

Mr. CARDIN. Mr. President, I want to thank Senator KAINE and Senator CORKER.

This is the second day that we have been debating the nuclear oversight bill. Members have had a chance to express their concerns. They have had a chance to put forward amendments, to file them at this particular moment. We have been working with several Members to try to see whether we can work out an orderly way for the consideration of those amendments. I want all of the Members to know we are open for business. Senator CORKER has been meeting with Members, and I have been talking to Members. We hope we can find a way to move this bill forward tomorrow for the consideration of amendments.

I would urge Members—we are not encouraging amendments because we think we took up these issues in the committee and we worked out a bipartisan bill to get this done. But please talk to us so we can try to work out in an orderly way the consideration of amendments starting tomorrow and hopefully finish the bill shortly thereafter.

I yield the floor.

#### EXECUTIVE SESSION

#### NOMINATION OF DAVA J. NEWMAN TO BE DEPUTY ADMINISTRATOR OF THE NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to executive session to consider the following nomination, which the clerk will report.

The senior assistant legislative clerk read the nomination of Dava J. Newman, of Massachusetts, to be Deputy Administrator of the National Aeronautics and Space Administration.

The PRESIDING OFFICER. Under the previous order, there will be 30 minutes of debate equally divided in the usual form.

Mr. KAINE. Mr. President, I ask unanimous consent that the time allotted during quorum calls be charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KAINE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. DAINES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DAINES. Mr. President, today the Senate will vote to confirm Dava Newman to be Deputy Administrator of the National Aeronautics and Space Administration. I had the pleasure of meeting with Dr. Newman. She is a talented individual. She is passionate

about aerospace engineering and is generating awareness of science, technology, energy, and math opportunities in Montana students.

Dr. Newman is excited to get to work and continue to make NASA competitive with other countries studying space exploration.

A graduate of C.R. Anderson Middle School and Capital High School in Helena, MT, Dr. Newman is a testament to the quality of Montana's public education. After graduating from high school, Dr. Newman attended the University of Notre Dame before pursuing graduate school at the Massachusetts Institute of Technology. Dr. Newman is now a professor of aeronautics and astronautics.

In 2007, Time magazine highlighted Dr. Newman's work as one of the best inventions of the year. She developed a new space suit, known as the BioSuit, to increase astronauts' agility and movements, allowing astronauts to not only walk but also run and even climb mountains.

Her track record of success and nomination to NASA serve as a way to encourage young Montanans to pursue careers in space and engineering.

Dr. Newman is an incredibly accomplished Montanan who truly exemplifies our State's legacy of public service. Her passion and dedication to NASA is clear. I know she will lead with honor and is prepared for whatever challenges may lie ahead. I urge my colleagues to join me in support of Dr. Newman's nomination.

I yield back the remainder of my time.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. COATS). The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, in a few minutes, we are going to vote on the confirmation of Dava Newman, the nominee for Deputy Administrator of NASA. This little Agency happens to be one that I have some personal fondness for, having participated with NASA many Moons ago—29½ years ago—on the 24th flight of the space shuttle, a crew led by then-Navy Captain Robert Gibson, otherwise known as Hoot Gibson, and his second in command, the pilot of our mission, which was dubbed STS—Space Transportation System—61-C. Subsequently, all of the numbers of the space shuttles reverted to their original numbering, but there was a hiatus in there where several shuttle flights had a very complicated numbering system, and ours was one of them. The pilot of that mission was then-Marine Colonel Charlie Bolden, now-Marine General, Retired, Charlie Bolden, who is the Administrator of NASA and has been for the last 6 years. But Administrator Bolden

does not have a Deputy, and he needs a Deputy Administrator. So this process has been carefully conducted, and they sifted through hundreds of names to come up with just the right person, and that is in the person of Dr. Dava Newman.

She received her bachelor's degree from the University of Notre Dame and two master's degrees and a Ph.D. from the Massachusetts Institute of Technology. She is currently a professor of aeronautics and astronautics and engineering systems at MIT. She is also the director of the Technology and Policy Program there.

Right off the bat, you can see there is no question as to her skills, her smarts, and her credentials, but she is also known for her leadership and technical expertise in aerospace engineering. She authored over 200 research publications, including the textbook "Introduction to Aerospace Engineering and Design."

I think that would be kind of interesting, that as a backup to Administrator Bolden, who is a five-time space shuttle astronaut, we have someone who is an expert in aerospace engineering design, particularly as we are creating the new rockets and the new spacecraft as we speak, for the goal, which is Mars in the decade of the 2030s.

During her career, she served as the principal investigator on three space flight experiments flown on board the space shuttle and on board the previous Mir Space Station. She is tremendously known for her innovative space suit designs that use mechanical counterpressure to make the space suit formfitting, lightweight, and much more flexible than previous space suits.

If you notice, when you see the astronauts outside of the International Space Station—which, by the way, blows the mind, how big it is. It is 110 yards long. From one goalpost to the other goalpost is 120 yards. That is how big the International Space Station is that is 250 miles above the Earth with six humans on board. When you watch those EVAs—extravehicular activities—when they go outside to do the repairs, well, lo and behold, Dr. Newman is the designer of their innovative space suits. She has been recognized. Back in 2007, Time magazine recognized her and her space suit work as one of the best inventions of the year. She is currently leading the development of a suit that may help astronauts overcome back problems in space. The suit is planned to be tested on the International Space Station later this year.

As we go on this dual track in our civilian space program—first the track with commercial rockets that will take our cargo and is taking our cargo to and from the International Space Station and will soon be taking Americans to and from the International Space Station, and the other track of the dual tracks is the development of this huge new rocket, much larger than the

Apollo Saturn V Rocket, which at the time defied the imagination of how large it could be—this is even bigger. This is called the Space Launch System, and atop it will sit the human capsule Orion, which will start the process of developing the systems, the techniques, the lifesaving, life-enhancing, and life-protecting measures and equipment that can take us all the way to Mars.

So we need a professional at NASA to help General Bolden and his very dedicated team. I certainly commend Dr. Dava Newman to the Senate as that person. We should confirm her today, and we can continue this Nation's civilian space program.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. ENZI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ENZI. I yield back the remainder of our time.

The PRESIDING OFFICER. All time has been yielded back.

The question is, Will the Senate advise and consent to the nomination of Dava J. Newman, of Massachusetts, to be Deputy Administrator of the National Aeronautics and Space Administration?

Mr. BARRASSO. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The clerk will call the roll.

The bill clerk called the roll.

Mr. CORNYN. The following Senators are necessarily absent: the Senator from Tennessee (Mr. ALEXANDER), the Senator from Arkansas (Mr. COTTON), the Senator from Texas (Mr. CRUZ), the Senator from Arizona (Mr. FLAKE), the Senator from South Carolina (Mr. GRAHAM), the Senator from Alaska (Ms. MURKOWSKI), the Senator from Florida (Mr. RUBIO), the Senator from Pennsylvania (Mr. TOOMEY), and the Senator from Louisiana (Mr. VITTER).

Further, if present and voting, the Senator from Tennessee (Mr. ALEXANDER) would have voted "yea."

Mr. DURBIN. I announce that the Senator from Minnesota (Ms. KLOBUCHAR), the Senator from Connecticut (Mr. MURPHY), the Senator from New York (Mr. SCHUMER), and the Senator from New Mexico (Mr. UDALL) are necessarily absent.

The PRESIDING OFFICER (Mr. LANKFORD). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 87, nays 0, as follows:

[Rollcall Vote No. 166 Ex.]

YEAS—87

Ayotte	Feinstein	Moran
Baldwin	Fischer	Murray
Barrasso	Franken	Nelson
Bennet	Gardner	Paul
Blumenthal	Gillibrand	Perdue
Blunt	Grassley	Peters
Booker	Hatch	Portman
Boozman	Heinrich	Reed
Boxer	Heitkamp	Reid
Brown	Heller	Risch
Burr	Hirono	Roberts
Cantwell	Hoeven	Rounds
Capito	Inhofe	Sanders
Cardin	Isakson	Sasse
Carper	Johnson	Schatz
Casey	Kaine	Scott
Cassidy	King	Sessions
Coats	Kirk	Shaheen
Cochran	Lankford	Shelby
Collins	Leahy	Stabenow
Coons	Lee	Sullivan
Corker	Manchin	Tester
Cornyn	Markey	Thune
Crapo	McCain	Tillis
Daines	McCaskill	Warner
Donnelly	McConnell	Warren
Durbin	Menendez	Whitehouse
Enzi	Merkley	Wicker
Ernst	Mikulski	Wyden

NOT VOTING—13

Alexander	Klobuchar	Toomey
Cotton	Murkowski	Udall
Cruz	Murphy	Vitter
Flake	Rubio	
Graham	Schumer	

The nomination was confirmed.

(At the request of Mr. McCONNELL, the following statement was ordered to be printed in the RECORD.)

#### VOTE EXPLANATION

• Mr. RUBIO. Mr. President, I am proud that Florida has such a rich history and relationship with NASA. From the earliest launches of rockets that established manned missions, to the Apollo program and the continued support for the International Space Station, my home State of Florida is proud to take ownership in NASA's past and will certainly be a part of its future.

It is imperative that we continue to have a robust space exploration program that promotes America's economic, scientific, and security interests, and that effectively utilizes its resources. NASA must have strong leadership and I believe Dr. Dava Newman will serve the Administration well in her new role as Deputy Administrator of NASA. While other obligations kept me from Washington, I would have voted in favor of her nomination. •

The PRESIDING OFFICER (Mr. LANKFORD). Under the previous order, the motion to reconsider is considered made and laid upon the table, and the President will be immediately notified of the Senate's action.

#### LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will resume legislative session.

The Senator from Georgia.

#### MORNING BUSINESS

Mr. PERDUE. Mr. President, I ask unanimous consent that the Senate be in a period of morning business, with

Senators permitted to speak therein for up to 20 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### CREATING A NEW BEGINNING

Mr. PERDUE. Mr. President, I rise today to address for the first time this august body, the United States Senate—the greatest governing body ever conceived. Out of respect, I have waited until we passed the 100-day mark to deliver this speech, but I rise today because I believe our Republic is in grave danger. We need to create a new beginning by dealing with the very real crisis of leadership we face today. It is why I ran for the Senate in the first place—because we need a new perspective in Washington. Like many Americans, I am outraged by Washington's dysfunction, its fiscal irresponsibility, its lack of leadership in foreign policy, its intrusiveness and overreach, and its negative impact on hard-working Americans.

Before being elected to the Senate, I had never been involved in politics. Simply put, I am a political outsider committed to changing the direction of our country. I grew up in a small military town in Middle Georgia, working on our family's farms. My mom and dad were public school teachers, and I grew up modestly, as did most people there. I worked my way through college and was blessed with a business career that took me from the factory floor to become a Fortune 500 CEO.

My story is not unique. It is the American story. Only in America is this possible, thanks to hard work and self-reliance. It is called the American dream, and it is our job to make sure it lasts. Many people today believe that this dream no longer exists, that we need big government to provide us with more and more financial security. I disagree totally. I believe our best days lie ahead. But we have to act boldly if we are to save this dream and our very way of life.

As an outsider to the political process, I am humbled by the privilege to serve my country as a U.S. Senator. I am sobered by the immense responsibility of representing the people of Georgia, and I am encouraged by the opportunity we have to solve this crisis of leadership and create a new beginning.

As one of the Original Thirteen Colonies, Georgia has long been blessed with outstanding statesmen in the U.S. Senate. The first Senator to serve in this seat in the first U.S. Congress in 1789 was Senator William Few. He also signed the U.S. Constitution. As fate would have it, Sarah Few Collins, a member of the team that helped me become Georgia's 37th U.S. Senator in this seat, is a direct descendant of Senator Few. I think that is pretty special. This desk I use on the Senate floor is also very meaningful to me. It has served such distinguished leaders from Georgia such as Saxby Chambliss, Zell
