REPORT ON H.R. 2397, DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2014

Mr. FRELINGHUYSEN, from the Committee on Appropriations, submitted a privileged report (Rept. No. 113-113) on the bill (H.R. 2397) making appropriations for the Department of Defense for the fiscal year ending September 30, 2014, and for other purposes, which was referred to the Union Calendar and ordered to be printed.

The SPEAKER pro tempore. Pursuant to clause 1, rule XXI, all points of order are reserved on the bill.

ENROLL AMERICA

(Mr. BURGESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURGESS. Mr. Speaker, today, the White House's permanent campaign machine released a television ad promoting the Affordable Care Act and, unfortunately, it aims to completely mislead the public. The ad claims that Americans are seeing better coverage and lower costs because of the Affordable Care Act. That is pure fantasy.

The fact is that premiums have been ratcheting upward across the country. On average, rates in Ohio will go up to almost \$200 a month because of this law. It's the same story state by state. These rising costs clearly have the administration worried that people are

going to understand how bad the Affordable Care Act is.

Enroll America is set to spend tens of millions of dollars in promoting this law. This is money that they raised by using current and former administration officials to unethically, if not illegally, strong-arm donations from health care companies that are regulated by the Department of Health and Human Services.

The administration put together a law that hurts families and now they have to spend tens of millions of dollars telling people that "hey, it ain't so bad."

Mr. Speaker, this is a travesty. It should be stopped.

CLIMATE CHANGE

(Mr. WAXMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WAXMAN. Mr. Speaker, this last week, the International Energy Agency came out with a very important report about climate change. They said that if we don't act soon, we are going to see extreme weather events—droughts, hurricanes, all sorts of flooding, real serious problems for our children and our grandchildren. But the important thing in this report is if we do act now, we can avert some of those horrible consequences that will face our children, and especially our grandchildren.

I want to urge the Congress to take this report seriously and let us start acting to protect future generations and this planet. We only have one atmosphere we share with everyone else. Let's not pollute it so that the carbon emissions and greenhouse gases continue to heat the planet and cause climate problems that we're already witnessing today. Let's move. It will help our economy, as well as our environment.

ABUNDANT, CLEAN, AND AFFORDABLE NATURAL GAS

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Mr. Speaker, America is blessed with abundant, clean, and affordable natural gas. As the amount of known natural gas reserves continually increases, we are also blessed with the technology to be environmentally responsible when accessing this resource.

In my home State of Pennsylvania, the discovery and extraction of the Marcellus shale has been transforming. During the difficult years of an economy in recession, unemployment numbers in the Keystone State have remained well below the national rates. We can attribute a substantial portion of this prosperity to development related to this plentiful natural resource.
