

By April 2009, solar and wind companies had proposed 28 projects to be included in the Mojave Trails National Monument, including sites on former Catellus lands intended for permanent conservation. I visited some of those sites at the time, including one particularly beautiful area known as the Broadwell Valley, where thousands of acres of pristine lands were proposed for development. Seeing it first hand, I quickly came to the conclusion that those lands were simply not the right place for renewable energy development.

Since then, 26 of the 28 applications have been withdrawn. Let me explain why this happened. First, the Energy and Interior Departments developed new solar energy zones. These zones allow projects to be developed on lands least likely to harm plant and wildlife species, and allow projects to be completed faster and with fewer conflicts. This is a smart compromise. Second, California has worked closely with Federal agencies to develop the Desert Renewable Energy Conservation Plan. This blueprint will help identify pristine lands that warrant protection and direct energy projects elsewhere. This is a fair balancing of priorities, and I think it provides a clear path forward.

The bill I am introducing also takes additional action to help promote responsible renewable energy development through state land exchanges. There are currently about 370,000 acres of isolated parcels of state lands spread across the California desert. These state-owned lands are largely unusable, due to their location inside Federal national parks, wilderness, monuments, and conservation areas. The bill addresses this problem by requiring the Department of the Interior to develop and implement a plan with the state to exchange these state lands for other BLM or General Services Administration owned property in the next ten years. By swapping state land that is often surrounded by wilderness and national parks for other federal land, these exchanges will provide California with sites for renewable energy production, recreation or other uses.

I strongly urge my colleagues in both the House and the Senate to take a hard look at this legislation. We have made great strides in the past twenty years to strike the right balance between desert conservation, recreational uses, and the development of our natural resources. I believe this legislation continues in that fine tradition. Built on a foundation of consensus and compromise, this legislation fulfills our promise to the next generation that they will have the same opportunities to indulge in the best the California desert has to offer.

I am hopeful this Congress will take this legislation up and move it forward. It's the right thing to do.
