

causing tumors in the kidneys, lungs, liver, heart, eyes, skin, and brain. Researchers have linked TSC to seizures, autism, and severe intellectual disability.

Research on this condition is also having a notable impact on our understanding of traumatic brain injury and other medical conditions, like cancer and diabetes.

The TSC program at the Department of Defense is critical to our continued understanding of this condition.

With me on the floor today, Mr. Speaker, is a beautiful little girl, Stephanie from Pennsylvania, who has been diagnosed with TSC.

Her brave spirit brings light to the importance of this cause and helps remind us of others living with this condition across the United States.

It is crucial that we continue to band together as a community and a legislative body to support this significant research initiative.

The SPEAKER pro tempore (Ms. ROSELEHTINEN). The Chair reminds Members not to refer to persons on the floor as guests of the House.

DEEPENING THE SAVANNAH HARBOR

(Mr. BARROW of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARROW of Georgia. Madam Speaker, I rise in great disappointment that the President's budget makes no provision for deepening the Savannah harbor.

The Port of Savannah is one of the busiest in the country and is a major thoroughway for all sorts of essential goods coming in and out of the country. The State of Georgia has collaborated with the Federal Government to ensure that the port is deepened to accommodate the larger ships that will soon come through the expanded Panama Canal.

After decades of study, State and local stakeholders, congressional authorizers and appropriators, the Corps of Engineers, the U.S. Fish and Wildlife Service, the National Oceanic and Atmospheric Administration, and the EPA have all endorsed this project as technically feasible, economically justified, cost-effective, environmentally responsible, and in the national interest.

Vice President BIDEN recently visited Savannah and promised we would get this project done, "come hell or high water." Only OMB now stands in the way.

This project makes sense to almost everyone who has studied it. I share the frustration of my constituents that it continues to be stalled by bureaucracy, and I urge the President to lead, follow, or get out of the way of the effort to make this project happen.

NUCLEAR ENERGY

(Mr. WILLIAMS asked and was given permission to address the House for 1 minute.)

Mr. WILLIAMS. Madam Speaker, as a business owner of 42 years, I know a few things about job creation, and with more than 10 million Americans out of work, it is time to energize the energy business. We need to let the private sector drive our initiatives and promote the advancement of safe nuclear energy.

Nuclear power sustains 100,000 high-paying jobs, and 2,000 of those are in Texas facilities. In my district, the 25th District of Texas, there are hundreds of highly skilled workers at the Comanche Peak Nuclear Plant who are doing a great job and are doing great things to promote this clean, reliable, and inexpensive energy source, less expensive than coal or natural gas.

Texas plays a vital national and international role in the development of new technologies and is among the 10 States with the greatest nuclear power generation capacity in the whole country.

Nuclear energy should play a major role in our Nation's all-inclusive energy plan, and that is why our policies should support it. Nuclear creates good jobs, puts billions of dollars into our economy, and is a safe, clean, and reliable energy source we simply can't afford to ignore. Let's move forward. In God we trust.

JOHN BUHRMASTER'S ICBA NOMINATION

(Mr. TONKO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TONKO. Madam Speaker, I rise today to congratulate John Buhrmaster, who is president of 1st National Bank of Scotia in the capital region of New York, upon his nomination as chairman of the Independent Community Bankers of America, here in Washington, D.C.

The Independent Community Bankers of America represents almost 7,000 community banks across our great Nation, financial institutions that provide opportunity for our local small businesses and family farms to expand operations, develop surrounding economies, and hire locally.

John will provide steady leadership for an 11-person executive panel that draws expertise and know-how from across the Nation to support our small banks.

Again, I congratulate Mr. Buhrmaster on his appointment, and I look forward to working with him to boost small financial institutions and their important role in economic expansion on a community level.

CELEBRATING THE CENTENNIAL OF THE COOPERATIVE EXTENSION SERVICE

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Madam Speaker, this year marks the 100th anniversary of the Smith-Lever Act of 1914, which established the Cooperative Extension Service. Extension is a unique educational partnership among Federal, State, and local governments and the Nation's land-grant universities to extend research-based knowledge to the American public and private industry.

Over the years, Extension has connected individuals and families with the resources and expertise of our Nation's land-grant university system. In Pennsylvania, Pennsylvania State University provides this educational network, working to help families make sound economic and nutritional choices, and help businesses increase efficiency and troubleshoot production and industry challenges.

Madam Speaker, today, the Penn State College of Agricultural Sciences is on the Hill with agricultural businesses and industry advocates to share with us the importance of the Cooperative Extension Service.

As we celebrate the 100th anniversary of the Smith-Lever Act, I want to give congratulations and recognition to the outstanding Penn State Extension team, which is led by Interim Dean Barb Christ, and thank them for their important work to improve the lives and economic outcomes of countless families and businesses across the country.

WOMEN'S HISTORY MONTH

(Ms. HAHN asked and was given permission to address the House for 1 minute.)

Ms. HAHN. Madam Speaker, this month we join together as a nation to celebrate Women's History Month. We pay tribute to the generation of women whose courage, perseverance, and leadership have helped build our great Nation—from everyday working mothers to women like civil rights icon Rosa Parks and labor activist Dolores Huerta. Our journey would not be possible without these great women and so many others who proudly took the seat at the table and at the front of the bus to chart the way for our Nation's progress.

But, while progress has been made in gender equality, we still have a lot more work to do when two-thirds of the minimum wage workers are women in this country and nearly one-third of families headed by a single female are living in poverty.

Instead of simply using Women's History Month to highlight the contributions of women leaders, let's take this
