Casa Grande, Arizona. A drunk driver ran a stop sign, colliding into the patrol car

and ejecting Michael from the vehicle. He served in the Border Patrol for 2 years, and also served our Nation in Iraq, risking his life to protect our freedom.

He is dearly missed by his wife and his two sons.

Even though he moved away, I understand that he remained a dedicated Pennsylvania sports fan. We cannot thank him and his family enough for his service. We can only honor him for dedicating his life to keeping Americans safe here at home and abroad.

THE CLOCK IS TICKING ON AMERICA'S DEBT LIMIT

(Mr. BUTTERFIELD asked and was given permission to address the House for 1 minute.)

Mr. BUTTERFIELD. Mr. Speaker, the clock is ticking, and we must act now on increasing our debt limit. The American people must understand that increasing the debt limit will enable us to meet obligations that have been incurred by Democratic and Republican Congresses in years past. Defaulting on these obligations will not only wreak havoc on the American people; it will weaken our overall economy.

The Republicans have been given opportunity after opportunity to help craft an acceptable, long-term debt reduction plan that would include a debt limit increase, but Republicans have slow-walked us to the brink of collapse.

The Republican plan is to imperil Medicare and Medicaid. Republicans want to balance the budget by forcing the government away from government-sponsored Medicare and provide vouchers so seniors can purchase coverage from private insurance companies. Republicans want to shift the Medicaid responsibility to States that are already struggling to balance their budgets. Republican budget cuts will force doctors, hospitals and other health care providers to leave the Medicaid program entirely.

The Republican strategy has been evolving for a long time, and now it is revealed. Shame on you. Shame on the Republican majority.

□ 1210

RAISING THE DEBT LIMIT: THE HYPOCRISY COULD NOT BE MORE CLEAR

(Mr. DUNCAN of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUNCAN of South Carolina. Mr. Speaker, I ask the American people to listen closely to these words:

"The fact that we are here today to debate raising America's debt limit is a sign of leadership failure. It is a sign that the U.S. Government cannot pay its own bills. It is a sign that we now depend on ongoing financial assistance from foreign countries to finance our government's reckless fiscal policies.

"Increasing America's debt weakens us domestically and internationally. Leadership means that 'the buck stops here.' Instead, Washington is shifting the burden of bad choices today onto the backs of our children and our grandchildren. America has a debt problem and a failure of leadership. Americans deserve better."

These were remarks by Senator Barack Obama, March 2006. Mr. Speaker, the President's hypocrisy could not be more clear.

God bless America.

WE NEED TO COMPROMISE

(Mr. BACA asked and was given permission to address the House for 1 minute.)

Mr. BACA. Mr. Speaker, 2 years ago, the Republicans in Congress campaigned on, Where are the jobs? Not spending cuts or living within our means, but where are the jobs. The Blue Dogs were the ones calling for responsible fiscal responsibility.

Then at the end of Congress last year, President Obama compromised with the Republicans, extended the Bush tax cuts in order to try to create jobs. This gamble did not create jobs. All it's done is extended the tax breaks for millionaires and billionaires.

We cannot play chicken and cause our Nation to default. We must lower the deficit with cuts to wasteful spending. But we can't balance the budget on the backs of seniors, the poor, by cutting Social Security and Medicare while continuing to give tax breaks to the ultra-rich and oil companies and those who make over \$250,000 a year.

No taxes, no jobs. We must compromise. It can't be "my way or the highway."

THE SMALL ARMS TREATY

(Mr. POMPEO asked and was given permission to address the House for 1 minute.)

Mr. POMPEO. Mr. Speaker, over the past 1½ years, we've seen this President take away a lot of our freedoms with big spending and a big health care plan. I want to talk about another risk to American freedom today, and that is the United Nations Arms Trade Treaty, also known as the Small Arms Treaty.

I'm profoundly disappointed, but, frankly, not surprised, that this administration is joining the United Nations in crafting this dangerous treaty designed to curtail our Second Amendment rights.

Parties in the negotiations about the treaty are talking about banning civilian possession of firearms, decreasing the ability for trade in firearms, and heavily restricting the rights of Americans to carry their firearms. Each one of these directives, if implemented, would clearly violate individual rights as enshrined in our Constitution.

The Senate should not ratify this treaty. We must never turn our national sovereignty over to anyone, most especially the United Nations.

As a former soldier who dearly loves his M250 caliber machine gun and loves his firearms as a civilian as well, I know that we have that right. We've got to stand up and protect it, and I urge my colleagues in the Senate not to ratify this treaty.

RECOGNIZING FINALISTS OF SECRETARY OF DEFENSE EMPLOYER SUPPORT FREEDOM AWARD

(Mr. CICILLINE asked and was given permission to address the House for 1 minute.)

Mr. CICILLINE. Mr. Speaker, I rise today to recognize three employers in Rhode Island that are honoring and supporting the brave men and women serving our great country in the armed services.

These include Amica Mutual Insurance of Lincoln, Rhode Island; Banneker Industries of North Smithfield; and the Woonsocket Middle School. These Rhode Island employers have received national recognition as finalists and semifinalists for the Secretary of Defense Employer Support Freedom Award and were selected for this honor from a pool of 4,000 nominations.

This award is the Department of Defense's highest recognition of employers for the extraordinary support they provide to our National Guard and Reserve members and their families. The Freedom Award is especially significant because nearly half of our Nation's military is currently comprised of Guard members and Reservists.

These men and women have put their lives on the line because our country asked them to. Because of their service, we're able to enjoy the freedoms that we have here at home. We owe those serving our country, our veterans, and their families our utmost gratitude and respect for their great sacrifices on our behalf.

I commend our Rhode Island businesses who recognize the sacrifices of our servicemen and -women and their families.

WHERE IS THE PRESIDENT'S PLAN TO BALANCE THE BUDGET?

(Mr. BROOKS asked and was given permission to address the House for 1 minute.)

Mr. BROOKS. Mr. Speaker, yesterday President Obama gave a speech to the Nation about the debt ceiling. He said, I won't bore you with the details of every plan or proposal. Mr. Speaker, I say please bore us with the details.

The House passed the Cut, Cap, and Balance plan that prevents a national bankruptcy by modestly cutting spending, capping the size of government, and advocating a balanced budget amendment to force Congress to act responsibly. In contrast, the President gives fine speeches, yet fails to submit a single written plan to balance the budget that can be evaluated by the American people.

Mr. Speaker, I say bore us with the details. Washington's spending binge has put America \$14 trillion in debt.

America's future is at risk. Congress welcomes written detailed solutions to Washington's spending binge from the President.

Mr. Speaker, I reiterate, please bore us with the details. America has a right to hear them. President Obama has a duty to deliver them.

JUVENILE DIABETES

(Mr. CARNEY asked and was given permission to address the House for 1 minute.)

Mr. CARNEY. Mr. Speaker, I rise today in support of efforts to find a cure for type 1 diabetes.

Recently, I visited with 11-year-old Madeline Tallman from my home State of Delaware. She was here to tell her story of what it's like to live with type 1 diabetes. Madeline is faced with the life-long challenge of checking her blood sugar levels, managing her diet, and injecting herself with insulin every single day.

While research to find a cure for type 1 diabetes is progressing, people like Madeline are looking for better ways to manage their diabetes right now.

An artificial pancreas has the potential to transform the lives of those with type 1 diabetes. This device automatically controls blood sugar levels around the clock allowing patients to remain healthy until a cure is found. But before this technology can be made available to patients, the FDA must approve the next steps in the regulatory process for artificial pancreas trials.

I commend the FDA for committing to publish draft guidance by December 1. I urge the FDA to stick with that guideline. Children like Madeline have waited long enough.

THE DEBT CEILING

(Mr. CARNAHAN asked and was given permission to address the House for 1 minute.)

Mr. CARNAHAN. Mr. Speaker, we voted last week on a plan put forward by my Republican colleagues that I strongly opposed and was rejected by the Senate because it would have ended Medicare as we know it while preserving giveaways to Big Oil and corporations shipping jobs overseas.

Now Speaker BOEHNER has introduced a new plan which he says follows the spirit of the last plan. Rating agencies say Mr. BOEHNER's plan won't work. It won't prevent a ratings downgrade, it will destroy hundreds of thousand of jobs, weaken the American dollar, and raise interest rates on loans to keep families in their homes and students in school. It is a plan that experts tell us up front won't work, is not worth voting on, let alone passing.

Instead of retreating to our partisan quarters and refusing to cooperate, when the going gets tough we expect

leaders to get to work. This default crisis is a test of leadership and those willing to drive our country over the economic cliff fail that test and need to get serious.

□ 1220

PLEASE DON'T TOUCH MEDICARE, MEDICAID, OR SOCIAL SECURITY

(Ms. PINGREE of Maine asked and was given permission to address the House for 1 minute.)

Ms. PINGREE of Maine. Mr. Speaker, in the past few weeks, the phones in my office have been ringing off the hook. The message from my constituents is clear: Please don't touch Medicare, Medicaid, or Social Security. Some are angry, and some are tearful. All are sick with worry over the threat of losing benefits they have earned and depend on. Sadly, these effective programs have become targets for those who would balance the Federal budget on the backs of seniors and the middle class rather than restoring tax rates for millionaires. It's unthinkable, and it's unfair. I plan to do everything I can to protect these critical programs because they work.

When Medicare started 45 years ago, a third of our seniors lived in poverty; half had no health care coverage. Today the poverty rate for seniors has been slashed, and nearly all of our seniors have access to quality care. And thanks to the Affordable Care Act, seniors won't have to worry about paying for preventative care or falling into the prescription drug doughnut hole. After working hard their entire lives, seniors should be able to feel confident that the system they faithfully paid into will be there for them when they need it most.

DO THE RIGHT THING

(Mr. MORAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORAN. Mr. Speaker, I'll never forget the day that we voted for the Clinton tax rates. We were told by all of the Republicans that this was going to cause massive job losses, an unbalanced budget, and drive us into recession. And not one Republican voted with us. Well, we know exactly what happened: More than 20 million new jobs were created; we had the lowest level of poverty, the highest expansion of the middle class, three straight budget surpluses, and the people at the highest tax rates took home more after-tax income than at any time in American history. It worked. And we had over \$5.6 trillion in surplus projected over the now past decade.

Then when the Republicans took power again, what happened? Immediately they cut taxes—but not across the board—in a way designed primarily to benefit the wealthy. That's why the top 1 percent have 42 percent of this

Nation's wealth; while the bottom 90 percent have 26 percent, the greatest income disparity ever. This is a manufactured crisis, Mr. Speaker. Do what Alan Greenspan recommended: Go back to the Clinton tax rates; balance the budget; pay for the wars; pay for tax cuts; pay for expansion of Medicare; meet your obligations; don't manufacture crises; and don't drive us to deadlines when the whole world is watching and wondering if we are serious about governing the world's strongest economy.

THE JOBS OUTSOURCERS' BILL OF RIGHTS

(Mr. TONKO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TONKO. Mr. Speaker, in just a few hours, my Republican colleagues will bring to the floor the Jobs Outsourcers' Bill of Rights. This piece of legislation is an open attack on workforce protections, a union-busting bill that will open loopholes for companies to ship our jobs, American jobs overseas, and will make historic changes to workers' rights, all to serve the well-connected special interests community. This bill will allow companies to fire workers, workers who think that they might have a better shot of supporting their families in these precarious times by banding together to negotiate with their employers. That right, the freedom of association, finds its origins in the First Amendment to the United States Constitution.

Whether or not you like unions, there is no sense in making it even easier to ship our jobs overseas. If this bill becomes law, a company faced with a few organizing workers trying to form a union could close an entire United States plant and move the work to China, where sweatshop laborers will work for less than even the lowest-paid, nonunion American workers. Actually, that's an assault on America's middle class. I would urge my colleagues to oppose this reactionary and poorly thought out legislation.

WEAKENING THE UNITED STATES PRESIDENCY

(Mr. YARMUTH asked and was given permission to address the House for 1 minute.)

Mr. YARMUTH. Mr. Speaker, I know my constituents and most Americans are trying to figure out exactly what this debt ceiling crisis is. It can't be about a desire to cut spending because both sides have already agreed to more cuts than are on the table in either the Senate or the House. No, this is a politically induced crisis that the Republicans have created in order to force votes on the debt ceiling next year during a Presidential campaign and weaken the President. But I hope they realize that if they weaken President Obama, they weaken the Presidency as

well. And if they succeed in defeating him next year, their candidate, their President, will face reduced stature in the world, just as our political system will face a reduced stature in the world.

We are the foundation of economic and political stability around the world, and this crisis is threatening our stature in that position. We cannot let the Republican politically induced default crisis succeed.

WHERE ARE THE JOBS?

(Ms. CLARKE of New York asked and was given permission to address the House for 1 minute.)

Ms. CLARKE of New York. Mr. Speaker, our colleagues on the other side of the aisle have been in the majority for a full 29 weeks, and they still have not addressed the number one priority of the American people: jobs.

The Republican majority has, instead, used the time and energy that should have been focused on jobs to manufacture a crisis that could very well destroy the full faith and credit of our Nation. What makes this made-up crisis so undignified is that the other side has taken the American people hostage to their radical plan of placing the burden of deficit reduction on the backs of poor, working poor, and struggling middle class families while asking absolutely nothing of the most fortunate among us. Why, Mr. Speaker, have those who have done very well in America been asked to do so little for the country that made their success possible?

The Republican-led 112th Congress has totally ignored the jobs crisis and has actually managed to create another. The 112th Congress owes the American people an apology for continuing to waste their time. Where are the jobs? We owe the American people real job creation.

FAILURE TO PAY IS NOT AN OPTION

(Mr. WALZ of Minnesota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALZ of Minnesota. Mr. Speaker, I rise today to tell my colleagues what my constituents are saying, simply stop playing games.

Now, we all come to this job with certain ideas, values, and principles. But that doesn't mean we get to let our ideology dictate the facts. Failure to pay our bills will have a catastrophic effect on our still-recovering economy. It's as simple as that.

This isn't a question about enabling future deficits. The Federal Government needs to cover promises it has already made to our seniors, to our soldiers in the field, to our veterans, to our States, and to our creditors at home and abroad. We need to pay our bills.

The need to address our debt is every bit as serious as the need to avoid a de-

fault, but we need a balanced approach and shared sacrifice. We cannot balance the budget on the backs of working and middle class Americans while simply refusing to ask corporations and billionaires to pay one penny more. We cannot ignore the facts, and allowing our Nation to default is no way to fix our budget problems.

SPENDING-DRIVEN DEBT CRISIS

(Ms. FOXX asked and was given permission to address the House for 1 minute.)

Ms. FOXX. Mr. Speaker, our record debt of \$14.3 trillion is growing, and it poses a direct threat to our national security, our economy, and our children's future. The American people deserve real leadership right now, not politics as usual.

The President's bipartisan deficit commission called the House-passed Path to Prosperity a "serious, honest, straightforward approach to addressing our Nation's enormous fiscal challenges." On the contrary, the Democratic cochair of the commission, Erskine Bowles, recently criticized the President's fiscal plan, introduced on April 13, by stating that "When you compare it to the Ryan plan and to the commission's plan, it really doesn't stabilize the debt. The debt, as a percentage of GDP, gets up to around 77 percent, and it never gets to primary balance."

If President Obama and the Democrat leaders of the Senate wish to take solving our spending-driven debt crisis seriously, the solution is simple: Washington must stop spending money it doesn't have.

FIGHT FOR AMERICAN FAMILIES AND DEFEAT H.R. 2587

(Mr. DEUTCH asked and was given permission to address the House for 1 minute.)

Mr. DEUTCH. Mr. Speaker, America earned the name the Land of Opportunity because anyone willing to work hard and play by the rules can make it here. Well, our families still work hard, they still play by the rules, and yet so many are barely scraping by. So they send us to Washington to fight for them. They can't afford lobbyists. They only have us.

Today we will consider Republican legislation that is a textbook example of why too often, the special interests win out over the public interests. H.R. 2587 gives corporations a green light to send jobs overseas if their employees simply ask for a decent salary or better hours. This bill is based on the premise that executives can negotiate multi-million dollar bonuses for themselves, but if American workers exercise their rights, their jobs will be on the next plane to China. That's the majority's answer to outsourcing of American jobs. If the rights of American workers get in the way of corporate profits, then it's time to do away with those

rights. Let's stand up and fight to keep jobs here. Let's fight for American families. Let's defeat H.R. 2587.

□ 1230

STUDENT LOAN DEBT FORGIVENESS

(Mr. CLARKE of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLARKE of Michigan. Mr. Speaker, as we're on the verge of facing government default, there are several proposals on the table for us, as Members of Congress, to consider. And in my opinion, none of these proposals go far enough. Yes, they cut money in hopes of reducing our deficit and reducing our debt.

But here's what they don't do. They don't cut, they don't cap, and they don't forgive student loan debt.

Look, people. We want to create jobs. We want our families to have financial security. We need to help them get out of personal debt. And the most powerful way to get this economy moving again and to get our people the education they need is to help forgive certain student loan debt.

PROVIDING FOR CONSIDERATION OF H.R. 1938, NORTH AMERICAN- MADE ENERGY SECURITY ACT

Mr. WEBSTER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 370 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 370

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 1938) to direct the President to expedite the consideration and approval of the construction and operation of the Keystone XL oil pipeline, and for other purposes. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed one hour, with 30 minutes equally divided and controlled by the chair and ranking minority member of the Committee on Energy and Commerce, 20 minutes equally divided and controlled by the chair and ranking minority member of the Committee on Transportation and Infrastructure, and 10 minutes equally divided and controlled by the chair and ranking minority member of the Committee on Natural Resources. After general debate the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider as an original bill for the purpose of amendment under the five-minute rule the amendment in the nature of a substitute recommended by the Committee on Energy and Commerce now printed in the bill. The committee amendment in the nature of a substitute shall be considered as read. All points of order against the committee amendment in the nature of a substitute are waived. No amendment to the committee amendment in the nature of a substitute shall be in order

except those printed in the report of the Committee on Rules accompanying this resolution. Each such amendment may be offered only in the order printed in the report, may be offered only by a Member designated in the report, shall be considered as read, shall be debatable for the time specified in the report equally divided and controlled by the proponent and an opponent, shall not be subject to amendment, and shall not be subject to a demand for division of the question in the House or in the Committee of the Whole. All points of order against such amendments are waived. At the conclusion of consideration of the bill for amendment the Committee shall rise and report the bill to the House with such amendments as may have been adopted. Any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mr. YODER). The gentleman from Florida is recognized for 1 hour.

Mr. WEBSTER. For the purpose of debate only, I yield the customary 30 minutes to the gentleman from Florida (Mr. HASTINGS)—who has a nice colorful Florida tie on today—pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

GENERAL LEAVE

Mr. WEBSTER. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. WEBSTER. Mr. Speaker, I rise today to support this rule and the underlying bill. House Resolution 370 provides for a structured rule for consideration of House Bill 1938, the North American-Made Energy Security Act.

The rule makes 11 of the 13 amendments submitted to the Rules Committee in order for robust debate here on the floor of the House of Representatives. All 11 amendments made in order are Democrat amendments, and this legislation passed out of Energy and Commerce with bipartisan support, gathering "yes" votes from six Democrats on the committee, including the former chairman, Mr. DINGELL.

This bill has moved through the committee process with bipartisan support because it does not require anything in the extraordinary to do. Distilled in its simplest form, it directs the President to make a decision. It does not prescribe his decision one way or another; it just simply asks him to act, say "yes" or say "no."

After nearly 3 years of review, study, and comment, the President would have to decide whether or not to issue a Presidential permit permitting the Keystone XL pipeline.

This bill does not allow any corners to be cut, any environmental consider-

ations to be glossed over. In fact, not only has it required an Environmental Impact Statement to be executed, but several supplemental statements have been performed as well.

Furthermore, upon receipt of the final Environmental Impact Statement, but not later than November 1, the President still has an additional 30 days to weigh the evidence and make up his mind. After nearly 3 years, he does not have to approve the project nor disapprove the project; he simply has to make a decision.

And what exactly is at stake? What hinges upon the approval or disapproval of this monumental infrastructure project? American job creation, overdue economic growth, and increased national energy security.

TransCanada believes that the approval of the construction of the Keystone XL pipeline will create about 20,000 shovel-ready construction and manufacturing jobs, adding about \$6.5 billion in personal income for those workers. It injects more than \$20 billion in private sector investment in the U.S. economy.

It generates more than \$585 million in new taxes for States and communities along the pipeline route. It pays more than \$5.2 billion in property taxes during the life of the pipeline; undeniably strengthens America's energy security by enabling expanded importation of 830,000 barrels of oil a day from our U.S. neighbor and ally instead of importing it from other unfriendly sources.

In fact, according to the United States Department of State, if the pipeline is not approved, "the U.S. would not receive a reliable and cost-efficient source of crude oil from Canada and would remain dependent upon unstable foreign oil supplies from the Middle East, Africa, Mexico, and South America."

Once again, Mr. Speaker, I rise in support of this rule and the underlying legislation. Relevant committees of jurisdiction have worked to provide us with a bipartisan bill which, at its core, is quite simple. It simply directs the administration to make a decision on America's energy and security and job creation.

I encourage my colleagues to vote "yes" on the rule and "yes" on the underlying bill.

I reserve the balance of my time.

Mr. HASTINGS of Florida. I thank my friend for yielding and compliment him on his sunshine tie, and I yield myself such time as I may consume.

Mr. Speaker, I rise today in strong opposition to the rule for H.R. 1938 and feel that, much like the majority's previous legislation attempts to increase offshore drilling, this backwards-looking dirty energy bill will not lower the price of gasoline for the average American today, tomorrow, or in the future.

It manages, this bill does, to completely ignore the pressing needs to develop clean, sustainable energy. In fact, only the large oil companies will

benefit from this bill. In its very application for the Keystone XL pipeline expansion, TransCanada indicated that it believes this expansion will actually raise oil and gasoline prices.

The pipeline expansion connects Canadian oil to the Gulf of Mexico, making it possible to ship tar sands oil out onto the world market for the first time.

□ 1240

The pipeline will allow TransCanada to bypass the Midwest, reducing what the company called, and I quote, price discounting in the Midwest due to what it considers an, I quote, oversupply. The oil will run past Montana, right through Texas, ignore Nebraska completely, and wave good-bye to the United States while it rides right out of the country.

Providing Canadian oil companies access to this new market is the only reason to want to expand the pipeline. TransCanada's application actually indicates that it expects the price of crude oil to increase by \$6.55 per barrel in the Midwest and \$3 everywhere else after the expansion is completed.

Ultimately, the expansion would lead to a windfall for Canadian oil companies of between \$2 billion and \$3.9 billion by the year 2013, while increasing the cost of gasoline for hardworking Americans between 10 and 20 cents per gallon. The people of the United States will bear all the risks of an onshore oil spill and reap absolutely none of the benefits.

Let there be no mistake about this: the risk of an oil spill from these tar sand pipelines is very real. The oil is so much more corrosive than traditional crude oil that even Canada has yet to approve a dedicated pipeline conveying it to its coasts. The oil eats away at the pipelines, compromising them and leading to frequent spills. For example, the very pipeline for which the majority bill hastens expansion suffered 12 spills in its very first year. The first spill in June 2010 occurred only 1 month after the pipeline went into operation. Just this last May, the Keystone spewed 21,000 gallons of oil in North Dakota.

Already, Mr. Speaker, Americans are paying the price for a project which delivers to them absolutely no benefit. A similar pipeline recently discharged 840,000 gallons of oil into Michigan's Kalamazoo River, causing one of the largest oil spills ever in the Midwest. On July 1, a pipeline broke and spewed approximately 42,000 gallons of oil into the Yellowstone River. Between 1990 and 2005, there were over 4,700 related oil spills. The Keystone pipeline expansion would expand the risk of a BP-sized oil spill from the Gulf of Mexico to front yards across the heart of this country.

After its initial impact statement received harsh and extensive criticism, the State Department issued a supplemental draft statement. The period for public comment on that draft closed on

June 6. The State Department is currently reviewing the comments it received in response to this second statement in a process expected to take several months. Nonetheless, the State Department has reasonably indicated that a decision can be expected by the end of the year. Yet this bill would require a decision within 30 days of the issuance of the final environmental impact statement and no later than November 1.

Without further justification, Republicans seem to think it necessary to short-cut the process, compromising the discussion and its analysis. There are still many questions that need to be answered regarding the pipeline, including information on greenhouse gas emissions, safety, alternative routes, and environmental justice considerations.

This year, the Republican majority has offered three offshore drilling bills that have utterly failed to preserve and protect our environment. It is clear that my friends in the majority are more concerned with keeping big oil companies happy than implementing a workable energy policy for the future. Instead of crafting policies to ensure that the growing sustainable energy industry is filled with American workers, the majority wants to enrich Canadian oil companies at a cost of America's economy and environment.

These kinds of dirty energy bills keep us mired in the muck of fossil fuels when what we need to do is focus on making our energy use more efficient. We need to develop the next generation of clean energy technology. Unfortunately, Republicans seem intent on enabling our country's oil addiction. This is not good policy today and will certainly not be good policy in the future.

I reserve the balance of my time.

Mr. WEBSTER. Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Mr. BARTON).

(Mr. BARTON of Texas asked and was given permission to revise and extend his remarks.)

Mr. BARTON of Texas. I thank my friend from Florida for the time.

Mr. Speaker, I am puzzled by Congressman HASTINGS' remarks in opposition to the rule. This is a very fair rule. The Rules Committee received 13 amendments from the minority. They made in order 11 of those. One amendment was not germane and the other amendment by the gentleman from Massachusetts (Mr. MARKEY) would have restricted the oil to the United States and not allowed any of the product to be refined and sent overseas possibly, and that's a function that the Rules Committee felt should be a market function and not prohibited.

So 11 amendments by the minority were made in order. This is a bill that came out of my committee, the Energy and Commerce Committee, on a bipartisan vote. All the Republicans supported it and between a fourth and a third of the Democrats supported it.

The underlying thesis of the bill is pretty straightforward. Under current

law, you're supposed to make a decision on pipeline permits between 180 and 90 days. The Obama administration EPA has had 2 years on their watch and 1 year under the Bush administration. EPA has had over 3 years if you count towards this September, next month, or right after August, and has not made a decision. The bill says make a decision. Make a decision.

There is an existing pipeline. The Keystone pipeline would connect an existing pipeline that ends in the Midwest to the gulf coast. It would go to Congressman POE's district in Port Arthur and go over into Louisiana. It would create tens of thousands of jobs in construction; it would bring approximately a million barrels of oil per day into the United States to provide competition for existing oil supplies; it would be refined in U.S. refineries; and most of the product, if not all, would probably be consumed by U.S. consumers.

This is a good bill. This is a good rule. I would ask that we support the rule and then listen to the debate and hopefully decide to support the underlying bill.

Mr. HASTINGS of Florida. Mr. Speaker, if I could engage the gentleman from Texas just a moment, I will yield myself 30 seconds before yielding to my colleague from Virginia.

I just am curious to know if this will cause the price of gasoline to go down, in your judgment.

Mr. BARTON of Texas. Will the gentleman yield?

Mr. HASTINGS of Florida. I yield to the gentleman from Texas.

Mr. BARTON of Texas. In my judgment, providing more fuel supply for our refineries would liken the possibility that prices would go down.

Mr. HASTINGS of Florida. Likely possibility. I'll take that pretty much as a "no."

Mr. BARTON of Texas. No, that's a "yes." Take it as a "yes." Competition drives prices down.

Mr. HASTINGS of Florida. I thank the gentleman.

Mr. Speaker, I am very pleased to yield 2 minutes to my good friend from Virginia (Mr. CONNOLLY).

Mr. CONNOLLY of Virginia. I thank my colleague and my friend from Florida.

Mr. Speaker, I rise in opposition to this rule, and I rise in opposition on substantive grounds. The Rules Committee approved for our consideration here on the floor every germane amendment but one, the Markey-Connolly amendment, which would have required a simple certification that the bulk of this oil to be transported by this proposed pipeline be for and designated for domestic consumption.

□ 1250

We hear a lot of rhetoric about the need to expand American production and/or access to secure oil to lessen our dependence on foreign suppliers. That,

indeed, is a noble goal. It's one in which I share, but not at any price, and I don't want to be sold a pig in a poke.

The fact that the Rules Committee would not put that amendment on this floor, going into content rather than procedure, finding it germane but still not allowing a fair debate and its consideration on this floor, I think gives the lie to the intent behind the extension of this pipeline.

This oil is not for domestic consumption; this oil is for foreign export. It has very little to do with domestic oil supply or it might have very little to do with domestic oil supply. A simple requirement that the preponderance of it be for domestic supply I think would have made prudent domestic policy and I think would have allowed a fair and interesting debate here on the floor of the House as to what the real intention of this pipeline is.

So I say to the American public, I urge you not to be fooled by propositions from the other side that this is going to be good for American consumers. This is going to be good for Chinese consumers.

Mr. WEBSTER. Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Mr. POE).

Mr. POE of Texas. I thank the gentleman from Florida for yielding. I also admire the gentleman from Florida with the exotic tie and his comments. But I stand in support of the rule and, of course, the underlying bill. The rule is a fair rule.

I represent southeast Texas. We still think we're the energy capital of the world. The pipeline from Canada will go down into southeast Texas, Port Arthur, Texas, which actually has high unemployment. The pipeline will go to the refineries. The refineries will be able to expand and hire refinery workers to refine that crude oil. I think that's a good idea.

The Canadian oil sands will be able to produce 175 barrels of oil reserves, second only to Saudi Arabia. The idea that we need to move away from Middle Eastern oil is a good idea. Maybe we ought to support our loyal allies that are in a stable country.

A medium-sized pipeline, just to give you some statistics, pumps about 150,000 barrels a day. To replace that, you would have to have 750 trucks a day or a 75-car train every day.

Pipelines are the safest way to transport crude oil. Seventy-five percent of the accidents occur with a third party causing the accident to the pipeline. But if we don't make a decision—that's what we're asking the President to do—make a decision. And as my friend from Florida knows, being former judges, we made decisions. It didn't take us 3 years to make a decision. You get the evidence; you make a ruling. And it has taken, I think, the Federal Government way too long to make a decision on this issue.

But failure to act—delay, delay, delay—is tantamount to a “no,” and eventually the Canadians will sell that

crude oil that they have to China or other buyers. So I think it's quite important that we go ahead and make a decision, have the Federal Government rule on this issue.

There are 500,000 miles of pipelines into the United States; about half of those run through Texas. I'm told that a third of all those pipelines run through my congressional district. We have a lot of pipelines. And I think it's important that we continue to try to take care of ourselves, use a safe product from Canada, make sure that all the environmental requirements are imposed in making this pipeline that creates jobs in America—build a pipeline, create jobs in southeast Texas for Americans and the refinery business—because we still rely on crude oil.

And last I would say, I agree, we need to eventually have green energy, but we don't have that now. So if we cut off all of this, what will we use?

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. WEBSTER. I yield the gentleman 30 additional seconds.

Mr. POE of Texas. So I urge support of the rule. I urge adoption of this legislation so that we can move forward with construction, American jobs, and deal fairly on the issue of energy reliance upon ourselves and getting that from our allies instead of Third World dictators like Chavez and the Middle East.

Mr. HASTINGS of Florida. Mr. Speaker, I would say to my friend, Judge POE, that we have to start—and we are starting—the green energy movement. I readily understand the economic impact on Port Arthur, the State of Texas, and I also am deeply concerned for the ranchers in the Midwest, specifically Montana, Nebraska, those States, North Dakota, that are bypassed. And the possibility of their oil and gas costing more is, at the least, disturbing.

But I do want to share a report that was formulated regarding tar sands and their potential by the IHS Cambridge Energy Research Association, and it's under the aegis: “Growth in the Canadian Oil Sands.” What it says is:

“Tar sands, which are also known as ‘oil sands,’ are a combination of clay, sand, water, and bitumen, a heavy, black, asphalt-like hydrocarbon that cannot be extracted through a well like conventional oil. It is estimated that Canada's economically recoverable tar sands deposits in Alberta total 173 billion barrels, making Canada”—as Judge POE pointed out—“second after Saudi Arabia in oil reserves.

“Producing fuel from tar sands has significant environmental impacts. Extracting tar sands bitumen and upgrading it to synthetic crude oil produces roughly three times greater greenhouse gas emissions than producing conventional oil on a per-unit basis. Tar sands development also destroys boreal forests and wetlands and wildlife habitat, kills migratory birds, and degrades water quality and air quality.”

That said, tar sands oil contains, on average, 11 times more sulfur, 11 times more nickel, six times more nitrogen, and five times more lead than conventional oil. These pollutants are harmful to human health, causing lung and respiratory problems such as asthma and bronchitis, and the metals found in tar sands are neurotoxic. The pollutants released by refining tar sands causes acid rain, smog, and haze, and communities living near these refineries report elevated levels of cancer.

Mr. Speaker, the bill before us overrides current law for the sake of padding the pockets of oil company CEOs and fails to create significant sustainable jobs for the average American in the growing sustainable energy sector. This bill will never become law and is once again a waste of our time.

I oppose this unnecessary opportunistic legislation for many of the same reasons that I have made very clear, as have others, but I have made the vow to be the last man standing in the fight against expanding offshore drilling, and I may be among those that will continue to stand against transborder tar sands being transmitted here for purposes of going out onto the world market and not allowing for any reduction in the cost of gasoline in the United States of America.

I urge my colleagues to vote “no” on the rule and the underlying legislation.

Mr. Speaker, I yield back the balance of my time.

□ 1300

Mr. WEBSTER. Mr. Speaker, this rule provides for ample and open debate, allowing our colleagues from across the aisle to offer their legislative proposals to this bill.

Furthermore, the underlying bill addresses two critical concerns, if you listen to speeches made in this Chamber every day, of every Member of this House: unemployment and dependence on OPEC oil.

As I have stated, 20,000 shovel-ready jobs can be created with the approval of this infrastructure project. Approval of the Keystone XL pipeline will also serve to increase oil imports from our friend and neighbor in the north, Canada, while driving down our dependence on oil from countries that, quite frankly, do not share our ideas about democracy and freedom.

Most important, this bill does not force the President to approve this job-creating infrastructure project. It simply asks him, requires him to make up his mind after coordinating with all of the appropriate stakeholders.

I ask my colleagues to join me today in voting in favor of this rule and passage of the underlying bill.

I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered. The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HASTINGS of Florida. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess for a period of less than 15 minutes.

Accordingly (at 1 o'clock and 2 minutes p.m.), the House stood in recess subject to the call of the Chair.

□ 1311

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. YODER) at 1 o'clock and 11 minutes p.m.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on questions previously postponed.

Votes will be taken in the following order:

- adoption of H. Res. 370, by the yeas and nays;
- motion to suspend the rules on H.R. 1383, by the yeas and nays;
- approval of the Journal, by the yeas and nays.

The first electronic vote will be conducted as a 15-minute vote. Remaining electronic votes will be conducted as 5-minute votes.

PROVIDING FOR CONSIDERATION OF H.R. 1938, NORTH AMERICAN-MADE ENERGY SECURITY ACT

The SPEAKER pro tempore. The unfinished business is the vote on adoption of the resolution (H. Res. 370) providing for consideration of the bill (H.R. 1938) to direct the President to expedite the consideration and approval of the construction and operation of the Keystone XL oil pipeline, and for other purposes, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the resolution.

The vote was taken by electronic device, and there were—yeas 246, nays 171, not voting 15, as follows:

□ 1336

Messrs. HOLDEN, LUJÁN, and BECERRA changed their vote from “yea” to “nay.”

The resolution was agreed to. The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated against: Ms. SCHAKOWSKY. Mr. Speaker, on roll-call No. 637, had I been present, I would have voted “nay.”

RESTORING GI BILL FAIRNESS ACT OF 2011

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and concur in the Senate amendments to the bill (H.R. 1383) to temporarily preserve higher rates for tuition and fees for programs of education at non-public institutions of higher learning pursued by individuals enrolled in the Post-9/11 Educational Assistance Program of the Department of Veterans Affairs before the enactment of the Post-9/11 Veterans Educational Assistance Improvements Act of 2010, and for other purposes, on which the yeas and nays were ordered.

The Clerk read the title of the bill. The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. MILLER) that the House suspend the rules and concur in the Senate amendments.

This will be a 5-minute vote. The vote was taken by electronic device, and there were—yeas 424, nays 0, not voting 8, as follows:

-------	---------

NOT VOTING—6

Bachmann	Hinche	McDermott
Giffords	Marchant	Wu

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Two minutes remain in this vote.

□ 1350

So the Journal was approved.

The result of the vote was announced as above recorded.

OFFICIAL PHOTOGRAPH OF 112TH CONGRESS

The SPEAKER. Pursuant to House Resolution 299, this time has been designated for the taking of the official photo of the House of Representatives in session.

The House will be in a brief recess while the Chamber is being prepared for the photo. As soon as the photographer indicates that these preparations are complete, the Chair will call the House to order to resume its actual session for the taking of the photograph. At that point the Members will take their cues from the photographer. Shortly after the photographer is finished, the House will proceed with its business.

RECESS

The SPEAKER. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess while the Chamber is being prepared.

Accordingly (at 1 o'clock and 50 minutes p.m.), the House stood in recess.

□ 1355

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 1 o'clock and 55 minutes p.m.

(Thereupon, the Members sat for the official photograph of the House of Representatives for the 112th Congress.)

NORTH AMERICAN-MADE ENERGY SECURITY ACT

GENERAL LEAVE

Mr. WHITFIELD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks on the legislation and to insert extraneous material on the bill.

The SPEAKER pro tempore (Mr. YODER). Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The SPEAKER pro tempore. Pursuant to House Resolution 370 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the state of the Union for the consideration of the bill, H.R. 1938.

□ 1403

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H.R. 1938) to direct the President to expedite the consideration and approval of the construction and operation of the Keystone XL oil pipeline, and for other purposes, with Mrs. EMERSON in the chair.

The Clerk read the title of the bill.

The CHAIR. Pursuant to the rule, the bill is considered read the first time.

General debate shall be confined to the bill and shall not exceed 1 hour, with 30 minutes equally divided and controlled by the chair and ranking minority member of the Committee on Energy and Commerce, 20 minutes equally divided and controlled by the chair and ranking minority member of the Committee on Transportation and Infrastructure, and 10 minutes equally divided and controlled by the chair and ranking minority member of the Committee on Natural Resources.

The gentleman from Kentucky (Mr. WHITFIELD) and the gentleman from California (Mr. WAXMAN) each will control 15 minutes. The gentleman from Florida (Mr. MICA) and the gentleman from West Virginia (Mr. RAHALL) each will control 10 minutes. The gentleman from Washington (Mr. HASTINGS) and the gentleman from Massachusetts (Mr. MARKEY) each will control 5 minutes.

The Chair recognizes the gentleman from Kentucky.

Mr. WHITFIELD. I yield myself such time as I may consume.

Madam Chairman, I rise today to support H.R. 1938, the North American-

Made Energy Security Act, and give a long overdue green light to the Keystone XL pipeline project. The Keystone XL expansion project would allow up to 1.29 million barrels per day to flow into refineries in the Midwest and gulf coast, a 700,000-barrel-per-day increase over existing capacity from Canada. More oil means lower prices, and more imports from a stable ally like Canada means less from unstable nations and potential adversaries.

According to a study conducted for the Department of Energy, the Keystone project has the potential to significantly reduce oil imports from the Middle East. The good news only gets better when one looks at the job impacts of the Keystone project. Construction of the expanded pipeline system alone would create an estimated 20,000 jobs.

Unfortunately, the Obama administration continues to delay this project, and there seems to be no end in sight. Let's just look at the timeline to date:

In September 2008, TransCanada, the developer of this project, first submitted its application for a Presidential permit. The State Department didn't release its draft environmental impact statement until April 2010. After this first step, EPA rejected the draft statement and told the State Department they had to perform more work. After another year, the State Department issued a supplemental draft statement that addressed EPA's concerns. Even then, EPA seems to think the thousands and thousands of pages of objective and honest analysis performed by various Federal agencies is not enough.

Because of the endless delays, H.R. 1938 is a simple bill that calls on the Obama administration to make a decision on this project by November 1, 2011. The administration has stated that they could have a decision by December 16, 2011, so we're only asking them to speed that up a few months, and we're not saying what the decision should be.

At a time when the national average of a gallon of gas is \$3.70 per gallon and unemployment is still above 9 percent, the Obama administration should be doing everything it can to approve projects expeditiously if they are creating jobs and reducing gasoline prices.

H.R. 1938 is a bipartisan bill that cuts through the endless delays and creates a hard deadline for the administration to render a decision on Keystone. It's time to get moving on reducing energy prices, reduce unemployment, and pass this bill.

I urge all Members to support this important bill.

I reserve the balance of my time.

Mr. WAXMAN. Madam Chair, I yield myself 5 minutes.

I rise in opposition to H.R. 1938. This legislation is unnecessary and it's harmful. It cuts short the State Department's ongoing review of the Keystone XL tar sands crude pipeline, it would deny the public an adequate opportunity to comment on whether the

pipeline should be built, and it benefits a specific foreign company, TransCanada Corporation, at the expense of the American people.

There are really two distinct questions here: Do you think the Keystone XL pipeline is a good idea? And does this legislation make any sense? I happen to think that the Keystone XL pipeline is a bad idea; but even if you support the pipeline, you should oppose this bill.

The Keystone XL pipeline would carry a sludge made from Canadian tar sands through the middle of America. In doing so, it would raise gas prices, endanger water supplies, and increase carbon emissions; and that's why it should not be approved.

□ 1410

Keystone XL is a highly controversial project. The State Department received over 200,000 comments on the supplemental draft environmental impact statement. Once it is built, we will live with the pipeline and its impacts for 50 years or more. This is a decision we need to get right. Unfortunately, this bill's approach does not get it right. Instead, it says whatever the risks and costs, just get it done.

H.R. 1938 takes the extraordinary step of interfering in an ongoing decisionmaking process by the Secretary of State. The Secretary is in the midst of determining whether granting the permit requested by TransCanada would be in the national interest. The process for making these permit decisions was established by Executive orders issued by President Johnson and President George W. Bush. The State Department says that it plans to issue the final environmental impact statement in mid-August and the final decision by the end of the year. That's when the applicants say they need a decision.

This bill overrides the Executive orders and other Federal law, it short-circuits the decisionmaking process, and it requires the President to make a decision within 30 days of the final environmental impact statement. This effectively eliminates the opportunity for public comment on the national interest determination, and it cuts the time for consulting with other agencies by two-thirds. That doesn't make sense, especially when you consider the potential risk.

My greatest concern is that Keystone XL will make us more reliant on the dirtiest source of fuel currently available. On a life-cycle basis, tar sands emit far more carbon pollution than conventional oil—almost 40 percent more by some estimates. That's because it takes huge amounts of energy to take something the consistency of tar, which they mine, and turn it into synthetic oil. We should be reducing our oil dependence and using cleaner fuels, but Keystone is a big step in the wrong direction.

There are many other concerns, including safety. Today is the 1-year anniversary of the Kalamazoo River oil

pipeline spill, and 30 miles of the river are still closed. A few weeks ago, there was a massive oil pipeline spill into the Yellowstone River. And TransCanada, Keystone XL's owner and operator, has had 12 spills on the first Keystone pipeline in its first year of operation. Keystone One was even shut down by the Department of Transportation as "hazardous to life, property, and the environment." The risks from spills are exacerbated with Keystone XL because it is rooted through the Ogallala aquifer, which spans eight States and provides drinking water for 2 million people.

With all of these risks, the benefits are unclear. A study commissioned by DOE found that we will have excess pipeline capacity from Canada for the next decade or more, even without Keystone XL. And Keystone XL will likely raise, not lower, gas prices. In its permit application, TransCanada told the Canadian Government that by raising prices for crude oil in the Midwest, Keystone XL will increase revenue for Canadian producers by \$2 billion to \$4 billion a year.

But even if you believe we should build Keystone XL, you should oppose this legislation.

The CHAIR. The time of the gentleman has expired.

Mr. WAXMAN. I yield myself an additional 30 seconds.

If you think the project has merit, let it be approved on the merits, not rushed to judgment without public comment. Cutting the public out of the process and ramming this through will only increase opposition to this project.

I urge my colleagues to vote "no" on H.R. 1938.

I reserve the balance of my time.

Mr. WHITFIELD. Madam Chair, I yield 2½ minutes to the gentleman from Michigan (Mr. UPTON), the chairman of the Energy and Commerce Committee.

Mr. UPTON. Today, national unemployment rests at 9.2 percent, but it's even higher in my State of Michigan at 10.5 percent. Gasoline costs \$3.80 a gallon or more in many areas, up a dollar from last year. Political unrest halfway around the world disrupts the flow of oil to markets, causing prices to rise. Most leaders in this situation would be searching for a project that would create jobs, help bring down gas prices and, yes, provide a stable and secure source of oil to replace imports from dangerous parts of the world. Our President is being handed such a project on a silver platter, and he's dangerously close to letting it slip through his fingers.

Our northern ally, Canada, has discovered an oil resource comparable to the size of Saudi Arabia, and they want to send the oil here to the United States. Five major labor unions have thrown their support behind the pipeline because it's going to create more than 100,000 jobs. Yet this administration has allowed the permit application to languish for nearly 3 years, even

saying that they were inclined to support it almost a year ago in October.

This pipeline, the Keystone XL, if approved, would dramatically improve our energy security. According to DOE, the pipeline would essentially eliminate our Middle East oil imports. It would provide for a massive influx of stable oil into the market, something desperately needed as threatened supplies in North Africa send prices into orbit.

This country needs the President to make a decision on Keystone XL's permit. The uncertainty has gone on too long, and if we don't act, these energy supplies will go someplace else. That's why we have this legislation, H.R. 1938. This bipartisan bill doesn't tell the President how to decide, it just requires him to make a decision. I commend my colleagues, Representatives Terry and Ross, for finding a common-sense and, yes, bipartisan solution.

If we don't build this pipeline, Canada will find another buyer. The Chinese have expressed significant interest in Alberta's oil sands. Are we going to stand by and watch China receive imports from our ally while we're forced to rely on imports from unstable countries? I sure hope not.

While I believe construction of this pipeline is necessary and important, I know it has to be done safely. Last year, 20,000 barrels of oil did spill through a creek that runs through my district. I have made pipeline safety a priority in our committee, and just this week we're going to be moving forward on effective pipeline safety legislation to protect the environment and, yes, our communities.

This legislation will ensure that crucial energy supplies, like the oil received from Canada, is transported safely throughout the country. We need a "yes" vote on this bipartisan bill.

Mr. WAXMAN. Madam Chair, I yield 2 minutes to the gentlewoman from California (Mrs. CAPPS), a member of the Energy and Commerce Committee.

Mrs. CAPPS. I thank my colleague for yielding.

Madam Chair, I rise to speak against this hazardous piece of legislation.

H.R. 1938 directs the President to allow Canadian oil companies to build a dangerous pipeline through American lands and waters. And H.R. 1938 would expedite the pipeline's permitting process despite a long list of unaddressed concerns from numerous communities. The environmental impacts of this pipeline—which would extend over 1,600 miles through six States—have not been thoroughly considered. And we know that this project has the potential to significantly impact the environment.

We have already seen what damage can be done. There have been 12 spills along TransCanada's Keystone pipeline in its first 12 months of operation. And the Keystone XL pipeline will deliver some of the most destructive oil on the planet. Tar sands oil contain higher

concentrations of toxic chemicals, like sulfur, nickel, nitrogen, and lead, than conventional oil. And a barrel of tar sands oil emits up to three times more climate-disrupting gases than conventional oil.

Building this pipeline would be the greenhouse equivalent of adding roughly 6.5 million passenger vehicles to a highway or constructing 12 new coal-fired power plants. Major concerns arise about the negative impacts of the pipeline on public health and the environment.

At a time when we must find ways to end our dependence on fossil fuels, it is simply not in the national interest to deepen our reliance on one of the most dirtiest forms of oil on the planet. I believe that conducting the appropriate analysis under NEPA, which cannot be done properly if it's rushed, will make this abundantly clear.

We need to be moving forward by supporting clean, renewable energy in this country. And while the President is calling for a reduction in oil imports, this bill calls for an increase.

For all these reasons, I urge my colleagues to vote "no" on H.R. 1938.

□ 1420

Mr. WHITFIELD. I yield 2 minutes to the gentleman from Nebraska (Mr. TERRY), the author of the bill.

Mr. TERRY. Madam Chair, this bill is simple, but the ramifications may be significant. Let me set the record straight: I want to get off OPEC oil. Receiving as much as 700,000 barrels of oil from our northern neighbor, Canada, makes us more energy secure, more energy independent.

The application for this pipeline, an efficient way to move oil from one part to another part, the most efficient and safest, was filed almost 3 years ago. We are just a month shy of its 3-year anniversary; whereas, it is usually around 18 months to 24 months to have something like this approved.

Now, this bill sets a hard date of November 1, 2011, for the President to make a determination of national interest on this pipeline. Let me repeat: All we're asking is that the President make his decision by November 1. Enough time has passed.

Now, what we would see if this project moves forward: It will be a \$13 billion construction project, privately funded; it will create at least 20,000 direct high-paying labor construction jobs; it will generate \$6.5 billion in new personal income for U.S. workers and their families; it will spur more than \$20 billion in new spending for the U.S. economy; it will stimulate more than \$585 million in new State and local taxes; it will deliver \$5.2 billion in property taxes during the estimated operating life span of this pipeline.

Now, we have heard from two speakers already about the environmental impacts. I come from Nebraska. I want to make sure that this pipeline is safe as it passes through an environmentally sensitive area called the Sand

Hills and over the Ogallala Aquifer. There have been draft environmental impact statements. There have been supplements, and it has been shown that it can be done safely. This is the single-most studied pipeline in the history of the United States.

I believe it's in our national security interest. It's about the jobs, economy, and energy security.

Mr. WAXMAN. Madam Chair, I yield 2 minutes to the gentleman from Texas (Mr. GENE GREEN).

Mr. GENE GREEN of Texas. Madam Chair, I thank the gentleman, the ranking member of Energy and Commerce, for yielding me this time.

I rise in strong support of H.R. 1938. I represent a district at the end of this proposed pipeline in southeast Texas. I have five refineries in my district, and this will give them an alternative for crude oil to keep those refineries running.

North American oil sands are a vital source of energy for the U.S., and with skyrocketing fuel prices, I believe it's imperative for the U.S. to diversify our energy sources by exploring alternatives such as the oil sands in Canada.

As the largest single exporter of oil to the U.S. and a stable energy partner, Canada has helped to reduce our dependence on energy supplies from unfriendly nations, and this partnership should continue and be encouraged.

The pipeline owner, TransCanada, has agreed to comply with 57 additional special conditions developed by the Pipeline and Hazardous Materials Safety Administration for the Keystone XL project.

The supplemental environmental impact statement on the project has gone so far as to state that the incorporation of these conditions will result in a project that has a larger degree of safety over any other typically constructed domestic oil pipeline under the current code or law, and a larger degree of safety along the entire length of the pipeline similar to what we have in high consequence areas.

Additionally, an independent study showed that the \$7 billion Keystone XL pipeline is expected to directly create 20,000 high-wage manufacturing and construction jobs in the U.S. So not only will this project help our energy security, but it will help our recovering economy by creating thousands of jobs.

I am constantly hearing from building trades in the Houston area about their support for this pipeline and the bill. And yet none of this even matters because the bill very fairly doesn't say what the administration's determination should be. Instead, it says expedite the decision. It has been too long once the environmental review is complete.

I appreciate the Department of State's recent announcement that they are on track to make a final decision by December 31. Maybe that wouldn't have been announced last week if we hadn't had this bill moving in the House. But I do appreciate the effort. I support the bill and appreciate my colleagues' support.

Mr. WHITFIELD. Madam Chair, I yield 2 minutes to the gentleman from Texas (Mr. OLSON).

Mr. OLSON. I thank the gentleman for yielding me this time and for his leadership on this important issue.

Madam Chair, I rise today in strong support of H.R. 1938, the North American-Made Energy Security Act. This bill is a bona fide jobs bill and will have a positive economic impact on our entire country.

The Keystone XL pipeline will stretch from our neighbor and ally Canada through Montana, the intersection of North Dakota and South Dakota, Nebraska, Kansas, Oklahoma, all of the way down to my home State of Texas, ultimately transporting nearly 1.3 million barrels of oil per day—1.3 million barrels per day—and creating hundreds of thousands of jobs on its journey to the gulf.

The Keystone XL pipeline has the potential to create up to 624,000 jobs over the next 15 years, including 50,000 in the Lone Star State, with its economic impact valued in the billions. Madam Chair, 170,000 companies alone in Texas would serve as suppliers. These are real jobs for real Americans.

This is real energy security for America. The Department of Energy has determined that this pipeline could "essentially eliminate" our dependence on Middle Eastern oil sources.

The Obama administration has dragged its feet for over 2 years, insisting on delaying the project with more environmental studies and regulatory hurdles. If we don't break through this regulatory wall, China is more than happy to take our place.

The studies have been done, Madam Chair. It is time to approve the permit. H.R. 1938 will ensure that the administration does just that.

The Keystone XL pipeline will strengthen America's economy and reduce our dependence on Middle Eastern oil.

The CHAIR. The time of the gentleman has expired.

Mr. WHITFIELD. I yield the gentleman an additional 1 minute.

Mr. OLSON. In conclusion, the Keystone XL pipeline will strengthen America's economy, reduce our dependence on Middle Eastern oil, and produce hundreds of thousands of jobs right here in America. It's a win/win/win.

I urge my colleagues to support this very important energy security bill that creates, jobs, jobs, jobs right here in America.

Mr. WAXMAN. Madam Chair, I am pleased at this time to yield 2 minutes to the gentleman from Virginia (Mr. CONNOLLY).

Mr. CONNOLLY of Virginia. Madam Chair, this bill is a charade. It purports to increase oil production in America, yet it would direct construction of a pipeline designed to export oil. There is already one Keystone pipeline from the tar sands of Alberta into America. That pipeline terminates in Oklahoma

and supplies America with oil derived from tar sands.

If the Republicans wanted to bring a bill to the floor that would increase domestic access to this oil, then it would support it. In fact, Mr. MARKEY and I introduced an amendment to ensure that oil from the Keystone pipeline would benefit American consumers, and it wasn't allowed on the floor. The Republican leadership wouldn't even let this amendment come for debate. They claim this pipeline will deliver oil to America but have used a backdoor procedural trick to block debate on it.

The amendment Mr. MARKEY and I introduced was the only germane amendment which was blocked by the Rules Committee. Why? Because it gives lie to the real intent of this bill: oil for export, not for domestic consumption. Our amendment met all of the parliamentary tests necessary to come to the floor and didn't increase spending. All it would have done was ensure that Keystone pipeline oil would flow to America rather than China, Cuba, or some other country. The fact that the Republicans blocked this simple amendment shows that the bill before us today isn't about energy security or gas prices but about oil company profits and exports.

It isn't surprising that leadership would put Big Oil profits ahead of consumers. This is the same caucus that is driving our Nation toward default while they refuse to close tax loopholes for oil companies.

□ 1430

This is the same Republican caucus that gutted the Clean Air and Clean Water Act earlier this week with three dozen policy riders in the Interior and Environment appropriations act; the same Republicans that slashed funding for the Commodities Futures Trading Commission, our cops on the beat to stop oil speculation; the same Republicans who opposed using the Strategic Petroleum Reserve to burst the speculative bubble in prices, that marches in lockstep with big oil companies since they took over the House majority; and today they're attempting to pass legislation that would take gas from America and send it overseas. We're being given a false proposition in this legislation, and I urge my colleagues to oppose it.

The CHAIR. The time of the gentleman has expired.

Mr. WAXMAN. Madam Chair, I yield the gentleman 1 additional minute and ask if he will yield to me.

Mr. CONNOLLY of Virginia. I yield to the gentleman from California.

Mr. WAXMAN. I must say that we've heard comments on the floor and in committee on this bill that it's going to allow us to become less dependent, maybe not even dependent at all, on Saudi Arabia; that we'll be able to be self-sufficient and have lower prices because of this pipeline. But the truth of the matter is that some economists believe that this oil pipeline will bring

oil to Texas, and that oil will either be refined or shipped as crude oil to China. It doesn't help us to have any excess oil if it's going to be picked up and shipped to China.

I think that we need to always have in mind that the United States of America uses 25 percent of the world's oil resources and we have 2 percent of the source of those resources—the reserves—here in the United States. We are always going to be dependent on imported oil unless we start moving away from oil itself.

I thank the gentleman for yielding.

Mr. WHITFIELD. Madam Chair, how much time do I have remaining?

The CHAIR. The gentleman from Kentucky has 4 minutes remaining, and the gentleman from California has 2½ minutes remaining.

Mr. WHITFIELD. At this time I yield 2 minutes to the gentleman from Louisiana (Mr. SCALISE), a member of the Energy and Commerce Committee.

Mr. SCALISE. I thank the gentleman from Kentucky for yielding.

I rise in support of this jobs bill, the Keystone bill, that actually opens up another 700,000 barrels a day coming into the United States from Canada. First of all, this oil will be going to United States refineries in Texas to refine oil for Americans. On top of that, it will create another 20,000 American jobs.

If you look at what that means, first of all, China wants to get that oil from Canada. So if we don't agree to this, if the President, for whatever reason—because radicals don't want that oil coming in. They don't like oil at all. So I guess they're going to ride around on bicycles, and that's going to get them where they need to be.

We've got to live in reality. We've got a demand in this country for oil. It's either going to come from Middle Eastern countries, many of whom don't like us, or we can bring more of it in not only from America, where the United States has more reserves that they won't allow us to utilize, but here Canada is saying 700,000 barrels a day can come into America, where we can create those good jobs. What does that really mean? That means we don't have to buy 700,000 barrels a day from Middle Eastern countries.

Let's talk about the trade gap. The biggest part of our trade gap is all the money that we send to these Middle Eastern countries and other countries because we don't produce enough of our own in America because of these radical policies. So you bring that 700,000 barrels a day from Canada, that's \$25 billion a year that we're not sending to Middle Eastern countries who don't like us.

If you want to talk about a trade gap, when we trade with Canada, think about this: When we trade with Canada, 90 cents on the dollar comes back to the United States of America. Canada is a great ally and a good friend of ours. It's a good trading relationship. We get 90 percent of that money back.

When we trade with Middle Eastern countries, buying their oil, which we do right now, less than half of that money comes back to the United States.

So if you want to talk about this from dollars and cents, from jobs, from national security, all of that adds up to passing this bill to build this relationship, build this pipeline with Canada, who says they want to partner with us. Now, if we turn them down, they'll go to China. But they want this relationship. They want to increase our energy security and create those jobs.

I urge passage of this bill.

Mr. WAXMAN. Madam Chair, I am pleased at this time to yield 2 minutes to the gentleman from Georgia (Mr. JOHNSON).

Mr. JOHNSON of Georgia. Let's connect the dots here. The Koch brothers, who financed the election of 2010, won. And they won big time. They own a facility up in Canada that will be the place where the tar sands oil will be converted into a form that can then be shipped to the gulf coast by this pipeline. All that money that they put in, millions and millions of dollars into the last election, is coming back as a return on the investment. And it's a big return, ladies and gentlemen.

This pipeline is going to cost \$13 billion. Who's paying for it? The Koch brothers? No, not the Koch brothers. The American people are on the hook for the \$13 billion to build this pipeline for the Koch brothers and for their cohorts ExxonMobil, Shell, BP, and all of the rest of the big boys whose tax credits and tax breaks they are protecting without hesitation.

So they're getting it both ways, ladies and gentlemen. They're getting it on the front end, and they're getting it on the back end in terms of not having to pay any taxes.

I think we need to look at during this debt ceiling debate what our priorities are as a Nation and what our values are. Are we simply there to do the bidding of Big Business and the oil companies, or are we here to do the business for the American people?

Mr. WHITFIELD. Madam Chair, at this time I yield 1 minute to the gentleman from Colorado (Mr. GARDNER).

Mr. GARDNER. I thank the chairman for yielding.

Today, I rise to speak on the importance of the Keystone XL pipeline, H.R. 1938. One of my goals here in Congress has been to help advance projects like this—projects that will help advance domestic sources of energy. I'm continuously awed at how much potential we have here at home—and our neighbors—and how relatively simple it would be to advance policies that would make us more energy independent. However, I'm continuously baffled at how difficult this administration has made it to wean ourselves off Middle East oil and to create more jobs here at home. In fact, this bill alone, in committee I learned that it will create 6,000 new jobs in Colorado

over the next 4 years—good-paying construction jobs, for example.

I'm appalled at the regulatory burdens or, almost worse sometimes, the inaction on the part of our administration that has led us down the path of insecurity and dependence on many countries that have animosity towards us. Not only do we have the resources in our own backyard, but we have the ability to utilize friendly and willing neighbors like Canada to import oil into the United States.

H.R. 1938, the Northern American-Made Energy Act, would direct the President to simply make a decision on the Keystone XL permit and hopefully move us in the direction of energy security. American jobs, American made.

I urge passage of this bill.

The CHAIR. The gentleman from California has 30 seconds remaining.

Mr. WAXMAN. Madam Chair and Members of this House, climate change is real. We're experiencing its effects. According to The Washington Post, almost 2,000 high temperature records have been broken in towns and cities across America since the start of the month. Another 4,300 records have been set for high overnight temperatures. I don't think that we should short-circuit consideration of a pipeline that increases our consumption of tar sands crude with up to 40 percent higher carbon pollution. That is not in our national interest.

Even the National Farmers Union is urging opposition to this legislation. They say: "NFU continues to have serious concern regarding the Keystone XL pipeline as currently proposed. We believe all necessary time should be taken for public review and analysis of options for the proposed project. Congress should not fix a hard deadline for this process to be completed."

I urge a "no" vote on this legislation.

I yield back the balance of my time.

□ 1440

Mr. WHITFIELD. Madam Chair, I would remind everyone that in America today, we're using about 22 million barrels of oil a day and that we're producing about 7 million barrels of oil a day in this country. We need more efficiency—there is no question about that—to make better gas mileage.

We also have to recognize that we have the responsibility to bring more product into the United States. To do so from Canada would be good for the American people. It would create, it has been said, 20,000 construction jobs at a time when unemployment is at 9.2 percent. We also understand that, if that pipeline does not come to America, it's going to go to west Canada, and then that oil will be going to China. We have to remain competitive in the global marketplace if we're going to create jobs in America, and that's what this pipeline is about.

I would remind everyone that we're not short-circuiting any studies. Comprehensive studies have been made, and environmental impact statements have

been examined, so I would urge everyone to support this important legislation.

I yield back the balance of my time.

Mr. SHUSTER. I claim time in support of the bill on behalf of the Committee on Transportation and Infrastructure.

The CHAIR. The gentleman from Pennsylvania is recognized for 10 minutes.

Mr. SHUSTER. I yield myself such time as I may consume.

Madam Chair, I rise in support of H.R. 1938, the North American-Made Energy Security Act.

As a member of the Transportation and Infrastructure Committee and as the chairman of the Subcommittee on Railroads, Pipelines and Hazardous Materials, I appreciate the hard work of my colleague from Nebraska (Mr. TERRY) and of my colleagues on the Energy and Commerce Committee to bring this bill forward, with whom our committees share jurisdiction.

This important legislation directs the President to expedite the consideration and approval of the construction and operation of the Keystone XL oil pipeline. This important project has been delayed for far too long, and as my colleague from Nebraska pointed out, it is one month away from its 3-year anniversary from its introduction. The time has come for the President to finally move forward and make a decision. This legislation doesn't force the President to make a "yes" or "no" decision, but it does require the President to issue a final order granting or denying the Presidential permit for the Keystone XL pipeline no later than November 1, 2011.

This \$7 billion, 1,700-mile Keystone XL pipeline would link Canada's tar sands region with refineries in the Midwest and Texas. The economic impacts of the Keystone XL pipeline are immense, with estimates of 465,000 U.S. jobs stemming from the oil sands development by the year 2035.

All of my colleagues talk on the House floor about taking action to limit our dependence on oil from unstable areas of the world and from foreign governments hostile to the United States' interests. This is a project that will move us in that direction. Accomplishing that goal will also grow our economy in our partnering with our close friend and ally, Canada.

The United States has the largest network of energy pipelines of any nation in the world, and the pipelines remain the energy lifelines that power nearly all of our daily activities. The hallmark of America's pipeline network continues to be that it delivers extraordinary volumes of product reliably, safely, efficiently, and economically. Since 1986, the volume of energy products transported through pipelines has increased by one-third; yet the number of reportable incidents has decreased by 28 percent. Both government and industry have taken numerous steps to improve pipeline safety

over the last 10 years. Safety advocates, environmentalists and the pipeline industry all agree that the Federal pipeline safety program is working.

Later this summer, the Transportation and Infrastructure Committee will bring a bill to the floor to reauthorize the Federal pipeline safety program. We will work with our colleagues from the Energy and Commerce Committee, as we bring our bill to the floor, to ensure that safety remains our top priority. That piece of legislation will ensure that pipelines, like the Keystone XL pipeline, will continue to be the safest and most efficient way to move petroleum products and natural gas.

I am concerned by what appears to be a bias by some in this body to non-traditional sources of energy. To end our reliance on oil from overseas, we must develop the resources we have available in North America. That includes the oil sands in Canada and the Marcellus shale natural gas in my home State of Pennsylvania. We must ensure that the development of these resources is done responsibly and in an environmentally safe manner, but we cannot hold them back and show prejudice just because they are unconventional. We simply can't have it both ways. We can't grow our economy and reduce our dependence on foreign oil without developing the resources that are available right here in our own backyard.

So in closing, I urge my colleagues to support H.R. 1938, and I look forward to continuing to work on this important issue.

I reserve the balance of my time.

Mr. RAHALL. I yield myself such time as I may consume.

Madam Chair, as someone who has the privilege of representing an "American-made energy" producing State, I understand the economic benefits of producing energy here at home, and I believe my record on this subject in this body is well-documented.

I want to begin, of course, by complimenting the gentleman from Nebraska (Mr. TERRY) for his leadership on this legislation, as well as Chairman MICA of my Transportation and Infrastructure Committee, Subcommittee Chairman SHUSTER, and Ranking Member CORRINE BROWN.

I do rise today to express serious concerns regarding the process, or rather lack thereof, that was taken to bring this legislation to the House floor for consideration today.

The Committee on Transportation and Infrastructure has primary jurisdiction over pipeline construction and safety legislation. Following this longstanding precedent, on May 23, the Speaker designated the Committee on T&I as the committee of primary jurisdiction of the pending legislation. Yet instead of considering the legislation under regular order, as the committee has always done in the past, Chairman MICA chose to discharge the committee from consideration of the bill.

Now, I have served on the Committee on T&I for 34 years—my entire tenure in this body. I cannot think of one instance when this committee, acting as the committee of primary jurisdiction, has discharged its consideration of major legislation in this manner—not one single instance.

The fact is, in the aftermath of several devastating pipeline incidents, there are some legitimate concerns about the potential safety, environmental and health impacts of transporting heavy crude oil by pipeline. I would have liked to have explored those concerns in an open and transparent manner had the committee considered this legislation. With that said, I am optimistic that this is an issue that we can delve into further as we work with Chairman MICA to craft a bill that reauthorizes the Nation's pipeline safety program. In the interim, I believe we need to move forward with a decision on a Presidential permit for construction of the Keystone XL pipeline. Current plans are for construction activities to begin in the first quarter of 2012 and commercial operation to commence in 2013.

The fact is that this pipeline will create thousands of new jobs at a time when unemployment in the construction sector is double the national average. Construction was hard-hit by the recession, with the construction industry having lost nearly 2 million jobs since December 2007. We need to put these people back to work.

Unfortunately, last week, the House Republican leadership piled on the already devastated construction industry by shutting down major parts of the Federal Aviation Administration, which will jeopardize \$2.5 billion in construction projects, 87,000 American construction jobs, furlough 3,600 FAA aviation engineers, safety analysts, and other career professionals in 35 States, and will cost \$200 million per week in lost revenue.

If the chairman can discharge consideration of this bill and fast track it to the House floor for a vote, I hope he will do the same with the legislation that Representative COSTELLO and I introduced earlier today to end the Republican-led FAA shutdown in order to get aviation experts and construction crews back on the clock. While pink slips already went out to construction companies from coast to coast yesterday, Republicans seem to have reversed gears and now seem to want to support construction jobs—union jobs, in fact. I congratulate them on the latter.

In September 2010, TransCanada announced that it had entered into a project and labor agreement for a significant portion of U.S. construction of the proposed Keystone XL pipeline. The agreement, made with five labor organizations—the Laborers' International Union of North America, the International Brotherhood of Teamsters, the United Association of Journeymen and Apprentices of the Plumbing and Pipefitting Industry of the

United States and Canada, the International Union of Operating Engineers, and the U.S. Pipeline Contractors Association—will provide TransCanada with a capable, well-trained and ready workforce in the U.S. to construct the pipeline.

□ 1450

During construction, the project is expected to create over 13,000 highways union jobs for American workers. Despite the procedural concerns that I've raised, I urge my colleagues to support this legislation.

I reserve the balance of my time.

Mr. SHUSTER. May I inquire as to how much time is remaining?

The CHAIR. The gentleman from Pennsylvania has 6½ minutes remaining. The gentleman from West Virginia has 6 minutes remaining.

Mr. SHUSTER. At this time I yield 1 minute to the gentleman from Georgia (Mr. BROUN).

Mr. BROUN of Georgia. Madam Chair, I rise in strong support of H.R. 1938. I thank my friend, LEE TERRY from Nebraska, for taking the lead on this important issue.

The Keystone XL pipeline is vital to ensure that the United States is able to meet its demand for oil. Canada is already the single largest source of oil imports for the United States.

This pipeline is expected to bring between 830,000 to over 1 million more barrels of Canadian crude to American refineries each and every day, helping to reduce our dependency on oil from unfriendly nations.

At a time when unemployment continues to hover near 10 percent, this project is expected to add close to 13,000 new American jobs. Until we are able to maximize our domestic sources of oil, we will have to rely upon imports. Canada is one of our strongest allies and is a stable democracy with a strong free market economy.

Canada serves as an example of how we should be exploring and developing our own domestic resources. Again, I thank my friend from Nebraska for working so diligently on this issue. I urge my colleagues to support H.R. 1938.

Mr. RAHALL. Madam Chair, I yield 3 minutes to the distinguished gentleman from Florida, the ranking member, CORRINE BROWN.

Ms. BROWN of Florida. Madam Chair, let me just thank publicly the ranking member, Mr. RAHALL, for his leadership.

I am very upset that for the first time after 21 extensions, the FAA was shut down Friday night, jeopardizing \$2.5 billion in construction projects, 87,000 American construction jobs, and furloughing at least 3,600 FAA aviation engineers. This is really a sad time for the Committee on Transportation. We have always worked together in a bipartisan way to make sure that we move America and keep people working.

This is America, and I want to say I fully believe it's possible to build the

Keystone pipeline in a way that improves our access to crude oil and put thousands of people to work while protecting citizens from hazardous spills. But we have to hold the industry's feet to the fire and make sure that they take every possible precaution to build this pipeline.

The Pipeline and Hazardous Material Safety Administration must ensure full oversight in every step of the way in developing this pipeline and must ensure that it is completed safely.

I want to ask Chairman MICA and the ranking member to ensure that the committee fulfills its oversight role by regularly reviewing the construction of the pipeline to ensure that it is capable of transporting these most damaging products.

I want to take this time to express my disappointment that the Transportation and Infrastructure Committee waived its jurisdiction over the Keystone pipeline legislation that was developed by the Energy and Commerce Committee. The Committee on Transportation and Infrastructure is the committee of primary jurisdiction over pipeline construction and safety legislation and is the primary committee to refer for the Keystone legislation.

Just last week our subcommittee held a hearing on the spill in Montana and is continuing to monitor the progress on cleaning up this spill and compensation of those who were harmed. The legislation we are debating today should have been strongly vetted by our committee, and I join Ranking Member RAHALL in urging the committee to hold hearings and mark-ups up on any legislation within our jurisdiction.

Our railroad and pipeline subcommittee held at least five hearings last session concerning pipeline safety and found significant problems with reporting and inspections, as well as an unhealthy relationship between the pipeline industry and the agency regulating them.

Moreover, much like the sewer and water infrastructure in this country, much of the pipeline infrastructure is reaching the end of its useful life. And we are going to need to make significant investments improving this access if we are going to accomplish the goals of both delivering critical petroleum to the States and protecting citizens from the danger of hazardous pipelines and spills and deadly explosions.

We need to develop new technology and strategies for improving safety in highly populated areas now located above the aging pipelines. With the high unemployment rate this country is currently facing, we should be hiring and training inspectors.

The CHAIR. The time of the gentleman has expired.

Mr. RAHALL. I yield the gentleman an additional minute.

Ms. BROWN of Florida. We should be hiring and training inspectors and putting construction workers to replace this aging pipeline infrastructure in the U.S. gas and oil industry.

Let me rush to say that the Republicans in their deficit reduction plan are protecting the big oil companies that made over a trillion dollars in the last 10 years: \$310 billion by Exxon; \$552 billion by Chevron; \$207 billion by Shell

and BP. We are giving them a tax break of a—they made a trillion dollars, but yet we are trying to take senior citizens' retirement and Social Security.

You know, you can fool some of the people some of the time, but you can't fool all of the people all of the time. And I will submit their profit record for the RECORD.

BIG FIVE OIL COMPANIES' NOMINAL PROFITS, 2001–2010
(All figures in billions, 2011 \$)

	2001–2006	2007	2008	2009	2010	2001–2010
BP	80.39	22.2	21.68	17.14	-3.74	137.67
Chevron	77.39	19.86	24.45	10.78	19.29	151.77
Conoco Phillips	49.07	12.53	17.18	5.03	11.51	95.32
Exxon Mobil	169.42	43.12	46.23	19.81	30.9	309.48
Shell	116.93	33.24	26.9	12.01	18.28	207.36
Total	493.2	130.95	136.44	64.77	76.24	901.6

Note: Figures rounded to the nearest billion.
Sources: EIA and Google Finance.

Mr. SHUSTER. At this time I yield 1 minute to the gentleman from Texas (Mr. BRADY).

Mr. BRADY of Texas. I thank Chairman SHUSTER for the time.

I might point out that our energy companies are making major profits overseas because that's where this White House has chased our jobs and our energy production.

Today we're saying "yes" to North American-made energy. The Keystone XL pipeline will increase our access to safe and secure energy supplies from our neighbors from the north. Not from the Middle East, not from unstable parts of the world.

When completed, the pipeline will build millions of barrels of oil into our Midwest and gulf coast refineries and thousands of jobs—good-paying American-made jobs—with them. Unemployment is high. Prices at the pump are high. We've seen the effects of delay of American-made energy. And if you haven't seen that delay, ask our gulf coast workers who've lost their jobs and been hurt because of the "permitterium" in the Gulf of Mexico.

We have part of the solution before us today. More North American-made energy, solutions for safe, affordable energy from a strong trading partner and ally, and a solution that supports good old American jobs.

Mr. RAHALL. I reserve the balance of my time.

Mr. SHUSTER. I yield 4 minutes to the chairman of the Transportation and Infrastructure Committee, the gentleman from Florida (Mr. MICA).

Mr. MICA. Madam Chair and my colleagues, I rise in strong support of the proposal by the gentleman from Nebraska (Mr. TERRY). We should all be thanking Mr. TERRY for this initiative.

Not only are people in this country hit by incredible unemployment economic challenges and a dysfunctional Congress, but if they go to the local service station to fill up with gasoline, they're paying record prices.

I woke up this morning and I heard one of the commentators that was interviewing an expert, again, on energy, and he predicted that 1 year from now we will be paying between \$4.50 and \$5.50 for a gallon of gasoline.

Now, you just heard the ranking members criticize me for fast-tracking

this legislation. I guess I beat some kind of record, never having waived before. I'm telling you I will waive this and anything else we need to do to get this country energy independent and find a way for the average citizen to be able to afford energy.

We need a short-term plan, and that's bringing energy into the United States without being held hostage to people like the regimes in the Middle East or Venezuela. This pipeline will bring in 1.3 million barrels of oil per day. That exceeds what comes in from Venezuela. It exceeds what comes in from Saudi Arabia.

□ 1500

How frustrated the people of America must be. Then, of course, is the attack on the FAA, the lack of reauthorization. How could they attack me? For 4 years they controlled this place with incredible numbers, huge numbers to do anything in the House, huge numbers to do anything in the Senate—4 years. I authored the last FAA authorization in 2003 that expired in 2007, and they sat on it and never did anything. They did 17 extensions. They forced us to do three. And I'm telling you, I've had it. If they've done this before in a different way, it's not going to be done that way anymore.

We sent them, last Wednesday, an extension, and it was a clean extension. It had one provision which they passed unanimously, and they don't like part of that one provision that stops funding of Essential Air Service subsidies, Federal taxpayer subsidies in excess of \$1,000. So for three airports where their passengers are being paid a subsidy of \$1,500 to \$3,700—at three airports—they're closing down the FAA. They've had it since last Wednesday, and they've sat on it.

So I don't care how we've done things before. We're going to do things differently. I will be in charge of the committee at least through next year, and I'm going to find a way to do things. We're going to get reasonable energy to the American people. And a year from now, mark your calendar.

We didn't mandate that they build the pipeline. And I want the pipeline built with every safety consideration. Yes, the Obama administration shouldn't be asleep at the wheel, like

they were with the gulf oil spill when they issued the permit and stamped it in just a few days. They issued more permits for deepwater drilling in their short term in office and then closed down the rest of the access to energy across the United States, and actually issued more deepwater permits in their first few months in office than the entire Bush administration and then were asleep at the switch when they should have been inspecting that procedure. And they should inspect this. This doesn't say you must build the pipeline. It sets a deadline for a response from this administration.

Mr. RAHALL. Madam Chair, I appreciate the gentleman's remarks and his anger. It is, indeed, frustrating. I, again, invite him to fast-track without consideration of process, as he has done on this pipeline bill, in order to free us from reliance upon foreign sources of energy. I would hope he would just as quickly fast-track our clean extension of the FAA bill we introduced today in order to fast-track jobs, getting people back to work here in America. There are people that are already sitting at home for the second, going on the third day without jobs.

As I noted during my previous remarks, these are good-paying jobs. They are union jobs. A project labor agreement has been entered into that will ensure the protection of these union workers and their families.

So I would urge my colleagues to support the pending legislation at the same time that I would urge, again, my chairman to expedite consideration of a clean FAA reauthorization bill that has been introduced today by Representative COSTELLO and myself.

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON TRANSPORTATION
AND INFRASTRUCTURE,

Washington, DC, June 30, 2011.

Hon. JOHN L. MICA,
Chairman, Committee on Transportation and Infrastructure, U.S. House of Representatives, Washington, DC.

DEAR CHAIRMAN MICA: I write to express my serious concerns regarding your decision to discharge the Committee on Transportation and Infrastructure from consideration of H.R. 1938, the "North American-Made Energy Security Act". I urge you to reconsider your decision to abandon "regular order".

The Committee on Transportation and Infrastructure is the committee of primary jurisdiction over pipeline construction and

safety legislation. Following these longstanding precedents, on May 23, 2011, the Speaker designated the Committee on Transportation and Infrastructure as the committee of primary jurisdiction of H.R. 1938.

Nevertheless, in your June 24, 2011, letter to Committee on Energy and Commerce Chairman Fred Upton, you indicated your intent to discharge the Committee on Transportation and Infrastructure—the committee of primary jurisdiction—from consideration of the bill.

Although jurisdictional letters between committees are commonplace, I cannot recall an instance where the Committee on Transportation and Infrastructure, as the committee of primary jurisdiction, has discharged its consideration of major legislation in this manner. I urge the Committee to hold hearings and Subcommittee and Full Committee markups of the legislation prior to its Floor consideration.

Thank you for your consideration.

With warm regards, I am

Sincerely,

NICK J. RAHALL II,
Ranking Democratic Member.

LIUNA!
Washington, DC, July 12, 2011.

HOUSE OF REPRESENTATIVES,
Washington, DC.

DEAR REPRESENTATIVE: On behalf of the trade unions representing well over 2-million members, including the skilled craft workers who will build the Keystone XL pipeline, we seek your support for H.R. 1938, the "North American-Made Energy Security Act." H.R. 1938, a bi-partisan effort sponsored by Congressman Terry, would require a timely decision by the Executive Branch whether to grant or deny a Presidential Permit for the construction of the pipeline. Construction of the Keystone XL Pipeline will employ tens of thousands of our members and help secure the United States' economic and national security. The pipeline has been delayed in the permitting process for nearly three years. Each week that goes by in the permitting process of Keystone XL furthers the sense of uncertainty that private sector companies face when making massive investments that depend on regulatory approval. Providing procedural certainty to the project owner is simply good public policy.

The Keystone XL pipeline will help the Nation's energy security by reducing U.S. imports of foreign oil from Venezuela and the Middle East and replacing it with stable, secure supplies from both the U.S. and Canada. This project will also help strengthen the U.S. economy by creating good jobs and will reduce the American economy's vulnerability to supply shocks like the one in Libya today that has driven up prices at the pump for consumers.

This \$13-billion construction project is privately funded, privately financed and will not involve any government subsidy or expenditure. With sustained unemployment in the construction sector at double the national average, our members desperately need the work that the pipeline will create. Our unions have entered into a Project Labor Agreement with TransCanada which will ensure that a capable, well-trained and ready workforce is used to build the pipeline. Estimates are that the construction of the pipeline will:

Spur more than \$20 billion in new spending for the U.S. economy;

Directly create 20,000 high-wage construction and manufacturing jobs in 2011-2013 across the U.S. and 118,000 person-years of employment;

Generate \$6.5 billion in new personal income for U.S. workers and their families;

Stimulate more than \$585 million in new state and local taxes in states along the pipeline route during construction; and

Deliver \$5.2 billion in property taxes during the estimated operating life of the pipeline.

We believe that the demand for oil and gas resources will dictate the development of the Alberta oilsands, regardless of whether or not the Keystone XL is built. Allowing the construction of the pipeline will assure that the product is transported to American markets in the safest and most efficient way possible.

Further delay in the permitting process could have detrimental consequences and puts at risk the billions of dollars in private sector investment to be made into America's energy infrastructure. The members of our unions—and indeed the U.S. economy—need the Keystone XL Pipeline. That is why the four pipeline craft unions are proud to endorse H.R. 1938. The leadership of you and your colleagues on this project is greatly appreciated.

Sincerely,

INTERNATIONAL
BROTHERHOOD OF
TEAMSTERS,
LABORERS' INTERNATIONAL
UNION OF NORTH
AMERICA,
INTERNATIONAL UNION OF
OPERATING ENGINEERS,
UNITED ASSOCIATION OF
JOURNEYMEN AND
APPRENTICES OF THE
PLUMBING AND
PIPEFITTING INDUSTRY OF
THE UNITED STATES AND
CANADA.

Mr. SHUSTER. Will the gentleman yield?

Mr. RAHALL. I yield to the gentleman from Pennsylvania.

Mr. SHUSTER. Did I hear correctly that the gentleman is going to support the underlying legislation?

Mr. RAHALL. Yes. I made that clear in both of my speeches.

Mr. SHUSTER. I thought so. But I guess I wasn't paying attention to the end. So it is great to hear.

Mr. RAHALL. I yield back the balance of my time.

Mr. SHUSTER. Madam Chair, it's important that we pass this on a bipartisan basis because it does mean jobs for Americans, construction jobs, somewhere up around 20,000. It means steel that is going to be made in U.S. steel plants. So this is a bill that is not only going to create jobs, but it's going to help us break that dependence on foreign oil.

Again, I tip my hat to Mr. TERRY from Nebraska for putting forth H.R. 1938, and I urge all of my colleagues on both sides of the aisle to support this pro-energy, pro-jobs bill.

I yield back the balance of my time.

Mr. LAMBORN. Madam Chairman, I claim time on behalf of the Committee on Natural Resources.

The CHAIR. The gentleman from Colorado is recognized for 5 minutes.

Mr. LAMBORN. Madam Chairman, I yield myself such time as I may consume.

This legislation takes a crucial step towards securing our Nation's energy security and putting Americans back to work. In 2010 alone, the United States imported over 1 trillion barrels of oil from OPEC countries, many of

which have unstable or unfriendly governments. While my preference would be that we replace that oil with domestically produced resources from the Rockies, our Outer Continental Shelf, and Alaska, we have the next best thing by having Canada as a stable, friendly, energy-rich trading partner sharing our northern border.

As we have seen in so many other aspects of our Nation's energy portfolio, whether it be offshore production, onshore production, or even renewable energy production on Federal lands, the Obama administration is once again slow-walking or even stonewalling domestic energy security and job creation with needless delays and bureaucratic red tape.

This legislation will help ensure a steady supply of crude oil from one of our strongest allies. It has the potential to create 20,000 direct construction jobs for Americans and spur \$20 billion in new spending in the U.S. economy. The extension of this pipeline will generate \$585 million in new State and local taxes during construction. It will greatly lessen our dependence on oil from OPEC.

Opponents of this pipeline seem to believe that if we don't use this oil here, it won't be produced. That position is fundamentally wrong and displays a foolish and naive disregard for the flow of international oil production.

The reality is, if America won't take this oil, China will. Instead of having a secure pipeline feeding the American heartland, we will see massive tankers off the coast of Washington and Oregon as China fills its ships for export. And China doesn't have the environmental safeguards that we do.

We should pass H.R. 1938.

At this moment, Madam Chairman, I yield 1 minute to my colleague from the State of Ohio (Mr. JOHNSON).

Mr. JOHNSON of Ohio. I thank the gentleman for yielding.

Madam Chairman, today I rise in support of H.R. 1938, the North American-Made Energy Security Act.

For far too long, the proposed Keystone XL pipeline has been caught up in bureaucratic red tape that unfortunately has become the norm with this administration. This legislation simply forces the administration to make a decision by November 1 of this year, which will be more than 3 years after the application was originally submitted. This bill addresses our Nation's dependence on OPEC for oil, but it also creates American jobs.

The pipeline extension would allow for an additional 700,000 barrels of oil per day to be brought to the U.S. marketplace. This increase in oil, from America's largest trading partner, would begin to make America less beholden to unstable OPEC countries for our oil demands. Furthermore, if this pipeline isn't built, the oil will simply go to China instead of coming to America.

This legislation would also pave the way for the creation of 13,000 direct

jobs and tens of thousands of indirect jobs should the project be approved.

I urge my colleagues to support this commonsense legislation.

Mr. MARKEY. I yield myself such time as I may consume.

Madam Chair, I rise in strong opposition to H.R. 1938.

We are here debating whether to expedite the approval of a pipeline that will import the dirtiest crude oil on the planet into the United States of America by melting the oil out of the tar in Canada, which creates more greenhouse gases than any other production method for crude oil on the planet.

□ 1510

It also destroys the boreal forest. It contaminates millions of gallons of water each day. That is a very high environmental price to pay for oil from tar in Canada that may not lower prices for Americans and may never be sold to Americans. But we will build the pipeline for them through our land to accomplish this goal.

The majority has repeatedly claimed that expediting the approval of this pipeline will lower gas prices at the pump for the American public. But what factual evidence should we rely upon in order to substantiate this claim?

Well, we can't rely upon Trans-Canada, the very company that wants to build the pipeline through our country, because it has concluded that after the pipeline is constructed that gas prices would rise in the Midwest of our country as a result of the Keystone XL pipeline.

We are also told that building this pipeline will enable us to reduce our dependence on imported oil from countries who don't like us very much. Instead, we will be able to rely upon dependable Canada, our friends, the Canadians.

But what are the guarantees that building this pipeline will actually lead to greater supplies of crude oil for the American people?

Well, the answer, Madam Chair, is that there are no guarantees. There is nothing in this bill, nothing that prevents Keystone XL pipeline oil from being shipped to the gulf coast, refined there, from the tar of Alberta Canada, and then re-exported and sold into the global oil market to China, to Korea, right out of our country.

I offered an amendment to the Rules Committee that would have required the Department of Energy to ensure that the approval of this pipeline would, in fact, guarantee that the benefits of the Keystone oil being transported through our country stay right here in our country.

My amendment would have required that Keystone oil be sold in this country. That would increase the gasoline and the diesel supplies at the pump and would help to ensure lower prices at the pump. And my amendment would have benefited domestic businesses that use refined petroleum products,

including plastics and chemical companies, by ensuring a steady supply of petroleum products for their manufacturing plants here, made in America. My amendment was consistent with longstanding U.S. policy on oil exports.

Well, ladies and gentlemen, the Republicans refused to allow a vote on my amendment here today. They won't even allow our Members to vote on keeping the oil that is going to be transported in a pipeline that we're going to allow to be built through our country here.

So, yes, it's the dirtiest oil in the world; but at least, if you're going to build the pipeline, at least have it be sold here in America and not sold to China, not sold to Korea. At least have that guarantee.

They refused to even have a vote on it, ladies and gentlemen. That's what this is all about. Once again, it's all about this ideological belief that the largest oil companies know best. We should not be taxing them. We should not be putting any burden on the biggest oil companies.

Better to push the American economy to the brink of fiscal collapse than the Republicans would ever consider allowing to rescind tax breaks for the biggest oil companies. They wouldn't even begin to think about putting that on the table. Grandma's Social Security check, absolutely. Building a pipeline through our country with the dirtiest oil in the world to be sold to Asia, absolutely no problem for the Republicans.

So this bill, despite the overwhelming factual evidence that building the pipeline will only result in dirtier air, more profits for Big Oil, without benefits for the American consumer, they are going to continue to push forward.

Vote "no" on this environmental atrocity.

The CHAIR. The time of the gentleman has expired.

Mr. LAMBORN. I yield 1 minute to my good colleague and friend from the State of Texas (Mr. FLORES).

Mr. FLORES. Madam Chair, I rise today in strong support of H.R. 1938, the North American-Made Energy Security Act.

This bipartisan legislation would increase access to more energy supplies by expediting the Presidential permit for the Keystone XL pipeline extension.

We are all aware that every additional barrel that can be produced within North America is one fewer barrel that we need from the Middle East. This pipeline extension will help bring total capacity up to more than 1.2 million barrels per day into our markets. Also, as we look for opportunities to address our struggling economic recovery, this project will create an estimated 100,000 American jobs and help grow our economy.

Canada's vast oil resources have also attracted interest from other energy-hungry nations. If we do not tap this

valuable resource, the Chinese or other countries will. The Obama administration has already delayed the decision on this project for almost 3 years and it is time that they act and make a decision.

The choice is clear. By passing this bill, we will increase our energy security with a more stable supply of efficient and affordable energy from our best international friend and trading partner, and we will lessen our dependence on Middle Eastern oil.

I urge my colleagues to support this critical legislation.

Mr. LAMBORN. Madam Chairman, the North American-Made Energy Security Act is a pivotal first step toward securing our energy future, lessening our dependence on oil from OPEC countries, and putting Americans back to work.

Canada and the U.S. have the world's largest two-way relationship. Rather than put up roadblocks, we should foster and build upon that relationship to utilize each other's resources.

If we don't use this oil, Chinese consumers will, and we will continue to rely on oil from OPEC. We cannot stand idly by as the Obama administration continues to delay and put up roadblocks that prevent the production of American energy and the creation of American jobs.

H.R. 1938 will force the administration to make a decision that has been unnecessarily delayed for years. The legislation is good for the American economy and good for American jobs, and I urge my colleagues to support this legislation.

I yield back the balance of my time.

Mr. VAN HOLLEN. Madam Chair, I rise in opposition to H.R. 1938 and object to this majority's repeated attempts to circumvent environmental law and prioritize special interests over sound science.

The Keystone XL is a proposed pipeline project from Alberta, Canada to Port Arthur, Texas. Since the project crosses national boundaries, it requires Presidential approval to proceed. By Executive Order, President Obama has delegated that authority to the State Department, which is in the process of reviewing public comment so that it can finalize the Environmental Impact Statement (EIS) required by the National Environmental Protection Act (NEPA). Once an EIS has been completed, the State Department will receive final input from other relevant federal agencies, as well as the general public, before making a final determination as to whether the Keystone XL pipeline is in the national interest. According to the State Department, this review—which appropriately includes a thorough evaluation of the project's environmental, marketplace, national security and community impacts—should be completed by the end of the year.

However, rather than allowing that process to come to a timely and considered conclusion, today's legislation sets forth its own demonstrably inaccurate and woefully incomplete findings in order to justify the majority's preferred outcome—and then directs the President to make a final permitting decision by November 1, whether the required evaluation is complete or not.

In truth, one need look no further than the errors and omissions throughout this legislation's findings to understand why an objective, complete, scientifically-based review of the proposed Keystone XL pipeline project is so necessary.

Accordingly, I urge a "no" vote.

Mr. WILSON of South Carolina. Madam Chair, I appreciate the leadership of Congressman LEE TERRY of Nebraska to develop H.R. 1938, the North American-Made Energy Security Act.

H.R. 1938 would expedite the Presidential Permit approval process for the Keystone XL pipeline extension. This pipeline extension would allow the delivery of more oil to come into this country from Canada's oil sands in the province of Alberta. I appreciate Canada as America's largest trading partner.

There are strategic and economic impacts of the development and delivery of oil and natural gas between the U.S. and Canada, and I am well aware of the economic impacts in South Carolina, creating thousands of jobs in the District I represent in Aiken and Lexington Counties.

Currently, there are over 100 of the large mine haul trucks operating in the Oil Sands powered by MTU engines. The engines produced by MTU in Aiken, South Carolina, support not only the North American manufacturers of these large mining trucks, but the international market as well. Interestingly, by next year, Aiken will be producing MTU's largest engine for the haul-truck market, the 20V 4000. The marine variant of this engine powers the U.S. Coast Guard's Fast Response Cutter, and this will also be produced in Aiken. Hundreds of jobs are created in Aiken County and neighboring Georgia due to the oil sands development in Alberta.

Furthermore, the Michelin tire manufacturing facility in Lexington, South Carolina, produces earthmover tires and is one of the mining industry's largest suppliers. Overall, 7,930 people are employed by Michelin in South Carolina with locations in Anderson, Greenville, and Lexington.

Passage of this legislation is critical to our economy. The nearly three-year delay of the Keystone XL pipeline expansion project is blocking significant economic growth and preventing Americans from fully accessing a safe and dependable source of oil held by Canada, a longtime ally and the largest trade partner of the United States. This expansion would enable expanded importation of 830,000 barrels of oil daily from Canada, instead of importing it from other unfriendly sources.

A Canadian Energy Research Institute study found that investing in Canadian oil sands will produce 340,000 U.S. jobs and create \$34 billion in revenues for the U.S. government. Construction of the pipeline itself would also support more than 10,000 jobs, and the addition of the pipeline to the Bakken formation would enable additional, more cost-effective development of that domestic energy source.

For these reasons, I support this legislation and am hopeful of ultimate support from the President.

The CHAIR. All time for general debate has expired.

Pursuant to the rule, the amendment in the nature of a substitute recommended by the Committee on Energy and Commerce printed in the bill shall be considered as an original bill

for the purpose of amendment under the 5-minute rule and shall be considered read.

The text of the committee amendment in the nature of a substitute is as follows:

H.R. 1938

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "North American-Made Energy Security Act".

SEC. 2. FINDINGS.

Congress finds and declares the following:

(1) *The United States currently imports more than half of the oil it consumes, often from countries hostile to United States interests or with political and economic instability that compromises supply security.*

(2) *While a significant portion of imports are derived from allies such as Canada and Mexico, the United States remains vulnerable to substantial supply disruptions created by geopolitical tumult in major producing nations.*

(3) *Strong increases in oil consumption in the developing world outpace growth in conventional oil supplies, bringing tight market conditions and higher oil prices in periods of global economic expansion or when supplies are threatened.*

(4) *The development and delivery of oil and gas from Canada to the United States is in the national interest of the United States in order to secure oil supplies to fill needs that are projected to otherwise be filled by increases in other foreign supplies, notably from the Middle East.*

(5) *Continued development of North American energy resources, including Canadian oil, increases domestic refiners' access to stable and reliable sources of crude and improves certainty of fuel supply for the Department of Defense, the largest consumer of petroleum in the United States.*

(6) *Canada and the United States have the world's largest two-way trading relationship. Therefore, for every United States dollar spent on products from Canada, including oil, 90 cents is returned to the United States economy. When the same metrics are applied to trading relationships with some other major sources of United States crude oil imports, returns are much lower.*

(7) *The principal choice for Canadian oil exporters is between moving increasing crude oil volumes to the United States or Asia, led by China. Increased Canadian oil exports to China will result in increased United States crude oil imports from other foreign sources, especially the Middle East.*

(8) *Increased Canadian crude oil imports into the United States correspondingly reduce the scale of "wealth transfers" to other more distant foreign sources resulting from the greater cost of importing crude oil from those sources.*

(9) *Not only are United States companies major investors in Canadian oil sands, but many United States businesses throughout the country benefit from supplying goods and services required for ongoing Canadian oil sands operations and expansion.*

(10) *There has been more than 2 years of consideration and a coordinated review by more than a dozen Federal agencies of the technical aspects and of the environmental, social, and economic impacts of the proposed pipeline project known as the Keystone XL from Hardisty, Alberta, to Steele City, Nebraska, and then on to the United States Gulf Coast through Cushing, Oklahoma.*

(11) *Keystone XL represents a high capacity pipeline supply option that could meet early as well as long-term market demand for crude oil to United States refineries, and could also potentially bring over 100,000 barrels per day of United States Bakken crudes to market.*

(12) *Completion of the Keystone XL pipeline would increase total Keystone pipeline capacity by 700,000 barrels per day to 1,290,000 barrels per day.*

(13) *The Keystone XL pipeline would provide short-term and long-term employment opportunities and related labor income benefits, as well as government revenues associated with sales and payroll taxes.*

(14) *The earliest possible construction of the Keystone XL pipeline will make the extensive proven and potential reserves of Canadian oil available for United States use and increase United States jobs and will therefore serve the national interest.*

(15) *Analysis using the Environmental Protection Agency models shows that the Keystone XL pipeline will result in no significant change in total United States or global greenhouse gas emissions.*

(16) *The Keystone XL pipeline would be state-of-the-art and have a degree of safety higher than any other typically constructed domestic oil pipeline system.*

(17) *Because of the extensive governmental studies already made with respect to the Keystone XL project and the national interest in early delivery of Canadian oil to United States markets, a decision with respect to a Presidential Permit for the Keystone XL pipeline should be promptly issued without further administrative delay or impediment.*

SEC. 3. EXPEDITED APPROVAL PROCESS.

(a) **IN GENERAL.**—*The President, acting through the Secretary of Energy, shall coordinate with each Federal agency responsible for coordinating or considering an aspect of the President's National Interest Determination and Presidential Permit decision regarding construction and operation of the Keystone XL pipeline, to ensure that all necessary actions with respect to such decision are taken on an expedited schedule.*

(b) **AGENCY COOPERATION WITH SECRETARY OF ENERGY.**—*Each Federal agency described in subsection (a) shall comply with any deadline established by the Secretary of Energy pursuant to subsection (a).*

(c) **FINAL ORDER.**—*Not later than 30 days after the issuance of the final environmental impact statement, the President shall issue a final order granting or denying the Presidential Permit for the Keystone XL pipeline, but in no event shall such decision be made later than November 1, 2011.*

(d) **ENVIRONMENTAL REVIEW.**—*No action by the Secretary of Energy pursuant to this section shall affect any duty or responsibility to comply with any requirement to conduct environmental review.*

The CHAIR. No amendment to the committee amendment in the nature of a substitute shall be in order except those printed in House Report 112-181. Each such amendment may be offered only in the order printed in the report, by a Member designated in the report, shall be considered read, shall be debatable for the time specified in the report equally divided and controlled by the proponent and an opponent, shall not be subject to amendment, and shall not be subject to a demand for division of the question.

AMENDMENT NO. 1 OFFERED BY MR. WELCH

The CHAIR. It is now in order to consider amendment No. 1 printed in House Report 112-181.

Mr. WELCH. Madam Chair, I offer an amendment.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 6, after line 24, insert the following new paragraph:

(18) The proposed Keystone XL pipeline would run through the Ogallala aquifer, risking an oil spill into one of the world's largest freshwater aquifers that provides 30 percent of the groundwater used for irrigation in the United States and drinking water for millions of Americans. Even a small, undetected leak from an underground rupture of the pipeline in the Nebraska Sandhills could pollute almost 5,000,000,000 gallons of groundwater—enough oil to pose serious health threats to anyone using the underlying Ogallala Aquifer for drinking water or agriculture.

The CHAIR. Pursuant to House Resolution 370, the gentleman from Vermont (Mr. WELCH) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Vermont.

Mr. WELCH. Madam Chair, I yield myself such time as I may consume.

Madam Chair, this amendment inserts an environmental finding that highlights the very significant environmental and health risks that are proposed that will occur as a result of this proposed pipeline. This pipeline is going to carry up to 900,000 barrels of tar sands oil every day, and it's going to carry them a distance of 2,000 miles. And whatever assurances are given about the safety of any mechanical and engineering system, we have too much regular experience that the best of intentions oftentimes fail.

□ 1520

So there is risk, and we want that to be known as part of the findings.

A University of Nebraska professor recently released the first independent assessment of the spills that could come from the Keystone XL pipeline. That study found that TransCanada has in fact greatly understated the risks of the pipeline. That study established that the pipeline could spill over 5 million gallon of tar sands oil into a major river, making water undrinkable for hundreds of miles. Also, the Keystone real-time leak detection system doesn't register spills that are less than 700,000 gallons per day.

Cynthia Quarterman, the administrator of the Pipeline and Hazardous Materials Safety Administration, has noted that the U.S. pipeline system was not designed with raw tar sands crude in mind.

My amendment is very simple: if we're going to rush through—and that's what we're doing—the environmental permitting process for a project that has questionable benefits to our Nation, let's at least recognize the risks.

I reserve the balance of my time.

Mr. TERRY. I rise in opposition to the amendment.

The CHAIR. The gentleman from Nebraska is recognized for up to 5 minutes.

Mr. TERRY. Madam Chair, I urge rejection of this gutting amendment. What this would do is basically say you can't build any pipelines in this general area.

I would like the gentleman from Vermont to know that there are many pipelines already running through this area, oil pipelines, natural gas pipelines; and also the other part that I would like to make regarding this amendment, this almost 2 feet high stack of materials is the draft environmental study, the supplemental environmental study, PHMSA's report. I can assure the gentleman that there is no other pipeline that has been studied to the point that this one has. It is as close to the best built pipeline as demanded by the agencies that have oversight. It has gone through a very thorough, thorough examination.

The owners of this pipeline, TransCanada, have already agreed to not only increasing the thickness of the pipeline, itself, but additional pump stations to be able to detect when there's a leak. The pipeline reform bill will be reported out of committees later; and they would have to adhere to all of those rules, including something that we're discussing that all leaks have to be able to be onsite repaired within 1 hour.

There's no way to design a perfect pipeline, but there are ways to make sure that if there is an issue, there's a rapid response, and that has been built in. Those are additional agreements. I'm vastly positive that, A, any leaks that would occur are going to be minimal and not hazardous to the Ogallala aquifer or to the Sand Hills.

I reserve the balance of my time.

Mr. WELCH. How much time do I have?

The CHAIR. The gentleman from Vermont has 3 minutes remaining.

Mr. WELCH. I yield such time as he may consume to the gentleman from Tennessee (Mr. COHEN).

Mr. COHEN. Madam Chair, I rise in support of the Welch-Cohen amendment. Our simple, not a gutting, amendment—that's totally wrong—noncontroversial amendment, states an important fact that was not mentioned in the findings section. I'm disappointed that this stilted legislation fails to mention any of the risks associated with the pipeline, such as the critical fact that Keystone XL would run through the world's largest fresh water aquifer, the Ogallala, which provides 30 percent of the groundwater used for irrigation in the United States and drinking water for millions of Americans. This fact is an essential aspect of the pipeline that must be considered by the State Department and the American public before granting a determination of national interest.

Our amendment also states the results of the only independent assessment of the worst-case spills for the proposed Keystone XL pipeline, a report that indicates that TransCanada has greatly understated the pipeline's risks.

Perhaps the most important component of the report is the discovery that even a small undetected leak from an underground rupture of the pipeline in

the Nebraska Sand Hills could pollute almost 5 billion gallons of groundwater, enough oil to pose serious health threats to anyone using this aquifer for drinking water or agricultural purposes; and a leak of this magnitude is certainly possible given that the Keystone XL's real-time leak detection system does not register spills less than, get this, 700,000 gallons a day. They'll have no knowledge of it.

What is even more disconcerting is that according to Cynthia Quarterman, the administrator of the Pipeline and Hazardous Materials Safety Administration, the U.S. pipeline safety regulations were not written to address the unique risks of piping tar sand, the worst oil one could imagine. Additionally, Administrator Quarterman noted that her agency, the government's pipeline safety experts, has not been included in the review of Keystone XL and has never studied the risks of piping tar sands.

As we consider building a dangerous tar sands pipeline through our Nation's most important aquifer, it is critical the decision be based on an accurate depiction of the pipeline's risks and not just rosy, overly optimistic descriptions of its projected benefits. This is why the Sierra League and the National Resource Defense Council are so interested, as is the American public in these findings.

I urge support for the Welch-Cohen amendment.

Mr. WELCH. I yield back the balance of my time.

Mr. TERRY. Madam Chair, in closing, I want to allay the fears here. To sit there and say that this hasn't been studied, we have the environmental impact study; we have the supplemental. This has been studied. All the agencies are involved, including PHMSA. I'm sure they will make their recommendations based on sound science.

I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentleman from Vermont (Mr. WELCH).

The question was taken; and the Chair announced that the ayes appeared to have it.

Mr. TERRY. I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Vermont will be postponed.

AMENDMENT NO. 2 OFFERED BY MR. RUSH

The CHAIR. It is now in order to consider amendment No. 2 printed in House Report 112-181.

Mr. RUSH. Madam Chair, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 6, lines 10 through 13, strike paragraph (15) (and redesignate the subsequent paragraphs accordingly).

The CHAIR. Pursuant to House Resolution 370, the gentleman from Illinois (Mr. RUSH) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Illinois.

Mr. RUSH. I yield myself as much time as I may consume.

Madam Chair, during both the subcommittee and full committee mark-ups, I offered my amendment to delete a finding that I thought was particularly misleading.

Finding No. 15 states: "Analysis using the Environmental Protection Agency models shows that the Keystone XL pipeline will result in no significant change in total United States or global greenhouse gas emissions."

□ 1530

My amendment was defeated on a party-line vote after my colleagues on the other side insisted that the statement was indeed true. Well, Madam Chair, I took it upon myself to write a letter to the EPA asking the agency to weigh in on the accuracy of this finding, and this was the agency's reply:

"EPA has conducted no modeling, nor provided any models, to analyze the likely effect of the Keystone XL pipeline on U.S. or global greenhouse gas emissions. The language in the above finding is therefore incorrect."

The official EPA statement went on to say:

"As detailed in the Supplemental Draft Environmental Impact Statement for the Keystone XL project issued by the Department of State, the Department of Energy directed a contractor to conduct modeling on potential impacts of the project. EPA provided some data to be used in that effort, but EPA models were not used and EPA did not model any projected emissions effects of the project."

Madam Chairman, there are some who believe that the majority does not care about facts or truth or science or climate change if these facts and otherwise get in the way of industry moving forward unfettered. Well, by voting for my amendment, we have an opportunity to set the record straight and prove to the American people that when a statement is demonstrably shown to be false, then Members of Congress from both sides, Democrat or Republican, will put their partisan differences aside and stand on the side of truth. Know ye the truth and the truth shall set you free.

So I urge all my colleagues to support my corrective amendment in order to correct this misleading statement contained in the bill.

I reserve the balance of my time.

Mr. TERRY. Madam Chair, I rise in opposition to the amendment.

The CHAIR. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. I would like to join my friend in standing up for the truth and accuracy; so what I will do is read the Supplemental Environmental Impact Study.

Page 7: "The WORLD and DOE Energy Technologies Perspective model analyses results show no significant change in total U.S. refining activity,

total crude and product import volumes and costs, in global refinery CO₂ and total life-cycle greenhouse gas emissions whether Keystone XL is built or not."

It's the exact verbiage from the actual Department of Energy using the EPA's modeling conclusions. So we're just using the Department of Energy study's own language that it's not increasing. So what this amendment does is takes out the exact language from an independent study by the Department of Energy and supplants it with an inaccurate statement.

Now, I think where my friend is going, and the EPA has recently written a letter saying, the standard they would like to see is not heavy crude versus heavy crude. Because what this study is saying is this oil is still going to be refined, whether it's in Kansas, Oklahoma, Texas, or Chicago. If it's not being refined there, it will be refined in China; therefore, it has the same impact globally, the same life-cycle greenhouse gas emissions.

Well, the EPA wrote a letter and said, Well, we're changing that standard. We would like you to just compare it to Texas sweet crude. And they just pulled that out of a hat here just a few months ago. So that's what he's saying, but it's not part of what the study says. So there is no reason to remove this.

This is accurate. It's exactly from the Department of Energy's study based on EPA's own modeling.

I reserve the balance of my time.

Mr. RUSH. Madam Chair, may I inquire as to how much time is remaining?

The CHAIR. The gentleman from Illinois has 1½ minutes remaining, and the gentleman from Nebraska has 2½ minutes remaining.

Mr. RUSH. Madam Chair, this is simply an argument over whether or not this House will allow demonstrably false information in this bill to move forward even though we have documentation from the very agency in question stating that the information is false. This is the letter. This is the letter. It's a letter dated June 22, and it says:

"EPA has conducted no modeling, nor provided any models, to analyze the likely effect of the Keystone XL pipeline on U.S. or global greenhouse gas emissions. The language in the above finding is therefore incorrect."

How clear can it be that the EPA states beyond a shadow of a doubt that this particular passage in this bill is false, is misleading? And if, in fact, we vote to enact this wrong piece of legislation, not only is it wrongheaded, it's wrong in its effort. If we vote to pass this legislation, then we are perpetuating a falsehood.

Madam Chair, this Congress stands for a greater and higher standard than to vote for something that we know is false. We know it's not accurate. The other side knows it's not accurate. But if industry wants it, if it's accurate or

not, industry, according to them, must have it. And I say industry must not have it. We should have to stand for the truth in this Congress, and the truth is that the EPA did not conduct any model.

I yield back the balance of my time.

Mr. TERRY. Madam Chair, once again, in the entire record that's been submitted from the Department of Energy to EPA, the studies that have been done conclude that, in global refineries, CO₂ and total life-cycle greenhouse gas emissions, whether the Keystone XL is built or not, there is no additional CO₂, no significant CO₂. That is the exact language in here. To strike that would strike the truth that is set forth in the studies and supplant it with something that doesn't exist in all of the models and studies that have been provided.

Madam Chair, I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentleman from Illinois (Mr. RUSH).

The question was taken; and the Chair announced that the noes appeared to have it.

Mr. RUSH. Madam Chair, I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Illinois will be postponed.

□ 1540

AMENDMENT NO. 3 OFFERED BY MS. ESHOO

The CHAIR. It is now in order to consider amendment No. 3 printed in House Report 112-181.

Ms. ESHOO. Madam Chair, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 6, after line 24, insert the following new paragraph:

(18) Recent oil pipeline spills, such as the May 2011 leak of 21,000 gallons of crude from TransCanada's existing Keystone pipeline in North Dakota, have raised serious concerns about the risks associated with pipelines carrying diluted bitumen. At a June 16, 2011, hearing on pipeline safety held by the Subcommittee on Energy and Power of the Committee on Energy and Commerce, Cynthia L. Quarterman, Administrator of the Pipeline and Hazardous Materials Safety Administration of the Department of Transportation, testified that the Pipeline and Hazardous Materials Safety Administration had not done a study analyzing the risks associated with transporting diluted bitumen.

Page 7, line 19, insert "Notwithstanding the previous sentence, prior to the issuance of a final order granting or denying the Presidential Permit for the Keystone XL pipeline, the Pipeline and Hazardous Materials Safety Administration shall complete a comprehensive review of the properties and characteristics of bitumen and the hazardous liquid pipeline regulations to determine whether current regulations are sufficient to regulate pipelines used for the transportation of tar sands crude oil." after "November 1, 2011."

The CHAIR. Pursuant to House Resolution 370, the gentlewoman from California (Ms. ESHOO) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from California.

Ms. ESHOO. Madam Chair, pipeline safety is not a subject that we can afford to take lightly. On September 10, 2010, last year, a natural gas explosion in San Bruno, California, just north of my congressional district in Congresswoman SPEIER's district, killed eight people, injured dozens of others, and destroyed 55 homes. This was from a natural gas explosion.

Since 1938, Congress has attempted to promote natural gas pipeline safety, but the horrific explosions, like the one in San Bruno, California, continue to occur every year someplace in our country. It is a dangerous business under the best of circumstances.

To move forward with the tar sands pipeline, which we have little experience regulating, without a solid understanding of the safety issues is an enormous and, I think, dangerous mistake. We have heard strong, well-informed concerns that pipelines carrying tar sands and the chemical bitumen may pose greater safety risks than even those pipelines carrying conventional or synthetic crude.

On June 16 of this year, during an Energy and Power Subcommittee hearing on pipeline safety, Cynthia Quarterman, administrator of the Pipeline and Hazardous Materials Safety Administration, known as PHMSA, testified that this agency, specifically tasked with researching and administering pipeline safety, has not analyzed the risks of these new pipelines. But Ms. Quarterman replied, when asked, that the agency would be pleased to make such a review. I think the American people would be safer if they did.

My amendment would require PHMSA to complete a comprehensive review of the properties and characteristics of bitumen and the hazardous liquid pipeline regulations before a final Presidential permit is issued.

I think this study is very, very important for the safety of all Americans, and it will determine whether current regulations are sufficient to regulate pipelines used for the transportation of tar sands crude oil. This approach I think makes sense because it is far less costly to build pipelines correctly than to try to fix or replace a line that is already built.

The explosion that occurred in San Bruno, California, and the recent oil spills that have occurred, particularly the spills from TransCanada's Keystone pipeline, which leaked 21,000 gallons of crude in North Dakota—I want to repeat that—leaked 21,000 gallons of crude in North Dakota, is a warning to all of us that we need to get this right. So let's protect lives, money, property, and take the proper precautions now.

For these reasons, I urge all of my colleagues to support my amendment.

I reserve the balance of my time.

Mr. TERRY. Madam Chair, I rise in opposition to the amendment.

The CHAIR. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. Madam Chair, the crux of this amendment is that the gentlewoman from California is asking for another study. That seems to be kind of the new tactic of how to delay or kill a bill; let's do a study instead of implementing something.

I want to talk about the safety of the pipeline with the chemical bitumen, which helps the crude actually flow through the pipeline better. This chemical isn't new to the Pipeline Hazardous Materials Safety Agency. In fact, heavy crude has been sent through pipelines with this chemical since the 1920s, including out of California. So they have the expertise to deal with this already. They are working on their assessment of the Keystone pipeline to assist the State Department and Department of Energy in their recommendation, so there is really no need for this type of a study.

I reserve the balance of my time.

Ms. ESHOO. Madam Chair, to respond to my friend and colleague, Mr. TERRY, with all due respect, I didn't come to the floor today with a tactic. I offered this, I raised this in the committee. We had a very good discussion about it there. It's my understanding that an EIS is being conducted, but an EIS on the entire pipeline is very different than what I am raising.

And the head of the agency, of PHMSA, when she appeared before the committee, understanding that there had not been an examination in particular about the tar sands crude oil and bitumen, said that her agency would be pleased to undertake that study.

So I'm here today, obviously, to offer this amendment. I think it is based on good common sense that we examine this before we go ahead with it. I raised something that is very real and that is just a handful of miles from where I live, even though it is outside my congressional district, where lives were lost—eight people were killed, dozens were injured, and 55 homes destroyed. So this is not a tactic. This is not to delay. This is to get this right before the permit is issued. I think the agency can do this on an expedited basis. I'm not seeking to delay and blow up anything. I'm here relative to public health and public safety.

I yield back the balance of my time.

Mr. TERRY. Madam Chair, I too have great confidence in PHMSA to be able to determine whether or not the chemical creates any issues. Bitumen has been around for 91 years with heavy crude, and so I just don't think there is a need for additional delays or studies.

Ms. Quarterman has already said she is undertaking the study, and that will be included in her recommendation.

I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentlewoman from California (Ms. ESHOO).

The question was taken; and the Chair announced that the noes appeared to have it.

Ms. ESHOO. Madam Chair, I demand a recorded vote.

The CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlewoman from California will be postponed.

AMENDMENT NO. 4 OFFERED BY MRS. CHRISTENSEN

The CHAIR. It is now in order to consider amendment No. 4 printed in House Report 112-181.

Mrs. CHRISTENSEN. Madam Chair, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 6, after line 24, insert the following new paragraph:

(18) The Supplemental Draft Environmental Impact Statement estimates that the Keystone XL pipeline would increase carbon pollution associated with United States fuel use by up to 23,000,000 metric tons of carbon dioxide equivalent per year, which is equivalent to the annual emissions from an extra 4,500,000 passenger vehicles.

The CHAIR. Pursuant to House Resolution 370, the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from the Virgin Islands.

Mrs. CHRISTENSEN. Madam Chair, I rise to introduce an amendment that would simply add a provision to H.R. 1938 to recognize that the construction of the Keystone XL pipeline would increase carbon emissions and make it harder to address global warming.

Permitting Keystone and allowing the transport of heavy petroleum product from the Canadian tar sands to refineries in the Gulf of Mexico has serious environmental and economic ramifications. Reports indicate that the production of fuel from tar sands can yield greenhouse gas emissions nearly three times as high as those produced from conventional extraction.

While my colleagues and I last Congress worked to reduce greenhouse emissions by 2020, Canada has projected that their emissions will grow 25 percent by 2020, with those from tar sands being the single largest contributor. This is not something that we should be working to expedite.

H.R. 1938 makes a series of findings related to the Keystone XL pipeline. Some of these findings are a matter of opinion, and some are just flat-out wrong. All of these findings share one characteristic—they all support the pipeline. And inconvenient facts are not included. In fact, there are a lot of inconvenient facts about the pipeline that the American people should know.

Tar sands require far more energy to extract and process than conventional crude oil.

□ 1550

The result is that emissions from using tar sands fuel are approximately 9 to as high as 37 percent higher than from our baseline fuel mix. This pipeline would almost double our current use of tar sands fuel. At a time when

we're trying to curb carbon emissions and stop global warming, Keystone makes us more reliant on one of the dirtiest sources of fuel currently available.

In short, tar sands oil threatens our air, water, land, and economy, and will increase already dangerously high greenhouse gas emissions and demand for natural gas. It has no place in the clean energy economy.

On page 3-198 of the State Department's Supplemental Draft Environmental Impact Statement, it is estimated that Keystone XL pipeline could increase carbon pollution associated with U.S. fuel use by up to 23 million metric tons of CO₂ equivalent per year. This is equivalent to the annual emissions from an extra 4.5 million passenger vehicles.

The SDEIS further indicates that most of the greenhouse gas emissions will come from the production of crude oil, refining of the crude oil, and combustion of the refined products. Transportation of the crude oil to the refinery and transportation of the products to the market also contribute to greenhouse gas emissions. This does not include the range of secondary carbon emissions to be considered as well.

In a letter to the State Department, our very own EPA indicated that the extra greenhouse gas emissions associated with this proposed project may range from 600 million to up to 1.15 billion tons of CO₂ over Keystone XL's lifecycle.

It's unfortunate that while the Department of State and EPA have recognized the huge risk that would be incurred, the proponents of H.R. 1938 simply ignore them. While some will tout that the Keystone XL will enhance energy security, the other side of this equation must be considered.

Now is not the time for us to increase harmful air emissions and further jeopardize the people in our environment.

I reserve the balance of my time.

Mr. TERRY. Madam Chair, I rise in opposition to the amendment.

THE CHAIR. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. Two points here: I think, number one, the gentlelady's amendment really helps define what the real issue here is. It isn't with, necessarily, the pipeline or its placement of the pipeline or a chemical that's in it. It's actually about whether we're going to continue to use oil. As we use more oil, it gets heavier.

As I mentioned earlier with the amendment by the gentleman from Illinois, the EPA is doing this switch where you don't compare a heavy crude or sour to the same, like what's been brought in by Venezuela. Now you have to compare it to a different type of sweeter crude or easier to refine crude.

The reality here—and that's the point that's made in the study itself, and the part that the gentlelady reads from, it is actually noting that we're using a heavier crude. So I just want to point out that that's kind of an unfair

comparison. We have got to do heavy to heavy to determine if there's going to be an increase in greenhouse gasses.

There's no rushing or expediting. This has been sitting around for 3 years. So it's really time to get up and do something.

At this time, I yield 2 minutes to the gentleman from Illinois (Mr. SHIMKUS).

(Mr. SHIMKUS asked and was given permission to revise and extend his remarks.)

Mr. SHIMKUS. This debate is about U.S. energy security, North American energy, and jobs.

The original Keystone pipeline cost \$2 billion, a thousand U.S. jobs. The expansion of the refinery bordering my district and the chairwoman's district is thousands of jobs and an expansion of the refinery. Keystone XL will allow us to create thousands of new jobs expanding the pipeline, expanding new refineries, getting down to the refineries in Texas.

The Canadians are going to build this pipeline in one or two directions. They're either going to go south to help us become North American reliant and secure in energy, or they're going to build this pipeline west to put it on tankers and ship it to China.

Now, I would ask my colleagues: What's more environmentally safe, secure, and sound—a pipeline or a super-tanker? What's better for our country—have that oil coming to the United States or that oil going to China?

I think the answer is clear. We can become North American energy independent. The Keystone XL pipeline is part of that.

I would ask my colleagues to vote against the amendment.

Mrs. CHRISTENSEN. Madam Chair, my amendment really says nothing about the placement. This is also a problem. And while I realize that we will be using oil for a long time, it's time for us to begin to move towards a clean and greener economy and to slow down global warming and do what we can to protect the public health.

My amendment is in direct opposition to the finding. The finding says the XL pipeline will result in no significant change in total U.S. or global greenhouse gas emissions, when EPA and also the supplemental EIS from the Department of State clearly says: range from 600 million to 1.15 billion tons of CO₂, assuming the life cycle that's projected, and also that the range could be equivalent to greenhouse gas emissions from the combustion of fuels in approximately—this is from the State Department—588,000 to 4.5 million passenger vehicles, or the CO₂ emissions of combusting fuels used to provide energy consumed by approximately 255,000 to 1.9 million homes.

In addition to that, the social cost has not been assessed. The social cost to agricultural productivity, human health, property damages from flood risk, ecosystem services due to climate

change. So even though this has been under discussion for a long time, there are a lot of things that have not been considered.

With that, I reserve the balance of my time.

Mr. TERRY. I still am in opposition because it doesn't really accurately reflect the statements within the EIS, the Environmental Impact Studies.

I yield back the balance of my time. The CHAIR. The gentlewoman from the Virgin Islands has 15 seconds remaining.

Mrs. CHRISTENSEN. Madam Chair, while we're trying to reduce the emissions, when you look at Canada, primarily because of the tar sands, their emissions are projected to rise by 25 percent. So I continue to offer my amendment and ask for the support of my colleagues.

I yield back the balance of my time.

The CHAIR. The question is on the amendment offered by the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN).

The amendment was rejected.

AMENDMENT NO. 5 OFFERED BY MR. COHEN

The CHAIR. It is now in order to consider amendment No. 5 printed in House Report 112-181.

Mr. COHEN. I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 6, lines 14 through 17, amend paragraph (16) to read as follows:

(16) TransCanada Corporation's first wholly owned oil pipeline in the United States is the recently built Keystone I, which spilled 12 times in the United States and 21 times in Canada in less than one year of operation. Despite claims that it is "the safest pipeline ever built", Keystone was recently shut down by the United States Government because it was deemed a "threat to life, property, and the environment".

The CHAIR. Pursuant to House Resolution 370, the gentleman from Tennessee (Mr. COHEN) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Tennessee.

Mr. COHEN. I yield myself such time as I may consume.

As the State Department and the U.S. public consider whether the proposed Keystone XL tar stands pipeline is in the national interest, it is critical that the most accurate information be made available. That's why I have offered an amendment to this legislation that eliminates a rhetorical, baseless safely claim and replaces it with a substantiated factual statement.

TransCanada is engaged in a high-stakes public relations campaign to brand the Keystone XL pipeline as safe and their company as responsible operators. I'm sure that BP Oil said the same thing about Deepwater. But that wasn't true. Just because they say it doesn't make it true. It is one thing for a foreign oil company to employ misleading rhetoric, but it's not the place of the House of Representatives to endorse these mistruths.

It only requires a brief objective glance at the safety record to realize that TransCanada's meritorious safety claims do not withstand even the slightest scrutiny. When selling Keystone—that's not Keystone XL, which we're looking at; Keystone, another pipeline—to the U.S., TransCanada claimed the pipeline was "state-of-the-art," and even went as far as dubbing it the "safest pipeline ever built." Well, we're in trouble.

□ 1600

After 1 disastrous year of operation, TransCanada's rosy claims are not reflective of the reality that exists.

In less than 12 months of operation, the so-called "safest pipeline ever built" has spilled 12 times in the United States—the dirty dozen—and 21 times in Canada. Following that 12th domestic spill, the Department of Transportation shut down pipeline operations because Keystone was deemed "a threat to life, property and the environment."

Since Keystone is TransCanada's first wholly owned pipeline in the United States, TransCanada's safety record is off to a pretty bad start. TransCanada's misleading safety claim extends far beyond their simple rhetoric. Here are three of the most egregious claims for Keystone XL:

Number one: TransCanada claims that, if and when the Keystone XL pipeline has a leak, it will shut down the pipeline almost instantly.

Unfortunately, spills on the Keystone pipeline have demonstrated that TransCanada's theoretical response is far better than their actual response. In May, when Keystone spilled 21,000 gallons, it took TransCanada 44 minutes to shut down the pipeline after the spill. It would have taken even longer had it not been for a landowner who called in the spill, which shot a six-story-high gusher of toxic oil into the air. You'd have thought it was Texas.

Number two: TransCanada suggests there is little risk of a spill on the Keystone XL pipeline.

However, the only independent assessment of the worst case spills for Keystone XL indicates that TransCanada has greatly understated the severity and frequency of significant spills, an estimate that is more than 80 percent lower than what would likely occur.

Over the last few weeks, we have all witnessed the irreparable damage caused by the 40,000-gallon Silvertip pipeline spill in the Yellowstone River. Now try to imagine how devastating a 6.95 million-, almost a 7 million, gallon spill of more toxic oil would be on the Yellowstone River. A spill of this magnitude and devastation is possible if we approve the Keystone XL.

Number three: TransCanada claims that Keystone XL would be built of thicker steel and operate at lower than allowed pressures.

But major segments of Keystone XL would be made of thinner steel than

Exxon Mobil's failed Silvertip pipeline. So while Keystone XL would operate at lower than allowed pressures, it would still operate at nearly twice the pressure of the Silvertip. Additionally, Keystone XL would be transporting tar sands, a substance which is far more corrosive and volatile than conventional oil.

Even a cursory review of TransCanada's safety claims reveals a web of exaggerations, understatements and lies that have been carefully woven together to manufacture an image of safety and responsibility.

It is critical that the American people have an accurate depiction of the dangers of the proposed Keystone XL pipeline. Congress must exercise more scrutiny and not take TransCanada's manufactured rhetoric at face value. We cannot afford to let TransCanada once again dupe us into permitting an even more dangerous pipeline, for as they say, "Fool me once, shame on you. Fool me twice, shame on me." Somebody from Texas tried to say that once, but we know the statement.

I urge support for my amendment, and I yield back the balance of my time.

Mr. TERRY. I rise in opposition to the amendment.

The Acting CHAIR (Mr. POE of Texas). The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. There is no doubt that the facts are that, on the Keystone but not the Keystone XL, there have been 12 leaks, 12 leaks of as little as 5 gallons to 400 barrels from a recent one. Those were determined to be caused, not by the safety of the pipeline but by valves that were mal-manufactured, where there was a manufacturing problem, but within a 12-hour period, they were up and running again. Those have all been replaced. That's the type of response that we expect under our pipeline laws.

I think the issues here are better placed in our discussions of pipeline safety, on which both the Transportation Committee and Energy and Commerce Committee will begin working soon, so I just don't see the need for this type of an amendment, or fact-finding, to be put into this bill.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Tennessee (Mr. COHEN).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. COHEN. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Tennessee will be postponed.

AMENDMENT NO. 6 OFFERED BY MR. MURPHY OF CONNECTICUT

The Acting CHAIR. It is now in order to consider amendment No. 6 printed in House Report 112-181.

Mr. MURPHY of Connecticut. I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 4, lines 18 through 23, amend paragraph (7) to read as follows:

(7) Consultants employed by Canadian tar sands companies have publicly stated that without the Keystone XL pipeline, Canada's tar sands will be "landlocked" and unable to be exported overseas. There are significant barriers to construction of a pipeline to ports on the West Coast of Canada. The Keystone XL pipeline, which would service Port Arthur and the Port of Houston, would allow tar sands crude to be exported. Permitting the pipeline would provide an export route to China where none now exists.

The Acting CHAIR. Pursuant to House Resolution 370, the gentleman from Connecticut (Mr. MURPHY) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Connecticut.

Mr. MURPHY of Connecticut. Mr. Chairman, my amendment before us today asks a simple question:

Why should America shoulder new environmental risks to help power the economy of China?

Many Members have come to the floor today to document the considerable ecological and public health threats posed by the development of the TransCanada Keystone XL pipeline. In addition to producing 40 percent more life cycle greenhouse gas emissions than conventional oil, the recent Exxon pipeline spill in Montana's Yellowstone River serves as a stark reminder of the very real risks posed by these kinds of pipeline projects.

However, in discounting these facts, the proponents of Keystone XL assert that, without the new pipeline, Canada's dirty tar sands oil will be shipped to China and to other overseas markets. This simply isn't true. Without access to a major new shipping terminal and refining hub on the gulf coast, Canada's tar sands will remain stranded on the North American continent.

Indeed, Keystone XL is essential to the economic expansion of Canadian tar sands because it opens up new trade routes to the East. Current pipeline infrastructure carries tar sands oil to the Midwest but no further. By 2015, existing markets will no longer be sufficient to absorb this increased tar sands production. So the Keystone XL pipeline will provide that new market to China for this oil.

Indeed, earlier this year, the CEO of Valero Energy, one of the companies that has signed up to ship oil through Keystone XL, said this: that the future of refining in the United States is in exports.

So America is increasingly now the global middleman in world oil exports. Our oil exports have doubled in the last 5 years. The question is this: Shouldn't we have some say in where our oil goes?

With the construction of this new pipeline, we are going to be shouldering

all of the increased environmental risks that come with its construction to help meet the growing overseas oil demand of our economic competitors. How does that further the energy independence of the United States?

So the amendment we are offering today with Mr. COHEN and Mr. WELCH will merely make it clear that a decision to permit Keystone XL is a decision to, in part, help promote North American oil exports to China. Whether you like that or don't like that, we should at least admit that that is one of the byproducts of our action today. I urge my colleagues to support this amendment and to face the reality of the Keystone XL pipeline rather than just the rhetoric.

At this point, I yield such time as he may consume to the gentleman from Tennessee (Mr. COHEN).

Mr. COHEN. I appreciate the gentleman from Connecticut for yielding time.

I rise in support of the Murphy-Cohen-Welch amendment. This amendment sheds light on the oil industry's attempt to pressure the U.S. into approving Keystone XL by threatening to export tar sands to China if we do not approve the pipeline.

As Mr. MURPHY has well stated, Canada has already said themselves they can't get that oil out of Canada without this pipeline, that they can't get it to China unless they build a pipeline. They want to build a pipeline through America over one of our most important aquifers—threatening our environment and our drinking water so that Canada can get some oil to possibly go to China.

□ 1610

Canada cannot get it to China without going through the United States, and it makes no sense. The fact is this amendment, like the previous amendments, is just simply putting the facts, the truth, into this particular paper.

There is nothing wrong with these. Nobody disputes the facts. In fact, the gentleman agreed on the previous amendment that there had been a dozen leaks of the Keystone pipeline. He mentioned that some of them were very small. The average one is a thousand barrels.

So if the Keystone pipeline, which was the safest in the world, was not safe, what's wrong with mentioning it in the findings?

And the same thing here. What they said about China is just not true. The only feasible route to export tar sand to China is the Keystone XL. And that's what they're looking to do, because it's not going to affect the United States' use of oil, oil as a commodity that the Canadians want to sell, and they're not going to give it to us any cheaper than they're going to give it to anybody else. They want to make money, but they've got opposition in their own country as well.

We need to look out for the American people and not have some situation

where maybe because Canada is helping us with oil in the Middle East that we're helping them with oil through our Midwest. America's Midwest is too important to sacrifice to some misguided adventure that Canada got into with us and the Mideast all because of oil.

So I would support the Murphy-Cohen-Welch amendment.

Mr. MURPHY of Connecticut. I would like to yield the balance of my time to the gentleman from Illinois (Mr. RUSH).

Mr. RUSH. Mr. Chairman, I stand in support of Mr. MURPHY's amendment, and this amendment replaces misleading findings about the Keystone XL pipeline's critical faster implementation.

The only problem that I see was the majority's argument in that Canada has really—and I agree with Mr. COHEN—that Canada has no way to send oil to China now and no realistic prospect of ever sending oil to China. They won't do anything any time soon.

So I think that this is a common-sense amendment, and I certainly stand in support of this amendment.

Mr. MURPHY of Connecticut. I yield back the balance of my time.

Mr. TERRY. I rise in opposition to this amendment.

The Acting CHAIR. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. Thank you, Mr. Chairman.

First of all, the purpose of this pipeline is so that American citizens will have a reliable source of fuel made in America. That's the whole point of this. And there are companies that are expanding their refineries right now to be able to accept this crude.

Now, it's been stated that if we don't use it, then this is not going to be used because it's landlocked, but nothing could be further from the truth. It's only 800 miles from the point that the oil sands will be used to the Vancouver coast where it could be put on and would be put on tankers to be shipped to China.

Now, Enbridge is already in the promoting process for a pipeline that will link the Athabasca fields in northern Alberta to a terminal in Kitimat, British Columbia. It's 525,000 barrels per day. So the statement that it will be landlocked and never used is just simply flat wrong. That is not what the Canadians will do.

To say that it's going to be sent to our refineries in Oklahoma, Chicago, Texas, and Louisiana so it could be then refined and put on a tanker then to go south through the Panama Canal and through just makes no sense because we have the most stringent regulations in refining and on cleaning, or a clean process that adds a great deal more to the cost of refining, so it just makes no economic sense to do that. It would be much cheaper just to put a pipeline to the west coast of Canada, put it on tankers. It would be much cheaper to do that.

At this point I yield 2 minutes to the gentleman from Pennsylvania (Mr. MURPHY).

Mr. MURPHY of Pennsylvania. I thank the gentleman from Nebraska.

That line through Canada, less than 800 miles long, to add an additional almost 10,000 miles to go through the Panama Canal to Shanghai doesn't make economic sense. And let's keep in mind, Canada is our neighbor. They are our friend, our most consistent and reliable ally, and I trust the way they are going to be working on many things with us.

But I also trust the workers who will work on this pipeline, American workers from here in the United States, well-trained people who have gone through good training programs as apprentices and journeymen. Construction of this pipeline will generate about \$20 billion in economic output, perhaps \$13 billion in direct work on the pipeline itself.

Now, some estimates have said that for every \$1 billion you spend on infrastructure, it yields about 35,000 jobs. That's some jobs that go for manufacturing, that's some jobs that go for the actual construction, and some jobs that go for all the supports that help those workers as well as the places that they will spend money—steamfitters and welders who make \$45 to \$50 an hour, operating engineers, laborers who will earn between \$23 and \$31 an hour.

And, yes, this is a time we need to do this, not with more delays and more problems, but at a time when we need jobs.

Let's keep this in mind too: Construction of this pipeline with oil from Canada is going to make us less dependent on OPEC. Right now we send \$129 billion a year to OPEC. That's \$129 billion in foreign aid which we do not have to send to those countries there, \$129 billion which we wouldn't have to be spending on countries that sometimes turn around and use U.S. dollars against our soldiers and then we end up fighting for both sides on the war on terror.

This is what we need to keep in mind: This is a jobs bill; this is a bill dealing with a friend; and this is a bill that makes a lot of sense, and we shouldn't put more delays and restrictions on this because we have to get off of our addiction to OPEC oil.

Mr. TERRY. Mr. Chairman, I urge defeat of this onerous and job-killing amendment.

I yield back the balance of my time. The Acting CHAIR. The question is on the amendment offered by the gentleman from Connecticut (Mr. MURPHY).

The question was taken; and the Chair announced that the ayes appeared to have it.

Mr. TERRY. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by

the gentleman from Connecticut will be postponed.

AMENDMENT NO. 7 OFFERED BY MR. RUSH

The Acting CHAIR. It is now in order to consider amendment No. 7 printed in House Report 112-181.

Mr. RUSH. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 7, line 14, strike "30 days" and insert "120 days".

Page 7, lines 18 and 19, strike "November 1, 2011" and insert "January 1, 2012".

The Acting CHAIR. Pursuant to House Resolution 370, the gentleman from Illinois (Mr. RUSH) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Illinois.

Mr. RUSH. Mr. Chairman, today's debate on fast-tracking the Keystone XL pipeline by 2 months reminds me of a saying that adequately sums up the fight before this Congress: Good sense minus common sense equals nonsense.

With the current crisis our Nation faces on lifting the debt ceiling and other priorities for the American people, including the economy and jobs, it is incomprehensible that we are here debating a bill that is totally and absolutely unnecessary, completely futile, and is not even worth not one millisecond of Congress' time.

Mr. Chairman, as written, this bill will force the administration to issue the Presidential permit for the pipeline within 30 days of the environmental impact statement and no later than November 1, 2011, regardless of whether or not the review process has been completed.

This arbitrary, willy-nilly time line would reduce the allocated time that the Federal agencies will have to determine the national interest in deciding this proposal by almost two-thirds of the time that they need, while also reducing or eliminating the 30-day public comment period.

□ 1620

Mr. Chairman, the amendment that I am offering would allow for 120 days after the final environmental impact or no later than January 1, 2012, for the President to issue a final decision on the Keystone XL pipeline.

I believe that public input is a vital and necessary part of the permitting process, and I also believe that it is important for the various departments to weigh in with their national interest determinations, which this bill would severely curtail, if not completely eliminate. In fact, in conversations that my office has held with the State Department and the EPA, we were informed that it would be close to impossible for the responsible agencies to complete their due diligence and reply by the arbitrary timeline of November 1, as this bill would mandate. Additionally, just yesterday, the State Department publicly stated that this bill was

"unnecessary" since the agency already plans to reach a final decision on the Keystone XL by the end of the year, after first holding a series of public hearings in the very six States that would be affected by the enactment of this bill. Mr. Chairman, whether you support the Keystone XL pipeline or not, it is extremely important that all of the relevant information and consequent impacts be considered so that an informed decision can be made.

So I urge all my colleagues to support my amendment, which would allow for the appropriate time period for the public and the different agencies to weigh in, while also mandating that a decision is made within a timely manner.

With that, Mr. Chairman, I reserve the balance of my time.

Mr. TERRY. Mr. Chairman, I rise in opposition.

The Acting CHAIR. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. Mr. Chairman, I first want to state that this is an infrastructure bill. This is a \$13 billion project, \$13 billion spent in the United States, employing United States workers.

On the surface, my friend from Illinois' amendment seems fairly innocuous, just delaying this decision by 61 days. The point that I would like to make is that we've just had it with the delays. This isn't rushing or expediting. This is only weeks away from the 3-year anniversary of the filing of the application when, in comparison to other transcontinental pipelines, the average is 18 to 24 months. So it's time that we act.

The date of November 1 was actually calculated by the time it would take the State Department, after they requested another round of town hall meetings, to have sufficient time to accomplish those. So there's just no reason to bump it back from this date, from November 1, 61 days to January 1.

I yield 3 minutes to the gentleman from Illinois (Mr. KINZINGER).

Mr. KINZINGER of Illinois. I thank the gentleman from Nebraska for generously yielding.

Mr. Chairman, I'm also from Illinois. And I can tell you, in Illinois there is a very tough economic environment right now. We've got a tough budget. There is a lot of talk about the budget right now. We've got huge unemployment. We've got people who desperately want to go to work. And when I do town hall meetings, when I'm in the 11th Congressional District in towns like Joliet, or when I'm in Ottawa, or Princeton, or some of those towns, I get this from a lot of people: Why can't we just become energy independent? Why can't we just become energy secure? And I think that's a great question.

When people look at Washington, D.C., and they say, Washington, D.C., is broken, I think one example of that is the fact that we can't get our act together and do what we need to do to in-

crease oil that we're not pulling in from the Middle East. I mean, it's just very basic. How can we do anything in this Congress if we can't even agree that our partners to the north can bring their oil here for our consumption so that we can come off of that oil we're buying from the Middle East that, in some way, is always going to fund the people that we are fighting overseas and the terrorists that we're fighting?

But when we talk about the Keystone pipeline, let me ask you, what does the pipeline mean for the United States and for Illinois? For starters, it means creating more than 100,000 American jobs. We've been seeing the jobs reports lately. They're not good. How would you like to add 100,000 American jobs? That's what we're offering. It means 1.3 million barrels of oil from our friends to the north, which means we need less oil from the Middle East, from Venezuela, and less oil from other countries that we can no longer rely on and are not friendly to the interests of the United States. What's bad about that? It means \$5.2 billion in new property tax revenue for bankrupt States, like my own, like Illinois.

The North American-Made Energy Security Act expedites a final decision on the Keystone XL pipeline, a project that would allow millions of barrels of Canadian oil supplies to flow into U.S. markets and requires the President to issue a final Presidential permit decision by November 1, 2011. This bill does not require the President to accept the benefits of the Keystone XL pipeline. It merely requires him to make a long overdue decision on this pipeline.

The State Department has, at their discretion, the authority to decide if the U.S. benefits from this. The fact is that someone will benefit from the oil out of Canada. If it's not the United States, it will be China. Unless we take immediate action to expand the Keystone pipeline, it will be American businesses, American consumers, and those who are unemployed that are desperately seeking a job in this terrible economy who will suffer the consequences from our inaction.

According to a Department of Energy report, the pipeline extension will "essentially eliminate" our oil imports from the Middle East. I urge my colleagues to oppose this amendment and support the final passage.

Mr. RUSH. Mr. Chairman, I really want my friend from Illinois to know that I don't have to travel to Joliet, Illinois, or any other part of Illinois; I don't even have to come down to his district in Peoria to see unemployment, to see the joblessness. I am not standing here fighting against jobs. I am fighting for jobs. But I think at the same time that we fight for jobs, we have to also fight so that the American people have input in terms of making decisions such as this. Mr. Chairman, I also believe that at the end of the day, we want to ensure that this pipeline benefits America and not China.

I yield back the balance of my time.
Mr. TERRY. I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Illinois (Mr. RUSH).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. RUSH. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Illinois will be postponed.

AMENDMENT NO. 8 OFFERED BY MS. HANABUSA

The Acting CHAIR. It is now in order to consider amendment No. 8 printed in House Report 112-181.

Ms. HANABUSA. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 7, after line 23, insert the following new subsection:

“(e) WORST-CASE DISCHARGE SCENARIO CERTIFICATION.—

“(1) IN GENERAL.—No Presidential Permit shall be issued approving the construction and operation of the Keystone XL pipeline unless the Secretary of Energy, in consultation with the Pipeline and Hazardous Materials Safety Administration, certifies that the applicant—

“(A) has calculated a worst-case oil spill scenario for the proposed pipeline; and

“(B) has demonstrated to the satisfaction of the Secretary and the Pipeline and Hazardous Materials Safety Administration that the applicant possesses the capability and technology to respond immediately and effectively to such worst-case oil spill scenario.

“(2) WAIVER.—The Secretary of Energy, in consultation with the Pipeline and Hazardous Materials Safety Administration, may waive the requirement under paragraph (1) if the applicant has already completed a worst-case discharge scenario analysis and established that it possesses the capability and technology to respond immediately and effectively to such worst-case oil spill scenario.

The Acting CHAIR. Pursuant to House Resolution 370, the gentlewoman from Hawaii (Ms. HANABUSA) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from Hawaii.

Ms. HANABUSA. Mr. Chairman, I yield myself such time as I may consume.

□ 1630

Mr. Chairman, this amendment requires that prior to the Presidential permit approving the construction and operation of the Keystone XL pipeline, that it will not issue until such time as the Secretary of Energy, in consultation with the PHMSA, certify that the applicant has calculated a worst-case oil spill scenario for the proposed pipeline and has demonstrated to the satisfaction of the Secretary and the PHMSA that the applicant possesses the capability and technology to re-

spond immediately and effectively to the worst-case scenario.

Mr. Chairman, the reason this amendment is so necessary is because we are talking about a 2,000-mile pipeline from Alberta to the gulf coast. Actually, according to the bill itself, it will increase the production; and the pipeline will carry 700,000 to 1.290 million barrels of oil in a day.

This pipeline will go over important aquifers; and what we need to recognize is that the people of this great country, after experiencing the BP oil spill, expect us to address and recognize that that type of catastrophe may occur. And what this amendment does is it gives the people that assurance.

I would also like to say, Mr. Chairman, that part of this amendment also gives the Secretary the opportunity to waive the requirement. If the Secretary and the PHMSA believe that the applicant has, in fact, completed a worst-case discharge scenario, then they can say that this provision is no longer necessary.

So, Mr. Chairman, this is really for the people. It gives the people peace of mind that, in fact, we have addressed the situation, especially when we're going over aquifer and many people's lands, 2,000 miles.

Mr. Chairman, I reserve the balance of my time.

Mr. TERRY. Mr. Chairman, I rise in opposition to this amendment.

The Acting CHAIR. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. I appreciate the thoughts of the gentlelady from Hawaii. Coming from Nebraska, where it's the Sand Hills and the sensitive area and the Ogallala aquifer, I want to make sure that the people in my State have the peace of mind and the confidence that the worst-case scenarios have already been modeled out and written into their plans. In fact, that's the whole premise of PHMSA. And so the analysis of a worst-case scenario spill is already part of the application. It's part of the environmental impact statement and the supplemental environmental impact statement.

Furthermore, it's demonstrated its response plan in the event of the worst-case discharge, that the pumps will be stopped in 9 minutes and the valves will shut in 3 minutes. So the worst-case scenarios are actually part of the record so that the entities that have to make the recommendation to the President already have that determination. Then they'll use those facts and figures and models to determine what to recommend to the President. Then the President can make that recommendation.

So I believe that this amendment is really superfluous and unnecessary.

I reserve the balance of my time.

Ms. HANABUSA. Mr. Chairman, I understand what the proponent of this measure is stating. However, let us also recognize that this bill, in its own requirement, says that not later than

30 days after the issuance of the final environmental impact statement, the President shall issue an order either granting or denying the Presidential permit.

We're not here to slow this up. We're actually here to assist them if this is really what they want to do. The reason why is this: if you're very familiar with the environmental impact statement process, and we are in the comment period right now, but you know that after the comment period is done, that what will then happen is that you will then be able to file challenges to the EIS itself.

What this does is it then creates the opportunity to say, in a challenge, to an EIS, the sufficiency of which, if it's challenged on the fact that it did not properly address the worst-case scenario, that there is a process in the law itself which will permit them to say, hey, we can look at the worst-case scenario. And I believe that any kind of construction project such as this, it would be the worst-case scenario argument that would bring it to a complete halt.

So, given that, Mr. Chairman, I urge my colleagues to vote “yes” on this amendment because it really will give the people the peace of mind; and if this is a project worthy of going forward, that it does assist in that process.

I yield back the balance of my time.
Mr. TERRY. Mr. Chairman, I want to give a degree of confidence that this scenario's already been set forth. This is the environmental study, pages 3-99: maximum spill volumes. It's already been modeled out. It's already been determined.

And just to provide further confidence, even the EPA, that wrote a letter a few months ago, did not say anything about the maximum spills and whether the responses were appropriate or not. Most of theirs was on greenhouse gases. So this issue is pretty well settled. The facts are there for those who will make the recommendations. I request defeat of this amendment.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentlewoman from Hawaii (Ms. HANABUSA).

The question was taken; and the Acting Chair announced that the ayes appeared to have it.

Mr. TERRY. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentlewoman from Hawaii will be postponed.

AMENDMENT NO. 9 OFFERED BY MR. JOHNSON OF GEORGIA

The Acting CHAIR. It is now in order to consider amendment No. 9 printed in House Report 112-181.

Mr. JOHNSON of Georgia. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 7, after line 23, insert the following new subsection:

(e) **REQUIRED STUDY.**—Notwithstanding subsections (a) and (e), final approval of construction and operation of the Keystone XL pipeline shall not occur until the President has determined that the appropriate Federal agency has completed a study of the health impacts of increased air pollution in communities near refineries that will process up to 830,000 barrels per day of tar sands crude transported through the Keystone XL pipeline, including an assessment of the cumulative air pollution impacts on these communities, many of which already experience unhealthy levels of air pollution.

The Acting CHAIR. Pursuant to House Resolution 370, the gentleman from Georgia (Mr. JOHNSON) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Georgia.

Mr. JOHNSON of Georgia. Thank you, Mr. Chairman, for allowing me to speak today on H.R. 1938, the North American-Made Energy Security Act of 2011, and on my amendment to this legislation.

I oppose H.R. 1938, which would accelerate the approval of the Keystone Koch Brothers XL pipeline. No one knows how much air pollution this pipeline will cause, or how the pollution will impact the public health.

My amendment, which has been endorsed by the National Resources Defense Council and the Sierra Club, is common sense. I'm simply requesting a thorough analysis of the potential health risks that should be completed before any decision is made to begin construction.

Even though the State Department has submitted two environmental impact statements on the Keystone Koch Brothers XL pipeline, the Environmental Protection Agency has found that neither statement included a satisfactory evaluation of the increased air pollution that would come as a result of this pipeline's operation.

Communities surrounding the oil refineries that would be along the transportation route for these raw tar sands crude are already exposed to dirty air. Approval of the Koch Brothers Keystone XL pipeline will only make it worse.

The raw tar sands crude is more toxic and acidic than other types of crude. Raw tar sands crude produces significantly more harmful pollutants and greenhouse gas emissions than conventional crude oil due to the complex refining process it must go through before it reaches gas pumps in China.

As this type of crude has only been exported to the United States from Canada for a relatively short period of time, there has not been a thorough study on how its transport would effect air pollution in our Nation. It's troubling that the construction of the Keystone Koch Brothers XL pipeline, which could transport 900,000 barrels of this crude oil daily, should take place before such a study is ever done.

We have a responsibility to the American people to properly assess what risks the construction of this pipeline may pose to our health. It would be irresponsible for us to sweep these concerns under the rug, just to rush this project to the finish line.

□ 1640

Valid questions have been raised about the health risks associated with the increased air pollution this pipeline will produce, and these questions deserve legitimate answers. For this reason, I am requesting that a study be conducted to measure the health impacts of raw tar sands crude pollution in communities surrounding the refineries where the Keystone-Koch XL pipeline would operate. If you share my commitment to safeguarding Americans' health, I ask that you approve my amendment and allow for such a study to be done before we make any decision on the pipeline's construction.

With that, Mr. Chairman, I reserve the balance of my time.

Mr. TERRY. Mr. Chairman, I rise in opposition.

The Acting CHAIR. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. Thank you.

Let me assure the gentleman from Georgia that part of the environmental impact study based on the EPA modeling inherently includes the impact of health around the communities. So I am confident that the Department of Energy and the Department of State will have the necessary health impact data to make the proper recommendation to the President, and the President will then be able to rely on those or review the data himself before issuing it. But to require an additional study on top of the ones that have already been done appears to me to just simply be an act of trying to slow the process down.

Let me remind the Chairman that we are on the third-year anniversary of this particular application, whereas ordinarily these types of transborder pipeline applications are resolved within 18 to 24 months. The owner, TransCanada—TransCanada is a Canadian company—they've agreed to all of the recommendations that have come forth from all of the draft environmental impact studies and supplemental, so I really do not want additional studies layered on additional studies layered on additional studies to slow this down.

This is a \$13 billion construction project, not funded by the government, that will employ at least 20,000 union contractors and 100,000 to 200,000 employees to help build the refineries and to work the refineries in the United States. This is the jobs bill. This is getting people back to work. This is an infrastructure bill. Let's get this decision done. The data's available. It can be done by November 1. I urge the defeat of this amendment.

I reserve the balance of my time.

Mr. JOHNSON of Georgia. I yield myself the balance of my time.

The gentleman from Nebraska is incorrect in terms of the Environmental Protection Agency having conducted a study of the increased air pollution that would come as a result of this pipeline's operation.

The State Department has submitted two environmental impact statements on the Keystone XL/Koch brothers pipeline, but the Environmental Protection Agency has found that neither statement included a satisfactory evaluation of the increased air pollution that would come as a result of this pipeline's operation. So I wanted to correct the record on that.

Last but not least, I want this body to know that it is the health of Americans that is most important here as opposed to making money for an oil company.

With that, Mr. Chairman, I yield back the balance of my time.

Mr. TERRY. I yield myself the balance of my time.

I hold up the United States Department of State report here. A cooperating agency in the development of the report is the U.S. Environmental Protection Agency, EPA. The actual study was done by the Department of Energy using the EPA standards and modeling, so I think that may be where the confusion is entering here. I didn't state that the EPA did the study. I've always said that the Department of Energy, using EPA's modeling and standards, did it, but the EPA was a partner in this and had made their recommendations on it. Again, what we're requesting is a redundant study being done, and I urge the defeat of this amendment.

I yield back the balance of my time.

ANNOUNCEMENT BY THE ACTING CHAIR

The Acting CHAIR. Members are advised not to traffic the well while another is under recognition.

The question is on the amendment offered by the gentleman from Georgia (Mr. JOHNSON).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. JOHNSON of Georgia. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Georgia will be postponed.

AMENDMENT NO. 10 OFFERED BY MS. JACKSON
LEE OF TEXAS

The Acting CHAIR. It is now in order to consider amendment No. 10 printed in House Report 112-181.

Ms. JACKSON LEE of Texas. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 7, after line 23, insert the following new subsection:

(e) **SENSE OF CONGRESS.**—It is the sense of Congress that the United States must decrease its dependence on oil from countries

which are hostile to the interests of the United States. Canada has long been a strong trading partner, and increased access to their energy resources will create jobs in the United States.

The Acting CHAIR. Pursuant to House Resolution 370, the gentlewoman from Texas (Ms. JACKSON LEE) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from Texas.

Ms. JACKSON LEE of Texas. Thank you very much, Mr. Chairman.

I am glad I'm able to rise and speak about legislation that involves one of our closest allies, Canada, and because this is a relationship with Canada, and because it is an international issue, I'm assured that in the process, we will have significant oversight that includes the Environmental Protection Agency, the Secretaries of Defense, Commerce, Transportation, Energy, Homeland Security, and the Attorney General who will have to comment on this application before the conclusion and the final decision. That is good news.

I also think it's important, as we discuss what the potential of this relationship is and the opportunity for oil coming from a friendly neighbor, to be reminded that many of us have said over and over again that we must cease to rely upon foreign oil.

In fact, in a Senate hearing when Egypt was beginning to, in essence, explode, Members said, watch Egypt, and we must lessen our dependence on foreign oil. Obviously Egypt is not one of our major sources of energy, but they were beginning to see the ripple effect in the Mideast of what has been called the Arab Spring. For many of us, we realize that it is a long, long winter as our friends in the Mideast seek peace. So this is an important statement about our commitment to creating jobs, but also it is an important statement on relieving or ceasing the dependence of the United States on foreign oil.

Let me just take one State's economy and realize what would happen with this particular effort. There would be a \$2.3 billion investment in the Texas economy, creating more than 50,000 jobs in the Houston area, providing \$48 million in State and local taxes, increase the gross State product by \$1.9 billion.

But I don't choose to be selfish in my amendment, and my amendment is a sense of Congress that says that it is the sense of Congress that the United States must decrease its dependence on oil from countries that are hostile to the interests of the United States and that Canada has been a strong trading partner, and increasing access to their energy resources will help create jobs in the United States. If I were to add to that, I would say continue the strong relationship between the United States and Canada.

In addition, I think it is important to note that the President of the United

States has indicated that we should decrease our reliance on foreign oil.

□ 1650

In this instance, I believe that we are making an effort toward that. Do I believe that we should, in essence, cross our environmental Ts? Absolutely. So I would ask my colleagues to support my amendment.

I reserve the balance of my time.

Mr. TERRY. Mr. Chairman, I rise in opposition to the amendment.

The Acting CHAIR. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. I would like to inform the Chair and the gentlelady from Texas that we think that her amendment reflects the thoughts of the American people, and we agree with it.

I yield back the balance of my time.

Ms. JACKSON LEE of Texas. May I inquire as to the time I have remaining.

The Acting CHAIR. The gentlewoman from Texas has 2 minutes remaining.

Ms. JACKSON LEE of Texas. I thank the gentleman very much for his agreement.

Let me give a famous quote: "Can we all get along?" I mentioned the different agencies that will have oversight. I have listened to a number of concerns about safety, security, and health. I frankly believe we can do it all. We can increase jobs here up to 300,000 and we can pay attention to the issues of environmental safety and security.

I think it will be important for TransCanada to be able to address the question of spills, important for there to be discussions about protecting against toxic chemicals, important to disarm farmers—when I say disarm them, about fears about the pipeline in their area.

I've worked on pipelines. I know there is a lot of work that goes into construction, a lot of overall State laws that regulate the building. And so putting forward more safety procedures and standards, being concerned about the public health, and making sure that we address the concerns of all Americans is an important step.

But I think we have a bottom line here: the importance of lessening our dependence on foreign oil, and as well to be able to ensure that jobs are created here in America. That's what we are sent to Congress to do: to create these jobs, to stand alongside our neighbors and make sure they have a safe environment while they work, and produce an economy that is known only to America, the greatest economy in the world.

I ask my colleagues to support this amendment.

I thank the Chair for this opportunity to explain my amendment #6 to H.R. 1938 "North American Made Energy Security Act," expressing the sense of Congress that it is imperative that we decrease our dependency on oil from nations hostile to our national interest. Canada has long been a strong trading part-

ner, and increased access to their energy resources will create jobs in the United States.

I represent the 18th Congressional District in Houston, TX, our Nation's energy capital. I understand the vital role that the oil and gas industry plays in our economy and will continue to play in the future. Our nation needs a concrete and viable strategy for gaining independence from foreign oil and gas sources. These strategies need balance on the one hand this pipeline will create jobs and on the other we must weigh the costs associated. Upon careful and deliberate considerations of our energy needs, our need for jobs, and our need to protect our national security will result in finding a comprehensive energy strategy that works.

Houston is the fourth most populous city in the United States, and is home to nearly 3,500 energy companies and related firms. There is no denying the importance the energy industry has in creating jobs in Houston and across our Nation. I understand the need to put the hard-working people of the Gulf region back to work, and I believe it can be done in compromise with The Department of Interior. We have all heard the famous phrase "can't we all just get along." I believe that we can get along.

I have consistently brought attention to our dependence on oil coming from nations in the Middle East who are in turmoil and have shifting views of the United States. I offer this amendment to call attention to the national security implications of our continued dependency on foreign oil imports. I also, offer this amendment to draw attention to the need to create jobs here in the United States.

The United States imports 49% of all the oil we use. In 2010, 16% of oil imports came from OPEC countries in Africa and South America, with another 9% coming from OPEC nations in the Persian Gulf. Relying on oil imports from hostile regions greatly weakens our energy security.

A variety of events have caused increases in the price of oil over the last decade. In 2003, strikes shut down oil production in Venezuela, increasing oil prices of other OPEC nations. A 2004 terrorist attack in Saudi Arabia caused a sudden increase in oil prices, as did militant attacks in Nigeria in 2003, 2007 and 2008.

With the current political unrest brought by the Arab Spring, our oil supply is constantly threatened by hostile nations, and circumstances beyond our control. Oil is an integral part of the U.S. economy. 40% of the nation's total energy requirements are met by oil, including 94% of the energy used in transportation, and 41% of the energy used by the industrial sector.

Increases in the price of oil affect average American consumers as well as industry. Last week, the average price of gas in Houston ranged from \$3.57 to \$3.85, according to the U.S. Energy Information Administration's weekly retail gasoline index.

Increasing the amount of oil imported from Canada is beneficial to both our energy security and economy. Canada provides a far more stable source of oil than many of the OPEC countries, and importing Canadian oil often yields investment in U.S. infrastructure.

Additionally, Canada has been a longtime ally of the United States, and an important trading partner. In fact, the U.S. and Canada represent the world's largest two-way trading

relationship, and for every U.S. dollar spent on Canadian products, including oil, 90 cents is returned to the U.S. economy.

In addition to providing a stable and reliable energy source, the Keystone pipeline XL, which we are considering in H.R. 1938, will generate \$20 billion of private sector investment in the U.S. economy, as well as \$585 million in new taxes for states and communities along the pipeline route.

The American oil and gas industry are inextricably linked to our economy, and we must take steps to ensure that the U.S. remains competitive in the energy sector. According to an independent review of the Keystone XL Pipeline Project and its potential economic impact, during the construction period the pipeline will stimulate \$20 billion in new spending for the U.S. economy, spur the creation of 118,000 jobs and generate more than \$585 million in state and local taxes for the states along the pipeline route. When Keystone XL is operational, the states along the pipeline route are expected to receive an additional \$5.2 billion in property taxes during the operating life of the pipeline, according to the analysis.

However, there are some aspects of the legislation that require further review. I am particularly concerned about the implications of Congress legislating to force a decision of executive authority, as well as the environmental risks that may be associated with the pipeline.

As a Representative of Houston, the nation's energy capital, I certainly understand the importance of the energy industry with regard to our economy. The energy sector creates jobs, and increased energy production is good for the economy, but I do have reservations about the precedent set by this legislation. Ordinarily, we do not require a permit for constructing oil pipelines. However, any pipeline that connects the United States and another country is subject to executive permission, conveyed through a Presidential permit. Historically, any pipeline crossing international borders has required executive permission by way of a Presidential permit. Executive Order 13337 designates the Secretary of State as able to receive applications for Presidential permits. TransCanada submitted its permit applications to the Department of State in September of 2008. Environmental impact review has been underway since January of 2009, and has included public comment periods with extensions for additional input from impacted communities. The State Department is afforded primary jurisdiction over the proposal for the pipeline and expects to make a decision by the end of the year. Forcing the State Department and President Obama to render a decision before completing a thorough review is in no one's interest. Currently several agencies have worked together to determine the feasibility of this pipeline.

The Final Environmental Impact Statement is expected to be released by the EPA in August, at which time, the Secretaries of Defense, Commerce, Transportation, Energy, and Homeland Security, along with the Attorney General, and EPA Administrator will be asked for their views.

It is imperative that we achieve energy independence; we cannot continue to rely on foreign sources of oil from regions of the world which are unstable, and in some cases, opposed to our interests. Accordingly, there is no issue more integral to our economic and national security than energy independence.

We must encourage the development of innovative new technologies that create jobs; we must focus on reducing carbon emissions, protecting consumers, and increasing production of clean and renewable energy sources to truly modernize our infrastructure.

Yet, oil and gas companies provide jobs and serve a valuable need, and must be instrumental in devising a pragmatic strategy for achieving energy independence. We need new solutions, but they must strike a balance that will support continued growth in the oil and gas industry.

However, we must also carefully examine any project that impacts the environment to prevent lasting harmful effects to the nation and the planet. Before a decision is rendered on the current Keystone pipeline XL project, it is essential the proposal be thoroughly reviewed, and all environmental impact be evaluated.

We can work together to find a solution to our energy concerns upon which we can all agree. We can take the time to educate farmers who have valid concerns. We can brief environmental groups and seek their input from the planning stages to the implementation of the Process. We must not forget that the Canadian people also have an interest in protecting their environment. Certain parts of Canada are known for their pristine landscapes and nature conservatories. We must be prepared to advance and listen to the environmental concerns raised in the United States and Canada. We must protect both our citizens and the citizens of Canada.

The pipeline considered in this legislation transports tar sands oil, a high polluting fuel that produces high rates of carbon emissions. We must consider the potential for leaks and explosions that will release harmful toxins into the environment.

I am confident that both parties can find ways to work with the energy industry, the Administration, and other stakeholders to forge a compromise that will protect the environment without an adverse impact on the industry or consumers.

Rome was not built in a day; however, it was built on the backs of hard workers. At a time when our citizens seeking employment, many are struggling to live from one check to the next, it is imperative to review opportunities presented to us that will create a significant amount of jobs. We must utilize the technology and the resources we have at hand to advance our understanding of how to effectively process and use energy. We must acknowledge that we need energy. Our need for energy requires a comprehensive energy plan that will create jobs and decrease our dependence on countries that are hostile to our interests and indeed to our national security.

The oil resources currently available in Alberta, Canada are second to those available in Saudi Arabia. No one can argue that against the preference of getting oil from a stable country rather than from countries that are constantly in turmoil.

Canada has been our longest and strongest trading partner. Our countries share a common border and a common language. The sky will not fall if we build a pipeline. There is no doubt that we have all learned from the damage that can result by accidents caused by poor oversight.

I have thought about both the pros and the cons. I have carefully studied this issue. I be-

lieve that we must use the technology of today to advance the technology of the future. A lot has been made today of the recent pipeline explosion—has anyone asked why it occurred? How to prevent it from happening again?

Today, we are faced with looking at ways to decrease our dependence on oil from nations that are hostile to our interests. I support firmly advancing, if not this pipeline, then access to the oil resources in Canada. We must look at the thousands of jobs that can be created. There is .3 billion in revenue that can be generated. In the greater Houston area which has suffered so much job loss this will add thousands of jobs.

The arguments made have been balanced ones; however, when placed in context, when balanced against the need for working parents to have jobs that will feed their children during a time of economic crisis, then we must consider all options. I have long been and will continue to be a champion of the environment. Groups who have championed the environment are the very watchdogs we need to ensure its safety. At this time, our relationship with Canada merits careful and deliberative consideration.

We must consider all of the aspects of this legislation, and I offer this amendment to express the Sense of Congress that, despite how we will individually vote on H.R. 1938, we are committed to reducing our dependency on foreign oil from hostile regions, or those that oppose the interests of the United States.

I urge my colleagues to support my amendment and make very clear to the American people that we are dedicated to finding stable energy sources, reducing fuel costs, and creating jobs.

The Acting CHAIR. The question is on the amendment offered by the gentlewoman from Texas (Ms. JACKSON LEE).

The amendment was agreed to.

AMENDMENT NO. 11 OFFERED BY MR. KUCINICH

The Acting CHAIR. It is now in order to consider amendment No. 11 printed in House Report 112-181.

Mr. KUCINICH. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 7, after line 23, insert the following new subsection:

(e) MANIPULATION OF OIL MARKETS.—The President shall not issue a final order granting or denying the Presidential Permit for the Keystone XL pipeline until the Secretary of Energy, in consultation with the Federal Trade Commission, has certified that permitting the pipeline would not lead to manipulation of the United States oil market that would be detrimental to United States consumers.

The Acting CHAIR. Pursuant to House Resolution 370, the gentleman from Ohio (Mr. KUCINICH) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Ohio.

Mr. KUCINICH. Mr. Chairman, Americans are turning to the Federal Government for relief from high gas prices. However, approval of the Keystone XL pipeline will lead to exactly the opposite result; it will actually raise gas

prices—principally in the Midwest. In fact, some of the States that will suffer the worst gas price increases are the same ones that will have to bear the environmental burden of this pipeline.

This is not just my conclusion, this is the conclusion of TransCanada, the company that wants to build the Keystone XL pipeline. This is the conclusion of international energy consultant Purvin and Gertz, Inc., the company that TransCanada hired to evaluate its Keystone XL pipeline. And this is the conclusion of respected oil market economist Philip Verleger. That is why TransCanada wants to build this pipeline.

My amendment simply requires the Secretary of Energy to analyze the effect of the proposed pipeline on increased gas prices for American consumers and to determine if this pipeline is just an effort to manipulate the market for crude oil in the United States.

The proposed pipeline would carry up to 900,000 barrels per day of tar sands oil from Alberta, Canada over 2,000 miles to refineries on the U.S. gulf coast. Proponents have claimed that it would bring down oil prices.

However, TransCanada's permit application to the Canadian Government for the pipeline included documents and testimony which said Canadian oil companies could use the pipeline to increase America's fuel bill by up to \$4 billion per year by limiting the supply of Canadian crude to Midwest refineries and rerouting it to gulf coast refineries. This benefit to Canadian oil companies was used by TransCanada to argue that approval of the pipeline was in Canada's interest, but this information was conveniently hidden when TransCanada applied for the U.S. Presidential permit from the State Department.

This information comes from a report by international energy consultant Purvin and Gertz, Inc., the company that TransCanada hired to evaluate its Keystone XL pipeline.

In section 3.4.3 of their report, they concluded that there was an oversupply of crude oil in the Midwest that resulted in lower prices for Canadian crude oil and that the Keystone XL pipeline would remove this oversupply and raise crude oil prices in the market. In section 3.4.5 of their report, they recite that "Keystone has reviewed the PGI assessment and agrees with its conclusions."

Through manipulation of U.S. oil markets, the Keystone XL pipeline will increase U.S. gas prices by 10 to 20 cents per gallon across the United States, according to respected oil market economist Phillip Verleger. However, the greatest price increase—twice as much by one estimate—will occur in 15 States, including my State of Ohio, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Oklahoma, South Dakota, Tennessee, and Wisconsin. It is estimated to increase

prices by \$6.55 per barrel of crude oil in the Midwest and \$3 per barrel across the U.S.

This market manipulation will gouge American consumers, forcing them to hand over up to 3.9 billion hard-earned American dollars to foreign oil companies every year. While this boon may benefit TransCanada and Canadian oil shareholders, it will only further devastate the American people, our economy, and farmers who are already struggling financially and can't afford a gas price hike.

Americans want low gas prices. Permitting the Keystone XL pipeline will deliver the opposite by increasing prices at the pump and making Americans pay more and more for almost every commodity they purchase.

I urge my colleagues to protect Americans from being further gouged by foreign oil companies and to support my amendment.

I reserve the balance of my time.

Mr. TERRY. Mr. Chairman, I rise in opposition to the amendment.

The Acting CHAIR. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. I strongly oppose this amendment. This is a poison pill, especially the way that this amendment is worded.

Now, the reality here is when this infrastructure of the pipeline is completed to U.S. refineries that are expanding to be able to accept this additional crude from Canada, we will have a reliable supply of at least 700,000 barrels per day—not relying on the Middle East as the gentelady from Texas just spoke about, wherein the Arab Spring provided great uncertainty of which speculators took advantage.

But the reality here for the U.S. markets is that we won't have to deal with that uncertainty if we continue to take steps like the Keystone XL pipeline. Once again, a reliable resource of 700,000 to 1.3 million barrels per day will only deflate prices at the pump.

□ 1700

That's what the American citizens want. They want stability and reduced prices at the pump. It is a bogus argument to say that this pipeline is going to lead to an increase at the pump. It just doesn't make sense.

Now, what I believe is a strained conclusion of a comment made by a TransCanada employee that they can actually charge more, well, the reality is heavy crude is heavily discounted when compared to a sweet or lighter crude that is easier and less costly to refine. So there is a discount in there. But if you have a pipeline that easily transports and eliminates a lot of the costs of transporting and you have reliability, that does slightly increase the value to those buyers of that crude in Texas, Louisiana, Oklahoma and other parts of the Midwest.

So the reality is this heavy crude still will not rise to the price of a sweet crude. The reality is the reliability of

this oil coming to U.S. refineries will lower the price at the pumps, and that's what we should be doing, besides all of the jobs that will be created from this pipeline: 20,000 direct jobs created from this pipeline, energy security, an additional 100,000 to 200,000 jobs created on top of the construction.

So we need to move. We need the decision made. The data is here. They have enough time for additional comments to be able to make the decision by November 1.

I urge defeat of this amendment.

I reserve the balance of my time.

Mr. KUCINICH. How much time remains?

The Acting CHAIR (Mr. LATOURETTE). The gentleman from Ohio has 30 seconds remaining.

Mr. KUCINICH. The bottom line is the people whose jobs depend on their being right, and a company with billions of dollars at stake, all concluded that increases in price of gas will especially hit the Midwest as a result of this pipeline. These aren't just employees of TransCanada; these people are experts, legal experts who put this in an application. This is not a bogus argument.

If that is a bogus argument, to my friend, then that information should be conveyed to the Government of Canada, because TransCanada's permit application to the Canadian Government for a pipeline included documents and testimony which said that Canadian oil companies could use the pipeline to increase America's fuel bill by \$4 billion per year by limiting the supply of Canadian crude to Midwest refineries and rerouting it to gulf coast refineries.

Stand up for the American consumer.

I yield back the balance of my time.

Mr. TERRY. American workers and American consumers will be better off. They will reap the advantages of a reliable source of energy, eliminating, or at least greatly reducing, the uncertainties that cause the gas price spikes at the pump. Let's defeat this amendment.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Ohio (Mr. KUCINICH).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. KUCINICH. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Ohio will be postponed.

ANNOUNCEMENT BY THE ACTING CHAIR

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments printed in House Report 112-181 on which further proceedings were postponed, in the following order:

Amendment No. 1 by Mr. WELCH of Vermont.

Amendment No. 2 by Mr. RUSH of Illinois.

Amendment No. 3 by Ms. ESHOO of California.

Amendment No. 5 by Mr. COHEN of Tennessee.

Amendment No. 6 by Mr. MURPHY of Connecticut.

Amendment No. 7 by Mr. RUSH of Illinois.

Amendment No. 8 by Ms. HANABUSA of Hawaii.

Amendment No. 9 by Mr. JOHNSON of Georgia.

Amendment No. 11 by Mr. KUCINICH of Ohio.

The Chair will reduce to 2 minutes the minimum time for any electronic vote after the first vote in this series.

AMENDMENT NO. 1 OFFERED BY MR. WELCH

The Acting CHAIR. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from Vermont (Mr. WELCH) on which further proceedings were postponed and on which the ayes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The Acting CHAIR. A recorded vote has been demanded.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 164, noes 260, not voting 8, as follows:

[Roll No. 640]

Carter	Hinchee	T.

□ 1731

Messrs. POSEY and BISHOP of Georgia changed their vote from “aye” to “no.”

Ms. LORETTA SANCHEZ of California changed her vote from “no” to “aye.”

So the amendment was rejected.

The result of the vote was announced as above recorded.

MOMENT OF SILENCE IN REMEMBRANCE OF MEMBERS OF ARMED FORCES AND THEIR FAMILIES

The Acting CHAIR (Mr. JOHNSON of Ohio). The Chair would ask all present to rise for the purpose of a moment of silence.

The Chair asks that the Committee now observe a moment of silence in remembrance of our brave men and women in uniform who have given their lives in the service of our Nation in Iraq and in Afghanistan and their families, and of all who serve in our Armed Forces and their families.

AMENDMENT NO. 2 OFFERED BY MR. RUSH

The Acting CHAIR. Without objection, 2-minute voting will continue.

There was no objection.

The Acting CHAIR (Mr. LATOURETTE). The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from Illinois (Mr. RUSH) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The Acting CHAIR. A recorded vote has been demanded.

A recorded vote was ordered.

The Acting CHAIR. This will be a 2-minute vote.

The vote was taken by electronic device, and there were—ayes 164, noes 261, answered “present” 1, not voting 6, as follows:

ANSWERED "PRESENT"—1

Johnson (IL)

NOT VOTING—6

Bachmann
Giffords
Gutierrez
Hinche y
Lee (CA)
Pelosi

□ 1738

So the amendment was rejected.

The result of the vote was announced as above recorded.

Stated against:

Mr. JOHNSON of Ohio. Mr. Chair, on rollcall No. 641, I inadvertently voted "yes" on the Rush Amendment, when I intended to vote "no." I had just led a moment of silence from the chair, and in the excitement afterwards pressed the wrong button.

AMENDMENT NO. 3 OFFERED BY MS. ESHOO

The Acting CHAIR. The unfinished business is the demand for a recorded vote on the amendment offered by the gentlewoman from California (Ms. ESHOO) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The Acting CHAIR. A recorded vote has been demanded.

A recorded vote was ordered.

The Acting CHAIR. This will be a 2-minute vote.

The vote was taken by electronic device, and there were—ayes 163, noes 264, not voting 5, as follows:

Deutch

Giffords
Gutierrez
Hinchey
Scott, Austin

□ 1807

So the amendment was rejected.
The result of the vote was announced as above recorded.

Stated against:
Mr. AUSTIN SCOTT of Georgia. Mr. Chair, on rollcall No. 648 I was inadvertently detained. Had I been present, I would have voted "no."

PERSONAL EXPLANATION

Mr. GUTIERREZ. Mr. Chair, I was delayed for votes, due to my participation in a peaceful rally and protest against the current Administration's enforcement policies against immigrant students and the families of U.S. citizens. Had I been present for the votes I would have voted "yes" on rollcall votes 640, 641, 642, 643, 644, 645, 646, 647, and 648.

The Acting CHAIR. The question is on the committee amendment in the nature of a substitute, as amended.

The amendment was agreed to.

The Acting CHAIR. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. DOLD) having assumed the chair, Mr. LATOURETTE, Acting Chair of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill (H.R. 1938) to direct the President to expedite the consideration and approval of the construction and operation of the Keystone XL oil pipeline, and for other purposes, and, pursuant to House Resolution 370, reported the bill back to the House with an amendment adopted in the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the amendment reported from the Committee of the Whole?

If not, the question is on the committee amendment in the nature of a substitute, as amended.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT

Ms. SUTTON. Mr. Speaker, I have a motion to recommit at the desk.

The SPEAKER pro tempore. Is the gentlewoman opposed to the bill?

Ms. SUTTON. I am opposed in its current form.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Ms. Sutton moves to recommit the bill H.R. 1938 to the Committee on Energy and Commerce with instructions to report the same back to the House forthwith, with the following amendments:

Page 6, after line 24, insert the following new paragraphs:

(18) TransCanada Corporation has threatened to condemn the land of American farmers, ranchers, and homeowners along the Keystone XL pipeline route, and farmers, ranchers, and homeowners in the States of Montana, Nebraska, Oklahoma, South Dakota, Kansas, and Texas are at risk of having their property seized by a foreign corporation.

(19) In its permit application to the Canadian Government, TransCanada Corporation, the owner and operator of the Keystone XL pipeline, projected that the Keystone XL pipeline will increase oil prices in PADD 2, which includes the States of Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, Oklahoma, South Dakota, Tennessee, and Wisconsin, increasing annual revenue to Canadian oil producers by an estimated \$2,000,000,000 to \$3,900,000,000 in 2013.

Page 7, lines 14 and 20, redesignate subsections (c) and (d) as subsections (d) and (e), respectively.

Page 7, after line 13, insert the following new subsection:

(c) PROTECTING CONSUMERS FROM UNFAIR GAS PRICE INCREASES AND SEIZURE OF FARM-

LAND.—The President shall ensure that the necessary actions under subsection (a) shall include—

(1) any feasible step to prevent an increase in gasoline prices in any region of the country; and

(2) any feasible step to limit the seizure of American farmland and rangeland without consent of the landowners.

□ 1810

The SPEAKER pro tempore. The gentlewoman from Ohio is recognized for 5 minutes.

Ms. SUTTON. Mr. Speaker, I rise today to offer this amendment in response to a concern that we have all heard and which was recently raised in a letter that I received from a constituent in Cuyahoga Falls, Ohio. He wanted to know how Congress can help with rising gas prices, prices that are forcing him to spend less on taking care of his family and causing uncertainty and uneasiness. And it's with my constituent in mind that I offer this amendment today.

Mr. Speaker, today we have an opportunity to join together to pass this amendment and do something for my constituent and for the middle class families like his across the country that exist in each and every district.

At the outset, I want to be clear, this amendment, this motion, it does not kill the underlying bill. So regardless of whether you intend to vote for the legislation or against it, you will have the opportunity to do that today. This amendment simply offers us, Democrats and Republicans alike, the opportunity to speak up on behalf of our constituents loudly and clearly.

What this amendment does is makes it clear that if the underlying bill passes, we want the President to take feasible steps to prevent gas prices from rising as a result of its passage and to take feasible steps to limit the seizure of American farmland. This should be an easy amendment for colleagues on both sides of the aisle to support. A vote for the amendment means standing up for American consumers to protect them against gas increases. A vote for this amendment means you are standing up for American families to protect them from unfair seizures of their property. These are the goals that all of us in this body, the people's House, should share.

It is important that we act together to pass this amendment today because, make no mistake, at a time when gas prices are already too high, this bill in its current form will raise gas prices even higher, placing an even greater burden on American families and small businesses. We know this, Mr. Speaker, because TransCanada, the Canadian corporation that is building this pipeline, has admitted as much. TransCanada's own assessment from February of 2009 states that Keystone XL pipeline will increase the cost of a barrel of crude oil by \$6.55 per barrel in the Midwest and \$3 per barrel everywhere else.

Mr. Speaker, this is simply unacceptable. It's unacceptable because far too

many middle class families are already struggling. Without this amendment, this legislation amounts to salt in the wounds of working families, so many of whom have seen their jobs sent overseas and now they will see even more of their hard-earned dollars being sent out of the country and will have to pay more for gas to boot.

And this legislation, in its current form, also stands to harm our small business owners, putting a larger financial burden on them at a time when we have called on them to create jobs and lead the way in our recovery. It will burden our family farmers who will now have to pay more to gas up their combines and buy fertilizer.

But an increase in gas prices is not the only reason this legislation needs to be amended. From South Dakota to Texas, we have a situation where the non-U.S. energy company building this pipeline has been pushing American farmers and ranchers to give up their rights to their own property. And for those who have resisted, the company—in pursuit of billions of dollars—has been taking Americans to court to seize control of their land through eminent domain. TransCanada has been bringing these lawsuits even before they have the permits to build the pipeline.

These outrageous acts are bringing Democrats and Republicans together to speak out on behalf of property owners and to ensure that their rights come before the rights of any big corporation. That is the way it should be—us standing together to protect American consumers and property owners.

Mr. Speaker, our country needs to protect the rights of our citizens, not subject those rights to a foreign corporation. Mr. Speaker, our constituents pay high enough gas prices. They need us to stand up and do all that we can to prevent the admitted increases that will occur according to TransCanada's own study. With this amendment, we can join together to do just that. We can put the American people before politics and before corporate profits and ensure that the President takes any feasible steps to protect against gas increases and limit the taking of property through eminent domain that will result from this legislation. This final amendment will ensure these things while allowing for an immediate final vote on the bill.

I encourage my colleagues to stand together and vote "yes" on this final amendment.

Mr. Speaker, I yield back the balance of my time.

Mr. TERRY. Mr. Speaker, I rise in opposition to the motion to recommit.

The SPEAKER pro tempore. The gentleman from Nebraska is recognized for 5 minutes.

Mr. TERRY. Mr. Speaker, I urge all of my colleagues here to vote against this. This is, A, nonsensical and not even relevant here. Why? Well, maybe some of my friends on the other side of the aisle have confused a public works

project with this private infrastructure project.

Number one, private companies do not have any rights of eminent domain; they can't take people's lands. So this part about them exercising eminent domain is just not relevant here. They aren't doing this; they don't have the power.

The other part is equally as nonsensical. Listen, this is a \$13 billion stimulus infrastructure bill.

□ 1820

This is what all of us have been asking for because it creates thousands of jobs, 20,000 direct union construction jobs. Now, the Laborers International Union of North America supports this bill. International Brotherhood of Teamsters, United Association of Journeymen and Apprentices of the Plumbing and Pipefitting Industry of the United States, the AFL-CIO International Union of Operating Engineers, the Pipeline Contractors Association. These are the people. It's the labor. It's the jobs that are going to be created here, and we're standing with the American people.

Now, this other argument that we have been debating ad nauseam throughout the afternoon about bringing in 700,000 to 1.2 million barrels per day from Canada that is somehow going to raise prices at the pump. I'm sorry, I went through some economics. I don't see how adding supply, adding American jobs, making a reliable source of energy, and eliminating uncertainty is going to drive up costs. It doesn't make sense.

Let's stand with the American people. Let's create 100,000 new jobs. Let's get America working. Let's get the prices down at the pump. Vote against this motion for reconsideration, and let's vote to put people back to work.

I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Ms. SUTTON. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. Pursuant to clause 9 of rule XX, the Chair will reduce to 5 minutes the minimum time for any electronic vote on the question of passage.

The vote was taken by electronic device, and there were—ayes 181, noes 248, not voting 3, as follows:

authorities of the Small Business Administration”, approved October 10, 2006 (Public Law 109-316; 120 Stat. 1742), as most recently amended by section 2 of the Small Business Additional Temporary Extension Act of 2011 (Public Law 112-17; 125 Stat. 221), is amended by striking “July 31, 2011” each place it appears and inserting “December 31, 2011”.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall take effect on July 30, 2011.

SEC. 3. REPEALS AND OTHER TERMINATIONS.

(a) GENERAL PROVISIONS.—
(1) EFFECTIVE DATE.—A repeal or other termination of a provision of law made by this section shall take effect on the date of enactment of this Act.

(2) RULE.—Nothing in this section shall affect any grant or assistance provided, contract or cooperative agreement entered into, or loan made or guaranteed before the date of enactment of this Act under a provision of law repealed or otherwise terminated by this section and any such grant, assistance, contract, cooperative agreement, or loan shall be subject to the applicable repealed or otherwise terminated provision, as in effect on the day before the date of enactment of this Act.

(3) APPLICABILITY OF TEMPORARY EXTENSIONS.—A repeal or other termination of a provision of law made by this section shall have effect notwithstanding any temporary extension of programs, authority, or provisions under the Act entitled “An Act to extend temporarily certain authorities of the Small Business Administration”, approved October 10, 2006 (Public Law 109-316; 120 Stat. 1742).

(b) POLLUTION CONTROL LOANS.—Paragraph (12) of section 7(a) of the Small Business Act (15 U.S.C. 636(a)) is amended—

(1) by striking “(A) The Administration” and inserting “The Administration”; and
(2) by striking “research and development” and all that follows and inserting “research and development.”.

(c) SMALL BUSINESS INSTITUTE.—Subparagraph (E) of section 8(b)(1) of the Small Business Act (15 U.S.C. 637(b)(1)) is repealed.

(d) DRUG-FREE WORKPLACE GRANTS.—Paragraph (3) of section 21(c) of the Small Business Act (15 U.S.C. 648(c)) is amended—

(1) in subparagraph (R) by adding “and” at the end;
(2) in subparagraph (S) by striking “; and” and inserting a period; and
(3) by striking subparagraph (T).

(e) CENTRAL EUROPEAN SMALL BUSINESS ENTERPRISE DEVELOPMENT COMMISSION.—Section 25 of the Small Business Act (15 U.S.C. 652) is repealed.

(f) PAUL D. COVERDELL DRUG-FREE WORKPLACE PROGRAM.—Section 27 of the Small Business Act (15 U.S.C. 654) is repealed.

(g) PILOT TECHNOLOGY ACCESS PROGRAM.—Section 28 of the Small Business Act (15 U.S.C. 655) is repealed.

(h) NATIONAL VETERANS BUSINESS DEVELOPMENT CORPORATION.—

(1) IN GENERAL.—Section 33 of the Small Business Act (15 U.S.C. 657c) is repealed.

(2) CORPORATION.—Beginning on the date of enactment of this Act, the National Veterans Business Development Corporation and any successor thereto may not represent that the corporation is federally chartered or in any other manner authorized by the Federal Government.

(i) LEASE GUARANTEES AND POLLUTION CONTROL.—Part A of title IV of the Small Business Investment Act of 1958 (15 U.S.C. 692 et seq.) is repealed.

(j) ALTERNATIVE LOSS RESERVE.—Paragraph (7) of section 508(c) of the Small Business Investment Act of 1958 (15 U.S.C. 697e(c)) is repealed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining.

□ 1845

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will postpone further proceedings today on motions to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote incurs objection under clause 6 of rule XX.

Record votes on postponed questions will be taken later.

SMALL BUSINESS PROGRAM EXTENSION AND REFORM ACT OF 2011

Mr. HANNA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2608) to provide for an additional temporary extension of programs under the Small Business Act and the Small Business Investment Act of 1958, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2608

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Small Business Program Extension and Reform Act of 2011”.

SEC. 2. ADDITIONAL TEMPORARY EXTENSION OF AUTHORIZATION OF PROGRAMS UNDER THE SMALL BUSINESS ACT AND THE SMALL BUSINESS INVESTMENT ACT OF 1958.

(a) IN GENERAL.—Section 1 of the Act entitled “An Act to extend temporarily certain

(K) SMALL BUSINESS TELECOMMUTING PILOT PROGRAM.—Subsection (d) of section 1203 of the Energy Independence and Security Act of 2007 (15 U.S.C. 657h) is repealed.

(1) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) SMALL BUSINESS INVESTMENT ACT OF 1958.—Section 411(i) of the Small Business Investment Act of 1958 (15 U.S.C. 694b(i)) is amended to read as follows:

“(i) Without limiting the authority conferred upon the Administrator and the Administration by section 201 of this Act, the Administrator and the Administration shall have, in the performance of and with respect to the functions, powers, and duties conferred by this part, all the authority and be subject to the same conditions prescribed in section 5(b) of the Small Business Act with respect to loans, including the authority to execute subleases, assignments of lease and new leases with any person, firm, organization, or other entity, in order to aid in the liquidation of obligations of the Administration hereunder.”

(2) TITLE 10.—Section 1142(b)(13) of title 10, United States Code, is amended by striking “and the National Veterans Business Development Corporation”.

(3) TITLE 38.—Subsection (h) of section 3452 of title 38, United States Code, is amended by striking “any of the” and all that follows and inserting “any small business development center described in section 21 of the Small Business Act (15 U.S.C. 648), insofar as such center offers, sponsors, or cosponsors an entrepreneurship course, as that term is defined in section 3675(c)(2).”

(4) VETERANS ENTREPRENEURSHIP AND SMALL BUSINESS DEVELOPMENT ACT OF 1999.—Section 203(c)(5) of the Veterans Entrepreneurship and Small Business Development Act of 1999 (15 U.S.C. 657b note) is amended by striking “In cooperation with the National Veterans Business Development Corporation, develop” and inserting “Develop”.
SEC. 4. TERMINATION OF EMERGING LEADERS PROGRAM.

Notwithstanding any other provision of law, the Administrator of the Small Business Administration may not carry out or otherwise support the program referred to as “Emerging Leaders” in the document of the Small Business Administration titled “FY 2012 Congressional Budget Justification and FY 2010 Annual Performance Report” (or any predecessor or successor document) and may not carry out or otherwise support any successor to that program with similar goals.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New York (Mr. HANNA) and the gentlewoman from New York (Ms. VELÁZQUEZ) each will control 20 minutes.

The Chair recognizes the gentleman from New York.

GENERAL LEAVE

Mr. HANNA. Mr. Speaker, I ask unanimous consent that all Members shall have 5 consecutive days to revise and extend their remarks and include extraneous materials on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. HANNA. I yield myself such time as I may consume.

Mr. Speaker, there are a few components to the legislation we have before us.

First, the bill provides for a straightforward extension of certain SBA pro-

grams through December 31, 2011. This is a necessary measure since the current extension, which the House passed in May, expires at the end of this month. As we continue to do work with our Democratic colleagues and with our colleagues in the other body towards a full and complete reauthorization of the SBA and its programs, this extension will ensure that these programs are still available to provide assistance to entrepreneurs who need to create jobs.

Secondly, the bill before us terminates several duplicative and outdated programs that are either used very infrequently or not at all. It has been said that, once a program is initiated, it is almost impossible to eliminate. Today, we will prove that notion wrong. The program eliminations contained in this bill represent a good first step toward cleaning up the SBA's program portfolio, thereby refocusing the agency's energy on their core mission of facilitating small business lending, offering entrepreneurial advice to small business owners, and ensuring that they receive their fair share of Federal contracts.

For example, one of the programs selected for termination is the Central European Enterprise Development Program. This initiative has not been funded since 1995, and one of the countries involved, Czechoslovakia, no longer exists. For an even more striking example, the Pollution Control Bond Guarantee program, initiated in 1976 to provide SBA-backed bonds for the purchase of pollution and control equipment to retrofit existing factories, has not offered a single bond guarantee since the early eighties.

Simply having these programs on the books at the SBA detracts manpower and resources away from the SBA's core programs, and it is time to get them out of the way. Not only does this bill clean up the SBA; it also saves money.

□ 1850

The bill eliminates two drug-free workplace programs. These programs were allocated \$2 million for fiscal year 2011. While not a huge sum of money when considering the overall fiscal budget, each and every penny we save is a penny we don't have to borrow.

For additional cost savings, the legislation also prohibits the SBA from using any of its discretionary funding on its Emerging Leaders Program. While the program started in fiscal year 2009 without any congressional approval or authorization of appropriations, the SBA has requested \$3 million for this program for 2012. The program is duplicative of existing entrepreneurial development programs and does not have a good matrix for evaluating the program's success.

The SBA ought to be focusing on well-evaluated, congressionally authorized programs that have been fully vetted and supported by Members of Congress.

I would like to thank the gentlelady from New York, our committee's ranking member, Ms. VELÁZQUEZ, for her efforts to craft this legislation. It is a breath of fresh air to work in a truly bipartisan manner on important issues facing our Nation, and I appreciate her leadership on this issue.

With that, I urge my colleagues to support H.R. 2608 as amended.

I reserve the balance of my time.

Ms. VELÁZQUEZ. I yield myself such time as I may consume.

Small businesses who employ more than half of all private sector employees remain absolutely critical to the U.S. economy. With the unemployment rate at 9.2 percent, we need them more than ever to create new jobs. Central to these efforts are the tools and resources of the Small Business Administration which enable entrepreneurs to secure low-cost capital, fairer contracts, and technical assistance.

However, over time, I feel the agency's programs have become redundant and unnecessary. Many have not been funded in decades, while others are simply antiquated policy remnants from a bygone era.

It is a disservice to both small businesses and taxpayers to keep these obsolete initiatives on the books. By cleaning up the statute, as this legislation does, we can be assured that efforts to assist small businesses both now and in the future will be both efficient and up to date.

Importantly, many of these cuts were at the behest of our colleagues in the Senate. Given this, it is my hope that the Senate takes up this legislation and passes it expeditiously.

Chairman GRAVES is also to be commended for his comity and bipartisan approach to vetting these charges. Doing so has produced a bill that does not adversely affect small businesses.

Similarly, a new but equally concerning trend has been the growth of unauthorized programs. The costs of this program have grown dramatically to equal more than \$50 million and constitutes nearly 10 percent of the SBA's noncredit programs budget. By passing the legislation before us, Congress can take a small but meaningful step that will begin to close this loophole.

The reforms in this bill come against a backdrop of extending certain authorities for the SBA itself. However, whether or not this legislation becomes law has no bearing on whether the agency can serve small businesses. Given the passage of the full-year continuing appropriations bill and a prior SBA extension passed 2 months ago, the agency will remain fully operational irrespective of the passage of this bill.

Ensuring that small firms have continued access to a strong and stable SBA is more important than ever. The agency's resources enable would-be entrepreneurs to start up while helping existing ventures expand. By doing so, we will allow small business owners to do what they do best and create the

jobs we need to move the economy forward.

I urge my colleagues to support this legislation.

I yield back the balance of my time.

Mr. HANNA. Mr. Speaker, in closing, let me state that small businesses can and will lead our economic recovery. It's time that those of us in Congress provide them with the certainty they need to create jobs and grow our economy. The legislation we have before us today gives small firms the confidence to know that the SBA programs they rely on will be there for them when they need them. It also shows them that this House is serious about cutting spending, lowering debt, and restoring confidence to our entrepreneurs.

I look forward to continuing to work with the chairman and the ranking member and all our colleagues on the Small Business Committee to enact policies that benefit American entrepreneurs.

I urge my colleagues to support this good bill.

I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. HANNA) that the House suspend the rules and pass the bill, H.R. 2608, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

IMPACT OF INSURED DEPOSITORY INSTITUTION FAILURES

Mr. WESTMORELAND. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2056) to instruct the Inspector General of the Federal Deposit Insurance Corporation to study the impact of insured depository institution failures, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2056

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. INSPECTOR GENERAL STUDY.

(a) STUDY.—The Inspector General of the Federal Deposit Insurance Corporation (FDIC) shall conduct a comprehensive study on the impact of the failure of insured depository institutions.

(b) DEFINITIONS.—For purposes of this Act—

(1) the term “insured depository institution” has the meaning given such term in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c));

(2) the term “private equity company” has the meaning given the terms “hedge fund” and “private equity fund” in section 13(h)(2) of the Bank Holding Company Act of 1956 (12 U.S.C. 1851(h)(2)); and

(3) the term “paper-loss” means any write down on a performing asset held by an insured depository institution that causes such institution to raise more capital in order to cover the write down.

(c) MATTERS TO BE STUDIED.—In conducting the study under this section, the Inspector General shall address the following:

(1) LOSS-SHARING AGREEMENTS.—The effect of loss-sharing agreements (LSAs), including—

(A) the impact of loss-sharing on the insured depository institutions that survive and the borrowers of insured depository institutions that fail, including—

(i) the impact on the rate of loan modifications and adjustments;

(ii) whether more types of loans (such as commercial (including land development and 1- to 4-family residential and commercial construction loans), residential, or small business loans) could be modified with fewer LSAs, or if LSAs could be phased out altogether;

(iii) the FDIC's policies and procedures for monitoring LSAs, including those designed to ensure institutions are not imprudently selling assets at a depressed value;

(iv) the impact on the availability of credit; and

(v) the impact on loans with participation agreements outstanding with other insured depository institutions;

(B) the FDIC's policies and procedures for terminating LSAs and mitigating the risk of acquiring institutions having substantial assets remaining in their portfolio when the LSAs are due to expire;

(C) the extent to which LSAs provide incentives for loan modifications and other means of increasing the probability of commercial assets being considered “performing”;

(D) the nature and extent of differences for modifying residential assets and working out commercial real estate under LSAs; and

(E) methods of ensuring the orderly end of expiring LSAs to prevent any adverse impact on borrowing, real estate industry and the Depositors Insurance Fund.

(2) PAPER LOSSES.—The significance of paper losses, including—

(A) the number of insured depository institutions that have been placed into receivership or conservatorship due to paper losses;

(B) the impact on paper losses of raising more capital;

(C) the effect of changes in the application of the fair value of real estate accounting rules and other accounting standards;

(D) whether field examiners are using proper appraisal procedures with respect to paper losses; and

(E) methods of stopping the vicious downward spiral of losses and write downs.

(3) APPRAISALS.—

(A) The number of insured depository institutions placed into receivership or conservatorship due to asset write-downs and the policies and procedures for evaluating the adequacy of an insured depository institution's allowance for loan and lease losses.

(B) The policies and procedures examiners use for evaluating the appraised values of property securing real estate loans and the extent to which those policies and procedures are followed.

(C) FDIC field examiner implementation of guidance issued December 2, 2010, titled “Agencies Issue Final Appraisal and Evaluation Guidelines”.

(4) CAPITAL.—

(A) The factors that examiners use to assess the adequacy of capital at insured depository institutions, including the extent to which the quality and risk profile of the insured institution's loan portfolio is considered in the examiners' assessment.

(B) The number of applications received by the FDIC from private capital investors to acquire insured depository institutions in receivership, the factors used by the FDIC in evaluating the applications, and the number

of applications that have been approved or not approved, including the reasons pertaining thereto.

(C) The policies and procedures associated with the evaluation of potential private investments in insured depository institutions and the extent to which those policies and procedures are followed.

(5) WORKOUTS.—The success of FDIC field examiners in implementing FDIC guidelines titled “Policy Statement on Prudent Commercial Real Estate Loan Workouts” (October 31, 2009) regarding workouts of commercial real estate, including—

(A) whether field examiners are using the correct appraisals; and

(B) whether there is any difference in implementation between residential workouts and commercial (including land development and 1- to 4-family residential and commercial construction loans) workouts.

(6) ORDERS.—The application and impact of consent orders and cease and desist orders, including—

(A) whether such orders have been applied uniformly and fairly across all insured depository institutions;

(B) the reasons for failing to apply such orders uniformly and fairly when such failure occurs;

(C) the impact of such orders on the ability of insured depository institutions to raise capital;

(D) the impact of such orders on the ability of insured depository institutions to extend or modify credit to existing and new borrowers; and

(E) whether individual insured depository institutions have improved enough to have such orders removed.

(7) FDIC POLICY.—The application and impact of FDIC policies, including—

(A) the impact of FDIC policies on the investment in insured depository institutions, especially in States where more than 10 such institutions have failed since 2008;

(B) whether the FDIC fairly and consistently applies capital standards when an insured depository institution is successful in raising private capital; and

(C) whether the FDIC steers potential investors away from insured depository institutions that may be in danger of being placed in receivership or conservatorship.

(8) PRIVATE EQUITY COMPANIES.—The FDIC's handling of potential investment from private equity companies in insured depository institutions, including—

(A) the number of insured depository institutions that have been approved to receive private equity investment by the FDIC;

(B) the number of insured depository institutions that have been rejected from receiving private equity investment by the FDIC; and

(C) the reasons for rejection of private equity investment when such rejection occurs.

(d) REPORT.—Not later than one year after the date of the enactment of this Act, the Inspector General shall submit to Congress a report—

(1) on the results of the study conducted pursuant to this section; and

(2) any recommendations based on such study.

(e) COORDINATION BETWEEN FDIC IG, TREASURY IG, AND FEDERAL RESERVE IG.—In carrying out this section, the Inspector General of the FDIC shall consult with the Inspectors General of the Treasury and of the Federal Reserve System, and such Inspectors General shall provide any documents or other material requested by the Inspector General of the FDIC in order to carry out this section.

SEC. 2. FUNDING.

The FDIC shall make available from the portion of the FDIC budget allocated to management expenses, sums allowing the FDIC Inspector General to complete this study.

SEC. 3. GAO STUDY.

(a) **STUDY.**—The Comptroller General of the United States shall carry out a study on the following:

(1) The causes of high levels of bank failures in states with 10 or more failures since 2008.

(2) The procyclical impact of fair value accounting standards.

(3) The causes and potential solutions for the “vicious cycle” of loan write downs, raising capital, and failures.

(4) An analysis of the community impact of bank failures.

(5) The feasibility and overall impact of loss share agreements.

(b) **REPORT.**—Not later than the end of the 1-year period beginning on the date of the enactment of this Act, the Comptroller General shall issue a report to the Congress on the study carried out pursuant to subsection (a).

The **SPEAKER** pro tempore. Pursuant to the rule, the gentleman from Georgia (Mr. **WESTMORELAND**) and the gentleman from Georgia (Mr. **DAVID SCOTT**) each will control 20 minutes.

The Chair recognizes the gentleman from Georgia (Mr. **WESTMORELAND**).

GENERAL LEAVE

Mr. **WESTMORELAND**. I ask unanimous consent that all Members have 5 legislative days within which to revise and extend their remarks and to add extraneous material on this bill.

The **SPEAKER** pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. **WESTMORELAND**. I yield myself such time as I may consume.

Mr. Speaker, the bill before the House today is one that will provide much needed transparency to the FDIC process of examining and resolving banks.

First, I would like to thank Chairman **BACHUS** and Subcommittee Chairman **CAPITO**, Ranking Member **FRANK** and Subcommittee Ranking Member **MALONEY** for their support of H.R. 2056.

I'd also like to thank my lead cosponsor, the gentleman from Georgia, my friend, Representative **SCOTT**, for his tireless support on this issue.

As I have said many times before, there is no greater threat to our communities than bank failures, especially in my State of Georgia.

Mr. Speaker, I want to take a minute to highlight bank failures by the numbers in my State of Georgia: 319 is the total number of failures in the U.S. since 2008; 67 of those, that's the total number of Georgia bank failures since 2008; 16, this is the number of banks in Georgia that failed in 2011; 11 banks have failed in my congressional district.

Mr. Speaker, I would like to get you to look at this chart, and you can see by this chart that these communities, these 10 States, have had the largest closing number. Their unemployment rate is some of the highest, the defi-

ciency rates. And if you look at the percentages, if you look at Arizona, 30 percent of their banks have closed; Nevada, 41 percent of their banks have closed; and in my State of Georgia, 26 percent have closed. Sadly, there are some communities in my district that no longer are even served by a community bank.

And I have often referenced these, the 10 over 10, and these are the 10 States that have had more than 10 bank failures since 2008. As you can see these unlucky States are Georgia, Florida, Illinois, California, Minnesota, Washington, Michigan, Nevada, Missouri, and Arizona. In fact, six of these 10 States have had more than 10 percent of their banks fail in the past 3 years.

These States also share other commonalities. As I mentioned, each have a higher than average unemployment rate and serious delinquency rates as well as a high number of bank failures.

□ 1900

While I hope no more States are added to this list, many States are not far off. Colorado has had nine failures, including one on Friday. Kansas and Oregon have had seven failures.

Without a doubt, the FDIC is a wealth of information about the health of banks, if you have the time and resources to go through it. However, too much information without proper context can be detrimental. H.R. 2056 is designed to cut through all the information to analyze the underlying fundamentals that continue to cause bank failures across this country.

The bill directs the FDIC Inspector General, in consultation with the Treasury and Federal Reserve IGs, to study FDIC policies and practices with regard to loss share agreements, the fair application of regulatory capital standards, appraisals, FDIC procedures for loan modifications, and the FDIC's handling of consent orders and cease and desist orders.

Further, the GAO also has a study in the bill to pursue those questions the FDIC Inspector General is unable to fully explore, such as the causes of the high number of bank failures, procyclical impact of fair value accounting, analysis of the impact of failures on the community, and the overall effectiveness of loss share agreements for resolving banks.

I have welcomed the input from the FDIC IG as well as witnesses from the FDIC, the Office of the Comptroller of the Currency, the Independent Community Bankers Association, and the witnesses at the hearing 3 weeks ago. Overwhelmingly, these witnesses supported H.R. 2056. Likewise, the Financial Services Committee passed H.R. 2056 out of committee last week by voice vote.

Mr. Speaker, it is clear that Congress needs more information about the underlying causes of these bank failures.

I reserve the balance of my time.

Mr. **DAVID SCOTT** of Georgia. Mr. Speaker, I yield myself such time as I may consume.

As my distinguished colleague from Georgia, Congressman **WESTMORELAND**, pointed out, whom I am very pleased to serve as a cosponsor with on this bill, he very aptly described the very dire situation facing our State of Georgia.

Mr. Speaker, as I stand here, Georgia, since the 2008 financial difficulties started in this country, 67 banks have failed, which makes us the leader in the Nation in this area in our State. We have some very capable business people in Georgia and in Atlanta, very sterling leaders of the financial services industry worldwide based out of Atlanta. We're grappling with the recovery.

But there is no more important sector of our economy than our banking system. It is, indeed, the heart of our economic system. It pumps out the credit. It pumps out the capital that makes our economy go around. So it is very important that we really deal with an area and with information and with an effective study so that we can grasp the full meaning of what caused this to happen, what were the characteristics in Atlanta or in Georgia that caused this disproportionate number of bank failures. And, indeed, we could learn so much so that we can prevent this type of a collapse in our bank financial system from happening again and make a very valuable contribution.

So with that, Mr. Speaker, I want to take just a moment to explain what we are doing with this important bill, H.R. 2056, that we feel will make a very valuable contribution to preventing these kinds of collapses from happening again to the detriment of our economic system.

The purpose of this bill is, one, to determine the extent to which certain FDIC practices precipitated the bank failures. We need to find out if there's something that the FDIC was doing, that regulators were doing that we need to improve upon.

Two, we need to determine whether various FDIC policies and practices for resolving failed banks are appropriate. That's very important to know. If what we're doing is not appropriate, we can fix that.

And, three, we need to determine the extent to which the FDIC employees, themselves, in the field, the investigators, the bank examiners take actions that were consistent with FDIC policies and procedures that we developed here in Washington. In other words, Mr. Speaker, we need to take the time to look at this peculiar situation of this rash of bank failures in one basic geographic area of this country to see what really went wrong and if there were some things that we were doing here in Washington that we need to correct.

And, finally, we need to determine the extent to which the FDIC policies and procedures are applied consistently across all banks. This information will be very important.

The bill requires that the FDIC Inspector General, within 1 year of enactment of this bill, will conduct a study

on the impact of the failure of banks and report the results and any associated recommendations back to Congress.

This study would address, one, the effect of the FDIC's use of loss sharing agreements on relevant stakeholders, including banks that survive and borrowers of the failed IDI. Two, the significance that paper losses, including the extent to which they trigger IDI receiverships and the impact they have on raising more capital. Three, the success of field examiners in implementing the FDIC policies and procedures on commercial real estate workouts.

One of the things we find in our State of Georgia, one of the common characteristics that sort of held these banks separate was the overleverage, we shall say, of the portfolios in real estate and the housing bubble burst on us.

Four, the application and impact of consent orders and cease and desist orders, including whether such orders are used consistently across all types of banks, and also the application and impact of FDIC policies, particularly as they relate to a bank's ability to attract private capital. And then the FDIC's handling of potential investments by private equity companies in banks.

In H.R. 2056, as introduced, we received great bipartisan support and reception at a hearing that we recently had that my colleague from Georgia (Mr. WESTMORELAND) mentioned and the FDIC and the OCC are working with us on this bill. And the OCC has suggested that the FDIC Inspector General should consult with the OCC Inspectors General with respect to studied topics that pertain to banks that the OCC, which is the Office of the Comptroller of the Currency, directly supervisors and, of course, that same logic would argue for consultation with the Fed.

So subsequently, an amendment was adopted by voice vote in the full committee in the markup, requiring that the FDIC Inspector General consult with the Inspectors General of the Treasury, within which the OIG is housed, and the Fed. This amendment was passed by voice vote with strong bipartisan support to supplement the study factors regarding the loss sharing agreements. It added new study factors regarding appraisals and capital. It required the FDIC's Inspectors General to coordinate with the Treasury and the Fed's internal Inspectors General. And four, it added a new separate GAO study on bank failures to the report due 1 year after enactment. And I might add that both the FDIC as well as the OCC are supportive of this measure.

In conclusion, Mr. Speaker, this bill is very important for us not only in Georgia but across this country where we've had this rash of bank failures. It's important for us to learn and to know about the causes of the bank failures in the States that have been hard-

est hit, especially the issue of application and effect of consent orders and cease and desist orders, particularly where these orders have been enforced uniformly and fairly across all banks. This has been a concern from our banking community in Georgia.

□ 1910

While I know this bill alone will not solve our current banking crisis, I am confident it will provide Congress and regulators with valuable information that may prevent failures in the future and provide us with ways that the FDIC, that the OCC and the Fed, our banking regulators and examiners, can help our banks avoid bank failures.

If we're ever going to climb out of this terrible economic malaise that we're in and spark growth in our communities, it is the banks that must be stable. It is the banks that must be well-capitalized and able to lend to consumers and small businesses. And in particular, our small and community banks are the ones that will lead the way to our economic recovery, but only if they're able to work, hand-in-hand, with our Federal regulators and examiners to remain viable.

This bill is a small step, but it is a big step in the right direction in that respect, and I encourage all of my colleagues to support it.

I yield back the balance of my time. Mr. WESTMORELAND. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, our hope is that this will shed some light on these bank failures. We hope it will also shed light on why so many business people have come to all of us in this body to find out why they cannot get loans to promote job growth, to help expand their businesses. We need those answers.

We also need to make sure that this study will shed some light on what effects TARP and Loss-Share Agreements have had on our community banks. We also hope that it will shed light on why immediate write-downs are being demanded on our community banks when the loans are performing. People are paying their interest. They're meeting their renewal requirements, yet regulators are insisting that these loans be marked down. This has caused what I call a paper loss for a lot of these bankers that are then being made to ask to raise capital when they're under cease and desist orders.

So all of this does not work together. And, in fact, a lot of things that we have done in this previous Congress has caused the snowball to roll faster downhill.

I hope they'll look at the market to see what has happened and what is the effect of banks that have gotten TARP money and have come in and "fire sold" properties that have caused real property values to go down, not just for the banks, but for the people that have bought in there.

We need to find out why Loss-Share Agreements promote not modifying

loans, why they promote getting rid of some of these bad loans, why they promote a bank to be able to get rid of property when the government guarantees them 95 percent of their loss. What effect has that had on our community banks that didn't get the TARP, that have not been allowed to be in any of these Loss-Share Agreements?

These are answers that we're looking for.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Georgia (Mr. WESTMORELAND) that the House suspend the rules and pass the bill, H.R. 2056, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. WESTMORELAND. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

DEPARTMENT OF THE INTERIOR,
ENVIRONMENT, AND RELATED
AGENCIES APPROPRIATIONS
ACT, 2012

GENERAL LEAVE

Mr. SIMPSON. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks and include extraneous material on the further consideration of H.R. 2584, and that I may include tabular material on the same.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Idaho?

There was no objection.

The SPEAKER pro tempore (Mr. WESTMORELAND). Pursuant to House Resolution 363 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the state of the Union for the further consideration of the bill, H.R. 2584.

□ 1915

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H.R. 2584) making appropriations for the Department of the Interior, environment, and related agencies for the fiscal year ending September 30, 2012, and for other purposes, with Mr. DOLD (Acting Chair) in the chair.

The Clerk read the title of the bill.

The Acting CHAIR. When the Committee of the Whole rose on Monday,

July 25, 2011, the bill had been read through page 3, line 2.

The Clerk will read.

The Clerk read as follows:

In addition, \$32,500,000 is for the processing of applications for permit to drill and related use authorizations, to remain available until expended, to be reduced by amounts collected by the Bureau and credited to this appropriation that shall be derived from \$6,500 per new application for permit to drill that the Bureau shall collect upon submission of each new application, and in addition, \$39,696,000 is for Mining Law Administration program operations, including the cost of administering the mining claim fee program; to remain available until expended, to be reduced by amounts collected by the Bureau and credited to this appropriation from mining claim maintenance fees and location fees that are hereby authorized for fiscal year 2012 so as to result in a final appropriation estimated at not more than \$918,227,000, and \$2,000,000, to remain available until expended, from communication site rental fees established by the Bureau for the cost of administering communication site activities.

AMENDMENT OFFERED BY MR. CLARKE OF MICHIGAN

Mr. CLARKE of Michigan. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 3, line 3, after the dollar amount, insert “(reduced by \$10,000,000)”.

Page 65, line 19, after the dollar amount, insert “(increased by \$10,000,000)”.

Page 65, line 21, after the dollar amount, insert “(increased by \$10,000,000)”.

Mr. CLARKE of Michigan (during the reading). Mr. Chair, I ask that the reading be suspended.

The Acting CHAIR. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Acting CHAIR. The gentleman from Michigan is recognized for 5 minutes.

(Mr. CLARKE of Michigan asked and was given permission to revise and extend his remarks.)

Mr. CLARKE of Michigan. Mr. Chair, this amendment would move \$10 million from the Bureau of Land Management to the Environmental Protection Agency’s geographic programs under the Environmental Programs and Management account.

Here’s the bottom line, what this \$10 million is all about. It’s helping to save jobs connected to the \$7 billion Great Lakes fishing industry. This industry, and the jobs connected to it, are at stake, are at risk because of the Asian carp. So it’s my intention that the Environmental Protection Agency designate this additional \$10 million to the Great Lakes Restoration Initiative to stop the Asian carp from migrating into the Great Lakes.

Unfortunately, just last week, and this is the urgency of this situation, why I’m offering this amendment. Just last week, the Army Corps of Engineers found Asian carp DNA in Lake Michigan. This is deeply disturbing. We have to do everything in our power to stop the Asian carp from migrating to the

Great Lakes basin because of the \$7 billion industry that’s at stake.

These carp, they come and they eat all the food up in the ecosystem, and that leaves very little for the native fish. And the native fish is what people fish for in the Great Lakes.

So, again, I urge this body, for the sake of preserving the Great Lakes fishing industry, to allow this amendment. And again, it’s my intention that the additional \$10 million would go toward the Great Lakes Restoration Initiative, which right now is underfunded by \$100 million. So it’ll be some measurable improvement, and to have that money focus on preserving our Great Lakes fishing jobs by stopping the Asian carp.

I yield the balance of my time.

Mr. GEORGE MILLER of California. Mr. Chairman, I move to strike the last word.

The Acting CHAIR. The gentleman from California is recognized for 5 minutes.

Mr. GEORGE MILLER of California. Mr. Chairman, I rise in support of this amendment and strong opposition to this bill. The Interior appropriations bill that is before us today is a radical assault on public health, on clean air and clean water, and on our environment.

This bill wouldn’t create a single job. Instead of creating jobs and protecting the public health, this bill gives polluters and other special interests license to do just about anything that they want. This might be the single worst bill in this House for our public health and the environment since the days of Newt Gingrich and Tom DeLay.

□ 1920

In this bill, the House Republicans are undermining the Clean Water Act, creating loopholes in the Clean Air Act, and gutting the Endangered Species Act.

But that’s not all. This legislation makes it harder for our States and cities to improve their crumbling water and wastewater systems through the State clean water and drinking water revolving funds.

The legislation blocks the Environmental Protection Agency from protecting us from mercury, soot, and power plant pollution. Under this bill, the EPA will hardly be allowed to do anything about dangerous pollution that threatens our public health.

The legislation blocks the new vehicle standards that will save consumers at the gas pump and would reduce the amount of oil that we import as a Nation. If that wasn’t bad enough, the bill decides to prohibit the State of California from setting its own clean vehicle standards.

The legislation also includes an “extinction rider,” one of the most aggressive threats to the Endangered Species Act in my career here that would freeze all of the efforts to protect imperiled species across the country.

One of the most offensive aspects of this bill, out of a very long list, is the

80 percent cut to the Land and Water Conservation Fund. For nearly 50 years, the Land and Water Conservation Fund has taken oil and gas drilling fields, a finite resource, to invest them in a continuing protection of our resources on land, not taxpayer dollars—these are taken from the oil companies that drill in the offshore—and they use that money to preserve the national parks, the wildlife habitat, trails, and working ranches and forests.

With this cut, Republicans are breaking the decades-long promise that has been a bipartisan consensus across this country, the promise that we will use these oil and gas royalties to protect important American places for future generations.

Outside of the Republican Conference in the House of Representatives, I don’t know anyone in this country who wants to end our commitment to use these fees on Big Oil to protect our parks and recreation areas. These are our public lands. These are the lands that America’s families use every summer, use at different seasons and different parts of the country all of the time. These are the public spaces that make us the envy of the rest of the world. These are the public systems that countries from all over the world send people to understand how did we save them, how do we protect them, how do we manage them. We set the standard for the world. As it was said earlier, one of America’s best ideas. But now all of that is threatened under the cut to these funds for the Land and Water Conservation Fund.

Mr. Chairman, these are a few of my reasons; but there are many, many more why I would strongly oppose this legislation and the very bad, bad ideas that it contains. I would hope that this Congress would reject this legislation out of hand.

I yield back the balance of my time.

Mr. SIMPSON. I move to strike the last word in opposition to the amendment.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. Mr. Chairman, I appreciate what the gentleman is trying to do. This amendment would limit the BLM from spending \$10 million in offsetting collections for oil and gas fees and put the funding into the EPA’s geographic programs. I understand what he’s trying to do, and I’m sympathetic with what he’s trying to do.

I’m not necessarily opposed to increasing this program, and we recognize the challenge of the Asian carp in the Great Lakes. We have many invasive species in Idaho, so I certainly understand where the gentleman is coming from and the challenges that they face.

With that said, we worked hard to balance funding in this bill. We already funded invasive species in the Great Lakes at \$43 million, and the total for Great Lakes geographic programs is \$250 million. It makes little sense to

take funds from offsetting collections for the cost to administer the oil and gas programs. In other words, these programs are paid for by the industry, not by the taxpayers.

So while I don't necessarily oppose what the gentleman is trying to do, it's the offset that the gentleman has created to put the \$10 million in there. We've tried to create a balance between these different programs with limited funding. I think we've done a good job in the Great Lakes, the best we could in this bill; and I would oppose the amendment and ask my Members to oppose the amendment.

Mr. CLARKE of Michigan. Will the gentleman yield?

Mr. SIMPSON. I yield to the gentleman from Michigan.

Mr. CLARKE of Michigan. Thank you, sir. I appreciate it.

I do have a newspaper article that does state that the oil and gas industry does hold around 7,200 drilling permits that haven't been used yet, but I do take the gentleman's point into consideration, if there is a way that we could work out something, because I'm not trying to undercut the drilling program at all here.

I did notice in fiscal year 2012 that there was a surplus in terms of what we funded, which was around \$45 million; in terms of the collections that were received, there was around \$27 million. So there was around an \$18 million overfunding there. That's why I did ask for this offset, because I felt it would be responsible and would not undercut the drilling permit program here.

Mr. SIMPSON. Reclaiming my time, I appreciate what the gentleman is trying to do. As I said, we do have some concerns with the offsets, but I am more than willing once this bill goes to conference in whatever form, depending on the outcome of this amendment, obviously, to work with the gentleman to see what we can do with the geographical programs, not just the Great Lakes programs, but there are both Republicans and Democrats that care about the geographical programs.

We've tried to do the best we could there, but there are other geographical programs that the gentleman from Washington (Mr. DICKS) is concerned about and that the gentleman from Virginia (Mr. MORAN) is also concerned about. We will work with the gentleman in conference in trying to address the concerns expressed by the gentleman.

Mr. CLARKE of Michigan. I offer this amendment for what's at stake. The Great Lakes fishing industry is a \$7 billion industry, and right now metro Detroit and the State of Michigan are in very hard-hit economic times by our industrial base being eviscerated. The one saving grace in our State and in that region is the fishing industry. That's the reason why I'm asking for this right now. It's emergency action. We found Asian carp DNA in Lake Michigan last week. I've got to do everything in my power as a Representa-

tive of not only Michigan but of that entire region to stop that carp from getting into the Great Lakes system, which would destroy our fishing industry. I urge your help.

Mr. SIMPSON. I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Michigan (Mr. CLARKE).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. CLARKE of Michigan. I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Michigan will be postponed.

Mr. MARKEY. I move to strike the last word.

The Acting CHAIR. The gentleman from Massachusetts is recognized for 5 minutes.

Mr. MARKEY. Mr. Chairman, in the underlying bill, the majority has underfunded the Interior Department agency charged with issuing new drilling permits and ensuring that offshore drilling is safe. The underlying bill would underfund the Bureau of Ocean Energy Management, Regulation and Enforcement—BOEMRE is what it's called—by nearly \$35 million. This is the agency that is charged with the responsibility of ensuring that we drill safely off the coastline of the United States.

At our very recent hearing, the director of that agency, Michael Bromwich, said that underfunding this agency, as the majority, the Republicans, have done in this bill, would slow down new offshore drilling permits and make offshore drilling less safe. That is unacceptable.

Unfortunately, the rule the majority adopted has protected the underlying provision limiting the inspection fees paid by the oil and gas industry from a point of order, and now the Republicans will not allow the House to work its will on the amendment that I have drafted with the gentleman from New Jersey (Mr. HOLT) and the gentlelady from California (Mrs. CAPPs).

Our amendment would have fully funded this safety agency by increasing the inspection fees on the oil and gas industry. The top five oil and gas companies made \$35 billion in profits just in the first 3 months of this year. This week, they will likely report similar profits for the second quarter. In fact, earlier today, BP reported quarterly profits of \$5.6 billion. That's just for the last 3 months.

□ 1930

Yet the industry as a whole pays just \$10 million a year in inspection fees for offshore drilling, and the Republicans are putting it offshore today from any consideration by the Members of this body.

So our amendment would have, if the Republicans had allowed us, imple-

mented a key recommendation from the independent BP spill commission. The BP commission recommended increasing the \$10 million per year that the oil and gas industry currently pays in inspection fees significantly, and that is what our amendment would have done.

And for my friends on both sides of the aisle who are concerned about reducing Federal spending, the increased funding for the safety agency from our amendment would have come from the oil and gas industry and not from taxpayers, but the majority won't even allow a vote on this amendment.

The oil and gas industry supports increased funding for BOEMRE. Just last November, the president and CEO of the American Petroleum Institute, Jack Gerard, said, "We fully support Congress providing additional resources for the Bureau of Ocean Energy Management, Regulation and Enforcement. This agency needs the additional inspectors and the increased staff and training resources to allow more efficient review and approval of oil and natural gas permit applications and processing of environmental reviews."

But what have the Republicans done in this bill? They have underfunded this agency. The oil industry agrees that there needs to be more funding to process permits and conduct inspections. The only question is whether a portion of that funding is going to come from a small increase in inspection fees, as the independent BP commission has recommended, or whether American taxpayers will have to pick up the entire tab. We are saying that they should pay the fee, the American Petroleum Institute should pay the fee. The oil industry should have to pick up the tab. And right now we do not have an ability to debate that on the House floor.

When people go to get their cars inspected to ensure they are safe and not a threat to the environment, they pay a small fee. But the oil and gas industry, which is recording the largest profits in the history of the world, doesn't have to pay a fee to get some of their rigs inspected to ensure that we don't have another Deepwater Horizon disaster.

The American people want these rigs inspected to make sure they are safe, not allow oil companies to be safe from paying more inspection fees. But when we are trying to cut the deficit, the Republican majority is giving another gift to the oil industry, straining our oil safety agency. More than 1 year after the BP spill, it is still business as usual.

The Acting CHAIR. The time of the gentleman has expired.

Mrs. CAPPs. I move to strike the last word.

The Acting CHAIR. The gentlewoman from California is recognized for 5 minutes.

Mrs. CAPPs. Mr. Chairman, the legislation we are considering today undermines the ability of the Federal

Government to continue protecting our Nation's air, land, and waters.

I intended to offer an amendment, along with my colleague from Massachusetts (Mr. MARKEY) and my colleague from New Jersey (Mr. HOLT), to fully fund the Bureau of Ocean Energy Management, Regulation and Enforcement, fully fund the national agency in charge of regulating offshore oil and gas drilling. Unfortunately, due to changes by the Republican leadership to the House budget process, we weren't allowed to offer this amendment.

Mr. Chairman, it's been over a year since the Nation's worst offshore oil spill. And I think our constituents would be surprised to learn that rather than taking action to prevent another deadly spill, this House continues to talk about expanding offshore drilling while sidestepping environmental laws to do so. They would also be surprised to learn that the underlying bill blocks the bureau's ability to collect inspection fees, and, as a result, the agency would see a \$35 million cut in their budget.

Mr. Chairman, in his fiscal year 2012 budget request, President Obama asked for a significant increase for the bureau over his 2010 budget. He asked for this new money to hire additional inspectors, to enhance environmental reviews, and to enforce strengthened regulations. If we recall a year ago and the events following the spill, we will understand why this is the case.

While this request was a significant increase over prior years, the administration proposed to offset nearly half of the request by increasing the inspection fees on offshore rigs. This was a key recommendation of the President's bipartisan, independent national oil spill commission.

In their final report, the commissioners recommended the industry fees should be increased to, and I quote from their report, "provide adequate leasing capabilities and regulatory oversight for the increasingly complex energy-related activities being undertaken on the OCS."

Our straightforward amendment adopts this key recommendation to provide the funding needed for government regulators to do their jobs, and it will ensure a safer and more environmentally responsible industry.

Mr. Chairman, knowing what we know now, if we continue to allow offshore drilling in U.S. waters, the government has a responsibility to ensure that they are protecting us against a repeat of last year's disaster. And if oil and gas corporations want the opportunity to drill, it's only fair for them to help cover the cost of ensuring it's done properly, that their workers are protected, and the surrounding ocean is safe. But, ultimately, Congress holds the purse strings, and we must require these corporations to step up so the bureau can ensure that the people, communities, economies, and environment in the gulf, Alaska, and off the south-

ern California coast are sufficiently protected against a spill.

Whether or not we have an agency capable of properly regulating the oil and gas industry is dependent upon our decisions. Without these fees, taxpayers, rather than the industry, would have to shoulder the costs of these operations.

If we want to ensure safe and responsible energy development, we must put the lessons learned from the BP oil disaster to use.

I urge my colleagues to vote down this bill which blocks the bureau's ability to collect inspection fees. It's what is needed so we do not have to endure a repeat of the horrific disaster that is still inflicting pain and damage to the Gulf of Mexico and to those who make their living from it.

What a terrible legacy of this Congress that we have done so little following the gulf oil disaster. What a legacy should, God forbid, a future disaster take place and we would have remembered that on our watch we could have done something about it.

I yield back the balance of my time. Mr. HOLT. Mr. Chairman, I move to strike the last word.

The Acting CHAIR. The gentleman from New Jersey is recognized for 5 minutes.

Mr. HOLT. As you heard, this appropriations bill provides several hundred million dollars to the Bureau of Ocean Energy Management, Regulation and Enforcement. Sounds like a lot of money, but it is far less than what is needed for the protection of the environment and of workers for offshore oil and other activities.

The Director of the bureau recently testified that these funds that are missing are needed and that their lack will have a direct and immediate impact on the ability of the agency to hire inspection and permitting personnel.

It's interesting that so eager is the majority to look after the interests of the oil industry that they ruled out of order our amendment which provides one way to make up for these lost funds, this amendment that I would have offered with Mr. MARKEY of Massachusetts and Mrs. CAPPS of California had the amendment been in order. So eager are they to look after the interests of the oil industry that they actually work against the oil industry.

□ 1940

So eager are they to look after the interests of the oil industry, that they actually work against the oil industry. The irony is pretty rich here. At a time when the majority is aggressively pushing their oil, oil, oil, drill, drill, drill agenda, they are slashing the very funds that are needed by the bureau to conduct the lease sales and issue the permits and inspect the offshore drilling facilities so the industry can move ahead safely and efficiently.

You know, at a time when we are about, according to the majority here,

about to require seniors and the poor to pay more for their health care, and the majority is considering drastic cuts to the social safety net and considering trading away critical parts of Medicare and Medicaid, the majority is prepared to hand out yet another subsidy to the oil industry. They refuse to make in order the legislation that would take 0.02 percent, that is two-tenths of 1 percent, of the annual profits of the top five oil companies to replace the missing \$35 million in inspection fees. That amount would fully fund the bureau and would ensure that the agency could effectively and efficiently issue the permits and conduct the safety inspections.

This is an industry that is making tens of billions of dollars each quarter. As we have heard, BP just today announced more than \$5 billion in profit. That is a little bit below expectations, we read, \$5 billion in the last 3 months.

So as a result, because this amendment is not being made in order, this bill, should it become law, would leave the agency that is responsible for the management, regulation, and enforcement of offshore drilling underfunded, understaffed, and it would leave the public and the workers at risk.

I yield back the balance of my time.

The Acting CHAIR. The Clerk will read.

The Clerk read as follows:

CONSTRUCTION

For construction of buildings, recreation facilities, roads, trails, and appurtenant facilities, \$3,576,000, to remain available until expended.

LAND ACQUISITION

For expenses necessary to carry out sections 205, 206, and 318(d) of Public Law 94-579(43 U.S.C. 1715, 1716, and 1748(d), respectively), including administrative expenses and acquisition of lands or waters, or interests therein, \$4,880,000, to be derived from the Land and Water Conservation Fund and to remain available until expended.

AMENDMENT OFFERED BY MR. BASS OF NEW HAMPSHIRE

Mr. BASS of New Hampshire. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 4, line 6, insert after the dollar amount the following: "(increased by \$1,000,000)".

Page 10, line 1, insert after the dollar amount the following: "(increased by \$4,000,000)".

Page 15, line 19, insert after the dollar amount the following: "(increased by \$4,000,000)".

Page 32, line 12, insert after the dollar amount the following: "(reduced by \$20,000,000)".

Page 76, line 2, insert after the dollar amount the following: "(increased by \$7,000,000)".

Page 78, line 1, insert after the dollar amount the following: "(increased by \$4,000,000)".

Mr. BASS of New Hampshire (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read.

The Acting CHAIR. Is there objection to the request of the gentleman from New Hampshire?

There was no objection.

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. BASS of New Hampshire. I thank the Chairman for recognizing me and making it possible for me to offer this amendment at this point in the bill.

This amendment will restore \$20 million to the Land and Water Conservation Fund. It is offset by a \$20 million reduction from the Department of the Interior salaries and expenses. Now, the Department of the Interior salaries and expenses at present are about \$250 million, so this would represent roughly a 10 percent reduction in the overhead for the agency. But what do you get for that? You get about an 8 percent increase in the Land and Water Conservation Fund funding.

Now, the Land and Water Conservation Fund, as has been mentioned by other speakers, was established 46 years ago in 1965. It was designed as a forward-looking program to preserve critical assets in America for all of us to enjoy.

When you travel around the world, you don't find countries like America that have large parts of our country preserved for public use. Most of the land in other countries around the world is owned privately or by the government and it is not accessible to the public. The LWCF, through its state-side program, its Forest Legacy Fund, has provided countless acres of protected land for public enjoyment.

Now, the fund has, for the last 25 or so years, received most of its funding from offshore oil royalties, and those royalties have averaged anywhere from \$7 billion to \$18 billion a year. And I have a little table here for the last few years that shows the total royalties and how little amount of money that the Land and Water Conservation Fund takes from these receipts. It is authorized at \$900 million. It has been funded of late between \$300 million and \$500 million. But, my friends, this year it is funded at less than \$70 million.

We Republicans have set as a goal in our principles to reduce the growth of government and to reduce programs to their January 1, 2008, level. What have we done in this appropriations bill? We have reduced this fund to its 1965 level.

I have here another little table that shows the historical funding for the Land and Water Conservation program. There is 1965. We will be lower than that if we don't pass this amendment.

I ask you, my friends, for the sake of the 900,000 Americans who visit these lands during the year, of the millions of dollars spent through the outdoor recreation industry, for those opportunities that we may never see again to make critical purchases and easement purchases of assets that are so important to the future of our country, to raise this appropriation from \$68 million to \$90 million is a small price to pay for what could be done with those funds.

We need to continue the program of land conservation, local recreation, and, yes, working forests. And a \$68 million appropriation just plain doesn't do it.

So on behalf of my cosponsors, I urge you, Mr. Chairman, to support this amendment and make it a part of the underlying bill.

I yield back the balance of my time.

Mr. MURPHY of Connecticut. I move to strike the last word.

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. MURPHY of Connecticut. Mr. Chairman, I join my friend from New Hampshire as one of the cosponsors of this amendment, and I urge House passage.

Let me say at the outset that this is a terrible bill. This is the first time I have come to the House floor to speak on it. It goes without saying that the devastation that this underlying legislation would do to our, frankly, century-long history of environmental protection is almost indescribable. The League of Conservation Voters said simply this: that this bill is the biggest assault on the air we breathe, the water we drink, and the wildlife and wild places we hold dear to ever come before Congress.

It rolls back new vehicle emission standards. It guts the Clean Water Act. It defunds the Endangered Species Act. And in the middle of it all, it adds an 80 percent cut to the Land and Water Conservation Fund. As my friend, Representative BASS, rightly pointed out, it essentially reverses 50 years of investment in land conservation by returning this account back to the 1965 level.

It was a great Republican President, Teddy Roosevelt, who first had the wisdom to understand how integral the open spaces of this country are to what it means to be an American. There is something unique about this country. The views and the vistas are just one part of it. Our identity is wrapped up in the places that we have conserved, the places that we have conserved through the very rightful acts of investment by our Federal Government over the last 50 years, indeed, over the last 100 years. And it has been Republican and Democratic Presidents, Republican and Democratic Congresses that since that moment of awakening in this Nation have realized this is the right kind of investment for this Nation. It is the right kind of investment because not only does it preserve the character of our Nation, but it does so by leveraging private investment and State investment.

As Representative BASS noted, one of the most important pieces of LWCF is the Forest Legacy Program. That program has conserved 2 million acres around the country. In my State of Connecticut, it has helped conserve 8,000 acres, and it does it by partnering with State resources, with local resources, and with private resources; in my State, often through the generosity

of land trusts. This is an incredibly wise investment, as it has been over the years.

And worst of all, this isn't even getting at the larger question of deficit reduction because this account has never been funded through deficits or borrowing. It has been funded through the money that comes from our offshore oil leases.

There are so many horrible cuts in this bill. There are so many reasons for those of us who believe in the concept of environmental protection made real by bipartisan support over the course of the last century to oppose this bill. But this, in my mind, is the worst of it. This is a sad day where we stand today. This is a small, small increase beyond what the Republicans have proposed to cut, but I think it is meaningful in the sense that it is an opportunity for this Congress to come together and say what dozens upon dozens of Congresses have said since 1965, that it is an American investment to spend Federal money toward the project of land conservation.

I yield back the balance of my time.

□ 1950

Mr. MORAN. Mr. Chairman, I claim time in opposition to the amendment.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. Mr. Chairman, I am a strong supporter of the Land and Water Conservation Fund. It's one of the great environmental success stories of the past 50 years. The \$65.8 million that the bill contains for the Land and Water Conservation Fund is in fact, as has been stated, the lowest since the program was started back in 1965. This is a 78 percent cut from the current level of funding. But I have to oppose the Bass-Murphy amendment because it not only is too small but the offset used would in fact harm other important programs.

The \$20 million for the Land and Water Conservation Fund that the Bass-Murphy amendment would restore is less than 10 percent of the \$235 million cut from this year's level. But to fund this plus-up, the Bass amendment actually makes it worse by taking \$20 million from the Office of the Secretary's account. Because what appears to be an increase in funding in the Secretary's office is actually the transfer of the revenue collection function from the Bureau of Ocean Energy Management, Regulation, and Enforcement. The Office of the Secretary took that in so that the Interior Department can do a better job in collecting the royalties and payments that are due the American people from Outer Continental Shelf drilling. But if you take this \$20 million away, it jeopardizes those collections.

The problem is that the Land and Water Conservation Fund is in fact funded with Outer Continental Shelf royalties. But if you take away the ability to collect those royalties, not

only are you taking the \$20 million from the ability of the Secretary of the Interior to manage the office, but you could very well be costing the government much more than \$20 million because they won't have the ability to collect those royalties that in fact pay for the Land and Water Conservation Fund.

Now, we couldn't agree more that it never should have been cut by 78 percent. It should be restored. We have said that in our statement. We support amendments to restore it, but certainly not to take it from the ability of the Secretary of the Interior to collect the very revenues that the government needs and that the American people are owed.

So that's why, regrettably, I have to oppose the gentleman's amendment.

I yield back the balance of my time.

Mr. REICHERT. Mr. Chair, the Land and Water Conservation Fund has helped ensure the permanent protection and maintenance of critical lands in our national forests, parks, wildlife refuges, and historic sites. Equally important, it has provided matching funds to support countless state parks and recreation projects in thousands of communities in every state in the nation.

The Land and Water Conservation Fund not only helps provide outdoor recreation access so that parents can teach their children about active, healthy lifestyles, it also provides an economic boost. In Washington state alone, the 2.7 million people who enjoy hunting, fishing, and wildlife watching contribute \$3 billion to the local economy.

I've joined bipartisan efforts to protect this important fund because, in the Pacific Northwest, we take special pride in our natural resources. I'm proud to, again, follow in the footsteps of so many who have worked together to protect the outdoors and our environment. I urge my colleagues to support the Bass amendment.

The Acting CHAIR. The question is on the amendment offered by the gentleman from New Hampshire (Mr. BASS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LAMBORN

Mr. LAMBORN. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 4, line 6, after the dollar amount, insert "(decreased by \$4,880,000)".

Page 10, line 1, after the dollar amount, insert "(decreased by \$15,047,000)".

Page 15, line 19, after the dollar amount, insert "(decreased by \$18,294,000)".

Page 78, line 1, after the dollar amount, insert "(decreased by \$12,500,000)".

Page 158, line 25, after the dollar amount, insert "(increased by \$50,721,000)".

The Acting CHAIR. The gentleman from Colorado is recognized for 5 minutes.

Mr. LAMBORN. Mr. Chairman, I am offering this amendment on behalf of and in cooperation with Representative PAUL BROUN of Georgia, who could not be here tonight. What this amendment does is it would zero out all of the land acquisition programs within the Inte-

rior, Environment, and Related Agencies appropriations bill, thus placing more than \$50 million in the Spending Reduction Account in order to reduce our national debt.

The Federal Government already owns more than 650 million acres of land, or about 30 percent of the total land area of the United States. We can't even take good care of the lands that the Federal Government already owns. An example of this is that the Park Service has a current backlog of several billions of dollars of repairs and maintenance in our beautiful national parks. At a time when we are facing an unprecedented fiscal crisis, the Federal Government needs to focus its energy on taking better care of the land it already has rather than purchasing additional acres. Our Federal agencies have enough on their plate, and if we zero out these land acquisition programs, we can save a significant amount of money.

Mr. Chair, we cannot spend our way out of the debt dilemma. I urge my colleagues to support this amendment and to send more than \$50 million toward paying down our national debt.

I yield back the balance of my time.

Mr. MORAN. I rise in opposition to this amendment.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. Mr. Chairman, I wish that our friends who just spoke on an amendment to add \$20 million were still around, because their points are well taken. We've already cut 78 percent from this program.

The gentleman from Colorado wants to eliminate it entirely. The Land and Water Conservation Fund is one of the premier environmental programs in this country. Most Americans have no idea how important it has been to their quality of life and to the ecology of this great country. But by wiping out these funds entirely, the amendment would force land management agencies to cease all work on congressionally approved projects that are now under way using previous year appropriations.

This mean-spirited amendment will hurt willing sellers—landowners who are willing to sell—because it's going to prevent agencies from finishing the commitments that are already in place. Among the willing sellers who would be unfairly thrown to the curb are owners who are partway through contracted sales and are counting on Land and Water Conservation funds to complete those sales, those contracts that they have already been working on. Many landowners, who range from elderly widowers and family trusts to ranchers and forest owners, have pressing financial needs that now depend on the completion of what are ongoing Land and Water Conservation projects. The amendment would also frustrate land exchanges that are currently in process. So it's not just the sale of land, it's exchanges of land that this

amendment would prohibit. Many of them have been years in the making. And so it's very important for local and private economic development and for public land management.

Under this amendment, staff would not even be in place to accept and process donations of important natural historic and other properties. Donations to the public, you wouldn't even have staff to accept those donations. Without staff, right-of-way work to provide or maintain access to key public needs also would be impossible. The public, the American taxpayer, would be unable to secure critically needed routes for fuels and wildfire management or for watershed management or for access for sportsmen and other recreational use. I can't imagine that the sportsmen in this country could ever want to have this kind of prohibition in place that might prevent them from even getting access to important recreational areas for fishing and hunting and so on.

The amendment would exacerbate an already draconian cut—78 percent cut—to the Land and Water Conservation Fund, a program that is already paid for using a very small percentage of oil drilling receipts. I would hope that my colleagues and anybody that might be listening to this debate would understand that Land and Water Conservation Fund moneys are not taxpayer dollars. They come from the receipts from oil and gas drilling—drilling that is on publicly owned land.

□ 2000

Those royalties come into the government, and that's what we use to fund the Land and Water Conservation Fund, but this would eliminate that program. This amendment represents a complete elimination of a bipartisan program that has existed for 45 years. This proposal prevents revenues deposited in the Land and Water Conservation account from being used for their authorized purposes. These funds were a promise made to the American people in 1964. This Congress should not be breaking that longstanding commitment. I, obviously, oppose the amendment.

I yield back the balance of my time.
Mr. SIMPSON. Mr. Chairman, I move to strike the last word.

The Acting CHAIR (Mr. HURT). The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. First, let me apologize to the gentleman from Virginia for the last amendment.

We both had some concerns, that he expressed very well, about taking \$20 million out of the Secretary's office and the impact that that could have. As we discussed during his debate, I think both of us are concerned about the underfunding of the Land and Water Conservation Fund and would like to see that fund increased. During his debate in opposition to the amendment, we decided to accept the \$20 million in the amendment from the gentleman from New Hampshire and the

gentleman from Connecticut's amendment.

So I apologize for the confusion in the middle of all that. The gentleman's issues that he raised about the Secretary's budget and the impact that could have are real. We will have to address those in conference, and I want to work with you to do that.

Let me rise in opposition to this amendment. I have concerns that this is eliminating all of the funds, especially since we just increased them by \$20 million. When we had this limited allocation, we had to make some tough decisions. The Secretary wanted it fully funded at \$900 million as did the Obama administration. We simply did not have that kind of money, and to put more money into it, given our allocation, we would have had to take the money out of some other programs that are very important to other people. What we did do is put enough money in it to keep the programs and the purchases and the deals that had been made with citizens to acquire land that were already in progress so that those could be completed. We didn't put additional money in there.

I happen to be a fan of the Land and Water Conservation Fund. I think it has done some great things. I've seen it do things in Idaho and I've seen it do things in other States, things that are very important. Westerners, though, have a different view of the Land and Water Conservation Fund, and let me tell you where it comes from.

It's that most of the money that's put into the Land and Water Conservation Fund, at least a large percentage of it, is used to buy land in States in the West. Those are States that are already highly leveraged by the Federal Government. In Idaho, 64 percent of the land is owned by the Federal Government. So a lot of westerners say, Listen, if you want to put money in the Land and Water Conservation Fund, if you want to buy the whole east coast, we don't care; but what we want in Idaho and what we want in Western States is some private land to be able to pay the taxes to support our education system and other services that are necessary.

I have one county in Idaho that is 96 percent Federal land—96 percent Federal land. It's bigger than the State of Rhode Island. That means 4 percent of the property is paying property taxes to deliver the services to these people. Several years ago, a mountain climber, not from Idaho but from somewhere else, came out and was climbing the mountains of Mount Borah. He died. It took their entire search and rescue budget for the year for that county to retrieve that one body off Mount Borah. That means everybody else who recreated in that county did not have that backup, did not have that search and rescue available, because they had no funds, because they had no private land to pay the taxes to fund those services.

That's the problem that westerners who are in States that are highly

owned by the Federal Government have with the Land and Water Conservation Fund, but I'll be the first to admit that it does some wonderful things. If you float down the South Fork of the Snake River, you will see one of the most beautiful canyons and one of the best fishing rivers in the country; and if the gentleman from Washington wants to come out, I'll float him down it. It is an incredibly beautiful place, and it has been done through the Land and Water Conservation Fund.

So I believe in the importance of this program. I apologize to the gentleman from Virginia as to our previous confusion on that; but I oppose this amendment, and I would encourage Members to oppose it.

I yield back the balance of my time.

Mr. GARAMENDI. I move to strike the last word.

The Acting CHAIR. The gentleman from California is recognized for 5 minutes.

Mr. GARAMENDI. I was just listening to the debate here, saying: What are they thinking? What is the rationale? What is the purpose for the legislation that we have before us, more pointedly, the amendment that was just offered?

This is an incredible country. This is a country that very recently took great pride in cleaning its rivers, in protecting its citizens from toxins and pollutants and chemicals and poisons. This is a country that took great pride in creating the first-ever in this world national park and then expanded it over time to create the most awesome National Park System in the entire world. This is a country that took great pride in the Snake River and the use of the Land and Water Conservation Fund.

An argument was made a moment ago that there is not enough money. Yet not more than a month ago, an effort to increase the royalties from our oil that is pumped from our land, the land of the people and of the United States—and in fact even to get a royalty—was rejected by our Republican colleagues. So money was available if we simply had gone for the royalties that should be there under any case. This legislation, however, goes far beyond that, and over time will destroy the pride that we have taken in creating our national parks, in setting aside for future generations the great vistas of America, protecting our air, our land and our water.

You look at this bill. You look at the details of this bill, and you go, Oh, my. How could they? How could they put in legislation that would block the effort of the EPA to eliminate mercury poison in our air and water? How could they allow a bill that would create more soot in our atmosphere, put 34,000 lives at risk, and exempt the oil companies from air pollution standards in offshore drilling, which in California is a big deal because the air blows, the wind blows onto the land? How could they threaten the health of millions of

Americans by jeopardizing the EPA's critical air, land and water regulations? Then our children. They block the EPA from limiting dangerous air pollution. How could they put together a bill that potentially could contaminate 117 million Americans' water?

How could you do that? Have you no pride in this country? Do you not care about the basic things that we have done to create a country that cares about clean water? You talk about jobs. Yet, in this bill, you eliminate the funding for the Clean Water Act, which is really building sanitation facilities in our community.

I remember in the 1960s the great pride that the 500 people in my community of Mokolumne Hill took when they got that money from the Federal Government and actually built the first sanitation system in that small town. How could you deny Americans the opportunity for that—and the drinking water and the jobs that go with it?

That's what this bill does. Take pride in what you're doing, gentlemen, because at the end of the day, the American public will not take pride in what you're doing to this piece of legislation.

I yield back the balance of my time.

ANNOUNCEMENT BY THE ACTING CHAIR

The Acting CHAIR. Members are reminded to address their remarks to the Chair.

The question is on the amendment offered by the gentleman from Colorado (Mr. LAMBORN).

The amendment was rejected.

AMENDMENT OFFERED BY MR. TIPTON

Mr. TIPTON. Mr. Chairman, I have an amendment at the desk, and I ask unanimous consent to waive the reading.

The Acting CHAIR. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 4, line 6, after the dollar amount, insert "(increased by \$2,500,000)".

Page 65, line 19, after the dollar amount, insert "(decreased by \$5,000,000)".

Page 78, line 1, after the dollar amount, insert "(increased by \$2,500,000)".

The Acting CHAIR. The gentleman from Colorado is recognized for 5 minutes.

Mr. TIPTON. My amendment is going to apply funds directed towards much needed conservation programs which are used to be able to provide access for the American people to our public lands and to help support jobs in the recreational and sportsmen industry.

Our public lands are a treasured resource for all Americans to be able to use and enjoy responsibly. I support a balanced approach to public lands use, respecting the environment that we all deeply value while making the best use of our natural resources on public lands. Recreation, preservation, access,

and job creation are all important aspects of the multiple-use management for which these lands are truly intended.

This funding would be used for projects that clearly and specifically improve access for hunting, fishing and other forms of outdoor recreation on these Federal public lands. Of the directed funds, \$5 million would be redirected to make public lands public and provide much needed support for recreational access.

I yield back the balance of my time.

□ 2010

The Acting CHAIR. The question is on the amendment offered by the gentleman from Colorado (Mr. TIPTON).

The amendment was agreed to.

The Acting CHAIR. The Clerk will read.

The Clerk read as follows.

OREGON AND CALIFORNIA GRANT LANDS

For expenses necessary for management, protection, and development of resources and for construction, operation, and maintenance of access roads, reforestation, and other improvements on the revested Oregon and California Railroad grant lands, on other Federal lands in the Oregon and California land-grant counties of Oregon, and on adjacent rights-of-way; and acquisition of lands or interests therein, including existing connecting roads on or adjacent to such grant lands; \$112,043,000, to remain available until expended: *Provided*, That 25 percent of the aggregate of all receipts during the current fiscal year from the revested Oregon and California Railroad grant lands is hereby made a charge against the Oregon and California land-grant fund and shall be transferred to the General Fund in the Treasury in accordance with the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (50 Stat. 876).

RANGE IMPROVEMENTS

For rehabilitation, protection, and acquisition of lands and interests therein, and improvement of Federal rangelands pursuant to section 401 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1751), notwithstanding any other Act, sums equal to 50 percent of all moneys received during the prior fiscal year under sections 3 and 15 of the Taylor Grazing Act (43 U.S.C. 315 et seq.) and the amount designated for range improvements from grazing fees and mineral leasing receipts from Bankhead-Jones lands transferred to the Department of the Interior pursuant to law, but not less than \$10,000,000, to remain available until expended: *Provided*, That not to exceed \$600,000 shall be available for administrative expenses.

SERVICE CHARGES, DEPOSITS, AND FORFEITURES

For administrative expenses and other costs related to processing application documents and other authorizations for use and disposal of public lands and resources, for costs of providing copies of official public land documents, for monitoring construction, operation, and termination of facilities in conjunction with use authorizations, and for rehabilitation of damaged property, such amounts as may be collected under Public Law 94-579, as amended, and Public Law 93-153, to remain available until expended: *Provided*, That, notwithstanding any provision to the contrary of section 305(a) of Public Law 94-579 (43 U.S.C. 1735(a)), any moneys that have been or will be received pursuant to that subsection, whether as a result of

forfeiture, compromise, or settlement, if not appropriate for refund pursuant to section 305(c) of that Act (43 U.S.C. 1735(c)), shall be available and may be expended under the authority of this Act by the Secretary to improve, protect, or rehabilitate any public lands administered through the Bureau of Land Management which have been damaged by the action of a resource developer, purchaser, permittee, or any unauthorized person, without regard to whether all moneys collected from each such action are used on the exact lands damaged which led to the action: *Provided further*, That any such moneys that are in excess of amounts needed to repair damage to the exact land for which funds were collected may be used to repair other damaged public lands.

MISCELLANEOUS TRUST FUNDS

In addition to amounts authorized to be expended under existing laws, there is hereby appropriated such amounts as may be contributed under section 307 of the Act of October 21, 1976 (43 U.S.C. 1737), and such amounts as may be advanced for administrative costs, surveys, appraisals, and costs of making conveyances of omitted lands under section 211(b) of that Act, to remain available until expended.

ADMINISTRATIVE PROVISIONS

The Bureau of Land Management may carry out the operations funded under this Act by direct expenditure, contracts, grants, cooperative agreements and reimbursable agreements with public and private entities, including with States. Appropriations for the Bureau shall be available for purchase, erection, and dismantlement of temporary structures, and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title; up to \$100,000 for payments, at the discretion of the Secretary, for information or evidence concerning violations of laws administered by the Bureau; miscellaneous and emergency expenses of enforcement activities authorized or approved by the Secretary and to be accounted for solely on the Secretary's certificate, not to exceed \$10,000: *Provided*, That notwithstanding Public Law 90-620 (44 U.S.C. 501), the Bureau may, under cooperative cost-sharing and partnership arrangements authorized by law, procure printing services from cooperators in connection with jointly produced publications for which the cooperators share the cost of printing either in cash or in services, and the Bureau determines the cooperator is capable of meeting accepted quality standards: *Provided further*, That projects to be funded pursuant to a written commitment by a State government to provide an identified amount of money in support of the project may be carried out by the Bureau on a reimbursable basis. Appropriations herein made shall not be available for the destruction of healthy, unadopted, wild horses and burros in the care of the Bureau or its contractors or for the sale of wild horses and burros that results in their destruction for processing into commercial products.

UNITED STATES FISH AND WILDLIFE SERVICE RESOURCE MANAGEMENT

For necessary expenses of the United States Fish and Wildlife Service, as authorized by law, and for scientific and economic studies, general administration, and the performance of other authorized functions related to such resources, \$1,099,055,000, to remain available until September 30, 2013 except as otherwise provided herein: *Provided*, That none of the funds shall be used for implementing subsections (a), (b), (c), and (e) of section 4 of the Endangered Species Act, (except for processing petitions, developing and issuing proposed and final regulations, and

taking any other steps to implement actions described in subsection (c)(2)(A), (c)(2)(B)(i), or (c)(2)(B)(ii) of such section): *Provided further*, That of the amount available for law enforcement, up to \$400,000, to remain available until expended, may at the discretion of the Secretary of the Interior be used for payment for information, rewards, or evidence concerning violations of laws administered by the Service, and miscellaneous and emergency expenses of enforcement activity, authorized or approved by the Secretary and to be accounted for solely on the Secretary's certificate: *Provided further*, That of the amount provided for environmental contaminants, up to \$1,000,000 may remain available until expended for contaminant sample analyses.

AMENDMENT OFFERED BY MR. DICKS

Mr. DICKS. I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Under the heading "UNITED STATES FISH AND WILDLIFE SERVICE-RESOURCE MANAGEMENT", strike the first proviso (Page 8, line 19, to page 9, line 1), relating to implementation of subsections (a), (b), (c), and (e) of section 4 of the Endangered Species Act.

The Acting CHAIR. The gentleman from Washington is recognized for 5 minutes.

(Mr. DICKS asked and was given permission to revise and extend his remarks.)

Mr. DICKS. I rise to offer an amendment that would strip a dangerous rider from this bill, a rider that would seriously compromise the effectiveness of the Endangered Species Act. This is a bipartisan amendment, I might add.

I'm offering it with the support of Congressman THOMPSON and Congressman FITZPATRICK and Congresswoman HANABUSA.

The fiscal year 2012 Interior and Environment bill passed by the full committee a few weeks ago contains a direct attack on the ESA. I offered an amendment at that time to strike the provision, but the full committee rejected it.

The provision would block the Fish and Wildlife Service from listing candidate species as either threatened or endangered as well as the designation of the critical habitat necessary for species recovery. These listing activities are preliminary steps that the Fish and Wildlife Service must take in order to begin the recovery process. After those steps are taken, then the hard work begins. Without these important preliminary steps of listing and critical habitat designation, it would be impossible to develop a scientifically valid and legally defensible recovery plan for declining species.

This funding limitation aimed at the heart of the ESA is simply postponing the day of reckoning. It is important to note that the bill does provide funding for the Fish and Wildlife Service to downgrade the protections offered to species under the ESA. After all, the goal of the ESA is to eventually delist recovered species. Delisting is the reward after all the hard work recovering these species. But we can't get to the

point of delisting species without listing them first.

My amendment would remove these restrictions on listing and up-listing and the designation of critical habitat.

Many critics of the ESA argue the law simply does not work. I would argue that the recovery leading to the delisting of the bald eagle and the American alligator under the ESA is a strong success. In the last few months, the gray wolf in the northern Rockies has been delisted in two States and the Fish and Wildlife Service recently announced the intention to delist the gray wolf in the western Great Lakes.

Other animals that are still listed under the ESA but have made tremendous recoveries include the whooping crane, the black footed ferret, and the California condor. In the Pacific Northwest, I'm glad to report that we are seeing signs of healthy recovery for the ESA-listed salmon, although it will be awhile before delisting could occur.

Clearly these examples show us the success of the ESA, a law, by the way, that the American people overwhelmingly support.

As for species listed under the ESA, they still are struggling. It is naive to think that a quick turnaround is easy when it took decades, if not centuries, for a species to decline. Also, it takes more time to recover long-lived species.

Here is a situation that the Fish and Wildlife Service faces in the administration of the ESA.

Currently, there are about 260 species that have been identified as potential candidates for ESA protection. Of that total, there are just under 30 species that are poised for listing in the near future. The spending provisions in this bill would block further activity to protect these declining species. And remember, if you delay listing too long, a species will go extinct, thus making a recovery impossible. And that is why some people call this the "extinction rider."

The Endangered Species Act is one of the most effective environmental laws ever written. Recovering species is hard, often long, work; but it is a responsibility that cannot be dismissed like this Interior appropriation bill attempts to do.

I know that many of my colleagues would like to drastically reform the ESA, but it would be a sounder path to do such a reform through the authorization process rather than accomplishing the goal with a few lines in the appropriation bill. And I see that the distinguished chairman of the Natural Resources Committee is here, and he has pledged to get to work on this important endeavor.

In closing, I will point out that this amendment is supported by former directors of the Fish and Wildlife Service who served under Presidents Nixon, Ford, Carter, the first President Bush, and Bill Clinton. It is also supported by several hook-and-bullet groups including the Izaak Walton League and Trout Unlimited.

I urge support for this amendment.

I yield back the balance of my time.

Mr. SIMPSON. I move to strike the last word in opposition.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. I rise in opposition to the amendment by my good friend from Washington (Mr. DICKS).

I respect where my friend is trying to go; but not only does this amendment not get us there, it's downright dangerous. Let me explain why.

Since the Clinton administration and response to lawsuits and court orders that were crippling the agency's budget, there has been a statutory cap on how much the agency is permitted to spend on ESA listings. There's been a statutory cap in place since the Clinton administration. A cap on critical habitat spending was added in 2002.

The Obama administration requested new caps for petitions and foreign species listed in 2012.

In short, support for ESA funding caps has had bipartisan support in Congress and in the White House and was in place when the gentleman from Washington wrote the Interior bill and when the gentleman from Virginia wrote the Interior bill. Those spending caps were in place.

This amendment proposes to do away with funding caps altogether and gives the green light to those who have made a living suing the Fish and Wildlife Service. As a result, the litigants will act, the courts will all act, and the Fish and Wildlife Service's entire operating budget will be at risk of being raided in order to fund court-ordered mandates to list species and designate critical habitat.

□ 2020

This service will have no choice but to raid other funds from its resource management account, which is already decreased by \$146 million, or 12 percent, in this budget. Having said that, the heart of the issue isn't about funding. It's about the fact that the Endangered Species Act is broken and is badly in need of review, revision, and reauthorization by the Natural Resources Committee. As I have said before, there's been about 2,000 species listed and 21 recovered.

Unfortunately, the Endangered Species Act has become not so much about saving species as it has been about controlling land and water. I'll give you an example. We all talk about the fuzzy and warm animals that we all like and all want to save. Nobody talks about the slickspot peppergrass, endangered. Nobody really cares about the slickspot peppergrass, except that it's listed. And you know what it does? It prevents cattle grazing on public lands and is used to prevent cattle grazing on public lands and move cattle producers off of public lands. That's the only reason that the slickspot peppergrass is really listed. That's unfortunate.

When you start using what was an act that was bipartisan and almost had

unanimous agreement in the House and Senate, was a good Act—the intent of the Endangered Species Act is right, and we need to do it. We need to protect species that are endangered. Unfortunately, that's not what it's being used for today, and you can't get the stakeholders to the table to do a reauthorization bill because there are groups that like it the way it is. They want to control land and water by using the Endangered Species Act. How do we get the message out to them that we need to do a reauthorization? The only way I can think of is to say, You know what? This has been unauthorized for 20 years.

Now, you talk about policy riders in this bill that you don't like. This is a policy rider that you're attempting to add. It's an unauthorized program. Just because we have continued to fund it for 20 years, that's not the answer; that's the problem. And we need stakeholders to come to the table, sit down with the Natural Resources Committee and write a reauthorization. That's what this is all about. It is a shot across the bow.

I believe there are 56 or 58 programs in this bill that the authorization has expired. Somehow we need to send a message that we have a process around here. It's authorization, then appropriation. Not authorization, expired appropriation, and appropriation and appropriation and appropriation. It's the only way those things keep going on. We are trying to send a message.

You will find that I am supportive of reauthorization of the Endangered Species Act, and I am supportive of the Endangered Species Act as it was originally intended. But I would urge my colleagues to vote against this dangerous amendment which would undermine the Fish and Wildlife Service's budget because it would lift the caps that have been in place since the Clinton administration, and Fish and Wildlife Service would have no other alternative but to raid their accounts in order to fund court orders, suits, and other things that would come along.

I urge my colleagues to vote "no" on this amendment.

I yield back the balance of my time.

Mr. MORAN. I move to strike the last word.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. I was going to wait until other speakers spoke, but I felt it appropriate to engage in a discussion here with the chairman and to remind him that this bill includes funding for a multitude of expired authorizations.

The Bureau of Land Management isn't authorized. But you are funding the Bureau of Land Management because you like the Bureau of Land Management. The grazing program isn't authorized. Oil and gas isn't authorized.

Mr. SIMPSON. Will the gentleman yield?

Mr. MORAN. I yield to the gentleman from Idaho.

Mr. SIMPSON. The gentleman brings up the point I tried to make. This is a shot across the bow. All of these programs need to be reauthorized. We had to start somewhere.

Mr. DICKS. Can you start with another bow?

Mr. MORAN. Well, that's it.

Reclaiming my time, the shot across the bow goes right into the heart of the Endangered Species Act. So you are picking winners and losers. You could have picked any number of programs, but you like those. In fact, some of them you've increased—funding for grazing subsidies, funding for oil and gas subsidies. But the Endangered Species Act, the poor species who are in danger of extinction who can't speak up for themselves, they get targeted. They're the ones you are going to make an example of.

You know, not allowing listings of the designation of even the critical habitat that will protect endangered species doesn't change the fact that so many plant and animal species are at risk of extinction. There are 260 species that are in danger of extinction, but we're not going to protect them.

The lack of critical habitat designations not only hurts those species at risk, but it leaves in limbo landowners and businesses that need decisions made in order to make plans. We hear so much about uncertainty and how bad uncertainty is. This creates uncertainty.

The twist of irony: The bill allows funding to be used to delist species or reclassify them from endangered to threatened, to delist them or down-list them, but no funds can be used for listings or to reclassify them from threatened to endangered. Even if they become endangered, we can't classify them as endangered. We can only down-list them. It's a one-way street, a one-way street to less protection.

I too would like to see the Endangered Species Act authorized. Maybe we'll hear from the chairman of the authorizing committee why it's not being reauthorized. But this is not the way to deauthorize it. The fact is that this is legislating on an appropriations bill, basically. I thought we were not supposed to be doing that. But we make these poor endangered species that are at risk of extinction bear the cost of Congress' failure to reauthorize the Endangered Species Act.

Of course I support the Dicks amendment. Not only do we have 260 species at risk of extinction, but we don't even know the entire scope of the species whose very existence is at risk, and we don't know either the role they play in the ecology of our planet. There are so many species that we're only now learning—for example, there are now that catch insects or mosquitoes or whatever—that maintain the population of other species.

I do believe that every species has some role to play in the sustainability and the ecology of this planet. We don't know necessarily what that role

is, but I do think we have some idea that they're there for a purpose. And while they're there for a purpose, it seems to me we have a purpose, a responsibility for enabling that species to be sustained on this fragile planet. And to say that we can't outperform our responsibility, we can't act responsibly toward these species, is irresponsible. It really is an embarrassment to this Congress.

So I very strongly support the Dicks amendment. I would hope that we would give species a break. Get this language out of this bill.

I yield back the balance of my time.

Mr. HASTINGS of Washington. I move to strike the last word.

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. HASTINGS of Washington. Mr. Chairman, let me make one point: This debate is not about the Endangered Species Act; it is not about the Endangered Species Act.

I have to rise in opposition to the amendment offered by my good friend from Washington State. I think that Chairman SIMPSON has brought to the House floor a bill that prioritizes funding to ensure that the core responsibilities and environmental protections are met in a broader sense.

When it comes to the Endangered Species Act, this bill focuses on funding the actual recovery of species. It does this by, one, continuing funds for recovery activities and doing that despite the fact that this bill, the ESA, has not been reauthorized for 23 years—not 20 years; 23 years—and, two, by limiting funds for lawsuit-driven new listings and habitat designations.

This bill sends a clear message, as the gentleman from Idaho said, that the Endangered Species Act needs to be updated and improved. It needs to be reauthorized. As I mentioned, it's been 23 years since this bill was reauthorized by Congress. A person can be born and graduate from college in the amount of time that has passed since Congress last acted to make serious responsible improvements to this law.

□ 2030

Now, the gentleman from Washington acknowledged me on the floor earlier, and I will tell him, as the chairman of the Natural Resources Committee, which has jurisdiction on the Endangered Species Act, I can inform the House that this committee will be conducting robust oversight of the need to update this law in the coming months. The current law is failing to truly recover species while it frequently hamstring jobs and economic prosperity, like the gentleman from Idaho mentioned. And we will also examine legislative priorities.

In my view—and this is important about this debate—in my view, the real obstacle to improving ESA is the fact that a number of groups are heavily invested in litigation mindset, a litigation mindset that prefers lawsuits against the government over improving

the act and improving the recovery of species. These groups have filed lawsuits by the one hundreds against Fish and Wildlife and the National Marine Fisheries.

This bill, under Chairman SIMPSON's leadership, effectively halts these lawsuits. By limiting any spending on new listings or habit designations, this bill will allow the biologists to get back to work recovering species, rather than responding to court cases. Both funding and personnel will be able to focus on the real work of bringing species back from the brink.

By striking this provision, the Dicks amendment would reopen the litigation process. The same activist groups, Mr. Chairman, that filed these lawsuits endorse this amendment. As we speak, they are waging an expensive paid advertising campaign on behalf of this amendment. Because they profit from these lawsuits, to me, it appears they are more concerned about the ability to go to court, get a settlement and get paid than they are about recovering species.

So I urge my colleagues to oppose the amendment. This bill strikes the right balance by directing funding to actual recovery of species. And it strikes the right balance by bringing a halt to litigation over new listings and habitat designations.

This bill will create an opportunity where Congress can do its job to update and modernize the ESA. It's time that we take a thoughtful analysis of the inadequacies of this current law, inadequacies that allow the ESA to be abused through lawsuits, rather than serving as a true conduit for species recovery.

Let me go on to say that, as the chairman, I think, said very well in his remarks, there is no incentive for the stakeholders to come and try to work out the differences or update this law if Congress keeps kicking the can ahead. That's what the issue is all about.

I can't imagine, for example, that people really believe that this bill should be in place, yet, when there is a major construction project here in the Washington, DC, area, like the Woodrow Wilson bridge, they waive the act. Does that make sense? Of course it doesn't make sense.

And we don't get an opportunity, those of us that are impacted by this act, get a chance to waive it. So it just seems to me that there has to be an update of this. The act has not been updated for 23 years. It's time to do it. And as the chairman of the committee that has jurisdiction on that, I'm glad to work with the chairman of the Appropriations Committee on this. In fact, I'll work with anybody on this because I too believe that the species are very important, as the gentleman from Virginia said. But let's do it in a way that protects species and does not harm those people that make a living from the land and/or the water.

I yield back the balance of my time.

Mr. SIMPSON. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. FITZPATRICK) having assumed the chair, Mr. HURT, Acting Chair of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2584) making appropriations for the Department of the Interior, environment, and related agencies for the fiscal year ending September 30, 2012, and for other purposes, had come to no resolution thereon.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2587, PROTECTING JOBS FROM GOVERNMENT INTERFERENCE ACT

Mr. SCOTT of South Carolina, from the Committee on Rules, submitted a privileged report (Rept. No. 112-183) on the resolution (H. Res. 372) providing for consideration of the bill (H.R. 2587) to prohibit the National Labor Relations Board from ordering any employer to close, relocate, or transfer employment under any circumstance, which was referred to the House Calendar and ordered to be printed.

DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND RELATED AGENCIES APPROPRIATIONS ACT, 2012

The SPEAKER pro tempore. Pursuant to House Resolution 363 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the state of the Union for the further consideration of the bill, H.R. 2584.

□ 2037

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H.R. 2584) making appropriations for the Department of the Interior, environment, and related agencies for the fiscal year ending September 30, 2012, and for other purposes, with Mr. HURT (Acting Chair) in the chair.

The Clerk read the title of the bill.

The Acting CHAIR. When the Committee of the Whole rose earlier today, an amendment offered by the gentleman from Washington (Mr. DICKS) was pending, and the bill had been read through page 9, line 12.

Mr. LANGEVIN. Mr. Chairman, I move to strike the last word.

The Acting CHAIR. The gentleman from Rhode Island is recognized for 5 minutes.

Mr. LANGEVIN. Mr. Chairman, I rise to support the amendment introduced by my friend and colleague, Ranking Member DICKS, and in opposition to the broader FY 2012 Interior appropriations bill. This bipartisan amendment, I believe, is critical to restoring the long-time commitment to protecting our most threatened species from extinction.

The gentleman from Virginia is absolutely correct that so many of these species our planet actually depends on, and it is a symbiotic relationship that protects our environment.

The language in the underlying bill to prevent any funds from being used to list new species under the Endangered Species Act, I believe, is shortsighted and only serves to punish a successful program for preserving critical habitats. And this language is just one example of the extremely harmful policies included in this bill.

On the broader bill itself, and how it fails to help our economy and create jobs, I want to mention that in my home State of Rhode Island, our unemployment rate right now continues to be the third-highest in the Nation, at 10.8 percent. Right now we need investment in our infrastructure and in our resources to create jobs and modernize our communities.

New England is home to some of the oldest infrastructure in the Nation, and it is estimated that our drinking water infrastructure needs will cost over \$400 million over the next 20 years, and that our State has \$1.16 billion in unmet wastewater needs. But instead of addressing these needs by investing in our communities and creating new jobs, this bill slashes both the Clean Water and Drinking Water State Revolving Funds by 55 and 14 percent, respectively, below last year's levels.

In this time of complex and contentious debates about our debt and future fiscal security, I constantly hear my colleagues talk about the burden our actions will place on the next generation. Yet this bill would repeal and block implementation of two of the most important laws that keep our environment safe, the Clean Water and Clean Air Act.

Now, what chance are we giving our children to grow up and flourish if we can't protect the rivers and bays that they swim in and the water that they drink?

I'm also very disappointed that this bill blocks the EPA from finalizing a rule reducing emissions of mercury from power plants. Now, last week, Members were down here on the floor speaking about the tiny amount of mercury in light bulbs. Yet, today these same Members are blocking a rule that would keep our fisheries healthy and safe for consumption, in addition to preventing 17,000 premature deaths each year.

I don't understand how my colleagues on the other side of the aisle can be opposed to a small amount of mercury last week, yet today seemingly have no problem, no problem with much larger quantities of the same substance, but it being allowed to endanger public health.

Now, lastly, I urge my colleagues to fight against the nearly 80 percent cut in the Land and Water Conservation Fund, the lowest amount in its 45-year history. As many of us are well aware,

hunting, fishing, camping, and other outdoor recreation activities are a great benefit to our economy, bringing in a total of \$730 billion each year and supporting 6.5 million jobs.

□ 2040

These numbers bear out when you look at my home State of Rhode Island. Each year, 163,000 sportsmen and 436,000 wildlife watchers combine to spend \$381 million on wildlife-associated recreation in Rhode Island. We have incredible national wildlife refuges, which have been protected with LWCF funding, and which offer families in my district an opportunity to enjoy beautiful parks, trails, and open spaces at no cost during these tough economic times.

Mr. Chairman, I don't believe that this bill reflects our values or our shared desire to preserve our beautiful Nation. I believe we can and we ought to do better for our constituents and for our children. I urge my colleagues to reject this bill and to bring a bill to the floor that preserves our environment, creates new jobs, and protects our commitment to future generations.

Mr. DICKS. Will the gentleman yield?

Mr. LANGEVIN. I yield to the gentleman from Washington.

Mr. DICKS. I just want to commend the gentleman for his statement. It's an outstanding statement. You covered this very comprehensively, especially the part about infrastructure. There was a \$688 billion wastewater backlog during the Bush administration. We should be putting people to work on those kinds of projects. The gentleman is absolutely right, and I appreciate him being here late in the evening to support my amendment.

Mr. LANGEVIN. I thank the ranking member. I want to commend the gentleman for sponsoring this amendment and for his work on the broader bill. This is the right thing to do, to defeat the broader bill here and bring a bill to the floor that really reflects our values.

Again, I thank the gentleman from Washington State for offering this amendment.

I yield back the balance of my time.

Mr. CONAWAY. I move to strike the last word.

The Acting CHAIR. The gentleman from Texas is recognized for 5 minutes.

Mr. CONAWAY. Mr. Chairman, as has been spoken earlier, the Endangered Species Act is broken. What began as a tool to help scientists protect vulnerable populations of endangered animals and plants has metastasized into an economic straitjacket from which there is no relief.

To illustrate my point, I would like to share the stories of two species that make their home in west Texas: the Concho water snake and the dune sagebrush lizard.

The Concho water snake was first listed as threatened on September 3, 1986. Since that time, the citizens of

Texas have spent millions of dollars complying with Federal mandates, performing surveys, and generally advancing knowledge of the snake's biology far beyond that which existed when the snake was first listed in 1986. Today, there is little question that the snake's population is stable and exists in far greater numbers than during the original listing.

Because of this research, the service proposed delisting the snake on July 8, 2008. This delisting should be a victory for the service and the supporters of the Endangered Species Act. Instead, it has collapsed into a maddening, saddening caricature of endless government bureaucracy.

During a federally mandated 10-year study of the snake, researchers caught and released 9,000 individual snakes. The data collected was the basis for the Texas Parks and Wildlife Commission's decision to remove the snake from their threatened species list in August 2000. At that time, Fish and Wildlife declined to delist the species, instead requesting an additional population viability study to be conducted, with, of course, updated data.

Eight years later, in July of '08, the service finally issued a formal delisting proposal after what must have been an exhaustive, thorough, and detailed review of all of the best available science. Unfortunately, as of today, the service still has not completed action on its own proposal. Today, to the best of my knowledge, the final delisting rule is hung up somewhere with the lawyers in the solicitor's office of Fish and Wildlife.

It is inexcusable that this snake persists on the endangered species list. Its continued inclusion on the list represents a significant commitment of Federal, State, and local tax dollars. At a time when our financial commitments are under a strain at every level of government, dollars are wasted because of the failure of Fish and Wildlife to make a final decision on their own recommendation.

But beyond the dollars wasted while protecting a species that the service supports delisting, I'm more concerned about the long-term impact this non-decision has on the public's trust in our Federal Government. By proposing and then failing to delist a species, the service is undermining the very reputation it relies on when it hands down drastic and painful mandates sometimes needed to protect a species on the brink of extinction. The dunes sagebrush lizard is just one such species whose protection will require the service to demand significant and costly compliance measures from the landowners and communities where this lizard exists.

Unfortunately, it's also a species that has a paltry amount of science behind the support of its listing. In Texas, there are but a handful of places that anyone has looked for the lizard, and the service is unable to answer basic questions as to how many lizards

exist today or how many are needed to support a viable population of these lizards.

This might not stir up much trouble, except that the dune sagebrush lizard lives above one of the most productive oil and gas producing basins in the lower 48. Its inclusion on the endangered species list would dramatically curtail oil and gas exploration across this vast patch of the Permian Basin until the Fish and Wildlife Service decides on how best to proceed several years from now.

The oil produced on this land provides the livelihood for hundreds of thousands of Texas families, millions of dollars of support for Texas university and public school students and, most important, is used as energy by millions of Americans. The Fish and Wildlife Service has proposed closing this land to development based on too little science and too little concern for the economic consequences.

I believe that the interminable delay in delisting the Concho water snake and the paltry science behind listing of the dune sagebrush lizard is damaging the service's credibility as an honest steward of the powers its agents are entrusted with. Fair or not, the Endangered Species Act as implemented by Fish and Wildlife is viewed in my district as little more than a cudgel to beat up disfavored industries, in large part because the science is often shoddy, species are rarely delisted, and the mandates continue in perpetuity. I support the underlying legislation today because I believe it is the best short-term chance to correct the imbalance in the implementation of the Endangered Species Act.

The underlying legislation will allow the Fish and Wildlife Service one full year to clear out its backlog of Concho water snakes across this Nation. Free from new listing requirements, the service can focus on the recoveries of the species that are under its care and better managing the charges it already has. I hope that the service takes this year off to pay particular attention to the dune sagebrush lizard and work to understand this animal better before it moves to close down thousands of well sites across west Texas while the resulting energy prices are crushing our constituents.

Mr. Chairman, I oppose the gentleman's amendment because the amendment locks in the failed status quo for another year and offers communities around this country like mine no relief from the arbitrary mandates in the Endangered Species Act.

I yield back the balance of my time.

Mr. SABLAN. I move to strike the last word.

The Acting CHAIR. The gentleman from the Northern Mariana Islands is recognized for 5 minutes.

Mr. SABLAN. Mr. Chairman, I rise to express deep concern over the allocations in H.R. 2584, the Interior and Environment appropriations bill for 2012.

To begin, the bill cuts \$1.7 million for technical assistance and maintenance

assistance in the United States territories. These small amounts of money pay big dividends in the islands. The Northern Marianas was just awarded \$1.2 million in technical assistance funding to develop geothermal resources to generate electricity. We pay up to 40 cents per kilowatt-hour now because we have to buy expensive foreign oil to power our generators. Technical assistance funds are helping to develop our own domestic energy resources; and cutting these funds sends us in the wrong direction, back into the arms of foreign oil interests.

I do appreciate the small increases in the bill to fund water and sewer projects in the Northern Mariana Islands and the other territories. I am disappointed, however, that the bill targets the Environmental Protection Agency for overall cuts in the funding that provides Federal assistance to ensure clean air and water for all Americans.

As the ranking member of the Fisheries, Wildlife, Oceans and Insular Affairs Subcommittee, which has jurisdiction over the U.S. Fish and Wildlife Service, I am also troubled over the allocations in this bill which would be devastating for the environment and for the preservation of America's natural heritage. H.R. 2584 provides inadequate funding for the Fish and Wildlife Service at levels 21 percent below fiscal year 2011 and 30 percent below the President's fiscal year 2012 request.

The bill cuts provide a meager \$22 million in funding for the State and tribal wildlife grants program, 64 percent below fiscal year 2011, and 77 percent below the fiscal year 2012 President's request. This is a program that makes small investments now to avoid large expenses later. It provides money to States and tribes to take voluntary conservation actions to stabilize declining fish and wildlife populations now, and this helps avoid endangered species listings later. In my district, these grants help implement our wildlife action plan, conserving wildlife and, I might add, creating jobs.

The bill also cuts the Fish and Wildlife Service's cooperative landscape conservation and adaptive science program 35 percent below the fiscal year 2011 levels and 47 percent below the fiscal year 2012 President's budget. This program supports the work of Federal, State, tribal, and local partners to develop strategies to address climate impacts on wildlife on local and regional scales.

□ 2050

The Northern Mariana Islands and other insular areas are on the front line of climate change. We face the impacts of sea level rise, ocean acidification, and increasing typhoon intensity. We need this program to develop science-based tools and solutions to conserve natural resources and help us adapt to the many negative effects coming at us as the Earth grows hotter. H.R. 2584 also cuts funding for the

National Wildlife Refuge System to 7 percent below fiscal year 2011 and 9 percent below the 2012 request.

The National Wildlife Refuge System is the world's finest network of protected lands and waters. We have refuges in every State and in nearly every territory, including the Northern Mariana Islands. These refuges conserve our fish and wildlife resources, but they also have a huge economic benefit. Millions of people visit refuges each year to hunt, fish, and observe wildlife. The refuge system generates \$1.7 billion in sales for local communities and creates nearly 27,000 jobs annually. Every dollar spent in the refuge system by the Federal Government returns about \$4 to local communities, and we can assume that every dollar we cut means \$4 less for our local communities.

I have introduced legislation, H.R. 2236, that would generate funds for the refuges separate from the appropriations through the sale of semipostal stamps to address operations and maintenance backlog, but this is no substitute for money being cut in H.R. 2584.

Also cut is the Land and Water Conservation Fund, which is used to acquire lands and conservation easements from willing sellers and landowners to provide operational efficiencies and connectivity within the refuges.

At a Fisheries, Wildlife, Oceans and Insular Affairs Subcommittee hearing this year, we heard from stakeholders as diverse as Defenders of Wildlife and the National Rifle Association who recognize the importance of the Land and Water Conservation Fund, which, I might add, is generated by offshore oil and gas drilling revenues. H.R. 2584 provides only \$15 million to this program, 73 percent below fiscal year 2011 levels and 89 percent below the fiscal year 2012 President's request.

I strongly oppose H.R. 2584, which rolls back necessary funding to support hunters, fishermen, recreationists, and local communities who depend on the environment for their livelihoods and which undermines ongoing conservation, public health, and environmental protection for all Americans.

The Acting CHAIR. The time of the gentleman has expired.

Mr. FITZPATRICK. Mr. Chairman, I move to strike the last word.

The Acting CHAIR. The gentleman from Pennsylvania is recognized for 5 minutes.

Mr. FITZPATRICK. Mr. Chairman, I rise today in support of this amendment, which I have cosponsored, that would remove a rider from this bill that would seriously compromise the effectiveness of the landmark Endangered Species Act, which was signed into law almost 40 years ago in 1973.

The extinction rider in this bill is a sweeping action that will prevent the Fish and Wildlife Service from spending any money on listing new plants and animals under the Endangered Spe-

cies Act, designating critical habitat, or upgrading species from threatened to endangered. At the same time, the bill maintains funding for delisting species, creating an incomplete and lopsided endangered species policy.

Mr. Chairman, my constituents in Bucks County, Pennsylvania, and the American people support the important mission of the ESA, and it's not hard to see why. Preserving animals and plants brings countless benefits to people, and a loss of a species can have dangerous and expensive consequences in the future. For example, the U.S. Geological Survey recently estimated that the loss of bats in North America would cost agricultural producers nearly \$4 billion per year, including those in my district. We also never know which species of plants and animals may be important in developing life-saving medicines in the future.

But the ESA's primary success to date has been to prevent the extinction of hundreds of species, including the American alligator, grizzly bear, and gray wolf. Indeed, less than two dozen species have gone extinct under the act, and most of these species were already doomed to extinction by the time they were listed.

Perhaps the most iconic among these species saved by the act is our national symbol, the bald eagle. On June 20, 1782, our Founding Fathers adopted the bald eagle as our national emblem. On the backs of many of our coins we see an eagle with outspread wings. On the Great Seal of the United States, on the seal of this very House of Representatives, and in many places which are exponents of our Nation's authority, we see the same emblem.

Living as it does on the tops of lofty mountains and in river valleys as close as the Potomac, the eagle represents freedom. However, by the mid-20th century, the bald eagle was severely threatened and reduced to just 400 nesting pairs. Bald eagles were declared an endangered species in 1967 in the lower 48 States under a less cohesive, less effective act. Then the ESA was signed into law. As a result of this, on July 4, 1976, the U.S. Fish and Wildlife Service officially listed the bald eagle as a national endangered species. And thanks to the Endangered Species Act, the Fish and Wildlife Service upgraded the bald eagle to threatened status in the lower 48 States in 1995 and officially removed it from the nationwide list in 2007. Today, after decades of conservation effort, the Interior Department reports that there are some 10,000 nesting pairs for us and for future generations to cherish. Because, in large part, of the ESA, my children have had the chance to see a bald eagle in its natural habitat.

This amendment will remove the funding restriction on the listing and limit the funding to what has been spent on these activities in recent years. Additionally, the overall funding amount for the ESA and related programs of \$138 million is significantly

less than in past years, including in fiscal year 2008.

Mr. Chairman, decisions about wildlife management should be made by scientists, not by politicians. Preventing listing is not the answer. We must allow the U.S. Fish and Wildlife Service to do their job and protect species while making improvements to increase the efficiency of this crucial program.

As I close, I implore my colleagues to imagine if the U.S. Fish and Wildlife Service had been restricted from listing the American bald eagle. This majestic creature, without corrective measures, would have been lost only to books and to our national memory.

We have a responsibility to prevent the extinction of fish, plants, and wildlife because once they're gone, they're gone forever and we can't bring them back.

I urge support for this amendment.

Mr. DICKS. Will the gentleman yield?

Mr. FITZPATRICK. I yield to the gentleman from Washington.

Mr. DICKS. I just want to commend the gentleman for an incredibly comprehensive, thoughtful, and credible presentation.

You mentioned the bald eagle. Just a few weeks ago, my grandchildren were out at Hood Canal, where I live, and on the beach three bald eagles came down and landed. It was one of the most remarkable things I have ever seen. And I just want to thank the gentleman for his support, his cosponsorship of this amendment. And I appreciate your credibility and your forthrightness.

Mr. HASTINGS of Washington. Will the gentleman yield?

Mr. FITZPATRICK. I yield to the gentleman from Washington.

Mr. HASTINGS of Washington. I just want to say, because the gentleman made a very good remark, but since we're talking about bald eagles, in our State they're around, and I would invite the gentleman to come to where I live in the desert in central Washington where every fall and winter we see bald eagles. They are truly a majestic bird.

But the point is, again—and I really thank the gentleman for yielding—this debate is not about the Endangered Species Act. This debate here is about trying to get people together so we can make the Endangered Species Act work in a way that will be beneficial to everybody, so that we can repeat the successes that we have had, albeit the successes are only 20 species; but, nevertheless, we ought to be working that way rather than restricting and having restrictions as the current act is.

Mr. FITZPATRICK. I appreciate the gentleman's remarks. I appreciate the invitation. And the way to amend the act is in regular order, not in appropriation.

The Acting CHAIR. The time of the gentleman has expired.

(On request of Mr. HASTINGS of Washington, and by unanimous consent, Mr.

FITZPATRICK was allowed to proceed for 30 additional seconds.)

Mr. FITZPATRICK. I appreciate the invitation, but the way to amend the act is in regular order in the committee, not necessarily through the appropriations process.

Mr. HASTINGS of Washington. Will the gentleman yield?

Mr. FITZPATRICK. I yield to the gentleman from Washington.

Mr. HASTINGS of Washington. As I mentioned in my remarks when I spoke, that certainly is the intent of the committee that I chair that has jurisdiction.

The Acting CHAIR. The time of the gentleman has again expired.

□ 2100

Mr. THOMPSON of California. Mr. Chairman, I move to strike the last word.

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. THOMPSON of California. Mr. Chairman, the amendment before us today corrects a terrible flaw in the underlying bill, a provision that prohibits the endangered species from being listed as endangered. This provision is so bad that it would be funny but for the dangerous effect it would have on imperiled species on the brink of extinction and struggling to survive.

The previous speaker was eloquent in his discussion about the bald eagle. Let's think about what would have happened had this measure been law 44 years ago. The American bald eagle, our national bird and symbol, would be gone. In the 1960s, there were less than 450 nesting pairs of bald eagles. But thanks to the Endangered Species Act, this national symbol was removed from the endangered species list in 2007. And now there are nearly 10,000 nesting pair of bald eagles.

Maybe some of my colleagues side with those who wanted our national bird to be a turkey. But I think I speak for most Americans when I say that I am proud that we saved this national treasure, the American bald eagle, from extinction.

Had this rider been the law of the land in 1979, the American alligator would most likely be gone. But because of the ESA protections, the American alligator population has grown to more than 2 million and continues to thrive, helping local economies throughout the southeast.

The Aleutian goose is another example of the success of the Endangered Species Act. Back in 1967, there were no more than a few hundred of these birds. But thanks to the ESA, the Aleutian goose was fully recovered and successfully delisted in 2001, with a population of more than 100,000 birds in 2008. So successful was the ESA recovery effort that the Aleutian goose is not only thriving, but also being hunted in my district. Just this past hunting season alone, 1,700 acres of land were made available to hunters by the California Department of Fish and Game, not

only pleasing the hunters, but helping the local economy as well.

Other animals that have made a tremendous recovery while listed under the Endangered Species Act include the California condor, the black-footed ferret, and the whooping crane. And of great importance to my district, we are seeing signs of healthy recovery for ESA-listed salmon. This impacts other fishing States as well.

Ironically, this deeply flawed provision does allow funding for the Fish and Wildlife Service to delist recovered species under the act. However, you can't remove protections for recovered species unless they are listed as endangered in the first place and a successful recovery plan is implemented. This measure puts the cart before the horse.

Our bipartisan amendment, which is supported by more than 60 organizations, would strike this extreme provision. It is our responsibility to be good stewards of this Earth and prevent the extinction of wildlife, plants, and fish. The sad truth is that once we lose a species, we will never get it back. That's why we need to allow for science-based policies and recovery plans for imperiled species instead of allowing politics to drive listing decisions and activities.

I recognize that some of my colleagues have strong objections to the Endangered Species Act. But placing a spending rider on this year's Interior appropriation bill is not the answer. If real reform is needed, then let's have an honest debate in the authorizing committee to look at what is working and what's not working under the Endangered Species Act. And let's fix it.

That's a far wiser course than including an extreme policy change that goes back on America's promise to protect our most vulnerable animals and plants and would not be supported by the American public.

I ask that we support the Dicks amendment, this bipartisan amendment, and make sure that we take this extreme policy out of the underlying bill.

Mr. HASTINGS of Washington. Will the gentleman yield?

Mr. THOMPSON of California. I yield to the gentleman from Washington.

Mr. HASTINGS of Washington. I appreciate the gentleman's closing remarks when he said this is not the proper venue to address the Endangered Species Act. That has been my argument, too. I think it should be done in the authorizing committee.

But the fact of the matter is there is no incentive for the stakeholders to sit down if we continue to kick the ball ahead and not seriously look at the Endangered Species Act.

As the chairman said very well in his remarks, this is simply a shot across the bow, not only on this, but on other authorized programs. So we are not picking on these.

The Acting CHAIR. The time of the gentleman from California has expired.

(On request of Mr. HASTINGS of Washington, and by unanimous consent, Mr.

THOMPSON of California was allowed to proceed for 1 additional minute.)

Mr. THOMPSON of California. I thank the gentleman.

This is a shot. It is a shot at the endangered species. You and I both know how important this is in regard to the salmon in our district, something that is very, very important, something that is important to our economy and something that is important to the ecology of not only our State but the ecology of the Nation. We need to work together, and I can suggest that we remove this and get to working together.

Mr. HASTINGS of Washington. Will the gentleman yield?

Mr. THOMPSON of California. I yield to the gentleman.

Mr. HASTINGS of Washington. We share that concern about the salmon. I would point out to the gentleman that the salmon runs in the Snake River and the tributaries are coming back in greater number, which would suggest that the species is being recovered. And yet we are waiting for a judge to make a decision.

Mr. THOMPSON of California. Remember, you are very well aware of the salmon issue and how there have been a number of attempts over the matter of water that, if they had been successful, had it not been for the Endangered Species Act, there wouldn't be any fish, because without water, as you know, there are no fish.

Mr. HASTINGS of Washington. If the gentleman will continue to yield, I can't argue with the gentleman. I'm simply saying we need to look at this. It has been 23 years.

The Acting CHAIR. The time of the gentleman from California has again expired.

(On request of Mr. HASTINGS of Washington, and by unanimous consent, Mr. THOMPSON of California was allowed to proceed for 30 additional seconds.)

Mr. THOMPSON of California. I thank the gentleman.

Mr. HASTINGS of Washington. Will the gentleman yield?

Mr. THOMPSON of California. I yield to the gentleman.

Mr. HASTINGS of Washington. The argument is not about the Endangered Species Act. The argument is about the serious business of sitting down and reauthorizing an act that has not been reauthorized since the 1980s.

Mr. THOMPSON of California. I suggest we do it in the authorizing bill.

Mr. HASTINGS of Washington. I totally agree with you, and I said that in the opening remarks. The gentleman from Washington suggested that, and I totally agree with him.

Mr. THOMPSON of California. I yield back the balance of my time.

Mr. DENT. Mr. Chairman, I move to strike the last word.

The Acting CHAIR. The gentleman from Pennsylvania is recognized for 5 minutes.

Mr. DENT. I rise tonight in support of the Dicks-Fitzpatrick amendment. I voted for this same language in the Appropriations Committee markup a few

weeks ago, and we have all heard some pretty compelling arguments here tonight about some challenges with the Endangered Species Act. And as has been previously stated by Mr. THOMPSON and others here tonight, I agree with those who said that the proper venue for this discussion is in the authorizing committee. I have great confidence in Chairman HASTINGS, that he would take a thoughtful and sincere look at the act to make reforms that I think many people would agree are needed. But again, I don't think this is the right place to do it.

Again, I support the underlying bill. I think overall this legislation, this Interior bill, while it is not everything to everybody, and certainly the funding levels might not be where some people would like, Chairman SIMPSON has done a commendable job putting a bill together.

But I think this language in the underlying bill should be stricken as proposed by Mr. DICKS and Mr. FITZPATRICK, and so I urge my colleagues to support the amendment.

I yield back the balance of my time.

Mr. KIND. Mr. Chairman, I move to strike the last word.

The Acting CHAIR. The gentleman from Wisconsin is recognized for 5 minutes.

Mr. KIND. Mr. Chairman, as one of the former cochairs of the Congressional Sportsmen Caucus, and very active in that organization, I rise in support of the Dicks amendment and in opposition to the underlying bill.

It is unfortunate that Ranking Member DICKS has to offer an amendment in order to strip out a policy rider of this magnitude in an appropriation bill. We just had a short discussion about how this would be more appropriate in the authorizing committee for a further vetting of this issue. And I think there are some legitimate issues that we need to get into, but not in the appropriation bill. This is one of many policy riders that have been jammed into this appropriation bill, from the assault on the Clean Air and Clean Water Acts to allowing mining near the Grand Canyon, one of the great natural treasures we have as a Nation, and on and on and on. And this extension rider that was included in the base bill would prevent the Fish and Wildlife Service from spending money, any money, on the listing of new animals or plants under the Endangered Species Act.

So to claim that this doesn't directly affect and attack the Endangered Species Act tonight is mind-boggling to me.

And yet in my home district in western Wisconsin, a very beautiful national wildlife refuge, the Necedah Wildlife Refuge, with three endangered species located there—from the gray wolf to the cardinal blue butterfly to the whooping crane—because of the protection that they have had, they are now increasing in population. The wolf to the extent that they are on the

verge of being delisted in Wisconsin, another success story. And the whooping crane is making a resurgence, all because of the protections afforded under the Endangered Species Act.

And now to claim in this bill that we are going to prevent additional funding in order to locate those species, whether animal or plant or fish, from falling under the protection, this is not the appropriate vehicle. But there is even more in this legislation that's disconcerting. The deep cuts to long-standing conservation, the Land and Water Conservation Program that has traditionally enjoyed bipartisan support, is deeply disturbing—an 80 percent proposed cut to the Land and Water Conservation Fund.

□ 2110

And I'm glad that the committee earlier this night adopted the Bass amendment to at least restore \$20 million to the Land and Water Conservation Fund. But why are we cutting anything from that vital program? This isn't even funded by the taxpayers.

This comes from oil royalties from a grand bargain that we struck with oil and gas companies so they can explore and extract these natural resources from our public lands. They agreed that for the right of doing that, they would contribute to the Land and Water Conservation Fund, funds that would be used then for the enhancement of conservation programs and the protection and preservation of public lands in this country. And to come with a bill now to cut 80 percent of that out of oil royalties does not make sense. Or, the 7.5 percent under the Wildlife Refuge System.

I know Chairman DICKS has been a champion of the refuge system for many years. It's a system that affects virtually every congressional district. It brings countless revenue into our districts, plus jobs. And with the huge backlog of maintenance and operation, another 7.5 percent cut will put them in the hole.

A \$7 million cut from the National Park System budget, a 21 percent cut in the Fish and Wildlife Service, a 64 percent cut in the State Wildlife Grants Program, yet back home some of the greatest conservationists that I know are my hunting and fishing buddies, because they get it. They understand if we just go and use the resources and deplete it, from the wildlife to the fish to the waterfowl, that there's not going to be that recreational enjoyment that so many of us get in the outdoor recreation community.

That's why it was no surprise that earlier this month over 640 outdoor recreation entities and preservation entities signed a letter to the chairman and the leadership and to everyone in our office decrying the spending cuts in these programs that we have before us this evening, because they know that these programs aren't something you can just turn off like a spigot. These

programs require the continuity of funding and the continuity of assistance in order to make the progress that's necessary.

And so these draconian cuts that are being proposed right now are going to set back the cause of conservation, whether it's wildlife or land in the country, for many, many years, and that's unfortunate. Because these same people also understand the economic impact that these programs have.

Outdoor recreation contributes over \$730 billion annually to the U.S. economy. It supports over 6½ million jobs. One out of every 20 private sector jobs are affiliated with outdoor recreational opportunity, 8 percent of consumer spending. In my own State of Wisconsin, hunting and fishing alone supports over 57,000 jobs and \$400 million in State revenue.

So if we're really serious about addressing the soft economy we have now and doing what we can to get the economy on track, creating good-paying jobs, this is the wrong place we should be looking in the budget for drastic cutbacks.

I've been one of the leaders in this place for significant farm bill reform to get at the outdated agriculture subsidies.

The Acting CHAIR. The time of the gentleman from Wisconsin has expired. (By unanimous consent, Mr. KIND was allowed to proceed for 1 additional minute.)

Mr. KIND. For years, I have been leading the effort for farm bill reform to end these taxpayer subsidies going to a few but large agribusinesses that distort the market, distort trade policies. It's not helping our family farmers. Finally discussion is starting to take place seriously to actually scrub those programs. Yet when I've led this cause in the past, I remember not too long ago a Member in this body accused me of being the Osama bin Laden of agriculture policy. Yet today, if we had taken actions 10 years ago when many of us were acting on it, maybe we wouldn't be finding ourselves in this huge fiscal hole that we have today.

So not only the policy riders but the spending cuts that are being proposed are the wrong direction for our Nation to go. It will jeopardize these vital programs—programs, again, that have enjoyed wide bipartisan support. We ought not be balancing the budget on their backs.

Over the last 30 years, funding for conservation programs has gone from 1.7 percent of Federal funding to less than .6 percent. They get it at the altar of fiscal responsibility. We can't go any deeper.

I encourage Members to support the Dicks amendment and oppose the underlying bill. We have to do a better job.

I yield back the balance of my time. Mr. PEARCE. I move to strike the last word.

The Acting CHAIR. The gentleman from New Mexico is recognized for 5 minutes.

Mr. PEARCE. Thank you, Mr. Chairman.

I reluctantly rise to oppose the gentleman from Washington's amendment and support the underlying bill. A lot of compelling arguments have been made tonight to support the Endangered Species Act without interruption. They talk about the bald eagle and the compelling story about seeing those magnificent birds, and those are visual images that we all like.

But there's a side to the Endangered Species Act that is not being told. That's the side where one group just this year filed 1,000 petitions at one time to list new species. They know that their lawyers get reimbursed from the Federal Government every time they bring suit, and so they're happy to bring these actions which are destroying jobs in the West.

For instance, in the Second District of New Mexico, a suggested listing was given this year on the sand dune lizard, a small brown lizard that I've seen in the sand hills since I was going up there. They were plentiful then; they're about the same number now, but they have been listed as endangered.

And people didn't think much of it. And then they began to read the reports that anything that disturbs the surface of the ground would represent a potential threat to the habitat of the lizard and would thereby be prohibited.

Disturb the ground, they ask. What does that mean? Well, that means oil and gas activity. That means that \$2.8 billion investment for nuclear enrichment that is taking place in southern Lea County, just taking place now, creating jobs for the first time in the nuclear industry that has been dormant for 30 years, would be shut down because they disturb the ground.

It would stop the high line wires from being put up and the electric utility crews from driving to the homesteads miles and miles away from the nearest town because they would disturb the ground. They could not even check the power lines to make sure electricity is going to these remote areas.

This is the Endangered Species Act that we're seeing.

People would come to me in disbelief and say, Mr. PEARCE, it is not true? They couldn't kill our jobs with a lizard, could they? What about us as humans? What do they say?

I said, Take a look at the San Joaquin Valley. Twenty-seven thousand farmers put out of work with a 2-inch Delta smelt that we could have kept alive in holding ponds and bred by the millions and put into the rivers and go ahead and use the rivers for irrigation. But instead, a judge found that we had to shut down the entire agricultural product.

We began to import vegetables from areas that spray contaminants that we are not allowed to use in this Nation, a less safe food supply. We kill 27,000 jobs. We caused jobs to be created

somewhere else, less safe food supply, all for a 2-inch minnow that could have been kept alive in some other fashion.

We also have a Lesser prairie-chicken that threatens the oil and gas jobs in our area. They're saying that the bird might not fly under or over those lines, so we can't put up electric lines across. Then, bury the lines, people say. Well, then the lizard wouldn't go across the area that's been disturbed by burying the lines.

It's easy to see why people are saying that the Endangered Species Act is not functioning properly and we've got to stop it. We are spending \$3.5 trillion a year in our government and we're bringing in \$2.2 trillion. Part of the problem is we've killed enough of our jobs, we've killed enough of our economy that we're in severe debt and deficit crisis.

Now, one of the problems is we've systematically eliminated the timber industry because of a spotted owl. We eliminated those 27,000 farmer jobs in the San Joaquin Valley. We've got the salmon swimming upstream, and now it's threatening that we've got to tear down all the hydroelectric dams. And the list goes on and on.

It is time for us to say that we can preserve the species and create jobs at the same time. That's not an unreasonable request. But to those lawyers making \$350 a hour, they don't care if it's reasonable or not. To the Fish and Wildlife Service, they arrogantly told the people in New Mexico, No, we didn't do an economic study to see the cost on the jobs. We're not required to. These are things that are making people say enough is enough.

It's in my district that 900 people showed up to protest at one of the hearings on the listing of the lizard; 900 people coming out, and the Fish and Wildlife Service came to me in nervousness before the meeting and said, Would you speak to those who couldn't get into the meeting? They're agitated. I said, People do get agitated when you start killing their careers, when you start taking the jobs away from them.

There's a side to the Endangered Species Act that is being dealt with here tonight. I support the underlying bill and oppose the amendment.

I yield back the balance of my time.

□ 2120

Mrs. CAPPS. I move to strike the last word.

The Acting CHAIR. The gentlewoman from California is recognized for 5 minutes.

Mrs. CAPPS. Mr. Chairman, I am in favor of Mr. DICKS' amendment to remove this destructive and shortsighted anti-wildlife rider from the underlying bill.

The rider would gut the Endangered Species Act, as we've been discussing—a law that has worked for 40 years to successfully conserve our Nation's plants and animals. It would do this by blocking the Fish and Wildlife Service from new listings and bar the designa-

tion of critical habitat for currently listed species.

As has been said on both sides of the aisle this evening, this provision creates a one-way path to weakening wildlife protections by allowing the service to delist and downgrade a species' status from endangered to threatened but not to list new species. Unless a species is listed, it receives no protection under the ESA. Currently, the service has identified over 260 species that warrant protection but cannot be listed due to a lack of Federal resources. That's 260 species of plants and animals found across the Nation that are in dire need of assistance and are at risk of disappearing forever.

Mr. Chairman, America's native plants and animals are already in serious trouble—under constant threat from toxic pesticides, air and water pollution, habitat destruction, and climate change; but this shortsighted and irresponsible rider may prove to be the most immediate and serious threat of all, sending countless species into extinction and destroying America's great conservation legacy.

It is our responsibility here to protect and conserve our Nation's most precious resources for future generations, and of course, that's why the Endangered Species Act was written. It codifies our commitment to good stewardship, and it preserves what we hold dear for the benefit of our children and our grandchildren. Since its initiation, we've witnessed incredible comebacks. Animals that were once on the verge of disappearing forever are thriving once again.

Because of the Endangered Species Act and other successful partnerships, bald eagles have returned, not only to Washington State, but to the Channel Islands off the coast of my congressional district. Just a few years ago, a pair of nesting bald eagles produced the first wild-born chicks in 50 years on Santa Cruz Island.

Also on the Central Coast, we've seen California condors and peregrine falcons soaring through our skies once again. The Guadalupe fur seal, which was hunted to near extinction, can now be seen swimming off the Channel Islands. There are similar success stories for the southern sea otter and the blue whale, both found in the Central Coast waters of California; and the return of Island Foxes, whose population dropped down to less than 100, is now back above 1,200.

Mr. Chairman, of course there are so many examples across the country—Florida panthers, gray wolves, grizzly bears—and hundreds more species that have not gone extinct after receiving protection under the act. These species can't wait any longer, and we can't let them disappear forever on our watch.

I strongly urge my colleagues to support Mr. DICKS' amendment to strike this irresponsible provision in the bill. We can and must do better. Our children and our grandchildren are depending upon us.

I yield back the balance of my time.

Mr. BISHOP of Utah. Mr. Chairman, I move to strike the last word.

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. BISHOP of Utah. I rise to support Mr. DICKS' idea but not the process he is using to get there.

It is one of the amazing things as you look about the debate on this particular amendment. It's like ships passing in the night—getting close but never actually touching because everyone who has spoken so far is saying the same thing: that we want to have an Endangered Species Act that works. This needs to be fixed or amended and changed in some way to make it work better, to involve the entire process so that everyone is working towards the same goal; but for some reason, it flat out is not happening, and it's not happening because we have violated the process.

Everyone has said this is not the right place to try and fix the Endangered Species Act. That's also true, but it's the only process that's allowed because we have violated our own intent. Appropriators are supposed to appropriate funds to programs. Authorizers are supposed to create the programs and then every so often reauthorize those programs to make changes based on the need or to make sure that we are moving in the proper direction.

Let me introduce you, or at least remind you, of John Gochnauer—one of my favorite baseball players at the turn of the century with the Cleveland Indians. He was good enough to play regular shortstop for Cleveland, although the first year he played he committed 48 errors, and his batting average was 187. He was still good enough to stay around for the next year when, this time, his errors were just slightly under 100—he had a hard time hitting the first baseman when he threw—and his batting average was, once again, 187.

I say that specifically because the most inept player ever to put on spikes and play Major League Baseball had a batting average of 187. The Endangered Species Act has listed over 2,000 species and saved 21 for a batting average of 10 if you round up. It's actually .009. That clearly indicates we can do better, and we need to do better.

So the question has to simply be why aren't we doing better? Why can't we fix this problem and have a better success rate?

The answer is very simple:

For 23 years, we have put riders on this particular appropriations act to fully fund the old program, which has prohibited the authorizing committee to ever get people together to make the program better.

Chairman HASTINGS has simply said his goal is to provide a process that improves the system—and there is room for improvement of the system—but to do that, you've got to get the players to sit down in the authorizing committees where this is supposed to be

worked out. The Endangered Species Act needs to be expanded, needs to be fixed, needs to zero in to create people working together for a common goal.

I am actually grateful for Representative DICKS and Representative SIMPSON and what they have done in this bill. This amendment in the underlying bill does not destroy the Endangered Species Act. It doesn't even cut the funding for those species that are already being worked on. All it does is provide a change in the process to insist that people have to do what we should have been doing for the last 23 years—going to the authorizing committee and fixing the act, not just kicking the can down the road by funding it year, after year, after year, after year, while only 21 species have recovered over the 2,000 that could have and should have been.

I'm sorry. That's what everyone is saying. We all want species to be preserved and recovered, but we all are failing in the process, and after 23 years, we should have learned what we have been doing in the past doesn't work. Maybe if we went back to the way the system was intended to be and was designed to function, we could actually move forward in this entire issue, which, oddly enough, is what everyone is saying.

Mr. Chairman, I yield back the balance of my time.

Mr. DICKS. I move to strike the requisite number of words.

The Acting CHAIR. Without objection, the gentleman from Washington is recognized for 5 minutes.

There was no objection.

Mr. DICKS. I will do this very briefly.

As I recall, from 1995 to 2007, the other side—the majority party today—was the majority party then, and I don't remember any great effort on the Endangered Species Act. I welcome it. I welcome that any act can be made better. Now you guys are in charge again, and you have another opportunity. I believe Mr. BISHOP has been on the committee for quite a long time. I'm going to go look in his reform bill in the RECORD to see what has been happening here.

Mr. HASTINGS of Washington. Will the gentleman yield?

Mr. DICKS. I yield to the gentleman from Washington State, from the Natural Resources Committee.

Mr. HASTINGS of Washington. I thank the gentleman for yielding.

I appreciate the gentleman's remarks. I would remind him, from the time that we did get control of Congress in 1995 until your side gained control after the 2006 election, that was the issue that the then-chairman—the last chairman of the Natural Resources Committee, Richard Pombo from California—was working on. As a matter of fact, I think it was in 2005 that we did pass ES reform out of this House.

□ 2130

It did not go anyplace in the other body. So history tends to repeat itself.

Mr. DICKS. Former Senator Kempthorne worked on it.

Mr. HASTINGS of Washington. He did, as did Senator CRAPO from Idaho.

Here is the problem: The problem is that through all of the efforts of Chairman Pombo of trying to get this enacted and he couldn't get it through the Senate, then you know what the Appropriations Committee did?

Mr. DICKS. Reclaiming my time, because I can't go on forever, I just would say nobody is stopping you. Hold your hearings. Have your meetings. Bring up the witnesses, but don't stop listing 260 candidate species until you get the job done.

Mr. HASTINGS of Washington. Will the gentleman yield?

Mr. DICKS. I yield to the gentleman.

Mr. HASTINGS of Washington. I've been chairman now for a little over 6 months. I have every intention to do that, and I want to work with the gentleman on this.

Mr. DICKS. I want to be involved in this.

Mr. SIMPSON. Will the gentleman yield?

Mr. DICKS. I yield to the gentleman from Idaho, my good friend and the chairman and former ranking member, one of the best ranking members I've ever had.

Mr. SIMPSON. I thank the gentleman for yielding.

Mr. BISHOP had it exactly right. We all want the same thing. We want the Endangered Species Act, but we want the Endangered Species Act to work. And as you mentioned, Senator Kempthorne worked on it very hard, got it through the Senate when he was a Senator before he became Governor of Idaho. And it was some Republicans frankly in the House that stopped it because they didn't think it went far enough.

Unfortunately, if we just continue to do what we've done in the past, we're going to get exactly what we've gotten in the past, and that is no incentive for people to sit down and say we've got to work on this and we've got to get it done. And that's all we're trying to do.

Mr. MORAN. Will the gentleman yield?

Mr. DICKS. I yield to the ranking member.

Mr. MORAN. I do think it might be instructive that Mr. Pombo is no longer among our ranks and the principle reason is the Endangered Species Act authorization that he attempted to write which was so destructive of the original intent of the Endangered Species Act of 1965, and it was a Republican Senate that defeated it.

Mr. HASTINGS of Washington. Will the gentleman yield?

Mr. DICKS. I yield to the gentleman from Washington.

Mr. HASTINGS of Washington. I just want to respond to my friend from Virginia.

The bill passed, if my memory serves me correctly, with bipartisan support.

But, yes, of course there are political risks in doing whatever we're doing in

this body; and we all face that. After all, this is the people's government. But the point is it needs—and we've been saying over and over, the ESA needs to be updated.

It's been 23 years, for goodness sake.

Mr. DICKS. No one is objecting. I agree. We should look at how to improve the ESA. I don't like to hear these examples of where the process has not been able to be worked out. I have had to go through this as you have in the Pacific Northwest with the spotted owl, the marbled murrelet, salmon, et cetera. Now, those are starting to recover. We're making some progress, but I still believe we can make this act better.

I just think by taking out the ability to list and to have critical habitat, we're risking some of these species that are close to extinction.

And remember this: it's also about biodiversity, the web of life. We don't know how all of these things relate and whether something can be created, a medicine that could save lives in the future. And that's why trying to protect these species is an important thing.

The Acting CHAIR. The time of the gentleman from Washington has expired.

(On request of Mr. SIMPSON, and by unanimous consent, Mr. DICKS was allowed to proceed for 1 additional minute.)

Mr. DICKS. It's important for civilization, for humanity. We're creatures here, too. We depend on a lot of other animals in order to survive. And so this goes beyond just a legislative "it's difficult." This is down and dirty. This is very important. This is very important to survival.

Mr. SIMPSON. Will the gentleman yield?

Mr. DICKS. I yield to the gentleman from Idaho.

Mr. SIMPSON. I don't disagree with anything the gentleman just said. It's also important to remember that this amendment would take the caps off that have been in place since President Clinton and would undermine the Fish and Wildlife Service's budget to a great degree because it would then be controlled by the courts and by lawsuits. That's not where we want to go.

Mr. DICKS. We'll fix it in conference.

I yield back the balance of my time.

Ms. HIRONO. Mr. Chair, I rise in support of the Dicks-Fitzpatrick-Thompson-Hanabusa amendment to delete the Extinction Rider that was improperly added to this legislation. This rider, which has no place in an appropriation bill, prevents the Fish and Wildlife Service from spending any money on listing new plants and animals under the Endangered Species Act, designating critical habitat, or upgrading species from threatened to endangered.

This is a big deal to me because Hawaii happens to have the highest number of endangered species of any state in the nation. This is due, in large part, to the unique species that evolved in Hawaii because of its location 2,400 miles from the nearest land

mass. In fact, Hawaii's 33 endangered bird species represent 42 percent of the U.S. bird species listed as endangered. All of these live in my district. For example, we have a beautiful endangered forest bird called the Hawaii 'Akepa. Thanks to the Endangered Species Act, the populations of this bird are currently stable on Hawaii Island, although it is very rare on the island of Maui. The 'Akepa and the other 32 Hawaiian bird species listed as endangered are threatened by loss of habitat, a warming climate, and the onslaught of introduced species.

In fact, 69 of the 265 candidate species for addition to the Endangered Species Act—26 percent—are found in Hawaii. Most, like the 'Akepa, are found nowhere else in the world.

Another example of an Endangered Species Act success is the threatened Hawaiian green sea turtle—or honu as we call it in Hawaii. In the 1970s, before being listed, the Hawaiian green sea turtle was in steep decline because it was regularly hunted and eaten. Since being protected by the Endangered Species Act, the numbers of green sea turtles have increased dramatically—by 53 percent over the past 25 years! Despite this success, the honu remains vulnerable because its primary nesting habitat in the Northwestern Hawaiian Islands could be lost to sea level rise caused by climate change.

As members of Congress, we have a special responsibility to protect and be stewards of the land, the water, the air, and the species with which we share this world. There is no recovery from extinction. Each time we lose a unique creature or plant that evolved over thousands or millions of years, we make the world a poorer place and rob future generations.

Ms. SLAUGHTER. Mr. Chair, I rise today to defend our democracy from the egregious attacks on our legislative process that are abundant in the underlying legislation. The FY 2012 Interior Appropriations bill is rife with policy riders that legislate on an appropriations bill, which is in violation of Rules of the House. As a long serving Member of the House Rules Committee, I have seen a fair share of policy riders attached to legislation, but never in the history of my time here in the House have I seen such blatant disregard for the House rules and departure from regular legislative order.

There are dozens of these anti-environment policy riders—or should I say these pro-industry earmarks that are included in the underlying legislation. There is an entire stand-alone bill included in this must-pass legislation—an entire bill that couldn't muster enough support to be passed into law on its own virtues—that is standing in our way from funding the government in the upcoming fiscal year.

Last Thursday in the Rules Committee I offered a motion to amend the rule to strike the waiver that protects these offensive riders from points of order. If the Majority had voted in support of regular order and adopted my amendment, the Members of this House would have had the opportunity to raise points of order against these assaults on our environment here on the floor and strike them from the bill. Predictably, though, my motion failed on a party-line vote.

If the Majority had followed regular and adopted my amendment to the rule in Committee, Members of the House could have been able to strike riders that:

Put more toxic mercury, arsenic, and lead into our air and puts our children's health at risk; Allow more soot pollution in our air;

Block EPA from moving forward with carbon pollution standards for new vehicles after 2016;

Put as many as 34,000 lives at risk;

Threaten the health of millions of Americans;

Threaten the health of America's children, elderly citizens and other vulnerable populations;

Block EPA from limiting dangerous air pollution from livestock production and manure management;

Ban EPA from doing its job to enforce the Clean Air Act in Texas;

Exempt oil companies from complying with Clean Air Act standards;

Put the drinking water of 117 million Americans at risk;

Prevent EPA from protecting communities' clean water supplies;

Allow unregulated discharge of pesticides directly into waterways;

Threaten the health and environment of communities across Appalachia by blocking a number of protections against the destruction and pollution from mountaintop removal coal mining;

Put thousands of people living near coal ash pools at risk of toxic disasters;

Put Americans' drinking water and waterways at risk of sewage and urban runoff pollution;

Block EPA from moving forward with new rules to minimize the adverse environmental impacts of power plant cooling water intake structures;

Block protections for more than 1 million acres of land around the Grand Canyon;

Put public lands at risk of destruction;

Put the Delaware Water Gap and parts of the Appalachian Trail at risk of development; and

Put endangered species at risk of harmful pesticides.

So here we are tonight, fighting for our fellow citizens' right to clean air and clean drinking water with one of the few tools we have left as the minority in the House—our voices and the privilege to represent our constituents on the House floor. We are fighting to uphold decades of successful, bipartisan environmental laws that have protected our environment and improved our public health.

Each policy rider goes against our nation's values and our belief that we solve our toughest problems through shared sacrifice and working together. When these policy riders are all combined, they place a suffocating burden on the American people while rewarding special interests and the lobbyists who walk these halls.

Under this bill, the nation's clean air protections would be devastated, leaving our children exposed to life-threatening pollution. This bill would cause hundreds of thousands more Americans to suffer from the dangerous and deadly impacts of air pollution. The bill's policy riders prevent the EPA from doing its job to protect public health and won't cut one dime from the deficit.

The EPA has been actively engaged in helping clean up the air in Tonawanda, New York, which I proudly represent, and I stand by the agency's ability to continue doing the good work to improve the quality of life for

those residents. Rolling back the Clean Air Act, as is proposed under this legislation, will lead to more air pollution, more hospital visits and more deaths. We must support the Clean Air Act so that all Americans can breathe easier.

I will mention one more of these abhorrent policy riders that should be struck from the bill. There is a rider in this legislation that will effectively open up a million acres of national forest and other public land around Grand Canyon National Park to new uranium mining claims. Democrats have concerns about maintaining the integrity of the Grand Canyon and the effect of uranium mining on water quality, not to mention the spectacle of auctioning off a national treasure with the proceeds going to mostly foreign-owned entities, including Russia's state atomic energy corporation and South Korea's state-owned utility. America is not for sale, Mr. Chair, even if Republicans would like us to believe otherwise.

Mr. Chair, I stand firmly in opposition to the Majority's daily attempts to whittle away at the rules of the House. I urge my colleagues to oppose the Majority's protection of policy riders that endanger our public health and environment in favor of private interests, and to oppose the underlying legislation.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Washington (Mr. Dicks).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. DICKS. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Washington will be postponed.

The Clerk will read.

The Clerk read as follows:

CONSTRUCTION

For construction, improvement, acquisition, or removal of buildings and other facilities required in the conservation, management, investigation, protection, and utilization of fish and wildlife resources, and the acquisition of lands and interests therein, \$11,804,000, to remain available until expended.

LAND ACQUISITION

For expenses necessary to carry out the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-4 et seq.), including administrative expenses, and for acquisition of land or waters, or interest therein, in accordance with statutory authority applicable to the United States Fish and Wildlife Service, \$15,047,000, to be derived from the Land and Water Conservation Fund and to remain available until expended, of which, notwithstanding 16 U.S.C. 4601-9, not more than \$4,000,000 shall be for land conservation partnerships authorized by the Highlands Conservation Act of 2004, including not to exceed \$120,000 for administrative expenses.

COOPERATIVE ENDANGERED SPECIES

CONSERVATION FUND

For expenses necessary to carry out section 6 of the Endangered Species Act of 1973 (16 U.S.C. 1534 et seq.), \$2,854,000, to remain available until expended, to be derived from the Cooperative Endangered Species Conservation Fund.

NATIONAL WILDLIFE REFUGE FUND

For expenses necessary to implement the Act of October 17, 1978 (16 U.S.C. 715s), \$13,980,000.

NORTH AMERICAN WETLANDS CONSERVATION FUND

For expenses necessary to carry out the provisions of the North American Wetlands Conservation Act (16 U.S.C. 4401 et seq.), \$20,000,000, to remain available until expended.

AMENDMENT OFFERED BY MR. GRIFFIN OF ARKANSAS

Mr. GRIFFIN of Arkansas. I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 10, line 21, insert after the dollar amount the following: "(increased by \$3,000,000)".

Page 65, line 19, insert after the dollar amount the following: "(reduced by \$3,000,000)".

The Acting CHAIR. The gentleman is recognized for 5 minutes.

Mr. GRIFFIN from Arkansas. Mr. Chairman, I rise to offer an amendment which will leverage our limited resources for wetlands and wildlife conservation.

My amendment would transfer \$3 million to the North American Wetlands Conservation Fund, or NAWCA, by reducing the EPA's operations and administration budget by the same amount.

The EPA has been overfunded in recent years, and I appreciate Subcommittee Chairman SIMPSON's efforts to bring the agency's budget back down to size.

This amendment makes a reasonable reduction to the EPA's administrative budget in favor of wetland conservation.

Since this organization was established in 1989, more than 1,800 projects have led to the conservation of over 24 million acres of wetlands across North America. Each of these projects is funded through a public/private partnership. And for every dollar of the organization's money that is spent in my home State of Arkansas, private sources and foundations have given \$4 in matching funds.

In Arkansas alone, 12 of these projects are either completed or currently under way. And these projects have conserved over 64,000 acres of wetlands.

Make no mistake, this success story is not limited to Arkansas. Wetlands, wildlife, and outdoorsmen in every single State in the country have seen the benefits of this conservation effort.

Arkansas sits in the cradle of the Mississippi flyway, a migration route used by waterfowl as they fly to the southern United States each autumn. Migratory waterfowl and other birds often settle in the wetlands along the White River and Arkansas River, and the health of these habitats is closely tied to the health of the wildlife which inhabit them.

This amendment would improve the condition of our Nation's wetlands and wildlife. This is important to sportsmen, conservationists, and anyone who enjoys the American outdoors.

I urge my colleagues to support this commonsense conservation amendment.

I yield back the balance of my time.

Mr. MORAN. Mr. Chairman, I rise in opposition to the amendment.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. Mr. Chairman, I have the voting record from February 16. I know the gentleman will recall H.R. 1 and the debate that ensued.

In H.R. 1, the North American Wetlands Conservation Fund was zeroed out, and so I had an amendment to restore \$50 million to the North American Wetlands Conservation Program. What I find curious—confusing—is that the very gentleman that now wants to put money into the program voted "no" against putting the \$50 million into the North American Wetlands Conservation Program back in the spring.

Now, I do think it's an important program. I would like to see it continued. But I do have a problem with the fact that what we're doing when we want something to be funded, we take it out of the management of agencies—\$3 million, \$5 million, \$6 billion—and when these amendments pass, you have a very damaging cumulative effect upon the ability of the agency to banish these programs. If this were to pass, we're now at \$8 million that has been taken out of the management of EPA.

So I would have to oppose the amendment. And I'm not sure how strongly the gentleman feels about it since he voted against restoring the money in February, as did a great many Members of the body, unfortunately, because it is a good program.

I yield back the balance of my time.

□ 2140

Mr. SIMPSON. I move to strike the last word, Mr. Chairman.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. Mr. Chairman, I am prepared to accept the amendment. While the gentleman from Virginia offered an amendment on H.R. 1, which was several months ago, it was \$50 million. We didn't have that kind of money. Because of the bipartisan support for this program, we did fund it to keep it alive at \$20 million. And I have no problem putting the additional funding in, if the gentleman requests, depending on where he takes it from. So I support the gentleman's amendment and would hope that my friend from Virginia would think twice and support this amendment.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Arkansas (Mr. GRIFFIN).

The amendment was agreed to.

The Acting CHAIR. The Clerk will read.

The Clerk read as follows:

MULTINATIONAL SPECIES CONSERVATION FUND

For expenses necessary to carry out the African Elephant Conservation Act (16 U.S.C. 4201 et seq.), the Asian Elephant Conservation Act of 1997 (16 U.S.C. 4261 et seq.), the

Rhinoceros and Tiger Conservation Act of 1994 (16 U.S.C. 5301 et seq.), the Great Ape Conservation Act of 2000 (16 U.S.C. 6301 et seq.), and the Marine Turtle Conservation Act of 2004 (16 U.S.C. 6601 et seq.), \$7,875,000, to remain available until expended.

STATE AND TRIBAL WILDLIFE GRANTS

For wildlife conservation grants to States and to the District of Columbia, Puerto Rico, Guam, the United States Virgin Islands, the Northern Mariana Islands, American Samoa, and federally recognized Indian tribes under the provisions of the Fish and Wildlife Act of 1956 (16 U.S.C. 742a et seq.) and the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.), for the development and implementation of programs for the benefit of wildlife and their habitat, including species that are not hunted or fished, \$22,000,000, to remain available until expended: *Provided*, That of the amount provided herein, \$2,000,000 is for a competitive grant program for federally recognized Indian tribes not subject to the remaining provisions of this appropriation: *Provided further*, That the Secretary shall, after deducting \$2,000,000 and administrative expenses, apportion the amount provided herein in the following manner: (1) to the District of Columbia and to the Commonwealth of Puerto Rico, each a sum equal to not more than one-half of 1 percent thereof; and (2) to Guam, American Samoa, the United States Virgin Islands, and the Commonwealth of the Northern Mariana Islands, each a sum equal to not more than one-fourth of 1 percent thereof: *Provided further*, That the Secretary shall apportion the remaining amount in the following manner: (1) one-third of which is based on the ratio to which the land area of such State bears to the total land area of all such States; and (2) two-thirds of which is based on the ratio to which the population of such State bears to the total population of all such States: *Provided further*, That the amounts apportioned under this heading shall be adjusted equitably so that no State shall be apportioned a sum which is less than 1 percent of the amount available for apportionment under this heading for any fiscal year or more than 5 percent of such amount: *Provided further*, That the Federal share of grants shall not exceed 50 percent of the total costs of such projects: *Provided further*, That the non-Federal share of such projects may not be derived from Federal grant programs.

ADMINISTRATIVE PROVISIONS

The United States Fish and Wildlife Service may carry out the operations of Service programs by direct expenditure, contracts, grants, cooperative agreements and reimbursable agreements with public and private entities. Appropriations and funds available to the United States Fish and Wildlife Service shall be available for repair of damage to public roads within and adjacent to reservation areas caused by operations of the Service; options for the purchase of land at not to exceed \$1 for each option; facilities incident to such public recreational uses on conservation areas as are consistent with their primary purpose; and the maintenance and improvement of aquaria, buildings, and other facilities under the jurisdiction of the Service and to which the United States has title, and which are used pursuant to law in connection with management, and investigation of fish and wildlife resources: *Provided*, That notwithstanding 44 U.S.C. 501, the Service may, under cooperative cost sharing and partnership arrangements authorized by law, procure printing services from cooperators in connection with jointly produced publications for which the cooperators share at least one-half the cost of printing either in cash or services and the Service determines the cooperator is capable of meeting accept-

ed quality standards: *Provided further*, That the Service may accept donated aircraft as replacements for existing aircraft.

NATIONAL PARK SERVICE

OPERATION OF THE NATIONAL PARK SYSTEM

For expenses necessary for the management, operation, and maintenance of areas and facilities administered by the National Park Service and for the general administration of the National Park Service, \$2,240,152,000, of which \$9,832,000 for planning and interagency coordination in support of Everglades restoration and \$97,883,000 for maintenance, repair, or rehabilitation projects for constructed assets, operation of the National Park Service automated facility management software system, and comprehensive facility condition assessments shall remain available until September 30, 2013.

AMENDMENT OFFERED BY MR. TONKO

Mr. TONKO. Mr. Chair, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 14, line 7, after the first dollar amount, insert “(decreased by \$8,408,000)”.

Page 14, line 19, after the dollar amount, insert “(increased by \$8,408,000)”.

The Acting CHAIR. The gentleman from New York is recognized for 5 minutes.

Mr. TONKO. Mr. Chair, I rise today to offer an amendment to H.R. 2584, the Interior, Environment, and Related Agencies Appropriations Act for fiscal year 2012. The amendment is bipartisan and is supported by the Congressional National Heritage Caucus and the 49 National Heritage Areas across our country.

The amendment is straightforward and modest. The amendment restores the National Heritage Area program within the National Park Service to the fiscal year 2010 funding levels. This amount is constant with the amount approved by Congress for the past several years. To pay for this increase, the amendment shifts \$8,408,000 away from the Office of the National Parks Service account.

From Alaska to Florida, the National Heritage Areas are the most effective public-private partnerships for resource conservation and heritage tourism supported by the Federal Government. While each of the 49 National Heritage Areas currently in existence are authorized to receive \$1 million in annual support through the Department of Interior, the National Heritage Area program has only been funded between \$15 million and \$18 million over the past 5 years by Congress, despite their success in revitalizing communities and conserving naturally significant resources with only modest Federal support.

These public-private partnerships are perhaps the most cost-effective and efficient programs within the Department of Interior. Matching every dollar of Federal support with \$5.50 of other public and private funding, National Heritage Areas are clearly a high-yield investment of Federal resources.

To be clear, that investment results in over \$100 million of economic activ-

ity. During a time when our economy is so fragile, we must support these programs that have a proven record of economic benefit. National Heritage Areas have such a proven record of fostering job creation and advancing economic, cultural, historic, environmental, and community development. In addition to creating jobs, National Heritage Areas generate valuable revenue for local governments and sustain communities through revitalization and heritage tourism.

More specifically, in my district, a recent study released last year by my local heritage area, the Erie Canalway Heritage Corridor, found that visitors to heritage sites in the eastern part of the corridor—found that nearly 1 million people visit heritage sites each year, generating some \$38 million sales in local businesses, supporting 507 local jobs.

We must preserve sites that are historically significant. Doing so will increase community spirit as well as generate much-needed tourism dollars. A recent United States Cultural and Heritage Tourism Marketing Council and United States Department of Commerce study revealed that cultural heritage travelers contribute more than \$192 billion annually to our United States economy. I would point out also that this tool, this opportunity for heritage areas enables given regions to have a stronger sense of marketing tools. They are able to promote a stronger sense of place and a much more dynamic bit of destination. That is a tool in the economic recovery toolkit that is tremendously valuable and important to these given host regions.

I want to thank Representative DENT of Pennsylvania for offering this amendment with me today. He is the cochair of the National Heritage Area Caucus in the House, and he and his staff have been a pleasure to work with on this amendment. I also need to thank the ranking member on the committee, Mr. DICKS, and our ranker of the subcommittee, Representative MORAN. They have been invaluable in their support in my effort for this amendment.

Understanding today's difficult budgetary climate, I want to remind everyone that this amount is equal to the total appropriation for the program in the previous fiscal year and reflects the minimum level of support National Heritage Areas need to remain successful. I hope my colleagues will consider joining Mr. DENT and myself in supporting this modest funding level for a vitally important program.

Mr. Chair, I yield back the balance of my time.

Mr. DENT. I move to strike the last word, Mr. Chair.

The Acting CHAIR. The gentleman from Pennsylvania is recognized for 5 minutes.

Mr. DENT. Mr. Chairman, I do rise in support of the Tonko amendment. Mr. TONKO and I have offered this amendment for consideration by the House.

We are the cochairs of the Heritage Corridor Caucus. I represent the areas of the Delaware-Lehigh Heritage Corridor as well as the Schuylkill Valley Corridor in eastern Pennsylvania, and we have seen a great deal of positive activity as a result of these heritage areas. Specifically, as Mr. TONKO conveyed, a great deal of tourism activity, recreational opportunities, as well as economic development occurs as a result of this. Also, significant community development activities have been the result of our efforts and investment in these heritage areas.

Obviously money is very tight, and this program is taking about a 50 percent reduction under the underlying bill. The amendment before us will simply restore about \$8.4 million to the heritage area, to the heritage partnership program; and we'll be taking that money, substituting it from the National Park Service, where we believe they have sufficient funds to operate.

I support the underlying legislation. I know Chairman SIMPSON has put a lot of effort into this. I think he has really done a great deal, given the numbers he has had to work with. So I do support the underlying bill. But I think that this amendment strikes a proper balance and preserves and protects these heritage areas that are making a real impact across the country.

I guess there are 49 of these heritage areas currently in existence, and most of them, I believe, are receiving under \$1 million of support through the Interior Department. So I just think this is a program that is worthy of our support. We're just simply, in these tough economic times, trying to bring this program back to neutral. I know the administration did not, in their budget proposal, cut this program as well. But I think this might be one way this amendment could help us bring this program back to a level that will be sufficient in supporting these heritage areas.

Again, as was stated by Mr. TONKO, these communities are benefiting. We are seeing so much tourist activity. We are seeing increased recreational opportunities. I know in my community, we are all of a sudden doing things on our rivers and discovering our rivers and the natural beauty of them that many of us had not really noticed before, and it's really as a result of this. Again, it brought the rivers back to life, economic life, community life, and it has become really, once again, the center of our existence. And a lot of this would not have been possible but for the efforts of these heritage areas. So, again, I rise in support of the Tonko-Dent amendment and would urge the House to adopt this.

I yield back the balance of my time.

Mr. MORAN. I move to strike the last word, Mr. Chairman.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. Mr. Chairman, I want our side to go on record in support of

what Mr. TONKO and Mr. DENT are proposing. We have worked with them on this amendment.

This is the kind of program that really ought to have unanimous support in the House. I mean, we're talking about very small amounts of money that are distributed throughout the country; oftentimes \$150,000; sometimes it gets up to \$700,000. But they are relatively small amounts of money.

□ 2150

And what they do is to bring local community leaders together. Local communities love it and, of course, it draws tourism. It gets into the newspaper, oftentimes into metropolitan newspapers suggesting this is a terrific day trip for families to go on. They follow the Heritage Trail.

It has that kind of national recognition and credibility that only the Federal Government oftentimes can provide to a National Heritage Area, because many people claim it. But when the National Heritage Program identifies it as one of the true assets of our country and places that should be protected and preserved and explained to the public, then more people come. And it generates jobs; it generates economic activity.

Mr. WOLF just put in an authorization. He probably won't get the full amount of money that's authorized, but it will get some for the Civil War Battlefield Crossroads Trail, and that's drawing people up with the sesquicentennial of the Civil War.

All over the country. The Hudson River, there was a gentleman on the other side that opposed it when Mr. HINCHEY put it in, had it designated. And then when he saw how successful it was, he said, Let's get my part of the Hudson River included.

This is a really good program. It was funded at about \$17 million, 50 percent cut though. What are we doing? Talk about being penny-wise and pound-foolish, really. A 50 percent cut in it. It hurts the economies of any number of areas around the country.

So we think that this is a very reasonable amendment, and we congratulate the caucus for coming forward and suggesting that the money be restored, and we hope that it will be.

Mr. Chairman, I yield back the balance of my time.

Mr. SIMPSON. Mr. Chairman, I move to strike the last word.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. First, let me thank the gentleman from Pennsylvania and the gentleman from New York for their amendment. I'm sympathetic to what they're trying to do and the work that they do in the National Heritage Caucus, and it's important work. But I rise in reluctant opposition to the amendment.

While I'm sympathetic to the intent of the amendment and the increased funding for the National Heritage Areas, I'm concerned that the offset

would take funds away from the account providing funds for operations of our national parks across the country.

One of our goals in this bill was to provide sufficient funding for park operations so that every Park Service unit in the country would be open for business next year, without the threat of layoffs or furloughs for full-time or seasonal employees. My fear is that reducing this account by \$8.8 million would undermine the operation of our national parks.

Let me also point out that, while the amount in the bill is reduced from the fiscal year 2011 enacted level, the National Heritage Areas are funded in the bill at the amount requested by the President's budget. These National Heritage Areas are supposed to become self-sufficient, and the problem is we're going to see that when that doesn't happen, the funding request from the President is going to not be in their budget and, consequently, there's not going to be any money for these National Heritage Areas requested by the administration.

We funded this at the President's level. I appreciate what the gentlemen are trying to do. I support the National Heritage Areas program, but I, because of the offset, reluctantly oppose this amendment.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from New York (Mr. TONKO).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. TONKO. Mr. Chairman, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from New York will be postponed.

AMENDMENT NO. 5 OFFERED BY MR. AMASH

Mr. AMASH. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Page 14, line 7, after the first dollar amount, insert "(decreased by \$2,206,000)".

Page 158, line 25, after the dollar amount, insert "(increased by \$2,206,000)".

The Acting CHAIR. The gentleman from Michigan is recognized for 5 minutes.

Mr. AMASH. Mr. Chairman, did you know the Federal Government subsidizes the Goo Goo Dolls, Lynyrd Skynyrd, and the Gipsy Kings? What about the Culture Shock East Coast Dance Concert?

Well, it does.

My amendment to H.R. 2584 will reduce the deficit, save taxpayer dollars, and stop subsidies to bands, including the Beach Boys. This amendment will reduce the deficit by \$2.2 million by transferring funding from the National Capital Area Performing Arts program to the spending reduction account.

The National Capital Area Performing Arts program provides free

concerts and subsidized performances in and around Washington, DC, by paying for ushers, performers, lighting and other performance-related costs. The program funds venues like Carter Barron Amphitheater in DC. Even the National Park Service, which administers the program, has recommended its elimination, saying it distracts the Park Service from performing its core functions.

My amendment is simple. It will transfer all of the program's \$2.2 million in funding to the spending reduction account. I like the Beach Boys as much as the next person, but that doesn't mean we should force taxpayers to subsidize my ticket if I go to their concert.

Don't break taxpayers' trust. I urge my colleagues to support this common-sense amendment to prevent the wasteful spending of taxpayer dollars on niche entertainment programs in the Washington, DC, area.

I yield back the balance of my time.

Mr. MORAN. Mr. Chairman, I rise in opposition to the amendment.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. First of all, I'm not sure why you want the Beach Boys to be the issue here. We were just discussing Mr. WATT's tenure as Secretary of the Interior. That was not so successful when he came after the Beach Boys.

But be that as it may, what we're really talking about here are a number of nonprofit organizations, and these are national memorials. Ford's Theater, Wolf Trap. I guess because the Beach Boys performed at Wolf Trap they are an issue. Actually, I would recommend to the gentleman that he watch them perform. I guess it's more my age than yours that can relate to them, but it was a pretty good performance. But I digress.

We're talking about Ford's Theater, Wolf Trap, Carter Barron, all part of the National Park System. The Kennedy Center is a national memorial. These are performing arts right here on the Capitol grounds as well.

Now we're talking about nationally significant sites, and the performances that occur, in fact, are part of the mission of these sites. They were authorized for members of the public, the tax-paying public, to come to a nonprofit venue and, in fact, be entertained. The national parks do that. They entertain the public that pays for them, sometimes by seeing iconic sites, sometimes by hiking and camping, sometimes it's by performances. So the National Park Service is in keeping with its mission to interpret the purpose of these national sites.

These performances are seen by citizens, in fact, all over the country. Many people who visit our Nation's Capitol attend these performances as part of their trip to the District of Columbia. And the crowds that fill the West Lawn of the Capitol on Memorial Day and the Fourth of July are testa-

ment to the public's support for this program.

In fact, if you were there on Memorial Day or the Fourth of July and turned to see the crowd, there are people as far as the eye can see, people representative of this vast, diverse country, and every single one of them had a smile on their face. Every single one of them was delighted, overjoyed that they were able to participate and appreciate and enjoy the performance that was put on on the Fourth of July and Memorial Day. That's part of our Nation's heritage. It's a proud part.

This amendment would do real harm to programs enjoyed by millions of Americans.

I would also suggest that this line item has already suffered a virtually devastating cut. It was funded at about \$10 million. It's been cut to about \$2 million. I mean, it's just barely hanging on. And now this amendment would eliminate it?

□ 2200

I mean, think about this. I know that some of the Members, at least as many Members of the majority side as the minority side, were there for the Memorial Day concert. I saw them. I was sitting with them. The chairman of the full Appropriations Committee, the chairmen of the subcommittees, the leadership of the House and Senate were all there honoring our troops.

Mr. DICKS. Will the gentleman yield?

Mr. MORAN. I yield to the gentleman from Washington.

Mr. DICKS. Colin Powell was there to thank all of the troops that had served in Iraq and Afghanistan, and many of the wounded warriors were there as well.

Mr. MORAN. Not only were they there but Team 6 that had just dealt with Osama bin Laden in a fairly definitive manner, SEAL Team 6 was there. We couldn't identify them, but we all applauded for them, and they couldn't have been more overjoyed.

The gentleman makes a very good point. Colin Powell was basically the master of ceremonies.

Now, this is what we want to eliminate? This is what is such a threat to our budget as taking so much money? It's not taking that much money, and whatever money it's taking, it's giving back far more in return.

Mr. DICKS. I thank the gentleman for yielding and I hope we can defeat this unneeded amendment.

Mr. MORAN. I yield back the balance of my time.

Mr. SIMPSON. I move to strike the last word.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. Mr. Chairman, I rise in opposition to the amendment, and I agree with the words that were spoken by the gentlemen from Virginia and from Washington.

In these tough economic times, it is important that we keep some things

that are very important, I think, to the American people. If you look at the programs that have been put on by the Capitol concerts on the Fourth of July and on Memorial Day and what they've done for our troops and for really the spirit of America, I think is vitally important. They do things at Ford's Theater and other places around this country.

We have to remember: this is our Nation's Capital. The things they do here are important. They're important for our country, not just for this small piece of land we call Washington, DC. So I hope that Members on both sides of the aisle would recognize the importance of these programs and the work they do and the importance that they have for the American people and would reject this amendment.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Michigan (Mr. AMASH).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. AMASH. Mr. Chair, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Michigan will be postponed.

The Clerk will read.

The Clerk read as follows:

NATIONAL RECREATION AND PRESERVATION

For expenses necessary to carry out recreation programs, natural programs, cultural programs, heritage partnership programs, environmental compliance and review, international park affairs, and grant administration, not otherwise provided for, \$49,363,000.

AMENDMENT OFFERED BY MS. NORTON

Ms. NORTON. I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 14, line 19, after the dollar amount, insert "(decreased by \$300,000)(increased by \$300,000)".

The Acting CHAIR. The gentlewoman from the District of Columbia is recognized for 5 minutes.

Ms. NORTON. Mr. Chairman, my amendment would designate \$300,000 from the National Recreation and Preservation Account for a National Park Service study of whether applying the same rules and regulations to all parks maximizes the highest and best use of individual parks, for the system as a whole, and for Americans who use our parks.

This is but a study, and it would require the National Park Service to look at how NPS, cities, counties and States, as well as other countries, manage their diverse parks and to suggest, from the available best practices, appropriate ways to help NPS meet the needs of individual communities within the basic uniformity necessary to operate a national system of parks. Today, the NPS applies the same rules and regulations to all its parks, regardless

of location, from the almost 1200-square-mile Yosemite National Park to small urban parks on street corners.

I support a unified national park system, but NPS should develop flexible standards that take into account the unique circumstances and population of individual parks and changing conditions throughout the country in keeping with congressional recognition of both conservation and recreation as primary reasons for our parks. The neighborhood parks in the District of Columbia, for example, serve a very different function from Yellowstone. Dupont Circle Park is a central urban community meeting place in the District, not a place for enjoying the greenery of nature, as much as we love our parks for that purpose. On any given day, you will find people playing chess, sunbathing, playing Frisbee or passing out fliers.

Madam Chair, I have come to the floor because I have tried, unsuccessfully, to get the Park Service to make small adaptations perfectly compatible with their mission to allow for the people in the parks in my own district, and I am certain that other Members have found similar roadblocks. For example, the Park Service won't allow bike share stations on or near Federal parks, and they are not permitting the three golf courses in the District of Columbia to be run as a public-private partnership. Both of these examples have run into the same one-size-fits-all concession concerns.

Yet the National Park Service could negotiate concession agreements that accommodate bike share in the future; and an inflexibility in Park Service insistence on concession contracts that do not allow capital investment resulting in an astonishing deterioration of invaluable capital-intensive golf courses in the District could give way to other approaches, such as public-private partnerships operating under long-term leases that would allow private funding to assist the Park Service with upgrading and maintaining these public assets with Congress, which the taxpayers can't possibly by themselves maintain.

Inflexible, one-size-fits-all policies keep Americans from using our parks for compatible purposes, such as bike stations, or, worse, condemn unique iconic resources to inevitable decline.

Madam Chairman, my amendment is of the lowest possible cost. It is for a study to tell us what to do, to tell the Park Service what to do, to allow people throughout this country who live in very different locations and have to use our parks in very different ways just how this must be done compatible with a uniform National Park Service.

I ask that my amendment be approved.

I yield back the balance of my time. Mr. MORAN. I move to strike the last word.

The Acting CHAIR (Ms. Foxx). The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. Madam Chairman, I think we have a problem in the amendment, itself, because it would specifically designate a study that might be interpreted as some type of earmark, which I don't think it really is.

I like what the gentledady is trying to do. I think it's important. I think we ought to have a consideration by the Park Service of whether they are sufficiently flexible in dealing with local communities.

□ 2210

There was a recent article written in The Washington Post talking about some of the opportunities that exist to bring the community into local parks, urban parks, where far more people could be involved, people could participate, people could enhance the enjoyment of things that take place. For example, if there is a large soccer event at a park that is controlled by the National Park Service, you could bring the whole community in to watch it on a large screen.

There is no question but that we could find ways to discourage automobiles and encourage bikes—have bike sharing, for example, on The National Mall so that people could rent bikes and bike around The Mall. It wouldn't cause any environmental damage; in fact, it would preserve some of the lawn on our National Mall. Some people would enjoy it more and they would get a little exercise. Just all kinds of ideas that might be proposed by communities.

I remember being out in Washington State, San Juan Island. This was a little place. It's a national park because there was a bizarre military conflict that occurred out there. I won't go into the whole military conflict, but the people there love the bunny rabbits that are there. Well, the Park Service decided that they're really not a native species, there are too many of them, so the Park Service decided they're going to use the method they use at other places. First of all, they thought they would gas them, which the community was shocked by. Then they decided, well, we'll shoot them and so on, reduce the population. You know, if they had just sat down with members of the community, they could have figured out how to keep these bunnies that the community wanted, avoid a whole lot of negative attitude with regard to the Park Service, and in fact enhance the enjoyment of this little national park at San Juan.

I'm sure there are examples all over the country, in fact, all over the world, because the National Park Service has any number of parks outside the physical boundaries of our North American continent. We've got the Virgin Islands and so on.

I don't know what the local neighborhoods might suggest, but I do know that they have a lot of good ideas, ideas that the National Park Service ought to consider thoughtfully. And some will be rejected, but some might

well be accepted. But the process of that kind of community input, it seems to me, would generate even more support for the National Park Service.

It's a great institution. Our parks are iconic assets to our Nation. But I do think that the local community could enjoy them more and appreciate the National Park Service's role more if we had the kind of dialogue with the Park Service that Ms. NORTON is suggesting.

I don't see any harm in having that kind of study. I think we ought to be able to work with the gentledady, maybe put together some report language, at least a letter to the head of the National Park Service suggesting that this is an area that the Congress itself, in a bipartisan way, thinks ought to be explored.

Mr. SIMPSON. Will the gentleman yield?

Mr. MORAN. I yield to the gentleman from Idaho.

Mr. SIMPSON. I would say that I think the gentleman has stated the case as it is. It is an earmark, and that's a whole other story we can talk about.

But I agree with what the gentledady is trying to do here. And I will tell you that both the ranking member and I will work with the gentledady from the District of Columbia to try to resolve this in conference so that we can do what you're trying to accomplish here because I think it is important.

Mr. MORAN. The gentledady is smiling, so I will accept her concurrence. We will move forward in that fashion if the gentledady wouldn't mind withdrawing her amendment.

I yield back the balance of my time.

Ms. NORTON. I appreciate the remarks of the chairman and the ranking member. In light of those remarks and their generosity, I do withdraw my amendment and will work with them to try to implement it in other ways.

The Acting CHAIR. Without objection, the amendment is withdrawn.

There was no objection.

The Acting CHAIR. The Clerk will read.

The Clerk read as follows:

HISTORIC PRESERVATION FUND

For expenses necessary in carrying out the National Historic Preservation Act (16 U.S.C. 470), and the Omnibus Parks and Public Lands Management Act of 1996 (Public Law 104-333), \$49,500,000, to be derived from the Historic Preservation Fund and to remain available until September 30, 2013.

CONSTRUCTION

For construction, improvements, repair, or replacement of physical facilities, including modifications authorized by section 104 of the Everglades National Park Protection and Expansion Act of 1989 (16 U.S.C. 410r-8), \$152,121,000, to remain available until expended.

AMENDMENT OFFERED BY MR. CARTER

Mr. CARTER. Madam Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 15, line 8, after the dollar amount, insert "(decreased by \$1,000,000) (increased by \$1,000,000)".

The Acting CHAIR. The gentleman from Texas is recognized for 5 minutes.

Mr. CARTER. Madam Chairman, this is an amendment that was put together to ensure that the Interior Department prioritize its efforts to construct a joint law enforcement center in national parks and recreation areas along the southern border of the United States with available funds.

National Park lands on our southern border have experienced a gigantic increase in the amount of illegal activity that has crossed into our park lands. The reason for this is very similar to grabbing a bean bag and squeezing it; it always bulges out at some point. As we start tightening our southern border with a lot of the efforts that have been bipartisan efforts by this Congress, it causes the people who are wanting to have illegal activity to move farther and farther out into the rural areas and into the unoccupied areas, and they're moving into our national parks.

Joint law enforcement centers will be available to serve the National Park Service law enforcement agency, the United States Customs and Border Patrol, possibly even the Coast Guard when they're on the river at that border, and other Federal, State, or local law enforcement agencies as may be needed.

This is something that has been discussed; it has been agreed upon; it has been approved. Additional rangers and Border Patrol officers have been added to our border and been assigned and are being compensated for working down there, but they lack serious facilities within which to be able to operate.

One example is when we sent a group down to take a look at what other needs might be on our southern border, we ran across eight Border Patrol officers that were working in a temporary facility that was 288 square feet. This is absolutely inadequate. And if they were working in conjunction with the Park Service, there was no place for the Park Service to even stand in the building.

The purpose of this amendment is to dedicate \$1 million to the National Park Service construction funds for FY 2012 to jump-start the interagency project already agreed upon between the Departments of Interior and Homeland Security. We are confident that with this shot in the arm we will be able to get these centers, as they may be available, constructed.

And it's not just a place for these folks to work; but if you take a look at most of our southern border from all the way across, you will see that, if there is no place to hold prisoners when they're captured doing illegal activities, then you have to transport them. In many instances, this transportation is 150 miles to a place where they can be secured. And these would also allow at least for temporary detention so that we wouldn't have Border Patrol officers running back and forth 150 miles every time there's a detention needed.

This is a facility that really will aid what we've already provided, which is personnel to help defend our southern border. It is budget neutral, and I would respectfully request that this be adopted.

Mr. SIMPSON. Will the gentleman yield?

Mr. CARTER. I yield to the gentleman from Idaho.

Mr. SIMPSON. We are prepared on this side to accept the gentleman's amendment.

Mr. CARTER. Thank you, Mr. Chairman.

I yield back the balance of my time.

□ 2220

Mr. MORAN. Madam Chair, I move to strike the last word.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. I am not necessarily rising to oppose this, but to point out some deficiencies in the amendment itself. The claim is that the purpose of the amendment is to ensure that the National Park Service prioritizes its construction of law enforcement centers on national park lands, on the southern border in coordination with the Department of Homeland Security.

First of all, there is some feeling that national parks not have basically prison sites on them because what happens is that when people are rounded up by the Border Patrol, they are taken to these law enforcement centers and detained until they—I don't know whether they are adjudicated or not, but then eventually they are moved to another place. But they are temporarily detained at these law enforcement centers, and there is some feeling that national parks are not an appropriate location for that purpose.

But the very wording of the amendment doesn't really do that. It increases money, then it decreases the same amount of money. If it did it, it would be an earmark. And, of course, we don't do earmarks in this bill.

So as I say, I don't rise in opposition because I'm not sure what the amendment does, but I think it is helpful to be informed as to what it doesn't do.

Mr. CARTER. Will the gentleman yield?

Mr. MORAN. I yield to the gentleman from Texas.

Mr. CARTER. I thank the gentleman.

It is my understanding that this joint agreement, as we saw the acceleration of park rangers, and you're right, quite honestly, I don't think anywhere on the southern border people want illegal activity to be going on on our recreational areas, wherever they might be located. And nobody is trying to warehouse prisoners in a national park.

It is hard to envision this facility, but it would be a facility, I would assume, sort of like some of the facilities you see in other locations where people are operating out of it, but they have a temporary detention holding cell.

This would be strictly—and maybe I can explain it by pointing out one of

the problems we have on the border with the transportation of our prisoners. And, in fact, one of the things that we used our National Guard for when we did have to transfer prisoners when they were working on the border, there always has to be someone having this prisoner in custody. Whatever the accused crime is, they have to be in custody.

When we had limited resources, we bumped them up. But they take a trained border patrolman whose duty it is to protect our border, if he's the only person available, and he has to transport that prisoner because there's no facility to temporarily hold him in. And when I say "temporarily," it could be hours or maybe even minutes until someone can come along to help transport. If he's alone, then he has to transport him 150 miles. That's 3 hours that officer is off his post to make the transport.

So that's a little, tiny part for the purpose of this facility. This facility is really for a working space for those resources that we have already beefed up and put down on the border, and both Interior and Homeland have made agreements and really it is kind of just a kick to get them started. I believe we will see funding come from both sources to finish the project.

Mr. MORAN. Reclaiming my time, I understand that the gentleman wants to make that point. I understand the challenges that are faced in the area that he represents.

I was similarly confused, though, when there was a substantial amendment to strip funding for environmental mitigation between the Homeland Security and Interior Departments that the gentleman previously suggested and, I think, was successful in doing. So I don't know, it's not an area that I'm particularly familiar with. I am becoming more familiar with it; but, again, I'm not sure that this amendment does anything other than draw attention to the issue.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Texas (Mr. CARTER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MICA

Mr. MICA. I have an amendment at the desk.

Mr. DICKS. Madam Chair, we don't have a copy of the gentleman's amendment, and it is usually the protocol to give one to the minority.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 15, line 8, after the dollar amount, insert "(increased by \$2,000,000)".

Page 65, line 19, after the dollar amount, insert "(decreased by \$2,000,000)".

The Acting CHAIR. The gentleman from Florida is recognized for 5 minutes.

Mr. MICA. Thank you, Madam Chair, and I am sorry the minority didn't have a copy of this fine amendment. It was modified slightly from the original

submission to comply with the requirements of the Parliamentarian to be in order.

Let me say at this late hour I won't take too much time. I am from the authorizing side, and it's always good to come here and hear the difficulties that the appropriators have in trying to make choices, and tonight is about making choices.

I do have to compliment Mr. SIMPSON, the chair of the subcommittee; Mr. HASTINGS, the chair of the full committee; and the ranking members, Mr. MORAN and Mr. DICKS, for their efforts, being up late at night and making these difficult choices in some very tough economic times.

Normally, I wouldn't come here and tell you what to do; but, again, coming from a State that has some 11 parks and preserves and national monuments, I have a great interest in some of these accounts.

Now, we all have to set priorities; and as I said, these are difficult times. The Department of the Interior, I noticed, had, I guess, in 2010 just under \$11 billion that's being cut to \$9.8 billion, a 7 percent reduction. People ask me about transportation projects. Whether it is FAA, on transportation, I'm reducing some of the accounts by 30 percent in authorization, so I know the difficulty you're facing.

Now, I also looked at some of the other accounts here. EPA, I think folks would be shocked to find EPA has \$7.1 billion in this bill. That's quite a bit to operate that agency. Well, the National Park Service has \$2.5 billion. I think if you ask people on the street where would you put the dollars, I think they would like to see something very tangible. They appreciate their national parks. And, again, you have difficult priorities.

My amendment is simple. It takes \$2 million out of EPA's account for management programs, and it transfers it to the National Park Construction Account.

Now, this is not going to resolve a \$10 billion backlog in maintenance and construction projects. I can give you examples. Just a few miles from here, Harpers Ferry, they have a \$59 million deferred maintenance account pending. Florida, with its 11 parks and preserves and national monuments, has a \$4 million backlog. And, again, my amendment won't solve even Florida's problem.

□ 2230

Even closer to home in my district—and I want to thank again the chairman of the committee and the chairman of the subcommittee and staff for working with me—we are attempting, after authorization in 2004, to finally finish a visitors center. I want to make certain that the Castillo San Marco Visitor Center and the backlog of some of Florida's 11 parks and national monuments, their maintenance and some of their construction costs, that we have those funds available. So that's why I offered this amendment.

Again, I know you have difficult choices. This won't resolve the pending needs either in the State of Florida or nationally. That being said, and also stating my position and intent, and knowing that the committee and I know Mr. SIMPSON is anxious to work with me and is committed to work with me, Mr. HASTINGS and staff, and in the interest of time and also not pressing the issue beyond my ability to retain my friendship and strong working relationship, I ask unanimous consent to withdraw my amendment.

The Acting CHAIR. Without objection, the amendment is withdrawn.

There was no objection.

The Acting CHAIR. The Clerk will read.

The Clerk read as follows:

LAND AND WATER CONSERVATION FUND
(RESCISSION)

The contract authority provided for fiscal year 2012 by 16 U.S.C. 4601-10a is hereby rescinded.

LAND ACQUISITION AND STATE ASSISTANCE

For expenses necessary to carry out the Land and Water Conservation Act of 1965, as amended (16 U.S.C. 4601-4 through 11), including administrative expenses, and for acquisition of lands or waters, or interest therein, in accordance with the statutory authority applicable to the National Park Service, \$18,294,000, to be derived from the Land and Water Conservation Fund and to remain available until expended, of which \$2,794,000 is for the State assistance program and of which \$2,000,000 shall be for the American Battlefield Protection Program grants as authorized by section 7301 of the Omnibus Public Land Management Act of 2009 (Public Law 111-11).

ADMINISTRATIVE PROVISIONS
(INCLUDING TRANSFER OF FUNDS)

In addition to other uses set forth in section 407(d) of Public Law 105-391, franchise fees credited to a sub-account shall be available for expenditure by the Secretary, without further appropriation, for use at any unit within the National Park System to extinguish or reduce liability for Possessory Interest or leasehold surrender interest. Such funds may only be used for this purpose to the extent that the benefiting unit anticipated franchise fee receipts over the term of the contract at that unit exceed the amount of funds used to extinguish or reduce liability. Franchise fees at the benefiting unit shall be credited to the sub-account of the originating unit over a period not to exceed the term of a single contract at the benefiting unit, in the amount of funds so expended to extinguish or reduce liability.

National Park Service funds may be transferred to the Federal Highway Administration (FHWA), Department of Transportation, for purposes authorized under section 204 of title 23, United States Code. Transfers may include a reasonable amount for FHWA administrative support costs.

UNITED STATES GEOLOGICAL SURVEY
SURVEYS, INVESTIGATIONS, AND RESEARCH

For expenses necessary for the United States Geological Survey to perform surveys, investigations, and research covering topography, geology, hydrology, biology, and the mineral and water resources of the United States, its territories and possessions, and other areas as authorized by 43 U.S.C. 31, 1332, and 1340; classify lands as to their mineral and water resources; give engineering supervision to power permittees and

Federal Energy Regulatory Commission licensees; administer the minerals exploration program (30 U.S.C. 641); conduct inquiries into the economic conditions affecting mining and materials processing industries (30 U.S.C. 3, 21a, and 1603; 50 U.S.C. 98g(1)) and related purposes as authorized by law; and to publish and disseminate data relative to the foregoing activities; \$1,053,552,000, to remain available until September 30, 2013, of which \$65,561,000 shall be available only for cooperation with States or municipalities for water resources investigations: *Provided*, That none of the funds provided for the ecosystem research activity shall be used to conduct new surveys on private property, unless specifically authorized in writing by the property owner: *Provided further*, That no part of this appropriation shall be used to pay more than one-half the cost of topographic mapping or water resources data collection and investigations carried on in cooperation with States and municipalities.

ADMINISTRATIVE PROVISIONS

From within the amount appropriated for activities of the United States Geological Survey (USGS) such sums as are necessary shall be available for reimbursement to the General Services Administration for security guard services; contracting for the furnishing of topographic maps and for the making of geophysical or other specialized surveys when it is administratively determined that such procedures are in the public interest; construction and maintenance of necessary buildings and appurtenant facilities; acquisition of lands for gauging stations and observation wells; expenses of the United States National Committee on Geology; and payment of compensation and expenses of persons on the rolls of the USGS duly appointed to represent the United States in the negotiation and administration of interstate compacts: *Provided*, That activities funded by appropriations herein made may be accomplished through the use of contracts, grants, or cooperative agreements as defined in section 6302 of title 31, United States Code: *Provided further*, That the United States Geological Survey may enter into contracts or cooperative agreements directly with individuals or indirectly with institutions or nonprofit organizations, without regard to 41 U.S.C. 5, for the temporary or intermittent services of students or recent graduates, who shall be considered employees for the purpose of chapters 57 and 81 of title 5, United States Code, relating to compensation for travel and work injuries, and chapter 171 of title 28, United States Code, relating to tort claims, but shall not be considered to be Federal employees for any other purposes.

BUREAU OF OCEAN ENERGY MANAGEMENT,
REGULATION AND ENFORCEMENT

OCEAN ENERGY MANAGEMENT

For expenses necessary for minerals leasing and environmental studies and regulation of industry operations, as authorized by law; for enforcing laws and regulations applicable to oil, gas, and other minerals leases, permits, licenses and operating contracts; for energy-related or other authorized marine-related purposes on the Outer Continental Shelf; and for matching grants or cooperative agreements, \$138,605,000, to remain available until September 30, 2013; and an amount not to exceed \$160,163,000, to be credited to this appropriation and to remain available until expended, from additions to receipts resulting from increases to rates in effect on August 5, 1993, and from cost recovery fees: *Provided*, That notwithstanding 31 U.S.C. 3302, in fiscal year 2012, such amounts as are assessed under 31 U.S.C. 9701 shall be collected and credited to this account and

shall be available until expended for necessary expenses: *Provided further*, That to the extent \$160,163,000 in addition to receipts are not realized from the sources of receipts stated above, the amount needed to reach \$160,163,000 shall be credited to this appropriation from receipts resulting from rental rates for Outer Continental Shelf leases in effect before August 5, 1993: *Provided further*, That for fiscal year 2012 and each fiscal year thereafter, the term “qualified Outer Continental Shelf revenues”, as defined in section 102(9)(A) of the Gulf of Mexico Energy Security Act of 2006 (title I of division C of Public Law 109-432; 43 U.S.C. note), shall include only the portion of rental revenues that would have been collected at the rental rates in effect before August 5, 1993: *Provided further*, That not to exceed \$3,000 shall be available for reasonable expenses related to promoting volunteer beach and marine cleanup activities.

For an additional amount, \$10,000,000, to remain available until expended: *Provided*, That section 115 of the Department of the Interior, Environment, and Related Agencies Appropriations Act, 2010 (division A of Public Law 111-88; 123 Stat. 2928) shall apply for fiscal year 2012, and in such application “2012” shall be substituted for “2010”: *Provided further*, That such amount shall be derived from receipts resulting from such application: *Provided further*, That to the extent that such amount is not received by the United States as a result of such application, the amount needed to reach \$10,000,000 shall be credited to this appropriation from receipts resulting from rental rates for Outer Continental Shelf leases in effect before August 5, 1993.

OIL SPILL RESEARCH

For necessary expenses to carry out title I, section 1016, title IV, sections 4202 and 4303, title VII, and title VIII, section 8201 of the Oil Pollution Act of 1990, \$14,923,000, which shall be derived from the Oil Spill Liability Trust Fund, to remain available until expended.

OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

REGULATION AND TECHNOLOGY

For necessary expenses to carry out the provisions of the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, as amended, \$123,050,000, to remain available until September 30, 2013: *Provided*, That appropriations for the Office of Surface Mining Reclamation and Enforcement may provide for the travel and per diem expenses of State and tribal personnel attending Office of Surface Mining Reclamation and Enforcement sponsored training: *Provided further*, That, in fiscal year 2012, up to \$40,000 collected by the Office of Surface Mining from permit fees pursuant to section 507 of Public Law 95-87 (30 U.S.C. 1257) shall be credited to this account as discretionary offsetting collections, to remain available until expended: *Provided further*, That the sum herein appropriated shall be reduced as collections are received during the fiscal year so as to result in a final fiscal year 2012 appropriation estimated at not more than \$123,010,000: *Provided further*, That, in subsequent fiscal years, all amounts collected by the Office of Surface Mining from permit fees pursuant to section 507 of Public Law 95-87 (30 U.S.C. 1257) shall be credited to this account as discretionary offsetting collections, to remain available until expended.

ABANDONED MINE RECLAMATION FUND

For necessary expenses to carry out title IV of the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, as amended, \$27,443,000, to be derived from receipts of the Abandoned Mine Reclamation

Fund and to remain available until expended: *Provided*, That pursuant to Public Law 97-365, the Department of the Interior is authorized to use up to 20 percent from the recovery of the delinquent debt owed to the United States Government to pay for contracts to collect these debts: *Provided further*, That amounts provided under this heading may be used for the travel and per diem expenses of State and tribal personnel attending Office of Surface Mining Reclamation and Enforcement sponsored training.

ADMINISTRATIVE PROVISION

With funds available for the Technical Innovation and Professional Services program in this Act, the Secretary may transfer title for computer hardware, software and other technical equipment to State and tribal regulatory and reclamation programs.

BUREAU OF INDIAN AFFAIRS AND BUREAU OF INDIAN EDUCATION

OPERATION OF INDIAN PROGRAMS (INCLUDING TRANSFER OF FUNDS)

For expenses necessary for the operation of Indian programs, as authorized by law, including the Snyder Act of November 2, 1921 (25 U.S.C. 13), the Indian Self-Determination and Education Assistance Act of 1975 (25 U.S.C. 450 et seq.), as amended, the Education Amendments of 1978 (25 U.S.C. 2001-2019), and the Tribally Controlled Schools Act of 1988 (25 U.S.C. 2501 et seq.), as amended, \$2,333,690,000, to remain available until September 30, 2013, except as otherwise provided herein; of which not to exceed \$8,500 may be for official reception and representation expenses; and of which not to exceed \$74,911,000 shall be for welfare assistance payments, except that, in cases of designated Federal disasters, the Secretary may exceed such cap, from the amounts provided herein, to provide for disaster relief to Indian communities affected by the disaster; and of which, notwithstanding any other provision of law, including but not limited to the Indian Self-Determination Act of 1975, as amended, not to exceed \$228,000,000 shall be available for payments for contract support costs associated with ongoing contracts, grants, compacts, or annual funding agreements entered into with the Bureau of Indian Affairs prior to or during fiscal year 2012, as authorized by such Act, except that tribes and tribal organizations may use their tribal priority allocations for unmet contract support costs of ongoing contracts, grants, or compacts, or annual funding agreements and for unmet welfare assistance costs; and of which not to exceed \$584,369,000 for school operations costs of Bureau-funded schools and other education programs shall become available on July 1, 2012, and shall remain available until September 30, 2013; and of which not to exceed \$48,049,000 shall remain available until expended for housing improvement, road maintenance, attorney fees, litigation support, the Indian Self-Determination Fund, land records improvement, and the Navajo-Hopi Settlement Program: *Provided*, That notwithstanding any other provision of law, including but not limited to the Indian Self-Determination Act of 1975, as amended, and 25 U.S.C. 2008, not to exceed \$46,373,000 within and only from such amounts made available for school operations shall be available for administrative cost grants associated with ongoing grants entered into with the Bureau prior to or during fiscal year 2011 for the operation of Bureau-funded schools, and up to \$500,000 within and only from such amounts made available for administrative cost grants shall be available for the transitional costs of initial administrative cost grants to grantees that assume operation on or after July 1, 2011, of Bureau-funded schools: *Provided further*, That

any forestry funds allocated to a tribe which remain unobligated as of September 30, 2013, may be transferred during fiscal year 2014 to an Indian forest land assistance account established for the benefit of the holder of the funds within the holder's trust fund account: *Provided further*, That any such unobligated balances not so transferred shall expire on September 30, 2014: *Provided further*, That in order to enhance the safety of Bureau field employees, the Bureau may use funds to purchase uniforms or other identifying articles of clothing for personnel.

CONSTRUCTION

(INCLUDING TRANSFER OF FUNDS)

For construction, repair, improvement, and maintenance of irrigation and power systems, buildings, utilities, and other facilities, including architectural and engineering services by contract; acquisition of lands, and interests in lands; and preparation of lands for farming, and for construction of the Navajo Indian Irrigation Project pursuant to Public Law 87-483, \$154,992,000, to remain available until expended: *Provided*, That such amounts as may be available for the construction of the Navajo Indian Irrigation Project may be transferred to the Bureau of Reclamation: *Provided further*, That not to exceed 6 percent of contract authority available to the Bureau of Indian Affairs from the Federal Highway Trust Fund may be used to cover the road program management costs of the Bureau: *Provided further*, That any funds provided for the Safety of Dams program pursuant to 25 U.S.C. 13 shall be made available on a nonreimbursable basis: *Provided further*, That in implementing new construction or facilities improvement and repair project grants in excess of \$100,000 that are provided to grant schools under Public Law 100-297, as amended, the Secretary of the Interior shall use the Administrative and Audit Requirements and Cost Principles for Assistance Programs contained in part 12 of title 43, Code of Federal Regulations as the regulatory requirements: *Provided further*, That such grants shall not be subject to section 12.61 of such title; the Secretary and the grantee shall negotiate and determine a schedule of payments for the work to be performed: *Provided further*, That in considering grant applications, the Secretary shall consider whether such grantee would be deficient in assuring that the construction projects conform to applicable building standards and codes and Federal, tribal, or State health and safety standards as required by 25 U.S.C. 2005(b), with respect to organizational and financial management capabilities: *Provided further*, That if the Secretary declines a grant application, the Secretary shall follow the requirements contained in 25 U.S.C. 2504(f): *Provided further*, That any disputes between the Secretary and any grantee concerning a grant shall be subject to the disputes provision in 25 U.S.C. 2507(e): *Provided further*, That in order to ensure timely completion of construction projects, the Secretary may assume control of a project and all funds related to the project, if, within 18 months of the date of enactment of this Act, any grantee receiving funds appropriated in this Act or in any prior Act has not completed the planning and design phase of the project and commenced construction: *Provided further*, That this appropriation may be reimbursed from the Office of the Special Trustee for American Indians appropriation for the appropriate share of construction costs for space expansion needed in agency offices to meet trust reform implementation.

INDIAN LAND AND WATER CLAIM SETTLEMENTS AND MISCELLANEOUS PAYMENTS TO INDIANS

For payments and necessary administrative expenses for implementation of Indian

land and water claim settlements pursuant to Public Laws 99-264, 100-580, 101-618, 108-447, and 111-11, and for implementation of other land and water rights settlements, \$32,855,000, to remain available until expended.

INDIAN GUARANTEED LOAN PROGRAM ACCOUNT

For the cost of guaranteed loans and insured loans, \$8,114,000, of which not to exceed \$964,000 is for administrative expenses, as authorized by the Indian Financing Act of 1974, as amended: *Provided*, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974: *Provided further*, That these funds are available to subsidize total loan principal, any part of which is to be guaranteed or insured, not to exceed \$85,242,280.

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Appropriations for the Bureau of Indian Affairs (except the Revolving Fund for Loans Liquidating Account, Indian Loan Guaranty and Insurance Fund Liquidating Account, Indian Guaranteed Loan Financing Account, Indian Direct Loan Financing Account, and the Indian Guaranteed Loan Program account) shall be available for expenses of exhibits.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office oversight and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

Appropriations made available in this or any other Act for schools funded by the Bureau shall be available only to the schools in the Bureau school system as of September 1, 1996. No funds available to the Bureau shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau school system as of October 1, 1995, except that any school or school program that was closed and removed from the Bureau school system between 1951 and 1972, and its respective tribe's relationship with the Federal Government was terminated, shall be reinstated to the Bureau system and supported at a level based on its grade structure and

average student enrollment for the 2009-2010, 2010-2011 and 2011-2012 school years. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

AMENDMENT OFFERED BY MR. GOSAR

Mr. GOSAR. Mr. Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 31, lines 2 through 10, strike "Funds made available" and all that follows through "that period, but" and insert "A charter school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)) may operate".

Mr. DICKS. Madam Chair, I reserve a point of order.

The Acting CHAIR. The gentleman's point of order is reserved.

The gentleman from Arizona is recognized for 5 minutes.

Mr. GOSAR. Madam Chair, I rise in support of my amendment. As currently written, the Department of Interior appropriations bill states that education "funds made available under this Act may not be used to establish a charter school at a Bureau-funded school." My amendment would allow money appropriated under this bill to be used for charter schools. Now, the bill grandfathers in charter schools funded prior to 1999, but bars no new charter schools. The committee report is silent on this.

As of the 2005 census, children made up 1.4 million of the total of American Indian and Alaskan Native populations. They, and their parents, deserve educational choices. Charter schools are semi-independent schools usually within a State's public education system that are designed and operated by educators, parents, community leaders, educational entrepreneurs, and others. As of 2006, a total of 40 States and the District of Columbia have passed charter school laws allowing this type of school to be part of their system. I see no reason to deny this opportunity to American Indians.

I believe administrators of such schools may worry about administrative issues in terms of accounting for students who transfer between a charter school and a noncharter school and the moneys that are appropriated. This

is sometimes referred to as the "ownership" of the student. But such administrative concerns should not be a basis to completely abandon this option. Competent administrators at the BIA, the tribes, and the State educational associations can work out the transitional issues.

Further, to the extent someone does not like charter schools, so be it. Don't send your child to one. But we in Congress should not be picking winners and losers. Charter schools should be an available choice to those tribes that want them. If a tribe chooses not to offer a charter school approach, that is its decision. But another tribe may do so on its own. There's no reason in this appropriation bill to foreclose this option. We should not impose our personal likes and dislikes on others.

It is my further belief that allowing the tribes the maximum ability to choose the best educational program is consistent with self-determination. Having the right to decide local school decisions is a part of self-determination, and I don't see why we in Congress should deny that right. A key part of self-determination is choosing the manner in which the tribes educate their children. As far back as 1970, President Nixon addressed this issue that was then emerging, and stated: "It is long past time that the Indian policies of the Federal Government begin to recognize and build upon the capacities and insights of the Indian people. Both as a matter of justice and as a matter enlightened social policy, we must begin to act on the basis of what the Indians themselves have long been telling us. The time has come to break decisively with the past and create the conditions for a new era in which the Indian future is determined by Indian acts and Indian decisions."

□ 2240

Indeed, that is what Congress did when it passed the Indian Self-Determination and Education Assistance Act of 1975. Allowing the tribes to choose a charter school option makes sense from a self-determination perspective.

Finally, according to the Center for Education Reform, there are over 5,000 charter schools nationwide. There are examples of charter schools with spectacular successes and results. I'm sure there are some charter schools that have failed in their mission. The point here, however, is about choice and allowing the tribes to decide what educational opportunities they want to create.

It is well-known that charter schools are schools of choice. Unlike traditional public schools, students may choose to attend charter schools, and if those students determine that the school is not serving their needs, they may choose to leave. It is true that many charter schools typically have longer schooldays, longer school years and higher academic and behavioral expectations for their students. For those

concerned about the current public educational system, these trends should be encouraged, but let's allow the tribes to make that choice.

It is Congress' duty to describe and allow such choices as part of its oversight and application of our treaties with which American Indian tribal relations are governed. I ask for support of this amendment and support for Indian self-determination and school choice.

I yield back the balance of my time.

Mr. SIMPSON. I move to strike the last word.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. Madam Chair, we don't have any problem with this amendment. This is kind of new territory in our bill, but I appreciate the gentleman from Arizona's work on this and his interest in providing quality education for our Native American brothers and sisters all across this country. It's a deep concern that I share also, and I look forward to working with him to make sure that this does what is intended and that it provides what is necessary for our Indian population so that they have the advantages that all of us have. I thank the gentleman for offering the amendment.

I yield back the balance of my time.

The Acting CHAIR. Does the gentleman from Washington wish to continue to reserve his point of order?

Mr. DICKS. I withdraw my point of order, but would like to ask a question of the gentleman from Arizona.

The Acting CHAIR. The gentleman from Washington withdraws his point of order.

Mr. DICKS. I move to strike the requisite number of words.

The Acting CHAIR. The gentleman from Washington is recognized for 5 minutes.

Mr. DICKS. In your amendment, it says:

funds made available and all that follows through that period—but—and insert a charter school as that term is defined in section 1141 of the Education Amendments of 1978.

Would you tell us what that definition is, please.

Mr. GOSAR. We were looking that up, my colleague from Washington. We don't have that on the laptop at this point of inquiry.

Mr. DICKS. So you have no idea what this amendment means?

Mr. GOSAR. It allows the option for choice of charter schools as defined as "charters schools."

Mr. DICKS. How do you know that if you don't know what the language is?

Mr. GOSAR. They were grandfathered in up to 1999, but no provisions were given for that detail past 1999.

Mr. DICKS. I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Arizona (Mr. GOSAR).

The amendment was agreed to.

The Acting CHAIR. The Clerk will read.

The Clerk read as follows:

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106-113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101-301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

DEPARTMENTAL OFFICES
OFFICE OF THE SECRETARY
DEPARTMENTAL OPERATIONS

For necessary expenses for management of the Department of the Interior, including the collection and disbursement of royalties, fees, and other mineral revenue proceeds, as authorized by law, \$250,151,000 to remain available until September 30, 2013; of which not to exceed \$15,000 may be for official reception and representation expenses; and of which up to \$1,000,000 shall be available for workers compensation payments and unemployment compensation payments associated with the orderly closure of the United States Bureau of Mines; and of which \$12,112,000 for the Office of Valuation Services is to be derived from the Land and Water Conservation Fund and shall remain available until expended; and of which \$36,000,000 shall remain available until expended for the purpose of mineral revenue management activities: *Provided*, That, for fiscal year 2012, up to \$400,000 of the payments authorized by the Act of October 20, 1976, as amended (31 U.S.C. 6901-6907) may be retained for administrative expenses of the Payments in Lieu of Taxes Program: *Provided further*, That no payment shall be made pursuant to that Act to otherwise eligible units of local government if the computed amount of the payment is less than \$100: *Provided further*, That notwithstanding any other provision of law, \$15,000 under this heading shall be available for refunds of overpayments in connection with certain Indian leases in which the Secretary concurred with the claimed refund due, to pay amounts owed to Indian allottees or tribes, or to correct prior unrecoverable erroneous payments: *Provided further*, That, notwithstanding the provisions of section 35(b) of the Mineral Leasing Act, as amended (30 U.S.C. 191(b)), the Secretary shall deduct 2 percent from the amount payable to each State in fiscal year 2012 and deposit the amount deducted to miscellaneous receipts of the Treasury.

AMENDMENT OFFERED BY MR. DOLD

Mr. DOLD. Madam Chairman, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 32, line 12, after the dollar amount, insert "(reduced by \$24,700,000)".

Page 65, line 19, after the dollar amount, insert "(increased by \$24,700,000)".

Page 65, line 21, after the dollar amount, insert "(increased by \$24,700,000)".

The Acting CHAIR. The gentleman from Illinois is recognized for 5 minutes.

Mr. DOLD. Mr. Chairman, I rise today to restore funding to the Great Lakes Restoration Initiative. This important initiative received steep cuts in this year's Interior bill. My amendment would simply restore half of the funding that was cut.

This amendment is part of a two-step process to restore funding to the Great

Lakes Restoration Initiative. This amendment transfers funds from the Departmental Offices account to the Environmental Programs and Management, and it would be accompanied by a subsequent amendment to increase this funding to the Great Lakes Restoration Initiative.

I do appreciate the support that the Appropriations Committee has shown the Great Lakes Restoration Initiative in the past, and I am thankful that it does remain a priority within the Geographic Programs account. However, I do believe it is vitally important to restore some funding so that we can continue to protect the Great Lakes.

The Great Lakes are truly a shared national treasure. As the largest group of freshwater lakes on Earth, they hold 95 percent of the United States surface freshwater and are a source of clean drinking water to over 30 million people. From the beautiful beaches and wide open waters to the bluffs and dunes, the Great Lakes provide a wide array of recreational opportunities and are an important part of the physical landscape and cultural heritage of North America. Furthermore, the Great Lakes provide transportation for raw materials and finished goods, all of which create jobs and contribute to a stronger economy.

The Great Lakes Restoration Initiative is an important part of restoring the health and vitality of our Great Lakes. Certainly, in my district—the 10th District of Illinois—we want to make sure that the Great Lakes are taken care of and protected for future generations. However, the ecosystem is showing signs of serious stress, and action is now required to restore, rehabilitate and make our Great Lakes better. As a scoutmaster, I teach the Boy Scouts the principles of leaving areas better than when we found them.

The Great Lakes Restoration Initiative is an important avenue by which to clean up our lakes and restore them to their natural beauty so that they can remain the crown jewel for generations to come; but in order to preserve our Great Lakes, we need the Great Lakes Restoration Initiative to help tackle the challenges facing this natural treasure.

First, toxic substances are polluting the water, and this initiative helps with cleanup and pollution prevention. Also, invasive species are causing severe ecological stress on the lakes, and the initiative institutes a zero tolerance policy so that species such as the Asian carp cannot become fully established in the Great Lakes. Third, we must ensure that the pollution does not impair water quality. Finally, the Great Lakes Restoration Initiative works to restore degraded wetlands and wildlife habitats.

Earlier this year, I, along with Congressman LIPINSKI, introduced the Great Lakes Water Protection Act, which would protect Lake Michigan and the rest of the Great Lakes from wastewater discharges by prohibiting

publicly owned treatment works from intentionally diverting wastewater systems to bypass any portion of the treatment facility.

This is just one more step my colleagues and I in the Great Lakes region are taking to fight for the protection of our lakes. Yet, despite all of these concerns, the current recommendation for this critical initiative is just over half of what it received in fiscal year 2010, and is \$49.4 million below the fiscal year 2011 enacted level.

I do appreciate the hard work that the Appropriations Committee has been tasked with, and I fully support the committee's efforts to be fiscally responsible—to rein in Federal spending and to make sure that we are funding our Nation's priorities. That is why my amendment only seeks to restore half of the roughly \$50 million cut that the Great Lakes Restoration Initiative received in this year's Interior bill.

I do believe that the Great Lakes are at risk, and we must restore funding so that the Great Lakes Restoration Initiative can work to protect our natural resources for our children and our grandchildren for decades to come.

With that, I yield back the balance of my time.

Mr. SIMPSON. I move to strike the last word.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. I thank the gentleman for offering his amendment.

We had to make some tough decisions with this bill. Some of them were with the money that we spent in the Geographic Programs. I believe every geographic program had reduced funding in this bill. Last year, they were funded at \$300 million. I think the President requested \$350 million for the Great Lakes geographic program, and we funded it at \$250 million.

While I appreciate what the gentleman is trying to do with his amendment—and I thank him for offering it—the fact is we just don't have that kind of money. The offset of this is \$24 million out of the Secretary's account, and we earlier took \$20 million out of it. I don't believe the Secretary is sleeping very well tonight.

□ 2250

Pretty soon he won't have any money left in his office, as a matter of fact. So that is a problem.

It's not what the gentleman is trying to do. I fully support what the gentleman is trying to do. It's the offset and trying to get the \$20 million out of the Secretary's account which causes the problem for me. And I would hope that my colleagues would reject this amendment as we work on trying to make sure that we, in conference, can do what's necessary to fund those programs that do protect the Great Lakes, the Puget Sound, the Chesapeake Bay, Long Island Sound, San Francisco Bay, some of the other great water bodies in this country.

I appreciate the gentleman's amendment, but I have to rise in opposition to it.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Illinois (Mr. DOLD).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. DOLD. Madam Chair, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Illinois will be postponed.

AMENDMENT NO. 44 OFFERED BY MR. REED

Mr. REED. Madam Chairwoman, I have an amendment at the desk.

The Acting CHAIR. The clerk will designate the amendment.

The text of the amendment is as follows:

Page 32, line 12, insert after the dollar amount the following: "(reduced by \$8,291,000)".

Page 76, line 2, insert after the dollar amount the following: "(increased by \$8,291,000)".

The Acting CHAIR. The gentleman from New York is recognized for 5 minutes.

Mr. REED. I offer this amendment with my colleague from Oklahoma (Mr. BOREN).

This is a bipartisan amendment to this appropriations bill with the intent to return funding for the Forest Health Management Account, under State and private forestry.

What we're intending to do with our proposed amendment is to move money from the D.C. bureaucracy, and I anticipate there will be a concern raised about the offset of the line that we're using to cover this increase in the Forest Health Management account from the Secretary's account.

But I firmly do believe that our taxpayer dollars are better spent not on the bureaucracy of the Secretary's office here in Washington, D.C., but more importantly on the front lines and into the States that can benefit from these programs.

This program that we're trying to take care of with this amendment is to restore the funding for the purposes of weeding out invasive species which threaten many industries and our environment across the Nation.

Essentially, invasive species threaten natural habitats, economies, and environments in every State and essentially every district that we represent. The work done by the Forest Service in education, outreach, and on-the-ground action is imperative to the prevention and early detection of nonnative invasive species.

By way of just one example that we deal with in our district, in the New York 29th Congressional District is the emerald ash borer beetle which can kill an ash tree within 5 years, decimating forests across the States and across our district. This pest and other insects have caused disruption on local economies and on job producers nationwide. Research estimates that we have re-

viewed at our office indicate that replacement and treatment of affected ash trees could total \$10 billion over the next decade should this pest continue to spread.

This is just one pest of many that the U.S. Forest Service is seeking to maintain and address so that Federal and State funds are not diverted from other meaningful initiatives.

Working with individual States on invasive species control, the Forest Health Management programs are part of a collaborative effort to protect forest and grasslands where their efforts can be most effective—in the field on the front line rather than here behind a desk in Washington, D.C.

The benefit of placing Federal funds into action on the front lines, therefore, far outweighs the use of those funds to bloat the Federal bureaucracy. And, therefore, I ask my colleagues to support the amendment and join in this bipartisan effort, with all due respect to the chairman of the appropriations process that is making some very difficult decisions in this day and age.

But I just want to highlight this issue, and I do truly believe that through a bipartisan issue we can get money from D.C. into the fields and deal with the issue of invasive species that threaten economies and industry across the Nation.

I yield back the balance of my time. Mr. SIMPSON. I move to strike the last word.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. I appreciate the gentleman from New York's observation that we are working with some very difficult numbers, and he's absolutely right. And this is an account, frankly, that I think is important. The invasive species and trying to control invasive species across this country is of high importance. It's as of high importance in Idaho as it is in New York and other places across the country. But as the gentleman noted, the concern is the offset.

While we actually treated this account better than most other accounts within this budget, we actually only reduced it by 2½ percent. Some other accounts, EPA's account is down 18 percent, and some other things. Most accounts received substantially less funding. And where you're taking this money from, as I said on the last amendment, the Office of the Secretary is funded in this bill \$33½ million below the budget's request. That was before we took out another \$20 million in an earlier amendment to put it into the Land and Water Conservation Fund. So now we're doing \$53½ million. We add this to it and we are going to be down \$62 million.

Sometimes these, what appear to be small amounts, add up. If we're going to have a Secretary's office that actually functions, we have to keep enough resources there so that he can do his job.

And while I appreciate what the gentleman is trying to do, I sympathize

with what he's trying to do and support the effort of what he's trying to do. The fact that the offset affects an account that we have substantially reduced already is a problem, so I would oppose the amendment.

I yield back the balance of my time. Mr. MORAN. I move to strike the last word.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. I rise to agree with the chairman of the appropriations subcommittee just as I did with the last amendment.

The idea of a bloated bureaucracy, when you've taken \$53 million out of the Secretary's office, it seems to me, is misplaced where we're talking about giving the Office of the Secretary of the Interior far more responsibility. And now, at every opportunity, we seem to be cutting the resources that are necessary to fulfill those responsibilities. Already tonight we've taken \$20 million from the Office of the Secretary's account.

So just as I did with the prior amendment, I would also agree with the chairman's comments and associate myself with them. So I won't take any more of the body's time.

I yield back the balance of my time. The Acting CHAIR. The question is on the amendment offered by the gentleman from New York (Mr. REED).

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. REED. Madam Chair, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from New York will be postponed.

AMENDMENT OFFERED BY MR. SCALISE

Mr. SCALISE. I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 32, line 12, after the dollar amount, insert "(decreased by \$420,000)".

Page 158, line 25, after the dollar amount, insert "(increased by \$420,000)".

The Acting CHAIR. The gentleman from Louisiana is recognized for 5 minutes.

Mr. SCALISE. Madam Chair, the amendment that I bring would take \$420,000 from the Secretary of the Interior's account and move it into the spending reduction account to reduce the Nation's deficit.

And the reason that we're doing this is that, over the last year since the Deepwater Horizon exploded, the administration came out with a policy not long after that imposed a moratorium on drilling, a moratorium that was found by Federal courts to be outside of the law. The administration unfortunately went forward with that moratorium, costing thousands of American jobs, hurting America's energy security.

But even after the lifting of the moratorium, they still maintain what they call a permitorium, a refusal to issue permits to explore in the Gulf of Mexico for American energy. Not only does it cost our Nation tens of thousands of jobs, but it also costs us energy security where now we're even more dependent on Middle Eastern countries for oil. It's led to higher prices of gasoline at the pumps. It's had devastating impacts. Yet there's been no accountability to the administration for their policies that have led to this destruction of our economic well-being and our energy security as it relates to American energy, and especially as it relates to jobs in the Gulf of Mexico.

□ 2300

Now, if you really want to get down to the details of this amendment, one of the things we've said for a long time is, a lot of these companies, these big employers that have been out there for a long time exploring safely for American energy, they want to continue to be able to explore for American energy; and they want to go back to work; but they haven't been allowed to because of administration policies.

But what's more absurd is that while the administration has had this permitorium, where they won't let people go back to work, they have also allowed the clock to continue ticking on the permits and on the leases. And you've got a finite amount of time for a lease; you've got a 10-year period of time. And if the administration is saying you can't properly develop your lease—now it would be one thing if they said, we're going to stop the clock while we, as an administration, go forward with this radical policy. But all outside experts have said is that it has nothing to do with safety, and it is hurting not only American energy production but American jobs.

But what the administration said is they're going to continue to let the clock run. It's like if you are playing a basketball game and the referee is holding the ball, and the clock's still running. You are sitting there saying, look, I just want the ball. I want to be able to go out and play by the rules, and the referee is holding the ball while the clock continues to run. That's just not fair. And yet the administration continues to do this.

This House, Madam Chair, passed legislation, H.R. 1229. It's called the Putting the Gulf of Mexico Back to Work Act. This legislation that we passed here in this House with a bipartisan vote, sent it over to the Senate—they still haven't taken action in the Senate—but what this legislation did, among other things, is it addressed that problem and said, If this administration is going to tell responsible companies who are trying to go back to work, who are trying to do the right thing—if the administration is going to tell them that they're not allowed to play by their own rules, then the clock stops while the administration denies them the ability to be permitted.

So the legislation that we passed addressed this. But the Senate, for whatever reason, refuses to take that up; again, costing our country thousands of good, high-paying jobs and hurting America's energy security, making us more dependent on Middle Eastern oil.

What we're saying with this amendment is: if this administration wants to continue going forward with that radical policy, which a majority of the President's own hand-picked scientists in his report right after the explosion of the Horizon said is irresponsible to do, that would actually reduce safety by denying permits, by having this moratorium, and now permitorium, then there has to be accountability. We have to hold this administration accountable for their actions.

And the \$420,000 number in this bill that we're setting aside and putting into the deficit reduction account was gathered by looking at the number of leases that expire at the end of this year. There are 350 leases that will expire at the end of this year, not through any fault of those companies that are out there trying to explore for American energy, but because the administration won't let them play by the rules.

So if they're going to be irresponsible with their policies, there has to be a price to pay. There has to be accountability that the American people say, You're not going to use taxpayer money to deny American jobs, to deny American energy, and make our country more dependent on Middle Eastern oil and make our country continue to have to pay these higher prices at the pump.

It's their policies that have done it, and it's clear, and everybody understands that. People in the Gulf of Mexico recognize that. But there has been no accountability by this Congress, and so that's what this legislation is intended to do. This amendment will address that problem. I urge its adoption.

I yield back the balance of my time. Mr. SIMPSON. I move to strike the last word.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. Madam Chairman, I reluctantly rise in opposition to the amendment. I understand what the gentleman is saying. I agree with what he's saying. I think the Members have a concern that we are not allowing these oil companies to go out after the permits, and we're trying to send a message to the Secretary. I understand that, and I don't have a problem with sending a message.

The problem is—and this is a little bit of inside baseball, I guess, to talk about it this way—the problem is that under the rules we have, you can reduce an account by a certain amount and put that money in the budget reserve account which then reduces the allocation that the committee has to spend. He takes the \$420,000, I think it is, out of the Office of the Secretary and reduces our allocation by that much.

And as Members have heard that have listened to this debate, there are both Republicans and Democrats that are concerned about some of the funding allocations in this bill of the various accounts. People want to put more money into the Land and Water Conservation Fund. People want to put more money, as the last amendment did, into the invasive species program, taking care of invasive species. If you go throughout, there are Members on both sides of the aisle that believe that various accounts are funded at too low of a level. So to take this money and put it into the budget reserve account and take it out of the Interior appropriations bill means that that is money that could go into another account.

Now, this bill comes to the floor under the budget resolution that was passed by the House under the 302(a) and the 302(b) cap, the allocation that was given to this committee. It's a tough allocation, but we've made those tough decisions, and I don't like to see money to send a message to the Secretary, money taken out of his account and put into the budget reserve account when there are other accounts within the appropriation that could obviously use the funds.

So if we weren't putting it into the budget reserve account, I don't have a problem with the message you are trying to send. I appreciate what the gentleman is trying to do, but I would reluctantly have to oppose the amendment.

I yield back the balance of my time.

Mr. MORAN. I move to strike the last word, Madam Chair.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. I agree with the chairman of the committee again that this amendment should be opposed. But I would also mention that I don't know how fast the administration could issue drilling permits in the Gulf of Mexico that would be fast enough. It's as though Deepwater Horizon never happened. When it did happen, people died. The ecology of the gulf area was severely and adversely affected. The economy was devastated. And we did a complete investigation and found that it was largely because the Minerals Management Service was not doing its job, that they were issuing permits too quickly without adequate review. Sometimes they were just letting permit forms be filled out by the oil companies themselves. Sometimes they had already made arrangements to go to work for the oil companies.

But for whatever reason, the fact is that they weren't doing their job. They were letting down the American public. They were letting down the workers on the drilling rigs. And they certainly contributed to a despoiling of the environment, the ecology of the gulf. So this Congress, both sides having been severely critical of the Minerals Management Service, reorganized it and instructed it to be very careful, at least

much more careful than they had been in the past in terms of issuing drilling permits. That's what they're doing.

Now, there have been any number of drilling permits issued. They're being issued so fast, we don't have an exact number right now; but we know a lot have been issued. Again, I doubt that whatever the number was that it would be enough for Members that represent areas in the gulf to benefit from more drilling activity. But the American public—this is a democracy, the majority of the American public, whatever State they're in—wants the Secretary of the Interior to have a process that reflects integrity, that reflects caution, that puts the safety of workers and the protection of the environment first.

So the Secretary is doing his job. We support the job he's doing. We know he's issuing a lot of permits, and we agree with the chairman that this amendment should be defeated.

I yield back the balance of my time.

Mr. SCALISE. Madam Chair, I ask unanimous consent to modify the amendment with the modification I have placed at the desk.

□ 2310

The Acting CHAIR. The Clerk will report the modification.

The Clerk read as follows:

Modification to amendment offered by Mr. SCALISE:

Strike the second instruction

The Acting CHAIR. Without objection, the amendment is modified.

There was no objection.

The Acting CHAIR. Is there any further debate on the amendment?

Mr. MORAN. I move to strike the last word.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. Madam Chairwoman, this is a distinction without a difference. The money still goes away. The argument that was made by the chairman of the committee still stands, as far as I can see. And so even though the amendment may be worded a little differently, the reality is that the money is lost. And we don't see that this would be a constructive amendment anyway, so we would oppose it.

Mr. SCALISE. Will the gentleman yield?

Mr. MORAN. I yield to the gentleman from Louisiana.

Mr. SCALISE. What the amendment, as it's now revised, would do is it would still reduce the \$420,000. It wouldn't go to the Spending Reduction Account; it would stay within the department, and I think that addresses one of the concerns that the chairman had.

But it would still make it clear that there's going to have to be accountability for those people who have played by the rules who are being penalized today. There's got to be some accountability and, in this case, there would be the ability for us to not only

send a message but a message attached to a spending reduction in the Secretary's department, that he can't just deny people the ability to go back to work who are playing by the rules.

Mr. MORAN. Reclaiming my time, I don't know this business about playing by the rules and punishing people who don't. It seems to me that the Interior Department is trying to play by the rules that the Congress instructed it to play by.

But, notwithstanding that, when you remove \$420,000 from the bill, don't know where it goes, I think you lose it. So I don't think that this makes a difference.

What you're saying is that you're not going to put the \$420,000 into this reduction account. What's the term of it? The Spending Reduction Account. That does away with the money.

But now what you're doing is basically taking it out of the bill, letting it fly away to who knows where, but the reality is it no longer exists. So it's coming out of the bill. And we don't think that's a good idea. We agree with the chairman that this amendment should be defeated.

I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Louisiana (Mr. SCALISE), as modified.

The question was taken; and the Acting Chair announced that the noes appeared to have it.

Mr. SCALISE. Madam Chair, I demand a recorded vote.

The Acting CHAIR. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Louisiana will be postponed.

AMENDMENT OFFERED BY MS. JACKSON LEE OF TEXAS

Ms. JACKSON LEE of Texas. Madam Chair, I have an amendment at the desk.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 32, line 12, after the dollar amount, insert "(decreased by \$5,500,000)".

Page 65, line 19, after the dollar amount, insert "(increased by \$5,000,000)".

The Acting CHAIR. The gentlewoman from Texas is recognized for 5 minutes.

Ms. JACKSON LEE of Texas. Madam Chair, we are in some tough times, but I believe it's important to have a structure in this government that provides oversight over the environment of this country. And however one may quarrel with regulations that may seem a little steep, the work of the Environmental Protection Agency is important. And as we stand here today, this legislation cuts the budget of the Environmental Protection Agency by 18 percent, in addition to a 16 percent cut in funding for

FY 2011. Thirty-four percent. This is unacceptable.

In order to protect the environment without harming industry, we must reach a compromise, instead of haphazardly slashing the EPA budget. These cuts purposely limit the EPA's ability to ensure that all Americans have access to drinking water that does not contain harmful pathogens and toxins that expose Americans to serious risk such as typhoid, hepatitis, cancer, and organ damage.

The assault on public health does not stop with the quality of our drinking water. This bill also takes drastic steps to weaken the Clean Air Act. A rider is attached that will prevent the EPA from implementing the Cross State Air Pollution Rule, a regulation that was implemented to protect the public from dangerous air pollution and prevent up to 34,000 premature deaths, 15,000 heart attacks, and 400,000 cases of aggregated asthma.

I've never seen an EPA director work as hard as Administrator Lisa Jackson. Although we have had some outstanding administrators, she has worked to work with Members across the aisle.

But these cuts reduce funding for the very programs that keep Americans, our constituents safe. And I cannot speak for my colleagues on the other side of the aisle, but I cannot afford to have these cuts impact the people of Houston and around the Nation.

Since 1999, Houston has exchanged titles with Los Angeles for the poorest air quality in the Nation. And so it is important that we find a way to increase the funding for the EPA. And as this bill makes its way through the floor, I am continuing to work to do so. And I start first with this effort. And I ask my colleagues to support this amendment.

Let me explain to you about the Old Acres Home Citizens Council. This is a historic African American community located in Houston, Texas. The Council partnered with the University of Texas to conduct a study to assess the community's health risk. It was determined that a local landfill could be the cause for the community's health-related problems, enormous cancer in that area.

As a result of the study, the Council was awarded a \$20,000 grant from the EPA Justice Small Grants Program, under the Comprehensive Environmental Response Compensation Liability Act, commonly known as the Superfund, which, obviously, it was in some years past to conduct tests to detect, assess, and evaluate the risk to human health from hazardous substances. The goal of these Small Grants Program evaluation projects was to investigate whether there were hazardous substances in the runoff from the adjacent landfill. This community needed those resources. The Council used the EPA grant funds to hire an EPA-approved environmental consultant to take soil and water sam-

ples from the backyards. The results of the sample analysis revealed high concentrations of toxic substances, many of which are harmful to humans.

Since 2002, the residents of Old Acres homes have observed water and substances seeping from the landfill into their back yards. This runoff collects into pools of standing water. Due to poor drainage, these standing pools became engorged and then flood, thereby increasing exposure of residences to potentially hazardous substances from the landfill.

This was the work of the EPA. It educated a poor community of seniors and others about the conditions of their neighborhood. This funding that takes away from EPA also takes away from the Clean Water State Revolving Fund and, of course, impacts communities like that of the Acres Home Community in the 18th Congressional District.

□ 2320

My friends, we cannot gamble with the safety of the American public, the cleanliness of air and water, the quality of the environment for future generations. We need to restore this funding, and I have made this effort to do so. I will continue to do so.

Since the debt limit was put in place, we have always paid America's bills. We fight today to raise the debt ceiling, but at the same time we're cutting away at America's safety and America's need for environmental protection. I ask my colleagues to support this amendment because it is the right thing to do. It is the right thing to do for Acres Home Community in Houston, Texas.

With that, Madam Chairwoman, I yield back the balance of my time.

Mr. SIMPSON. I move to strike the last word.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. Madam Chairwoman, this is the same debate over again. We're taking money from the Office of the Secretary, which is down some \$30-odd million, \$33 million, I think it was, from the budget request of this year; then we've taken \$20 million out of that already to put into the Land and Water Conservation Fund. This would take more money out of the Office of the Secretary.

It seems like every time somebody has an amendment that they want to offer to fund some program that they believe is important—and oftentimes they are important—the savings account that you get it from is the Office of the Secretary. Not only in this bill, but in other bills. We take it out of administration. That's always the easiest thing to do, but the fact is that the Office of the Secretary has taken a pretty good hit in this bill both during the markup and here on debate on the floor, and so I'm afraid I have to oppose this amendment because I think it hits an account that is already substantially lower than what was requested.

I would oppose the amendment.

Ms. JACKSON LEE of Texas. Will the gentleman yield?

Mr. SIMPSON. I yield to the gentleman from Texas.

Ms. JACKSON LEE of Texas. First of all, I didn't thank both you and the ranking member for a very tough task, and I think my overall intent was the need for increasing the funding in EPA.

As we make our way through this process, does the gentleman see, in the consultation with the other body, any opportunity to restore any of these funds to the EPA?

Mr. SIMPSON. I would have to say I don't know. I don't know what the Senate is doing, what their allocation is going to be. They have not passed a budget, so they have no 302(b) over there to work with. But certainly we realize that the EPA has taken the largest hit within this budget. A lot of that was due to the fact that they had the largest increases over the last couple of years. But certainly we will be looking at all of these accounts when we go into conference with the body across the Rotunda trying to come to a compromise that can pass both the House and the Senate.

Ms. JACKSON LEE of Texas. If the gentleman will yield again, I am going to continue to work on this issue. I know that we're going to take a vote on this. I, as they say, will come back again on the floor, because I think this is a very important issue.

I thank the gentleman for yielding to allow me to again express how important it is that the EPA be funded more fully than it has been.

Mr. SIMPSON. I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Texas (Ms. JACKSON LEE).

The amendment was rejected.

The Acting CHAIR. The Clerk will read.

The Clerk read as follows:

INSULAR AFFAIRS
ASSISTANCE TO TERRITORIES

For expenses necessary for assistance to territories under the jurisdiction of the Department of the Interior, \$82,558,000, of which: (1) \$73,296,000 shall remain available until expended for territorial assistance, including general technical assistance, maintenance assistance, disaster assistance, insular management controls, coral reef initiative activities, and brown tree snake control and research; grants to the judiciary in American Samoa for compensation and expenses, as authorized by law (48 U.S.C. 1661(c)); grants to the Government of American Samoa, in addition to current local revenues, for construction and support of governmental functions; grants to the Government of the Virgin Islands as authorized by law; grants to the Government of Guam, as authorized by law; and grants to the Government of the Northern Mariana Islands as authorized by law (Public Law 94-241; 90 Stat. 272); and (2) \$9,262,000 shall be available until September 30, 2013 for salaries and expenses of the Office of Insular Affairs: *Provided*, That all financial transactions of the territorial and local governments herein provided for, including such transactions of all agencies or instrumentalities established or used

by such governments, may be audited by the Government Accountability Office, at its discretion, in accordance with chapter 35 of title 31, United States Code: *Provided further*, That Northern Mariana Islands Covenant grant funding shall be provided according to those terms of the Agreement of the Special Representatives on Future United States Financial Assistance for the Northern Mariana Islands approved by Public Law 104-134: *Provided further*, That the funds for the program of operations and maintenance improvement are appropriated to institutionalize routine operations and maintenance improvement of capital infrastructure with territorial participation and cost sharing to be determined by the Secretary based on the grantee's commitment to timely maintenance of its capital assets: *Provided further*, That any appropriation for disaster assistance under this heading in this Act or previous appropriations Acts may be used as non-Federal matching funds for the purpose of hazard mitigation grants provided pursuant to section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170c).

COMPACT OF FREE ASSOCIATION

For grants and necessary expenses, \$3,307,000, to remain available until expended, as provided for in sections 221(a)(2) of the Compact of Free Association for the Republic of Palau; and section 221(a)(2) of the Compacts of Free Association for the Government of the Republic of the Marshall Islands and the Federated States of Micronesia, as authorized by Public Law 99-658 and Public Law 108-188.

ADMINISTRATIVE PROVISIONS

(INCLUDING TRANSFER OF FUNDS)

At the request of the Governor of Guam, the Secretary may transfer discretionary funds or mandatory funds provided under section 104(e) of Public Law 108-188 and Public Law 104-134, that are allocated for Guam, to the Secretary of Agriculture for the subsidy cost of direct or guaranteed loans, plus not to exceed three percent of the amount of the subsidy transferred for the cost of loan administration, for the purposes authorized by the Rural Electrification Act of 1936 and section 306(a)(1) of the Consolidated Farm and Rural Development Act for construction and repair projects in Guam, and such funds shall remain available until expended: *Provided*, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974: *Provided further*, That such loans or loan guarantees may be made without regard to the population of the area, credit elsewhere requirements, and restrictions on the types of eligible entities under the Rural Electrification Act of 1936 and section 306(a)(1) of the Consolidated Farm and Rural Development Act: *Provided further*, That any funds transferred to the Secretary of Agriculture shall be in addition to funds otherwise made available to make or guarantee loans under such authorities.

OFFICE OF THE SOLICITOR SALARIES AND EXPENSES

For necessary expenses of the Office of the Solicitor, \$64,946,000.

AMENDMENT OFFERED BY MR. GOSAR

Mr. GOSAR. Madam Chair, I have an amendment at the table.

The Acting CHAIR. The Clerk will report the amendment.

The Clerk read as follows:

Page 36, line 24, after the dollar amount, insert “(decreased by \$4,367,000)”.

Page 88, line 9, after the dollar amount, insert “(increased by \$4,367,000)”.

The Acting CHAIR. The gentleman from Arizona is recognized for 5 minutes.

Mr. GOSAR. Thank you, Madam Chair.

As someone who has practiced chair-side dentistry for 25 years, I know firsthand the profound value of oral health, particularly for children. Oral health care access early in life is shown to be a critical aspect of primary preventative care. This is especially true in the Native American community, which I am proud to serve as a Representative of Arizona, which has 21 federally recognized tribes.

For this reason, my amendment would transfer \$4,367,000 from the Office of the Department of the Interior Solicitor General to the Indian Health Service. The committee report recommends \$4,367,000 less than the President's request for dental health within IHS, and while the bill does not name dental health specifically, I would like to make it clear on this floor tonight that this reallocation of funds is explicitly intended to fund dental health programs within IHS at the level recommended by the administration.

The United States Government took on long ago a number of treaty obligations to our Native people, and health care was among them. In particular, I cannot state strongly enough how imperative it is that the Indian tribes have this effort in the area of oral health fully funded.

Believe it or not, the incidence of early childhood caries, or commonly understood tooth decay, occurs among the Native American and Native Alaskan populations at 300 percent the rate of the United States average. This is unacceptable; and, again, as someone who has practiced dentistry as long as I have, I can tell you that this epidemic will have dire consequences for these children throughout their lives.

Worse still, the severity of decay is substantially higher in these children compared to the population as a whole. Preschool Native children average more than five decayed teeth compared to one decayed tooth among U.S. preschool children of all races. In many Native communities, between 25 and 50 percent of preschool children have such extensive tooth decay that they require full mouth restoration under general anesthesia, compared to less than 1 percent for non-Native children.

We have an obligation to improve this sad state of affairs, and so I offer this amendment and encourage my colleagues on both sides of the aisle to support it for the sake of these Native children to whom we have an obligation.

I yield back the balance of my time.
Mr. SIMPSON. I move to strike the last word.

The Acting CHAIR. The gentleman from Idaho is recognized for 5 minutes.

Mr. SIMPSON. Madam Chairwoman, you're going to hear from the entire Dental Caucus tonight. Congressman GOSAR from Arizona and myself are the

two dentists that are in Congress, so it might not surprise you that I support the gentleman's amendment. I appreciate his sincere efforts to address the obligations, both trust obligations and treaty obligations, and moral obligations, that we have with our Indian brothers and sisters across this country.

One of the things I'm proudest of in this bill, as I said in my opening statement during general debate, was to be able to carry on the work that had been done by Chairman DICKS when he was chairman of the committee, Chairman MORAN when he was chairman of the committee, and now that I'm chairman of the committee, to meet those trust obligations that we have with our Indian brothers and sisters across this country.

One of the areas in this bill, one of the two areas, that actually got increased funding was Indian health services because we do have an obligation to meet these things. Dental decay is the most prevalent disease in the United States; and as the gentleman from Arizona said, it's 300 percent more likely in Native Americans than it is in the general population. That's unacceptable. We have to do something about it. It means that we have to meet the contract obligations that we have had.

There's a saying that's been said around the country that if you live in Indian Country, you need to get sick before June, because the contract support costs run out about that time. One thing we've made a concerted effort to do on a bipartisan basis is try to fund 100 percent of the contract support costs for Native Americans. We haven't reached that goal yet. I think in this bill we're about at 93 or 94 percent, something like that. The contract support in the BIA that does the police work and those types of things are fully funded. We are going to continue to work to make sure that we meet those obligations that I think we all as Americans have.

I appreciate the amendment offered by the gentleman from Arizona, and I truly appreciate his support for our Indian brothers and sisters.

I yield back the balance of my time.

□ 2330

Mr. MORAN. Madam Chair, I move to strike the last word.

The Acting CHAIR. The gentleman from Virginia is recognized for 5 minutes.

Mr. MORAN. As I have said publicly and privately to the chairman of the Interior Appropriations Subcommittee, I congratulate him for taking the initiative and showing the commitment to the Indian Health Service by increasing it by \$369 million this year. And dental health specifically is up by \$13.8 million. That's above the existing level this year, and this year is above last year. Granted, the need is very substantial, and so I am very supportive.

The problem is that, with this amendment that adds another \$4.3 million for the express purpose of increasing dental health further, it's the offset. The cut is to the solicitor of the Department that serves as the chief legal officer, and it's the solicitor that provides legal services to Native Americans on behalf of the Department. So you're taking the chief legal officer for the Native Americans of this country and making a substantial cut to the resources available for that position. It's kind of robbing Peter to pay Paul.

There are very substantial and serious legal issues that need to be dealt with on behalf of Indians throughout the country, and there are very difficult health issues that certainly need to be addressed. So I did not rise in opposition to the amendment, but I do think that taking the money from the solicitor is an unfortunate place to be finding a cut of \$4.3 million.

Madam Chair, I yield back the balance of my time.

The Acting CHAIR. The question is on the amendment offered by the gentleman from Arizona (Mr. GOSAR).

The amendment was agreed to.

Mr. SIMPSON. Madam Chairman, I ask unanimous consent that the remainder of the bill through page 56, line 22 be considered as read, printed in the RECORD, and open to amendment at any point.

The Acting CHAIR. Is there objection to the request of the gentleman from Idaho?

There was no objection.

The text of that portion of the bill is as follows:

OFFICE OF INSPECTOR GENERAL
SALARIES AND EXPENSES

For necessary expenses of the Office of Inspector General, \$48,493,000.

OFFICE OF THE SPECIAL TRUSTEE FOR
AMERICAN INDIANS

FEDERAL TRUST PROGRAMS

(INCLUDING TRANSFER OF FUNDS)

For the operation of trust programs for Indians by direct expenditure, contracts, cooperative agreements, compacts, and grants, \$152,319,000, to remain available until expended, of which not to exceed \$31,171,000, from this or any other Act, shall be available for historical accounting: *Provided*, That funds for trust management improvements and litigation support may, as needed, be transferred to or merged with the Bureau of Indian Affairs, "Operation of Indian Programs" account; the Office of the Solicitor, "Salaries and Expenses" account; and the Office of the Secretary, "Salaries and Expenses" account: *Provided further*, That funds made available through contracts or grants obligated during fiscal year 2012, as authorized by the Indian Self-Determination Act of 1975 (25 U.S.C. 450 et seq.), shall remain available until expended by the contractor or grantee: *Provided further*, That, notwithstanding any other provision of law, the statute of limitations shall not commence to run on any claim, including any claim in litigation pending on the date of the enactment of this Act, concerning losses to or mismanagement of trust funds, until the affected tribe or individual Indian has been furnished with an accounting of such funds from which the beneficiary can determine whether there has been a loss: *Provided fur-*

ther, That, notwithstanding any other provision of law, the Secretary shall not be required to provide a quarterly statement of performance for any Indian trust account that has not had activity for at least 18 months and has a balance of \$15.00 or less: *Provided further*, That the Secretary shall issue an annual account statement and maintain a record of any such accounts and shall permit the balance in each such account to be withdrawn upon the express written request of the account holder: *Provided further*, That not to exceed \$50,000 is available for the Secretary to make payments to correct administrative errors of either disbursements from or deposits to Individual Indian Money or Tribal accounts after September 30, 2002: *Provided further*, That erroneous payments that are recovered shall be credited to and remain available in this account for this purpose.

DEPARTMENT-WIDE PROGRAMS
WILDLAND FIRE MANAGEMENT
(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses for fire preparedness, suppression operations, fire science and research, emergency rehabilitation, hazardous fuels reduction, and rural fire assistance by the Department of the Interior, \$574,072,000, to remain available until expended, of which not to exceed \$6,137,000 shall be for the renovation or construction of fire facilities: *Provided*, That such funds are also available for repayment of advances to other appropriation accounts from which funds were previously transferred for such purposes: *Provided further*, That persons hired pursuant to 43 U.S.C. 1469 may be furnished subsistence and lodging without cost from funds available from this appropriation: *Provided further*, That notwithstanding 42 U.S.C. 1856d, sums received by a bureau or office of the Department of the Interior for fire protection rendered pursuant to 42 U.S.C. 1856 et seq., protection of United States property, may be credited to the appropriation from which funds were expended to provide that protection, and are available without fiscal year limitation: *Provided further*, That using the amounts designated under this title of this Act, the Secretary of the Interior may enter into procurement contracts, grants, or cooperative agreements, for hazardous fuels reduction activities, and for training and monitoring associated with such hazardous fuels reduction activities, on Federal land, or on adjacent non-Federal land for activities that benefit resources on Federal land: *Provided further*, That the costs of implementing any cooperative agreement between the Federal Government and any non-Federal entity may be shared, as mutually agreed on by the affected parties: *Provided further*, That notwithstanding requirements of the Competition in Contracting Act, the Secretary, for purposes of hazardous fuels reduction activities, may obtain maximum practicable competition among: (1) local private, nonprofit, or cooperative entities; (2) Youth Conservation Corps crews, Public Lands Corps (Public Law 109-154), or related partnerships with State, local, or non-profit youth groups; (3) small or micro-businesses; or (4) other entities that will hire or train locally a significant percentage, defined as 50 percent or more, of the project workforce to complete such contracts: *Provided further*, That in implementing this section, the Secretary shall develop written guidance to field units to ensure accountability and consistent application of the authorities provided herein: *Provided further*, That funds appropriated under this heading may be used to reimburse the United States Fish and Wildlife Service and the National Marine Fisheries Service for the costs of carrying out their responsibil-

ities under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) to consult and conference, as required by section 7 of such Act, in connection with wildland fire management activities: *Provided further*, That the Secretary of the Interior may use wildland fire appropriations to enter into leases of real property with local governments, at or below fair market value, to construct capitalized improvements for fire facilities on such leased properties, including but not limited to fire guard stations, retardant stations, and other initial attack and fire support facilities, and to make advance payments for any such lease or for construction activity associated with the lease: *Provided further*, That the Secretary of the Interior and the Secretary of Agriculture may authorize the transfer of funds appropriated for wildland fire management, in an aggregate amount not to exceed \$50,000,000, between the Departments when such transfers would facilitate and expedite jointly funded wildland fire management programs and projects: *Provided further*, That funds provided for wildfire suppression shall be available for support of Federal emergency response actions: *Provided further*, That funds appropriated under this heading shall be available for assistance to or through the Department of State in connection with forest and rangeland research, technical information, and assistance in foreign countries, and, with the concurrence of the Secretary of State, shall be available to support forestry, wildland fire management, and related natural resource activities outside the United States and its territories and possessions, including technical assistance, education and training, and cooperation with United States and international organizations: *Provided further*, That, before obligating any of the funds provided herein for wildland fire suppression, the Secretary of the Interior shall obligate all unobligated balances previously made available under this heading that, when appropriated, were designated by Congress as an emergency requirement pursuant to the Concurrent Resolution on the Budget or the Balanced Budget and Emergency Deficit Control Act of 1985 and notify the Committees on Appropriations of the House of Representatives and the Senate in writing of the imminent need to begin obligating funds provided herein for wildland fire suppression: *Provided further*, That the Secretary of the Interior may transfer not more than \$50,000,000 of the funds provided herein to the Secretary of Agriculture if the Secretaries determine that the transfer will enhance the efficiency or effectiveness of Federal wildland fire suppression activities.

FLAME WILDFIRE SUPPRESSION RESERVE FUND
(INCLUDING TRANSFER OF FUNDS)

For necessary expenses for large fire suppression operations of the Department of the Interior and as a reserve fund for suppression and Federal emergency response activities, \$92,000,000, to remain available until expended: *Provided*, That such amounts are available only for transfer to the "Wildland Fire Management" account and only following a declaration by the Secretary that either (1) a wildland fire suppression event meets certain previously-established risk-based written criteria for significant complexity, severity, or threat posed by the fire or (2) funds in the "Wildland Fire Management" account will be exhausted within 30 days.

CENTRAL HAZARDOUS MATERIALS FUND

For necessary expenses of the Department of the Interior and any of its component offices and bureaus for the response action, including associated activities, performed pursuant to the Comprehensive Environmental

Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), \$10,149,000, to remain available until expended.

NATURAL RESOURCE DAMAGE ASSESSMENT AND RESTORATION

NATURAL RESOURCE DAMAGE ASSESSMENT FUND

To conduct natural resource damage assessment and restoration activities by the Department of the Interior necessary to carry out the provisions of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.), the Oil Pollution Act of 1990 (33 U.S.C. 2701 et seq.), and Public Law 101-337, as amended (16 U.S.C. 191j et seq.), \$5,763,000, to remain available until expended.

WORKING CAPITAL FUND

For the acquisition of a departmental financial and business management system, information technology improvements of general benefit to the Department, and consolidation of facilities and operations throughout the Department, \$57,019,000, to remain available until expended: *Provided*, That none of the funds appropriated in this Act or any other Act may be used to establish reserves in the Working Capital Fund account other than for accrued annual leave and depreciation of equipment without prior approval of the House and Senate Committees on Appropriations: *Provided further*, That the Secretary may assess reasonable charges to State, local and tribal government employees for training services provided by the National Indian Program Training Center, other than training related to Public Law 93-638: *Provided further*, That the Secretary may lease or otherwise provide space and related facilities, equipment or professional services of the National Indian Program Training Center to State, local and tribal government employees or persons or organizations engaged in cultural, educational, or recreational activities (as defined in section 3306(a) of title 40, United States Code) at the prevailing rate for similar space, facilities, equipment, or services in the vicinity of the National Indian Program Training Center: *Provided further*, That all funds received pursuant to the two preceding provisos shall be credited to this account, shall be available until expended, and shall be used by the Secretary for necessary expenses of the National Indian Program Training Center.

ADMINISTRATIVE PROVISION

There is hereby authorized for acquisition from available resources within the Working Capital Fund, 15 aircraft, 10 of which shall be for replacement and which may be obtained by donation, purchase or through available excess surplus property: *Provided*, That existing aircraft being replaced may be sold, with proceeds derived or trade-in value used to offset the purchase price for the replacement aircraft.

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

(INCLUDING TRANSFERS OF FUNDS)

EMERGENCY TRANSFER AUTHORITY—INTRA-BUREAU

SEC. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of

the Interior for emergencies shall have been exhausted: *Provided further*, That all funds used pursuant to this section must be replenished by a supplemental appropriation which must be requested as promptly as possible.

EMERGENCY TRANSFER AUTHORITY—DEPARTMENT-WIDE

SEC. 102. The Secretary may authorize the expenditure or transfer of any no year appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of wildland fires on or threatening lands under the jurisdiction of the Department of the Interior; for the emergency rehabilitation of burned-over lands under its jurisdiction; for emergency actions related to potential or actual earthquakes, floods, volcanoes, storms, or other unavoidable causes; for contingency planning subsequent to actual oil spills; for response and natural resource damage assessment activities related to actual oil spills or releases of hazardous substances into the environment; for the prevention, suppression, and control of actual or potential grasshopper and Mormon cricket outbreaks on lands under the jurisdiction of the Secretary, pursuant to the authority in section 417(b) of Public Law 106-224 (7 U.S.C. 7717(b)); for emergency reclamation projects under section 410 of Public Law 95-87; and shall transfer, from any no year funds available to the Office of Surface Mining Reclamation and Enforcement, such funds as may be necessary to permit assumption of regulatory authority in the event a primacy State is not carrying out the regulatory provisions of the Surface Mining Act: *Provided*, That appropriations made in this title for wildland fire operations shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for wildland fire operations, such reimbursement to be credited to appropriations currently available at the time of receipt thereof: *Provided further*, That for wildland fire operations, no funds shall be made available under this authority until the Secretary determines that funds appropriated for "wildland fire operations" and "FLAME Wildfire Suppression Reserve Fund" shall be exhausted within 30 days: *Provided further*, That all funds used pursuant to this section must be replenished by a supplemental appropriation which must be requested as promptly as possible: *Provided further*, That such replenishment funds shall be used to reimburse, on a pro rata basis, accounts from which emergency funds were transferred.

AUTHORIZED USE OF FUNDS

SEC. 103. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by section 3109 of title 5, United States Code, when authorized by the Secretary, in total amount not to exceed \$500,000; purchase and replacement of motor vehicles, including specially equipped law enforcement vehicles; hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

AUTHORIZED USE OF FUNDS, INDIAN TRUST MANAGEMENT

SEC. 104. Appropriations made in this Act under the headings Bureau of Indian Affairs

and Office of the Special Trustee for American Indians and any unobligated balances from prior appropriations Acts made under the same headings shall be available for expenditure or transfer for Indian trust management and reform activities. Total funding for historical accounting activities shall not exceed amounts specifically designated in this Act for such purpose.

REDISTRIBUTION OF FUNDS, BUREAU OF INDIAN AFFAIRS

SEC. 105. Notwithstanding any other provision of law, the Secretary of the Interior is authorized to redistribute any Tribal Priority Allocation funds, including tribal base funds, to alleviate tribal funding inequities by transferring funds to address identified, unmet needs, dual enrollment, overlapping service areas or inaccurate distribution methodologies. No tribe shall receive a reduction in Tribal Priority Allocation funds of more than 10 percent in fiscal year 2012. Under circumstances of dual enrollment, overlapping service areas or inaccurate distribution methodologies, the 10 percent limitation does not apply.

TWIN CITIES RESEARCH CENTER

SEC. 106. Notwithstanding any other provision of law, in conveying the Twin Cities Research Center under the authority provided by Public Law 104-134, the Secretary may accept and retain land and other forms of reimbursement: *Provided*, That the Secretary may retain and use any such reimbursement until expended and without further appropriation: (1) for the benefit of the National Wildlife Refuge System within the State of Minnesota; and (2) for all activities authorized by section 701 of Public Law 100-696 (16 U.S.C. 460zz).

PAYMENT OF FEES

SEC. 107. The Secretary of the Interior may use discretionary funds to pay private attorney fees and costs for employees and former employees of the Department of the Interior reasonably incurred in connection with *Cobell v. Salazar* to the extent that such fees and costs are not paid by the Department of Justice or by private insurance. In no case shall the Secretary make payments under this section that would result in payment of hourly fees in excess of the highest hourly rate approved by the District Court for the District of Columbia for counsel in *Cobell v. Salazar*.

EVERGLADES ECOSYSTEM RESTORATION

SEC. 108. This and any subsequent fiscal year, the National Park Service is authorized to implement modifications to the Tamiami Trail as described in, and in accordance with, the preferred alternative identified in the final environmental impact statement noticed in the Federal Register on December 14, 2010, (75 Fed. Reg. 77896), relating to restoration efforts of the Everglades ecosystem.

ELLIS, GOVERNORS, AND LIBERTY ISLANDS

SEC. 109. Notwithstanding any other provision of law, the Secretary of the Interior is authorized to acquire lands, waters, or interests therein including the use of all or part of any pier, dock, or landing within the State of New York and the State of New Jersey, for the purpose of operating and maintaining facilities in the support of transportation and accommodation of visitors to Ellis, Governors, and Liberty Islands, and of other program and administrative activities, by donation or with appropriated funds, including franchise fees (and other monetary consideration), or by exchange; and the Secretary is authorized to negotiate and enter into leases, subleases, concession contracts or other agreements for the use of such facilities on such terms and conditions as the Secretary may determine reasonable.

INDIAN PROBATE JUDGES

SEC. 110. In fiscal year 2012 and each fiscal year thereafter, for the purpose of adjudicating Indian probate cases in the Department of the Interior, the hearing requirements of chapter 10 of title 25, United States Code, are deemed satisfied by a proceeding conducted by an Indian probate judge, appointed by the Secretary without regard to the provisions of title 5, United States Code, governing the appointments in the competitive service, for such period of time as the Secretary determines necessary: *Provided*, That the basic pay of an Indian probate judge so appointed may be fixed by the Secretary without regard to the provisions of chapter 51, and subchapter III of chapter 53 of title 5, United States Code, governing the classification and pay of General Schedule employees, except that no such Indian probate judge may be paid at a level which exceeds the maximum rate payable for the highest grade of the General Schedule, including locality pay.

BUREAU OF OCEAN ENERGY MANAGEMENT, REGULATION AND ENFORCEMENT REORGANIZATION

SEC. 111. The Secretary of the Interior, in order to implement a reorganization of the Bureau of Ocean Energy Management, Regulation and Enforcement, may establish accounts and transfer funds among and between the offices and bureaus affected by the reorganization only in conformance with the reprogramming guidelines described in the report accompanying this Act.

AUTHORIZED USE OF INDIAN EDUCATION FUNDS

SEC. 112. Beginning July 1, 2008, any funds (including investments and interest earned, except for construction funds) held by a Public Law 100-297 grant or a Public Law 93-638 contract school shall, upon retrocession to or re-assumption by the Bureau of Indian Education, remain available to the Bureau of Indian Education for a period of 5 years from the date of retrocession or re-assumption for the benefit of the programs approved for the school on October 1, 1995.

CONTRACTS AND AGREEMENTS FOR WILD HORSE AND BURRO HOLDING FACILITIES

SEC. 113. (a) Notwithstanding any other provision of this Act, the Secretary of the Interior may enter into multiyear cooperative agreements with nonprofit organizations and other appropriate entities, and may enter into multiyear contracts in accordance with the provisions of section 304B of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 254c) (except that the 5 year term restriction in subsection (d) shall not apply), for the long-term care and maintenance of excess wild free roaming horses and burros by such organizations or entities on private land. Such cooperative agreements and contracts may not exceed 10 years, subject to renewal at the discretion of the Secretary.

(b) During fiscal year 2012 and subsequent fiscal years, in carrying out work involving cooperation with any State or political subdivision thereof, the Bureau of Land Management may record obligations against accounts receivable from any such entities.

BUREAU OF INDIAN EDUCATION OPERATED SCHOOLS

SEC. 114. (a)(1) Notwithstanding section 586(c) of title 40, United States Code, the head of a Bureau-operated school is authorized to enter into agreements with public and private persons and entities that provide for such persons and entities to rent or lease the land or facilities of the school in exchange for a consideration (in the form of funds) that benefits the school, as determined by the head of the school when such rent or lease does not interfere with school operations.

(2) Funds received under paragraph (1) shall be retained by the school and used for school purposes otherwise authorized by law. Any funds received under paragraph (1) are hereby made available until expended for such purposes, notwithstanding section 3302 of title 31, United States Code.

(3) Nothing in this section shall be construed to allow for the diminishment of, or otherwise affect, the appropriation of funds to the budget accounts for the operation and maintenance of Bureau-operated schools. No funds shall be withheld from the distribution to the budget of any Bureau-operated school due to the receipt by the school of a benefit in accordance with this section.

(b) Notwithstanding any provision of title 5, United States Code, or any regulation promulgated under such title, education personnel who are under the direction and supervision of the Secretary of the Interior may participate in a fundraising activity for the benefit of a Bureau-operated school in an official capacity as part of their official duties. When participating in such an official capacity, the employee may use the employee's official title, position, and authority. Nothing in this subsection shall be construed to authorize participation in political activity (as such term is used in section 7324 of title 5, United States Code) otherwise prohibited by law.

(c) The Secretary of the Interior shall promulgate regulations to carry out this section not later than 12 months after the date of the enactment of this Act. Such regulations shall include—

(1) provisions for the establishment and administration of mechanisms for the acceptance of consideration for the use and benefit of a school in accordance with this section (including, in appropriate cases, the establishment and administration of trust funds);

(2) accountability standards to ensure ethical conduct; and

(3) provisions for monitoring the amount and terms of consideration received, the manner in which the consideration is used, and any results achieved by such use.

(d) Provisions of this section shall apply to fiscal year 2012 and subsequent fiscal years.

MASS MARKING OF SALMONIDS

SEC. 115. The United States Fish and Wildlife Service shall, in carrying out its responsibilities to protect threatened and endangered species of salmon, implement a system of mass marking of salmonid stocks, intended for harvest, that are released from federally operated or federally financed hatcheries including but not limited to fish releases of coho, chinook, and steelhead species. Marked fish must have a visible mark that can be readily identified by commercial and recreational fishers.

Mr. SIMPSON. Madam Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. GOSAR) having assumed the chair, Ms. FOXX, Acting Chair of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill (H.R. 2584) making appropriations for the Department of the Interior, environment, and related agencies for the fiscal year ending September 30, 2012, and for other purposes, had come to no resolution thereon.

ENROLLED BILL SIGNED

Karen L. Haas, Clerk of the House, reported and found truly enrolled a bill

of the House of the following title, which was thereupon signed by the Speaker:

H.R. 1383. An act to temporarily preserve higher rates for tuition and fees for programs of education at non-public institutions of higher learning pursued by individuals enrolled in the Post-9/11 Educational Assistance Program of the Department of Veterans Affairs before the end enactment of the Post-9/11 Veterans Educational Assistance Improvements Act of 2010, and for other purposes.

SENATE ENROLLED BILL SIGNED

The Speaker announced his signature to an enrolled bill of the Senate of the following title:

S. 1103—An act to extend the term of the incumbent Director of the Federal Bureau of Investigation.

ADJOURNMENT

Mr. SIMPSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 34 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, July 27, 2011, at 10 a.m. for morning-hour debate.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XIV, executive communications were taken from the Speaker's table and referred as follows:

2605. A letter from the Chief Counsel, Department of Homeland Security, transmitting the Department's final rule — Suspension of Community Eligibility [Docket ID: FEMA-2011-0002] [Internal Agency Docket No. FEMA-8185] received June 28, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2606. A letter from the Regulatory Specialist, LRAD, Department of the Treasury, transmitting the Department's final rule — Risk Based Capital Standards: Advanced Capital Adequacy Framework — Basel II; Establishment of a Risk-Based Capital Floor [Docket No.: -2010-0009] (RIN: 1557-AD33) received June 20, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2607. A letter from the Deputy Assistant General Counsel for Regulatory Services, Department of Education, transmitting the Department's final rule — Final Priorities; Disability and Rehabilitation Research Projects and Centers Program — Disability Rehabilitation Research Projects (DRRP) — Americans with Disabilities Act (ADA) National Networks Regional Centers (formerly the Disability Business Technical Assistance Centers (DBTACs), the ADA National Network Knowledge Translation Center, and the ADA National Network Collaborative Research Projects [CFDA Numbers: 84.133A-6, 84.133A-7, and 84.133A-8] received June 20, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Education and the Workforce.

2608. A letter from the Deputy Assistant General Counsel for Regulatory Services, Department of Education, transmitting the Department's final rule — Final Priorities; Disability and Rehabilitation Research Projects and Centers Program [CFDA Numbers: 84.133E-1 and 84.133E-3] received June 28, 2011, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Education and the Workforce.

2609. REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BACHUS: Committee on Financial Services. H.R. 2056. A bill to instruct the Inspector General of the Federal Deposit Insurance Corporation to study the impact of insured depository institution failures, and for other purposes; with an amendment (Rept. 112-182). Referred to the Committee of the Whole House on the State of the Union.

Mr. SCOTT of South Carolina: Committee on Rules. House Resolution 372. Resolution providing for consideration of the bill (H.R. 2587) to prohibit the National Labor Relations Board from ordering any employer to close, relocate, or transfer employment under any circumstance (Rept. 112-183). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions of the following titles were introduced and severally referred, as follows:

By Ms. HAYWORTH:

H.R. 2642. A bill to prohibit the disposal of certain Department of Veterans Affairs land and improvements in the Hudson Valley Healthcare System; to the Committee on Veterans' Affairs.

By Mr. MCDERMOTT (for himself, Mr. JONES, Mr. CONYERS, and Mr. ELLISON):

H.R. 2643. A bill to provide for medical neutrality and to establish accountability for violations of the principle of medical neutrality, and for other purposes; to the Committee on Foreign Affairs, and in addition to the Committee on the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. COSTELLO (for himself, Mr. RAHALL, Mr. LEVIN, Mr. LEWIS of Georgia, Mr. DEFAZIO, Ms. NORTON, Mr. NADLER, Ms. BROWN of Florida, Mr. FILNER, Ms. EDDIE BERNICE JOHNSON of Texas, Mr. CUMMINGS, Mr. BOSWELL, Mr. HOLDEN, Mr. LARSEN of Washington, Mr. CAPUANO, Mr. BISHOP of New York, Mr. MICHAUD, Mr. CARNAHAN, Mrs. NAPOLITANO, Mr. LIPINSKI, Ms. HIRONO, Mr. ALTMIRE, Mr. WALZ of Minnesota, Mr. SHULER, Mr. COHEN, Ms. RICHARDSON, Mr. SIRES, and Ms. EDWARDS):

H.R. 2644. A bill to amend the Internal Revenue Code of 1986 to extend the funding and expenditure authority of the Airport and Airway Trust Fund, to amend title 49, United States Code, to extend the airport improvement program, and for other purposes; to the Committee on Transportation and Infrastructure, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. STARK (for himself, Mr. WAXMAN, and Mr. PALLONE):

H.R. 2645. A bill to amend title XVIII of the Social Security Act to increase the minimum loss ratio required of Medigap policies; to the Committee on Ways and Means, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. JOHNSON of Ohio:

H.R. 2646. A bill to authorize certain Department of Veterans Affairs major medical facility projects and leases, to extend certain expiring provisions of law, and to modify certain authorities of the Secretary of Veterans Affairs, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. CUMMINGS (for himself, Mr. HASTINGS of Florida, Mr. RANGEL, Mr. STARK, Mr. PIERLUISI, and Mr. COHEN):

H.R. 2647. A bill to require the Attorney General to make competitive grants to eligible State, tribal, and local governments to establish and maintain certain protection and witness assistance programs; to the Committee on the Judiciary.

By Ms. HIRONO (for herself, Mr. YOUNG of Alaska, and Ms. HANABUSA):

H.R. 2648. A bill to reauthorize the programs of the Department of Housing and Urban Development for housing assistance for Native Hawaiians; to the Committee on Financial Services.

By Mr. BRADY of Texas (for himself, Mr. KIND, Mr. CLAY, Mr. GERLACH, Mr. BARTON of Texas, Mr. MCINTYRE, Mr. PAUL, Mr. BLUMENAUER, Mr. RUPERSBERGER, and Mr. SHUSTER):

H.R. 2649. A bill to amend the Internal Revenue Code of 1986 to treat certain amounts paid for physical activity, fitness, and exercise as amounts paid for medical care; to the Committee on Ways and Means.

By Mr. COSTA:

H.R. 2650. A bill to designate the United States courthouse under construction at 510 19th Street, Bakersfield, California, as the Myron Donovan Crocker United States Courthouse; to the Committee on Transportation and Infrastructure.

By Mr. SCHWEIKERT (for himself, Mr. MULVANEY, Mr. GARRETT, and Mr. DUNCAN of South Carolina):

H.R. 2651. A bill to require that the United States Government prioritize all obligations on the debt held by the public, Social Security benefits, and military pay in the event that the debt limit is reached, and for other purposes; to the Committee on Ways and Means.

By Mr. COBLE:

H.R. 2652. A bill to amend title 5, United States Code, to provide that Members must complete 12 years of creditable service in order to be vested in an annuity under the Federal Employee Retirement System, and for other purposes; to the Committee on House Administration, and in addition to the Committee on Oversight and Government Reform, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. COOPER (for himself, Mr. KIND, Mr. WELCH, Mr. CUELLAR, Mr. COSTA, Mr. THOMPSON of California, Mr. DONNELLY of Indiana, Mr. ALTMIRE, Mr. MATHESON, Mr. BOSWELL, Mr. SCHRAEDER, Mr. BOREN, Mr. BISHOP of Georgia, Mr. SHULER, Mr. KISSELL, Mr. CARNEY, and Mr. HIMES):

H.R. 2653. A bill to provide that Members of Congress shall be paid last whenever the

Treasury is unable to liquidate the obligations of the United States Government in a timely manner because the public debt limit has been reached; to the Committee on House Administration.

By Mr. ELLISON:

H.R. 2654. A bill to amend the Servicemembers Civil Relief Act to provide servicemembers increased protection during a funding gap; to the Committee on Veterans' Affairs.

By Mr. GERLACH (for himself, Mr. NEAL, Mr. TIBERI, Mr. RANGEL, Mr. MCDERMOTT, Mr. LEWIS of Georgia, and Mr. BLUMENAUER):

H.R. 2655. A bill to amend the Internal Revenue Code of 1986 to extend the new markets tax credit through 2016, and for other purposes; to the Committee on Ways and Means.

By Mr. KIND (for himself, Mr. PETRI, and Mr. MCDERMOTT):

H.R. 2656. A bill to amend the Internal Revenue Code of 1986 and the Employee Retirement Income Security Act of 1974 to make technical modifications relating to the Worker, Retiree, and Employer Recovery Act of 2008 and the Preservation of Access to Care for Medicare Beneficiaries and Pension Relief Act of 2010; to the Committee on Education and the Workforce, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mrs. LOWEY (for herself, Mr. MORAN, Mr. CONNOLLY of Virginia, Mr. SERRANO, Mr. COHEN, Mr. SHERMAN, Mr. BRADY of Pennsylvania, Mr. GEORGE MILLER of California, Mr. WAXMAN, Mr. KUCINICH, Mr. DEUTCH, Mr. BLUMENAUER, Mr. GRIJALVA, Mr. RANGEL, Mr. VAN HOLLEN, Mr. HINCHHEY, Mr. KISSELL, Mr. STARK, Mr. LEWIS of Georgia, Mr. DEFAZIO, Ms. SCHAKOWSKY, and Mr. NADLER):

H.R. 2657. A bill to end the use of body-gripping traps in the National Wildlife Refuge System; to the Committee on Natural Resources.

By Mr. DANIEL E. LUNGREN of California:

H.R. 2658. A bill to amend the Homeland Security Act of 2002 to enhance the ability of the Federal Protective Service to provide adequate security for the prevention of terrorist activities and for the promotion of homeland security, and for other purposes; to the Committee on Transportation and Infrastructure, and in addition to the Committee on Homeland Security, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mrs. MALONEY (for herself, Mr. TOWNS, Mr. GRIJALVA, Ms. NORTON, Ms. LEE, Ms. SPELER, Ms. MOORE, Ms. HIRONO, and Mr. INSLEE):

H.R. 2659. A bill to establish certain duties for pharmacies to ensure provision of Food and Drug Administration-approved contraception, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MCCAUL (for himself, Mr. GOMMERT, Mr. POE of Texas, Mr. SAM JOHNSON of Texas, Mr. HENSARLING, Mr. BARTON of Texas, Mr. CULBERSON, Mr. BRADY of Texas, Mr. AL GREEN of Texas, Mr. CONAWAY, Ms. GRANGER, Mr. THORNBERRY, Mr. PAUL, Mr. REYES, Ms. JACKSON LEE of Texas, Mr. GONZALEZ, Mr. SMITH of Texas, Mr. OLSON, Mr. DOGGETT, Mr. FARENTHOLD, Ms. EDDIE BERNICE JOHNSON of Texas, Mr. CARTER, Mr. SESSIONS, Mr. HALL, Mr. HINOJOSA, Mr. FLORES, Mr. BURGESS, Mr. GENE

GREEN of Texas, Mr. CANSECO, Mr. CUELLAR, Mr. NEUGEBAUER, and Mr. MARCHANT):

H.R. 2660. A bill to designate the facility of the United States Postal Service located at 122 North Holderrieth Boulevard in Tomball, Texas, as the "Tomball Veterans Post Office"; to the Committee on Oversight and Government Reform.

By Mr. OWENS:

H.R. 2661. A bill to amend the Tariff Act of 1930 to waive the requirement to report the arrival at any port or place within the United States of a vessel of Canada if the vessel does not anchor or dock at any harbor within the customs territory of the United States; to the Committee on Ways and Means.

By Mr. RIBBLE:

H.R. 2662. A bill to amend the Internal Revenue Code of 1986 to provide for equity relating to medical costs; to the Committee on Ways and Means.

By Mr. SMITH of Washington (for himself, Mr. HOYER, Mr. DICKS, and Mr. BERMAN):

H.J. Res. 74. A joint resolution authorizing the limited use of the United States Armed Forces in support of the NATO mission in Libya; to the Committee on Foreign Affairs, and in addition to the Committee on Armed Services, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. BERKLEY:

H. Res. 373. A resolution supporting the goals and ideals of a national day of remembrance for United States nuclear weapons program workers and uranium miners, millers, and haulers; to the Committee on Oversight and Government Reform.

By Mr. SHUSTER (for himself and Ms. SCHWARTZ):

H. Res. 374. A resolution expressing the sense of the House of Representatives that the United States should initiate negotiations to enter into a free trade agreement with Georgia; to the Committee on Ways and Means.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

95. The SPEAKER presented a memorial of the House of Representatives of the State of Florida, relative to House Memorial 9 requesting that the Congress allocate moneys generated from marine and fishery product import tariffs for the domestic marketing of Florida seafood; to the Committee on Agriculture.

96. Also, a memorial of the House of Representatives of the State of Maine, relative to H.P. 1179 Joint Resolution urging the President and the Congress to realize the major problems of corn ethanol as a fuel additive; to the Committee on Energy and Commerce.

97. Also, a memorial of the House of Representatives of the State of Florida, relative to House Memorial 557 proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

98. Also, a memorial of the House of Representatives of the State of Florida, relative to House Memorial 1047 requesting that the United States Treasury Department withdraw Internal Revenue Service regulation REG-146097-09; to the Committee on Ways and Means.

CONSTITUTIONAL AUTHORITY STATEMENT

Pursuant to clause 7 of rule XII of the Rules of the House of Representatives, the following statements are submitted regarding the specific powers granted to Congress in the Constitution to enact the accompanying bill or joint resolution.

By Ms. HAYWORTH:

H.R. 2642.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, of the United States Constitution reserves to Congress the power to raise and support Armies and provide and maintain a Navy, as well as make Rules for the Government and Regulation of the land and naval Forces.

By Mr. McDERMOTT:

H.R. 2643.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 1 (spending authorization);

Article I, Section 8, Clause 3 (foreign commerce); and

Article I, Section 8, Clause 4 (immigration regulation).

By Mr. COSTELLO:

H.R. 2644.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 3

The Congress shall have Power to regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes.

By Mr. STARK:

H.R. 2645.

Congress has the power to enact this legislation pursuant to the following:

Clause 3, Section 8 of Article I of the Constitution.

By Mr. JOHNSON of Ohio:

H.R. 2646.

Congress has the power to enact this legislation pursuant to the following:

Clauses 12, 13, 14, and 18 of Section 8 of Article I of the United States Constitution

By Mr. CUMMINGS:

H.R. 2647.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 1

By Ms. HIRONO:

H.R. 2648.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 3.

By Mr. BRADY of Texas:

H.R. 2649.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, Clause 1

The Congress shall have Power to lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defence and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States.

By Mr. COSTA:

H.R. 2650.

Congress has the power to enact this legislation pursuant to the following:

This bill is enacted pursuant to the power granted to Congress under Section Eight, Clause one of the first Article one the United States Constitution.

By Mr. SCHWEIKERT:

H.R. 2651.

Congress has the power to enact this legislation pursuant to the following:

Article One, Section Eight

By Mr. COBLE:

H.R. 2652.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 6 of the United States Constitution

By Mr. COOPER:

H.R. 2653.

Congress has the power to enact this legislation pursuant to the following:

Article 1, Sections 8 and 9 of the Constitution of the United States.

By Mr. ELLISON:

H.R. 2654.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8.

By Mr. GERLACH:

H.R. 2655.

Congress has the power to enact this legislation pursuant to the following:

The Congress enacts this bill pursuant to Clause 1 of Section 8 of Article I of the United States Constitution.

By Mr. KIND:

H.R. 2656.

Congress has the power to enact this legislation pursuant to the following:

Article I Section 8.

By Mrs. LOWEY:

H.R. 2657.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, of the Constitution of the United States

By Mr. DANIEL E. LUNGREN of California:

H.R. 2658.

Congress has the power to enact this legislation pursuant to the following:

The constitutional authority on which this bill rests is the Commerce Clause of Article 1, Section 8 and to provide for the common defense also in Article 1, Section 8.

By Mrs. MALONEY:

H.R. 2659.

Congress has the power to enact this legislation pursuant to the following:

Clause 3 of Section 8 of Article I of the Constitution.

By Mr. McCAUL:

H.R. 2660.

Congress has the power to enact this legislation pursuant to the following:

Article 1, Section 8 of the United States Constitution: "The Congress shall have Power . . . To establish Post Offices and post Roads."

By Mr. OWENS:

H.R. 2661.

Congress has the power to enact this legislation pursuant to the following:

The Commerce Clause (Art. I, §8, cl. 3) of the United States Constitution provides that the Congress shall have the power to regulate interstate and foreign commerce.

By Mr. RIBBLE:

H.R. 2662.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, clause 1 of the U.S. Constitution.

By Mr. SMITH of Washington:

H.J. Res. 74.

Congress has the power to enact this legislation pursuant to the following:

Article I, Section 8, clauses 11 through 13, relating to Congress' authority to declare war, raise and support armies, and provide and maintain a Navy, respectively.

ADDITIONAL SPONSORS
