

the Centennial Iron Ranger Challenge 2016, which is taking place in all Arkansas national parks this year. The challenge seeks to encourage good health and fitness by asking people to take up a physical activity of their choice and complete 100 miles of that activity in any of Arkansas' National Parks. If you need a place to begin your centennial year challenge, I highly recommend the Buffalo National River.

In the spirit of the National Park Service's centennial motto, "Find Your Park," I encourage everyone to find the Buffalo National River and enjoy the outdoor adventures and relaxation that awaits in the Natural State.●

#### 50TH ANNIVERSARY OF ASSOCIATED LOGGING CONTRACTORS, INC., OF IDAHO

● Mr. CRAPO. Mr. President, today I wish to recognize the 50th Anniversary of the Associated Logging Contractors of Idaho.

The Associated Logging Contractors, Inc., of Idaho, ALC, have an important voice in advocating for policies that support an essential sector of Idaho—the logging and wood-hauling industry. Throughout the past 50 years since its organization, the association has worked to serve its purpose of "developing programs that are instrumental in helping members to reduce costs of operation and to craft creative solutions to problems confronting the industry." ALC represents nearly 400 independent logging contractor businesses from across Idaho.

From Endangered Species Act reform, to boosting rural economies, to addressing forest health and much more, the ALC has been involved in a wide range of discussions central to Idaho. I value the organization's and its members' input and involvement in shaping solutions to our natural resources challenges. We have much work ahead, but progress is being made on public lands issues to the benefit of Idahoans and our economy. Positive developments in job opportunities and more timber identified for harvest for the betterment of forest health are the result of the State and Federal Government working more closely with private landowners and the logging community to make progress toward the removal of salvage timber from last year's fires.

While challenging, collaboration is working, and ALC members have been instrumental in advancing this effort. The organization has much to be proud of for its efforts in bringing folks together to achieve solutions and working toward their implementation. Collaboration is difficult but indispensable work, as it brings lasting advancements for habitats, recreation, rural economies, and job production. I have greatly valued ALC member's support of local collaborative efforts.

Congratulations to the members of the Associated Logging Contractors of

Idaho on 50 years of accomplishments. Thank you for your hard work building up our great State and Nation. I wish you all the best for continued success.●

PETITIONS AND MEMORIALS

The following petition or memorial was laid before the Senate and was referred or ordered to lie on the table as indicated:

POM-159. A joint resolution adopted by the Legislature of the State of Tennessee urging the United States Congress to mandate, and provide an adequate budget for, the Department of Energy and the Nuclear Regulatory Commission to establish rules for manufacturing, siting, and licensing of small modular reactors and liquid core molten salt reactors to be built and operated in the United States by private industry for the production of energy and medical isotopes; to the Committee on Energy and Natural Resources.

HOUSE JOINT RESOLUTION NO. 507

Whereas, Tennessee has many finite natural energy resources; and

Whereas, world energy demand and usage are expected to increase; and

Whereas, is vital to the country's energy future to provide abundant base-load power and peaking energy-on-demand power affordably; and

Whereas, extending Tennessee's current energy boom will require the creation of a long-term energy plan and the development of clean and affordable energy technologies

such as liquid core molten salt reactors and small modular reactors; and

Whereas, the United States of America possesses a nearly inexhaustible supply of thorium and uranium (more than a billion years' supply of energy) that dramatically exceeds all known potential energy reserves; and

Whereas, the elements thorium and uranium have the practical potential to provide unlimited energy resources for Tennesseans and Americans on demand in the near future and to provide many other tangible benefits; and

Whereas, better utilization of thorium and uranium in specially designed reactors such as molten salt reactors, including liquid fluoride thorium reactors, can provide energy security from other nations by utilizing Tennessee coal and a reactor's nuclear heat energy to produce an abundance of synthetic liquid transportation fuels. These synthetic fuels can be produced for many future generations of Tennesseans in a safe, affordable, and most environmentally friendly manner; and

Whereas, the efficient use of thorium or uranium in a specially designed molten salt reactor allows for greatly increased environmentally friendly energy production that improves the economics of many recycling technologies and raises the standard of living; and

Whereas, it is incumbent upon this body to be forward-thinking in addressing the future energy challenges for the next generation of Tennesseans; and

Whereas, Tennessee is uniquely capable to commercialize small modular reactors, liquid core molten salt reactors, and integral fast reactors with its research and development assets of the Oak Ridge National Laboratory, where such technology was first developed, and other private companies and nonprofit organizations that specialize in nuclear technology development in Tennessee; and

Whereas, the academic, scientific, manufacturing, and business communities in Tennessee have some of the best talent and research and development records in the world. Development of this groundbreaking and economic game-changing technology would serve Tennessee's and America's economics better than current federal efforts to develop this technology in partnership with China; and

Whereas, advanced technology using thorium and uranium can affordably provide medical isotopes of materials for medical uses such as treating cancer and HIV/AIDS, diagnostic procedures, and improved health care; and

Whereas, S.99, the "American Medical Isotopes Production Act of 2011," was signed into law by President Barack Obama on January 2, 2013, and mandates a reliable domestic supply of molybdenum-99 for medical imaging and diagnostics; and

Whereas, molybdenum-99 is used in more than sixteen million medical procedures annually in the United States; and

Whereas, no domestic supply of molybdenum-99 currently exists, and present suppliers use old reactors that result in frequent supply disruptions; and

Whereas, the Nuclear Regulatory Commission, charged with licensing nuclear reactors, is not well-funded for establishing procedures for new, advanced reactor designs based on different architectures from today's fleet of light water reactors; and

Whereas, small modular reactors and liquid core molten salt reactors represent a business opportunity that Tennessee's manufacturing base is well-suited to exploit. This could potentially result in creating forty thousand manufacturing jobs in total within

Tennessee, because these jobs have the ability to complement Tennessee's coal industry, oil industry, and natural gas hydraulic fracturing industry by increasing jobs in those industries; Now, therefore, be it

*Resolved by the House of Representatives of the One Hundred Ninth General Assembly of the State of Tennessee, the Senate Concurring,* That the General Assembly supports the creation of a long-term energy plan that addresses the long-term energy needs of the state; and be it further

*Resolved,* That the General Assembly encourages and supports the research and development of liquid-core-molten-salt-reactor and small-modular-reactor technologies as a long-term solution to Tennessee's energy needs; and be it further

*Resolved,* That the General Assembly urges the Congress of the United States to mandate, and provide an adequate budget for, the Department of Energy and the Nuclear Regulatory Commission to establish rules for manufacturing, siting, and licensing of small modular reactors and liquid core molten salt reactors to be built and operated in the United States by private industry for the production of energy and medical isotopes; and be it further

*Resolved,* That the General Assembly supports investing in, acquiring grants for, implementing programs for, encouraging Tennessee institutions of higher learning to conduct research into, and attracting companies for the development of future technologies that will provide greater energy resources more affordably, abundantly, and in a more environmentally friendly manner than is being done at present; and be it further

*Resolved,* That the Clerk of the House of Representatives transmit certified copies of this resolution to the President of the United States, the Secretary of the United States Department of Energy, the Commissioners of the Nuclear Regulatory Commission, the Speaker and Clerk of the United States House of Representatives, the President Pro Tempore and Secretary of the United States Senate, and each member of the Tennessee Congressional delegation.
